XYZ - Definitions ..... 117

2 Initial Allocation and Renewal Procedures ..... 118

2.1 Initial Allocation of Available Transfer Capability: ..... 119

2.2 Reservation Priority For Existing Firm Service Customers ..... 120

3 Ancillary Services ..... 121

4 Open Access Same-Time Information System (OASIS) ..... 123

5 Local Furnishing Bonds ..... 124

5.1 Transmission Owners That Own Facilities Financed by Local Furnishing or Other Tax-Exempt Bonds or that are Tax Exempt Entities ..... 125

5.2 Alternative Procedures for Requesting Transmission Service: ..... 126

6 Reciprocity ..... 127

7 Billing and Payment ..... 128

7.1 Billing Procedure ..... 129

7.2 Interest on Unpaid Balances ..... 130

7.3 Financial Security Held By SPP ..... 131

7.4 Customer Default ..... 132

8 Accounting for Use of the Tariff ..... 133

8.1 Study Costs and Revenues ..... 134

9 Regulatory Filings ..... 135

10 Force Majeure and Indemnification ..... 136

10.1 Force Majeure ..... 137

10.2 Liability ..... 138

10.3 Indemnification ..... 139

10.4 Further Limitation of Liability ..... 140

10.5 Transmission Provider Recovery ..... 141

10.6 Limitation on Claims: ..... 142

11. Creditworthiness ..... 143

12 Dispute Resolution Procedures ..... 144

12.1 Internal Dispute Resolution Procedures ..... 145

12.2 External Arbitration Procedures ..... 146

12.3 Arbitration Decisions ..... 147

12.4 Costs: ..... 148

12.5 Rights Under The Federal Power Act ..... 149

II. POINT-TO-POINT TRANSMISSION SERVICE ..... 150

13 Nature of Firm Point-To-Point Transmission Service ..... 151

13.1 Term ..... 152

13.2 Reservation Priority ..... 153

13.3 Use of Firm Transmission Service by the Transmission Owners ..... 155

13.4 Service Agreements ..... 156

13.5 Transmission Customer Obligations for Facility Additions or Redispatch Costs ..... 157

13.6 Curtailment of Firm Transmission Service ..... 158

13.7 Classification of Firm Transmission Service ..... 160

13.8 Scheduling of Firm Point-To-Point Transmission Service ..... 163

14 Nature of Non-Firm Point-To-Point Transmission Service ..... 164

14.1 Term ..... 165

14.2 Reservation Priority ..... 166

14.3 Use of Non-Firm Point-To-Point Transmission Service by the Transmission Owner(s) ..... 168

14.5 Classification of Non-Firm Point-To-Point Transmission Service ..... 170

14.6 Scheduling of Non-Firm Point-To-Point Transmission Service ..... 172

14.7 Curtailment or Interruption of Service: ..... 173

15 Service Availability ..... 175

15.1 General Conditions ..... 176

15.2 Determination of Available Transfer Capability ..... 177

15.3 Initiating Service in the Absence of an Executed Service Agreement ..... 178

15.4 Obligation to Provide Transmission Service that Requires Expansion or Modification of the Transmission System ..... 179

15.5 Deferral of Service ..... 180

15.6 Other Transmission Service Schedules ..... 181

15.7 Real Power Losses ..... 182

16 Transmission Customer Responsibilities ..... 183

16.1 Conditions Required of Transmission Customers ..... 184

16.2 Transmission Customer Responsibility for Third-Party Arrangements ..... 185

17 Procedures for Arranging Firm Point-To-Point Transmission Service ..... 186

17.1 Application ..... 187

17.1a Time Requirements ..... 188

17.2 Completed Application ..... 189

17.3 Credit Arrangements ..... 191

17.4 Notice of Deficient Application ..... 192

17.5 Response to a Completed Application ..... 193

17.6 Execution of Service Agreement ..... 194

17.7 Extensions for Commencement of Service ..... 195

17.8 Designated Resources Using Long-Term Firm Point-To-Point Transmission Service ..... 196

17.9 Interconnection of Delivery Points ..... 197

18 Procedures for Arranging Non-Firm Point-To-Point Transmission Service ..... 198

18.1 Application ..... 199

18.2 Completed Application ..... 200

18.3 Timing of Requests and Responses Regarding Reservation of Non-Firm Point-To-Point Transmission Service ..... 201

18.4 Determination of Available Transfer Capability ..... 202

19 Additional Study Procedures For Firm Point-To-Point Transmission Service Requests ..... 203

19.1 Notice of Need for System Impact Study ..... 204

19.2 System Impact Study Agreement and Cost Reimbursement..... 205

19.3 System Impact Study Procedures ..... 206

19.4 Facilities Study Procedures ..... 207

19.5 Facilities Study Modifications ..... 208

19.6 Due Diligence in Completing New Facilities ..... 209

19.7 Partial Interim Service ..... 210

19.8 Expedited Procedures for New Facilities..... 211

19.9 Reporting Failure to Meet Study Deadlines ..... 212

20 Procedures if the Transmission Provider is Unable to Complete New Transmission Facilities for Firm Point-To-Point Transmission Service ..... 214

20.1 Delays in Construction of New Facilities ..... 215

20.2 Alternatives to the Original Facility Additions ..... 216

20.3 Refund Obligation for Unfinished Facility Additions..... 217

21 Provisions Relating to Transmission Construction and Services on the Systems of Other Utilities ..... 218

21.1 Responsibility for Third-Party System Additions ..... 219

21.2 Coordination of Third-Party System Additions ..... 220

22 Changes in Service Specifications ..... 221

22.1 Modifications On a Non-Firm Basis ..... 222

22.2 Additional Charge To Prevent Abuse ..... 224

22.3 Modification On a Firm Basis ..... 225

23 Sale or Assignment of Transmission Service ..... 226

23.1 Procedures for Assignment or Transfer of Service ..... 227

23.2 Limitations on Assignment or Transfer of Service ..... 229

23.3 Information on Assignment or Transfer of Service ..... 230

24 Metering and Power Factor Correction at Receipt and Delivery Points(s) ..... 232

24.1 Transmission Customer Obligations ..... 233

24.2 Transmission Provider Access to Metering Data ..... 234

24.3 Power Factor ..... 235

25 Compensation for Transmission Service ..... 236

26 Stranded Cost Recovery ..... 237

27 Compensation for New Facilities and Redispatch Costs ..... 238

III. NETWORK INTEGRATION TRANSMISSION SERVICE ..... 239

28 Nature of Network Integration Transmission Service ..... 240

28.1 Scope of Service ..... 241

28.2 Transmission Provider and Transmission Owners Responsibilities ..... 242

28.3 Network Integration Transmission Service ..... 243

28.4 Secondary Service ..... 244
28.5 Real Power Losses ..... 245
28.6 Restrictions on Use of Service ..... 246
29 Initiating Service ..... 247
29.1 Condition Precedent for Receiving Service ..... 248
29.2 Application Procedures ..... 249
29.3 Technical Arrangements to be Completed Prior to Commencement of Service ..... 254
29.4 Network Customer Facilities: ..... 255
29.5 Filing of Service Agreement ..... 256
30 Network Resources ..... 257
30.1 Designation of Network Resources ..... 258
30.2 Designation of New Network Resources ..... 259
30.2.1 Transfer of Designation ..... 259
30.3 Termination of Network Resources ..... 261
30.4 Operation of Network Resources ..... 263
30.5 Network Customer Redispatch Obligation ..... 264
30.6 Transmission Arrangements for Network Resources Not Physically Interconnected With The Transmission Provider ..... 265
30.7 Limitation on Designation of Network Resources ..... 266
30.8 Use of Interface Capacity by the Network Customer ..... 267
30.9 Network Customer Owned Transmission Facilities ..... 268
31 Designation of Network Load ..... 269
31.1 Network Load ..... 270
31.2 Delivery Points Connected with the Transmission Provider ..... 271
31.2a New Delivery Point ..... 272

31.3 Taxes on Contributions in Aid of Construction ..... 277

31.4 Delivery Points Not Physically Interconnected with the Transmission Provider ..... 279

31.5 Changes in Service Requests ..... 280

31.6 Annual Load and Resource Information Updates ..... 281

32 Additional Study Procedures For Network Integration Transmission Service Requests ..... 282

32.2 System Impact Study Agreement and Cost Reimbursement ..... 284

32.3 System Impact Study Procedures ..... 285

32.4 Facilities Study Procedures ..... 286

32.5 Penalties for Failure to Meet Study Deadlines ..... 287

32.6 Facilities Study Modifications ..... 288

32.7 Due Diligence in Completing New Facilities: ..... 289

32.8 Partial Interim Service ..... 290

32.9 Expedited Procedures for New Facilities ..... 291

32.10 Delays in Construction of New Facilities ..... 292

32.11 Alternatives to the Original Facility Additions: ..... 293

33 Load Shedding and Curtailments ..... 294

33.1 Procedures: ..... 295

33.2 Transmission Constraints ..... 296

33.3 Cost Responsibility for Relieving Transmission Constraints ..... 297

33.4 Curtailments of Scheduled Deliveries ..... 298

33.5 Allocation of Curtailments ..... 299

33.6 Load Shedding ..... 300

33.7 System Reliability ..... 301

34 Rates and Charges ..... 303

34.1 Monthly Demand Charge ..... 304
34.2 Monthly Demand Charge – Zone 1 ..... 306
34.3 Monthly Demand Charge – Zone 11 ..... 307
34.4 Determination of Network Customer's Monthly Network Load ..... 308
34.5 Determination of Transmission Provider's Monthly Zone Transmission Load ..... 309
34.6 Network Customer Obligations for Redispatch Costs ..... 310
34.7 Stranded Cost Recovery ..... 311
34.8 SPP Costs: ..... 312
35 Operating Arrangements ..... 315
35.1 Operation under the Network Operating Agreement: ..... 316
35.2 Network Operating Agreement ..... 317
36. Scheduling ..... 318
IV. SPECIAL RULES ON USE OF TARIFF ..... 319
37. During Transition Period ..... 320
37.1 Service Not Required for Bundled Customers or Customers Under Retail Access Programs ..... 321
37.2 Availability of Network Integration Transmission Service: ..... 322
37.3 Unbundled Wholesale: ..... 323
37.4 Grandfathered Transactions ..... 324
38 After Transition Period ..... 325
38.1 Applicability to Retail Load Having Choice ..... 326
38.2 Applicability to Retail Load Not Having Choice: ..... 327
38.3 Grandfathered Agreements ..... 328
39. Applicability of Non-Rate Terms and Conditions ..... 329

39.1 Subject to State Laws and Regulations and Public Power Rate Schedules ..... 330

39.2 Bundled Retail and Grandfathered Load: ..... 331

V. RECOVERY OF COSTS FOR BASE PLAN UPGRADES AND APPROVED BALANCED PORTFOLIOS ..... 339

40. Base Plan Zonal Charge and Region-wide Charge ..... 340

41. Applicability to Resident Load ..... 341

42. Applicability to Point-To-Point Transmission Service ..... 343

**43. Market Import Service** Market Import Service is used by a Market Participant to submit offers to sell energy from a generating resource external to the SPP Balancing Authority Area into the Day-Ahead Market or Real-Time Balancing Market for use by the Transmission Provider to serve Network Load from a non-designated generating resource. Market Import Service is available to a Market Participant that is a Transmission Customer (as that term is used in Part I of the Tariff), on an as-available basis, with no charges imposed under Schedules 7, 8, 9, or 11 of this Tariff. Market Import Service shall carry a reservation priority equivalent to non-designated Network Service. A Market Participant must reserve and schedule Market Import Service in accordance with the procedures specified in the SPP Business Practices. Market Import Service is not available for energy withdrawals out of the SPP Balancing Authority Area or to support a Third-Party Sale or purchase. Use of Market Import Service for any other purpose than defined in this Section 43 shall subject the Market Participant to unreserved use penalties pursuant to Section 14.5 of this Tariff. ..... 345

ARKANSAS ELECTRIC COOPERATIVE CORPORATION ..... 410

FORMULA RATE PROTOCOLS ..... 410

SECTION II. ANNUAL UPDATES ..... 410

SECTION III. INFORMATION EXCHANGE PROCEDURES ..... 414

SECTION IV. CHALLENGE PROCEDURES ..... 415

SECTION V. CHANGES TO ANNUAL UPDATES ..... 421

SECTION VI. INFORMATIONAL FILINGS ..... 422

SECTION I. INTRODUCTION ..... 560

1. WFEC's Formula Rate Template and these Protocols together comprise the filed rate for transmission service in Zone 13 of the SPP footprint. The Formula Rate will become effective for recovery of WFEC's ATRR upon the effective date authorized by FERC. ..... 560

2. WFEC will follow the instructions specified in the Formula Rate to calculate its ATRR upon which the rates for NITS and PTP in SPP Zone 13 are based. ..... 560

3. Recovery of costs associated with existing and new facilities will be consistent with Attachment AI and Attachment J, respectively, of the SPP Tariff, as well as with the Formula Rate. ..... 560

4. Defined terms are set forth in section III below. ..... 560

SECTION II. ANNUAL UPDATE ..... 560

1. THE FORMULA RATE WILL BE APPLICABLE TO SERVICE ON AND AFTER JULY 1 OF EACH CALENDAR YEAR THROUGH JUNE 30 OF THE FOLLOWING CALENDAR YEAR, SUBJECT TO REVIEW, CHALLENGE AND REFUNDS OR SURCHARGES WITH INTEREST, TO THE EXTENT PROVIDED HEREIN. THE ATRR WILL BE DETERMINED USING THE MOST RECENT HISTORICAL CALENDAR YEAR FINANCIAL AND OPERATING DATA. ..... 560

2. On or before April 15 of each calendar year, WFEC will (a) calculate the ATRR for the Rate Year starting July 1 of that

calendar year in accordance with the Formula Rate utilizing the most recent historical calendar year financial and operating data; (b) calculate, for illustrative purposes, the corresponding rates for NITS and PTP in SPP's Zone 13 for the Rate Year; and (c) provide its Annual Update to SPP and cause such information to be accessible on SPP's website and OASIS. ..... 560

3. Concurrent with the Annual Update posting, WFEC will provide a notice of such posting to Interested Parties through the email Service List maintained by SPP. ..... 560

4. The Annual Update will: ..... 560

(a) Include a workable populated Formula Rate Template with fully functional spreadsheets showing the calculation of the Annual Update with the most recent historical calendar year financial and operating data along with the underlying work papers in native format with links and formulas intact, including sufficiently detailed work papers and supporting documentation for data; ..... 560

(b) Be based on the independently audited books and records of WFEC for the most recent historical calendar year including its RUS Financial and Operating Report – Electric Power Supply (formerly known as the RUS Form No. 12); ..... 561

(c) Include WFEC's completed RUS Financial and Operating Report – Electric Power Supply for the most recent calendar year; ..... 561

(d) Provide sufficient information to enable Interested Parties to replicate the calculation of the results from the Formula Rate; ..... 561

(e) Identify changes in accounting that affect the inputs to the Formula Rate or the resulting charges billed under the Formula Rate, including: ..... 561

i. Any accounting changes, such as the initial implementation of an accounting standard or policy, the initial implementation of accounting practices for unusual or unconventional items where the RUS has not provided specific direction, or the correction of errors and prior period adjustments that impact the ATRR; ..... 561

ii. Any items included in the Formula Rate at an amount other than a historical cost basis; ..... 561

iii. Individual impact of any changes in section II.4(e)i above on charges billed under the Formula Rate; and ..... 561

iv. Accounting changes related to any reorganization or merger transaction and the effect of those changes on inputs to the formula rate; and ..... 561

(f) Not seek to modify the Formula Rate. ..... 561

5. Any modification to the Formula Rate will require a filing under FPA Section 205 or FPA Section 206. ..... 561

**Section III. Definitions** ..... 561

(a) "Annual Transmission Revenue Requirement" or "ATRR" means the net revenue requirement for the Transmission Services for WFEC under the SPP Tariff (Zone 13) calculated, posted and filed in accordance with the Formula Rate. ..... 561

(b) "Annual Meeting" means the meeting hosted by WFEC for the purpose of exchanging information with Interested Parties regarding the Annual Update. ..... 562

(c) "Annual Update" means WFEC's annual posting of its Formula Rate, in a working Excel™ format, in accordance with these Protocols. ..... 562

(d) "Business Day" means from 9:00 AM to 5:00 PM Central Prevailing Time other than weekends and federal holidays. ..... 562

(e) "Critical Energy Infrastructure Information" or "CEII" has the meaning set forth in 18 C.F.R. § 388.113(c)(1). ..... 562

(f) "Customers" means the customers taking NITS service, service under Grandfathered Agreements, or PTP service. ..... 562

(g) "FERC" or "Commission" means the Federal Energy Regulatory Commission. ..... 562

(h) "Final Posting" means the Annual Update information posted to the SPP website and OASIS with changes agreed to during the Review Period, as set forth in section IV.B.5 below. ..... 562

(i) "Formal Challenge" means a challenge by an Interested Party to an aspect of the Annual Update that is filed with the

Commission, and served on WFEC by electronic service on the date of such filing. ..... 562

(j) "Formula Rate" means these Protocols together with the Formula Rate Template. ..... 562

(k) "Formula Rate Template" means the WFEC transmission formula rate template incorporated in the SPP Tariff and accepted by FERC. ..... 562

(l) "FPA" means Federal Power Act. ..... 562

(m) "Grandfathered Agreement" means those agreements listed in Attachment W of the SPP Tariff to which WFEC is a party. ..... 562

(n) "Informal Challenge" means written notification by an Interested Party to WFEC, during the Review Period, of any specific challenge to the Annual Update. ..... 562

(o) "Information Request" means a written request submitted by an Interested Party to WFEC during the Review Period in accordance with these Protocols. ..... 562

(p) "Informational Filing" means WFEC's annual filing with the Commission of the information specified in these Protocols. ..... 562

(q) "Initial Posting" means the Annual Update data and information which WFEC posts, or causes to be posted, to the SPP website and OASIS in accordance with section II.2 of these Protocols. ..... 562

(r) "Initial Posting Date" means the date on which the Initial Posting is actually made. ..... 563

(s) "Interest" means interest calculated pursuant to 18 C.F.R. § 35.19a(a)(2)(iii), or successor regulation. ..... 563

(t) "Interested Party" includes but is not limited to Customers under the SPP Tariff, state utility regulatory commissions, consumer advocacy agencies, and state attorneys general. ..... 563

(u) "Mistake" means errors or omissions regarding the values inputted into the Formula Rate Template, such as arithmetic or computational errors, but excluding matters involving exercise of judgment or substantive differences of opinion regarding the derivation of an input that is more properly the subject of the Annual Update review process. ..... 563

(v) "NITS" means Network Integration Transmission Service as defined in the SPP Tariff. ..... 563

(w) "OASIS" means SPP's Open Access Same-Time Information System. ..... 563

(x) "Protocols" means these Transmission Formula Rate Protocols, as they may be amended from time to time. ..... 563

(y) "PTP" means Point-to-Point Transmission Service as defined in the SPP Tariff. ..... 563

(z) "Rate Year" means July 1 of a given year through June 30 of the subsequent year. ..... 563

(aa) "Review Period" means, unless otherwise extended in writing by WFEC, the period that begins on the Initial Posting Date and ends 60 days after the Initial Posting Date. ..... 563

(bb) "RUS" means the Rural Utilities Service. ..... 563

(cc) "Service List" means the email service list maintained by SPP for distribution of formula rate notices. ..... 563

(dd) "SPP" means Southwest Power Pool, Inc. ..... 563

(ee) "SPP Tariff" means SPP's Open Access Transmission Tariff. ..... 563

(ff) "Stated Values" means inputs to the Formula Rate that are fixed and not subject to change in an Annual Update, including: (i) the base return on equity, (ii) any approved adders to the base return on equity, (iii) any return on equity incentives for SPP regional transmission projects, (iv) depreciation and amortization rates, and (v) the hypothetical equity ratio floor established in Docket No. ER16-1774-000. ..... 563

(gg) "USoA" means the RUS Uniform System of Accounts. ..... 564

(hh) "WFEC" means Western Farmers Electric Cooperative. ..... 564

SECTION IV. REVIEW OF ANNUAL UPDATE ..... 564

**A.** Annual Meeting ..... 564

**B.** Information Exchange & Final Posting ..... 564

1. During the Review Period, Interested Parties may submit to WFEC reasonable requests for information, data and work papers

supporting the Annual Update that was posted on the Initial Posting Date that commenced such Review Period. Information Requests will be limited to that which is necessary to determine: ..... 564

(a) The extent or effect of an accounting change; ..... 564

(b) Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data; ..... 564

(c) The proper application of the Formula Rate and procedures in these Protocols; ..... 564

(d) The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies; ..... 564

(e) The effect of any change to the underlying USoA or Formula Rate Template; and ..... 564

(f) Any other information that may reasonably have a substantive effect on the calculation of the ATRR pursuant to the Formula Rate. ..... 564

2. WFEC WILL MAKE A GOOD FAITH EFFORT TO RESPOND TO EACH INFORMATION REQUEST WITHIN 7 BUSINESS DAYS OF RECEIPT OF THE INFORMATION REQUEST. ..... 565

3. WFEC WILL POST, OR CAUSE TO BE POSTED, ON A PUBLICLY ACCESSIBLE PORTION OF THE SPP OASIS ALL INFORMATION REQUESTS FROM INTERESTED PARTIES AND WFEC'S RESPONSE(S) TO SUCH INFORMATION REQUESTS, AND A LINK TO THE WEBSITE WILL BE ELECTRONICALLY SERVED BY WFEC ON ALL INTERESTED PARTIES VIA THE EMAIL SERVICE LIST MAINTAINED BY SPP AND PROVIDED TO WFEC. IF RESPONSES TO INFORMATION REQUESTS CONTAIN INFORMATION DEEMED BY WFEC TO BE COMMERCIALLY SENSITIVE OR OTHERWISE CONFIDENTIAL OR CEII, SUCH RESPONSES WILL NOT BE PUBLICLY POSTED BUT WILL BE MADE AVAILABLE BY SEPARATE MEANS TO INTERESTED PARTIES THAT HAVE EXECUTED A NON-DISCLOSURE AGREEMENT WITH WFEC. ..... 565

4. ANY CHANGES OR ADJUSTMENTS TO THE ANNUAL UPDATE RESULTING FROM THE INFORMATION REQUEST PROCEDURES THAT ARE AGREED TO BY WFEC AND RESOLVED PRIOR TO THE END OF THE REVIEW PERIOD WILL BE REPORTED IN A REVISED AND FINAL POSTING OF THE ANNUAL UPDATE ON THE SPP OASIS. ..... 565

5. ANY CHANGES OR ADJUSTMENTS TO THE ANNUAL UPDATE RESULTING FROM THE INFORMATION REQUEST PROCEDURES THAT ARE AGREED TO BY WFEC AFTER THE REVIEW PERIOD WILL BE REPORTED IN THE INFORMATIONAL FILING MADE WITH FERC AND WILL BE REFLECTED IN THE ANNUAL UPDATE FOR THE FOLLOWING RATE YEAR. ..... 565

6. IF THE REVIEW PERIOD ENDS ON A WEEKEND OR HOLIDAY, THE REVIEW PERIOD WILL BE EXTENDED TO THE NEXT BUSINESS DAY..... 565

7. WFEC WILL POST, OR CAUSE TO BE POSTED, THE FINAL POSTING ON A PUBLICLY ACCESSIBLE PORTION OF THE SPP OASIS, AND A LINK TO THE WEBSITE WILL BE ELECTRONICALLY SERVED BY WFEC ON ALL INTERESTED PARTIES VIA THE EMAIL SERVICE LIST MAINTAINED BY SPP. THE FINAL POSTING WILL BE MADE WITHIN 15 DAYS AFTER THE END OF THE REVIEW PERIOD (OR THE FIRST BUSINESS DAY THEREAFTER IF THE 15TH DAY FALLS ON A WEEKEND OR HOLIDAY)..... 565

**C.** Informal Challenge Procedures ..... 565

1. Interested Parties will have until the conclusion of the Review Period to notify WFEC in writing (which may be electronically) of any Informal Challenges. The Informal Challenge must specify the inputs, supporting explanations, allocation calculations, or other information to which the Interested Party objects, and provide an appropriate explanation and documents to support the objection. WFEC will make a good faith effort to respond to any Informal Challenge within 20 calendar days of receipt of such Informal Challenge. WFEC, and if appropriate SPP, will appoint senior representatives to work with the Interested Party to resolve the Informal Challenge. ..... 565

2. WFEC will post, or cause to be posted, on a publicly accessible portion of the SPP OASIS all Informal Challenges from Interested Parties and WFEC's responses to the Informal Challenges, and a link to the website will be electronically served by WFEC on all Interested Parties via the email Service List maintained by SPP. If responses to Informal Challenges contain information deemed by WFEC to be commercially sensitive or otherwise confidential or CEII, such information will not be publicly posted but will be made available by separate means to Interested Parties that have executed a non-disclosure agreement with WFEC. ..... 565

3. Any changes or adjustments to the Annual Update resulting from the Informal Challenge procedures that are agreed to by WFEC and resolved prior to the end of the Review Period will be

reported in the Final Posting on the SPP OASIS. Any changes or adjustments to the Annual Update resulting from the Informal Challenge procedures that are agreed to by WFEC after the Review Period will be reported in the Informational Filing made with FERC and will be reflected in the Annual Update for the following Rate Year. An Interested Party that pursues or fails to pursue an Informal Challenge does not implicitly waive its rights to raise a Formal Challenge with FERC or file a complaint under FPA Section 206. ..... 566

**D.** Formal Challenges ..... 566

1. A Formal Challenge will: ..... 566

(a) Clearly identify the action or inaction which is alleged to violate the Formula Rate; ..... 566

(b) Explain how the action or inaction violates the Formula Rate; ..... 566

(c) Set forth the business, commercial, economic, or other issues presented by the action or inaction as they relate to or affect the Interested Party filing the Formal Challenge, including: ..... 566

i. The extent or effect of an accounting change; ..... 566

ii. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data; ..... 566

iii. The proper application of the Formula Rate Template and the procedures in these Protocols; ..... 566

iv. The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies; ..... 566

v. The effect of any change to the underlying USoA or Formula Rate Template; and ..... 566

vi. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate; ..... 566

(d) Make a good faith effort to quantify the financial impact or burden (if any) created for the Interested Party filing the Formal Challenge as a result of the action or inaction; ..... 566

(e) State whether the issues presented are pending in an existing proceeding in any forum in which the Interested Party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum; ..... 567

(f) State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that belief; ..... 567

(g) Include all information and documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the Interested Party, including, but not limited to, contracts and affidavits; and ..... 567

(h) State whether the Interested Party utilized the Informal Challenge procedures described in these Protocols with regard to any issue. ..... 567

2. Formal Challenges will be filed with FERC, either in the FERC docket assigned to the Informational Filing or via Section 206 of the FPA, and must be served upon WFEC contemporaneously with the filing at FERC. Service can be accomplished by electronic mail in accordance with 18 C.F.R. § 385.2010(f)(3), by facsimile, express delivery or messenger to the individual listed as the contact person in WFEC's Informational Filing. ..... 567

**E.** Modification of Formula Rate or Annual Update ..... 567

1. ANY MODIFICATION TO THE FORMULA RATE WILL REQUIRE A FILING UNDER FPA SECTION 205 OR FPA SECTION 206. THE PROCEDURES FOR THE ANNUAL UPDATE, INFORMAL CHALLENGES, AND FORMAL CHALLENGES SET FORTH IN THESE PROTOCOLS MAY NOT BE USED TO MODIFY THE FORMULA RATE. ..... 567

2. The Stated Values in the Formula Rate may not be modified through the Annual Update, Informal Challenge, or Formal Challenge procedures. Modifications to the Stated Values require a filing with FERC pursuant to the FPA Section 205 or FPA Section 206. ..... 567

3. If WFEC makes a correction to a Mistake during a Rate Year that would affect the ATRR for that Rate Year, such corrections and any resulting refunds or surcharges will be reflected in the Annual Update for the next Rate Year with Interest. ..... 568

4. Any changes to the Formula Rate data inputs or to the Formula Rate that are the result of a Section 205 or Section 206 proceeding will be incorporated into the Formula Rate, and the charges

produced by the Formula Rate, in the Annual Update for the next Rate Year. ..... 568

5. Any refund required as a result of changes to the ATRR as provided in this section IV.E will include Interest calculated in accordance with 18 C.F.R. § 35.19a(a)(2). ..... 568

**F.** FERC Informational Filing ..... 568

1. NO LATER THAN 15 DAYS AFTER THE FINAL POSTING, WFEC WILL SUBMIT TO FERC AN INFORMATIONAL FILING OF ITS ANNUAL UPDATE. ..... 568

2. The Informational Filing must include the information that is reasonably necessary to determine: ..... 568

(a) That input data under the Formula Rate is properly recorded in any underlying work papers; ..... 568

(b) That WFEC has properly applied the Formula Rate Template and the procedures in these Protocols; ..... 568

(c) The accuracy of the data and the consistency with the Formula Rate of the ATRR and rates under review; and ..... 568

(d) The extent of accounting changes that affect Formula Rate inputs. ..... 568

Addendum 6 to Attachment H ..... 2017

**I. ANNUAL TRUE-UP AND ANNUAL PROJECTION** ..... 2054

1. The Formula Rate Template set forth in Attachment H, Addendum 6, of Southwest Power Pool's ("SPP") Open Access Transmission Tariff ("OATT") and these Formula Rate Implementation Protocols comprise the filed rate by SPP for calculating Lincoln Electric System's ("LES") Zonal Annual Transmission Revenue Requirement ("ATRR") for Transmission Service under the SPP OATT. LES shall follow the instructions specified in the Formula Rate Template to calculate annually its ATRR and the rates for its Network Integration Transmission Service and Point-to-Point transmission service, and the ATRR for Base Plan Upgrades and other network upgrades. These protocols shall apply to LES's calculation of its ATRR, including the calculation of the Annual True-Up ("Annual True-Up") and the projected net revenue requirement ("Annual Projection"). ..... 2054

2. The Formula Rate shall be calculated annually with resulting rates applicable to service on and after January 1st through December 31st of each calendar year ("Rate Year"), subject to review, challenge and refunds or surcharges with interest, to the extent provided herein. ..... 2054

3. On or before June 1st, LES shall provide its Annual True-Up to SPP and cause such information to be posted on SPP's website and OASIS. Within ten (10) days of such posting, LES shall request SPP to cause notice on the SPP exploder list titled "Formula Rate Posting Information Notification" or similar exploder list. Interested Parties may contact SPP to subscribe to the SPP exploder list. For

purposes of these protocols, the term Interested Party includes, but is not limited to, customers under the SPP OATT, state utility regulatory commissions, consumer advocacy agencies, and state attorneys general. ..... 2054

4. On or before October 15th, LES shall provide its Annual Projection to SPP and cause such information to be posted on SPP's website and OASIS. Within ten (10) days of such posting, LES shall request SPP to cause notice on the exploder list titled "Formula Rate Posting Information Notification" or similar exploder list. Interested Parties can contact SPP to subscribe to the SPP exploder list. ..... 2054

5. LES shall submit to the Federal Energy Regulatory Commission ("FERC" or the "Commission") an Informational Filing as provided in Section V of these protocols. ..... 2054

6. If the date for posting the Annual True-Up or Annual Projection falls on a weekend or a holiday recognized by FERC, then the posting shall be due on the next business day. The date on which such posting occurs shall be that year's "Publication Date." Any delay in the Publication Date or in the posting of the Annual True-Up or Annual Projection will result in an equivalent extension of time for the submission of Information Requests discussed in Section II of the protocols. ..... 2054

7. A change to the Formula inputs related to revised depreciation rates or the fixed margin requirement may not be made absent an appropriate filing with FERC. ..... 2054

8. The Annual True-Up shall ..... 2055

   (i) Be based on actual data for the prior calendar year, and, to the extent specified in the Formula, upon the audited books and records of LES; ..... 2055

   (ii) Identify all material adjustments made to the data in determining formula inputs. ..... 2055

9. The Annual True-Up and Annual Projection shall: ..... 2055

   (i) Include a workable data-populated Formula Rate Template in native format with all formulas and links intact; ..... 2055

   (ii) Provide the Formula Rate calculations and all inputs thereto, as well as supporting documentation and workpapers for data that are used; ..... 2055

(iii) Provide sufficient information to enable Interested Parties to replicate the calculation;..... 2055

(iv) Identify any changes in the formula references; ..... 2055

(v) With respect to any change in accounting that affects inputs to the Formula Rate or the resulting charges billed under the Formula Rate ("Accounting Change"):..... 2055

(1) Identify any Accounting Changes, including:..... 2055

(2) The implementation of new estimation methods or policies that change prior estimates. Identify items included in the calculation at an amount other than on a historical cost basis (e.g., fair value adjustments); identify any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs.. ..... 2055

(3) Provide, for each item identified pursuant to items I.9.v.1 - I.9.v.2 of these protocols, a narrative explanation of the individual impact of such changes on the calculation. ..... 2055

10. LES shall hold an open meeting among Interested Parties ("Annual True-Up Meeting") after the Annual True-Up Publication Date but no sooner than seven (7) days from the Publication Date and no later than July 15th. No less than twenty (20) days prior to such Annual True-Up Meeting, LES shall provide notice on SPP's website and OASIS of the time, date, and location of the Annual True-Up Meeting and LES shall request SPP to provide notice of such meeting to the SPP email exploder list titled "Formula Rate Posting Information Notification" or similar exploder list. ..... 2055

11. The Annual True-Up Meeting will be hosted by LES in the forum of its choice which may include video conferencing, webinar, internet conferencing, phone conferencing, in person, or other similar options. LES shall provide remote access for Interested Parties to participate in the meeting. The Annual True-Up Meeting shall (i) permit LES to explain and clarify its Annual True-Up; and (ii) provide Interested Parties an opportunity to seek information and clarifications from LES about the Annual True-Up. ..... 2056

12. LES shall hold an open meeting among Interested Parties ("Annual Projected Rate Meeting") after the Annual Projection Publication Date but no sooner than seven (7) days from the Publication Date and no later than November 30th. No less than twenty (20) days

prior to such Annual Projected Rate Meeting, LES shall provide notice on SPP's website and OASIS of the time, date, and location of the Annual Projected Rate Meeting and LES shall request SPP to provide notice of such meeting to the SPP email exploder list titled, "Formula Rate Posting Information Notification" or similar exploder list. ..... 2056

13. The Annual Projected Rate Meeting will be hosted by LES in the forum of its choice which may include video conferencing, webinar, internet conferencing, phone conferencing, in person, or other similar options. LES shall provide remote access for Interested Parties to participate in the meeting. The Annual Projected Rate Meeting shall (i) permit LES to explain and clarify its Annual Projection and (ii) provide Interested Parties an opportunity to seek information and clarifications from LES about the Annual Projection. ... 2056

14. Each year LES shall endeavor to coordinate with other transmission owners in the SPP using formula rates to establish revenue requirements for recovery of the costs of transmission projects that utilize the same regional cost sharing mechanism and transmission owners that own inter-regional projects whose costs are allocated in part to SPP members, and hold a joint informational meeting to enable all Interested Parties to understand how those transmission owners are implementing their formula rates for recovering the costs of such projects. ..... 2056

**II. INFORMATION EXCHANGE PROCEDURES** ..... 2056

1. Interested Parties shall have seventy-five (75) days following the Annual True-Up Meeting to serve reasonable information and document requests related to the Annual True-Up; and sixty (60) days following the Annual Projection Publication Date to serve reasonable information and document requests on LES related to the Annual True-Up and Annual Projection ("Information Exchange Period"). If either of these dates falls on a weekend or a holiday recognized by FERC, the deadline for submitting all information and document requests shall be extended to the next business day. Such information and document requests shall be limited to what is necessary to determine: ..... 2056

   (i) that LES has properly calculated its rate pursuant to the Formula Rate and the procedures in the Protocols; ..... 2057

   (ii) that input data under the Formula Rate are properly recorded in any underlying workpapers; ..... 2057

(iii) the accuracy of data and the consistency with the Formula Rate of the actual Net Revenue Requirement (including any True-Up Adjustment) under review; ..... 2057

(iv) the extent of accounting changes that affect Formula Rate inputs;..... 2057

(v) the prudence of actual costs and expenditures; and..... 2057

(vi) any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the formula. ..... 2057

2. LES shall make a good faith effort to respond to information and document requests within fifteen (15) business days of receipt of such requests. Information requests received after 4 p.m. Central Prevailing Time shall be considered received the next business day. ..... 2057

3. LES will cause to be posted on SPP's website and OASIS all information requests from Interested Parties and LES's response(s) to such requests; except, however, if responses to information and document requests include material deemed by LES to be confidential information, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement to be executed by LES and the requesting party. ..... 2057

4. LES shall not claim that responses to information and document requests provided pursuant to these protocols are subject to any settlement privilege, in any subsequent FERC proceeding addressing the results of the LES's Annual True-Up's or Annual Projection's incorporation into the SPP Tariff. ..... 2057

**III. CHALLENGE PROCEDURES**..... 2057

1. Interested Parties shall have until January 31st following the Publication Date to review the inputs, supporting explanations, allocations and calculations and to notify LES in writing, which may be made electronically, of any specific Informal Challenges to the Annual True-Up or Annual Projection. The period of time from the Publication Date until January 31st shall be referred to as the Review Period. If January 31st falls on a weekend or a holiday recognized by FERC, the deadline for submitting all Informal Challenges shall be extended to the next business day. Failure to pursue an issue through an Informal Challenge shall not bar pursuit of that issue as part of a Formal Challenge with respect to the same

Annual True-Up or Annual Projection as long as the Interested Party has included at least one issue as part of an Informal Challenge with respect to that Annual True-Up or Annual Projection. If the Interested Party has not included any issues as part of an Informal Challenge for an Annual True-Up or Annual Projection, the Interested Party is barred from pursuing a Formal Challenge with respect to any issue for that Annual True-Up or Annual Projection but is not barred from pursuing an issue or from lodging a Formal Challenge as to such issue as it relates to a subsequent Annual True-Up or Annual Projection. ..... 2057

2. A party submitting an Informal Challenge to LES must specify the inputs, supporting explanations, allocations, calculations, or other information to which it objects, and provide an appropriate explanation and documents to support its challenge. LES shall make a good faith effort to respond to any Informal Challenge within twenty (20) business days of notification of such challenge. If LES disagrees with such challenge, LES will provide the Interested Party(ies) with an explanation supporting the inputs, supporting explanations, allocations, calculations, or other information. No Informal Challenge may be submitted after January 31st, and LES must respond to all Informal Challenges by no later than February 28th. ..... 2058

3. Informal Challenges shall be subject to the resolution procedures and limitations in this Section III. ..... 2058

4. Informal Challenges shall be limited to all issues that may be necessary to determine: (1) that LES has properly calculated its rate pursuant to the Formula Rate and the procedures in the Protocols; (2) that input data under the Formula Rate are properly recorded in any underlying workpapers; (3) the accuracy of data and the consistency with the Formula Rate of the actual Net Revenue Requirement (including any True-Up Adjustment) under review; (4) the extent of accounting changes that affect Formula Rate inputs; (5) the prudence of actual costs and expenditures; and (6) any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the formula. ..... 2058

5. LES will cause to be posted on SPP's website and OASIS all Informal Challenges from Interested Parties and LES's response(s) to such Informal Challenges; except, however, if Informal Challenges or responses to Informal Challenges include material deemed by LES to be confidential information, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement to be executed by LES and the requesting party. ..... 2058

6. Any changes or adjustments to the Annual True-Up or Annual Projection resulting from the Information Exchange and Informal Challenge processes that are agreed to by LES will be reported in the Informational Filing required pursuant to Section V of these protocols. Any such changes or adjustments agreed to by LES on or before November 30th will be reflected in the Annual Projection for the upcoming Rate Year. Any changes or adjustments agreed to by LES after November 30th will be reflected in the following year's Annual True-Up, as discussed in Section IV of these protocols..... 2059

7. An Interested Party shall have until March 31st (unless such date is extended with the written consent of LES to continue efforts to resolve the Informal Challenge) to make a Formal Challenge to the Annual True-up or Annual Projection posted in the previous calendar year. ..... 2059

8. Formal Challenges shall be filed against SPP pursuant to these protocols and shall satisfy all of the following requirements. ..... 2059

   (i) A Formal Challenge shall:..... 2059

      (1) Clearly identify the action or inaction which is alleged to violate the filed rate formula or protocols;..... 2059

      (2) Explain how the action or inaction violates the filed rate formula or protocols; ..... 2059

      (3) Set forth the business, commercial, economic or other issues presented by the action or inaction as such relate to or affect the party filing the Formal Challenge, including: ..... 2059

      (4) Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;..... 2060

      (5) State whether the issues presented are pending in an existing Commission proceeding or a proceeding in any other forum in which the filing party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum; ..... 2060

      (6) State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that relief; ..... 2060

(7) Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the filing party, including, but not limited to, contracts and affidavits; and ..... 2060

(8) State whether the filing party utilized the Informal Challenge procedures described in these protocols with regard to any issue. ..... 2060

(ii) Service. Any person filing a Formal Challenge must serve a copy of the Formal Challenge on LES. Service to LES must be simultaneous with filing at the Commission. Simultaneous service can be accomplished by electronic mail in accordance with § 385.2010(f)(3), facsimile, express delivery, or messenger. The party filing the Formal Challenge shall serve the individual listed as the contact person on LES's Informational Filing required under Section V of these protocols. ..... 2060

9. A Formal Challenge shall be filed in the same docket as LES's Informational Filing discussed in Section V of these protocols. LES shall respond to the Formal Challenge by the deadline established by FERC. A party may not pursue a Formal Challenge if that party did not submit any Informal Challenge during the applicable Review Period. ..... 2060

10. In any proceeding initiated by FERC concerning the Annual True-Up or Annual Projection or in response to a Formal Challenge, LES shall bear the burden of proving that it has correctly applied the terms of the Formula Rate consistent with these protocols, and that it followed the applicable requirements and procedures in these protocols. Nothing herein is intended to alter the burdens applied by FERC with respect to prudence challenges. ..... 2060

11. The implementation of any changes or adjustments resulting from any Formal Challenge made with FERC shall be subject to SPP Tariff Section 39.1. ..... 2060

12. Except as specifically provided herein, nothing herein shall be deemed to limit in any way the right of LES to request SPP to file unilaterally, pursuant to section 205 of the Federal Power Act and the regulations thereunder, to change the Formula Rate o any of its inputs, or to replace the Formula Rate with a stated rate, or the right of any other party to request such changes pursuant to section 206 of the Federal Power Act and the regulations thereunder. ..... 2060

13. No party shall seek to modify the Formula Rate under the Challenge Procedures set forth in these protocols and the Annual True-Up and Annual Projection shall not be subject to challenge by anyone for the purpose of modifying the Formula Rate. Any modifications to the Formula Rate will require, as applicable, a Federal Power Act section 205 or section 206 filing before FERC. ..... 2061

**IV. CHANGES TO ANNUAL TRUE-UP OR ANNUAL PROJECTION** ..... 2061

1. Except as provided in Section III.6 of these protocols, any changes to the data inputs, or as the result of any FERC proceeding to consider the Annual True-Up or Annual Projection, or as a result of the procedures set forth herein, shall be incorporated into the Formula Rate and the charges produced by the Formula Rate in the Annual Projection for the next Rate Year. This reconciliation mechanism shall apply in lieu of mid-Rate Year adjustments. Interest on any refund or surcharge shall be calculated in accordance with the procedures outlined in Section VI of these protocols. ..... 2061

2. In the event that LES identifies an error in the Annual True-Up, or is required by applicable law to correct an error, LES shall correct such error in good faith and without regard to whether the correction increases or decreases LES's revenue requirements. Nothing in these protocols should or may be construed as preventing Interested Parties or FERC from protesting such correction as inappropriate. ..... 2061

**V. INFORMATIONAL FILINGS** ..... 2061

1. By March 15th of each year, LES shall submit to FERC an informational filing ("Informational Filing") of its Annual Projection for the Rate Year, including its Annual True-Up. The Informational Filing will be for administrative and informational purposes only, and will not submit LES to the jurisdiction of the Commission under the Federal Power Act. This Informational Filing must include the information that is reasonably necessary to determine: (1) that input data under the Formula Rate are properly recorded in any underlying workpapers; (2) that LES has properly applied the Formula Rate and these procedures; (3) the accuracy of data and the consistency with the Formula Rate of the ATRR and rates under review; and (4) the extent of accounting changes that affect Formula Rate inputs. The Informational Filing must also describe any corrections or adjustments made during the Review Period, and must describe all aspects of the Formula Rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures. LES shall request SPP to provide notice of

the Informational Filing via an email exploder list and by posting the docket number assigned to LES's Informational Filing on SPP's website and OASIS. ..... 2061

2. Any challenges to the implementation of the Attachment H-LES Formula Rate must be made through the Challenge Procedures described in Section III of these protocols, and not in response to the Informational Filing. ..... 2061

**VI. CALCULATION OF TRUE-UP ADJUSTMENT FOR THE ANNUAL TRUE-UP** ..... 2062

1. The Projected Revenue Requirement for the previous year, not including any prior year True-Up Adjustment, shall be compared to the Actual Revenue Requirement calculated in accordance with LES's Formula Rate for the previous year using data for that same year, and, to the extent specified in the Formula, upon the audited books and records of LES, to determine any over or under recovery plus interest ("True-Up Adjustment"). The True-Up Adjustment and related calculations shall be posted as part of LES's Annual True-Up to SPP's website and OASIS no later than June 1st (or if that day falls on a weekend or a holiday recognized by FERC, then the posting shall be due on the next business day). ..... 2062

   (i) Interest on any over recovery of the net revenue requirement or any over recovery due to volume changes shall be determined based on the Commission's regulation at 18 C.F.R. § 35.19a. Interest on any under recovery of the net revenue requirement or any under recovery due to volume changes shall be calculated on the basis of LES's actual short-term debt costs capped at the applicable FERC refund interest rate as provided in 18 C.F.R. § 35.19a. In either case, the interest payable shall be calculated using an average interest rate for the twenty-four (24) months during which the over or under recovery in the revenue requirement or volume changes exists. The interest rate to be applied to the over or under recovery amounts will be determined using the average rate for the nineteen (19) months preceding August of the current year. The interest amount will be included in the projected costs made available October 15. ..... 2062

2. The Net ATRR for transmission services for the following year shall be the sum of the projected revenue requirement for the following year minus Total Transmission Revenue Credits, plus or minus the True-up Adjustment from the previous year, if any, including interest. ..... 2062

ADDENDUM 2 TO ATTACHMENT O ..... 548

**ADDENDUM 3 TO ATTACHMENT O** ..... 550

Any proposed Interregional Projects shall be reviewed by the Transmission Provider in accordance with Section IV.7 of Attachment O. The Transmission Provider will construct its part of any approved Interregional Projects in accordance with Section VI of Attachment O. Any cost obligation of the SPP Region related to

Interregional Projects shall be allocated in accordance with Section VI of Attachment J. ..... 551

Date: 172

1. AMOUNT OF BOND. SURETY UNCONDITIONALLY AND IRREVOCABLY AGREES TO PAY SPP AMOUNTS NOT TO EXCEED AN AGGREGATE OF **[AMOUNT]**, IN ACCORDANCE WITH THE TERMS OF THIS SURETY BOND. ..... 1

2. PAYMENT UPON DEMAND. SURETY SHALL PAY SUCH AMOUNT AS SPECIFIED BY SPP UPON RECEIPT OF A DEMAND FOR PAYMENT NOTICE (“DEMAND FOR PAYMENT NOTICE”). SUCH DEMAND FOR PAYMENT NOTICE SHALL BE: (I) SIGNED BY AN OFFICER OR AUTHORIZED AGENT OF SPP, (II) DATED THE DATE OF PRESENTATION, AND (III) BE IN THE FORM AS SET FORTH IN EXHIBIT A, EXHIBIT B, OR EXHIBIT C, AS APPLICABLE. ..... 1

3. VALIDATION. SPP MAY DEMAND PAYMENT PURSUANT TO THIS SURETY BOND WITHOUT PRIOR DEMONSTRATION OF THE VALIDITY OF THE DEMAND. ..... 1

4. MULTIPLE DRAWS. SPP MAY DEMAND MULTIPLE PAYMENTS PURSUANT TO THIS SURETY BOND; *PROVIDED, HOWEVER*, THAT THE TOTAL AMOUNT OF SURETY’S OBLIGATION HEREUNDER SHALL NOT EXCEED AN AGGREGATE OF **[AMOUNT]**. ..... 1

5. TIME AND FORM OF PAYMENT. SURETY SHALL PAY AMOUNTS OWED PURSUANT TO THIS SURETY BOND IN FULL NOT LATER THAN THE FIRST BUSINESS DAY FOLLOWING RECEIPT OF SPP’S WRITTEN DEMAND FOR PAYMENT TO THE ACCOUNT DESIGNATED THEREIN. ..... 1

6. OBLIGATIONS UNCONDITIONAL. THIS SURETY BOND IS NOT CONDITIONED UPON SPP FIRST ATTEMPTING TO COLLECT PAYMENT, RESORTING TO ANY OTHER MEANS OF SECURITY OR COLLATERAL, OR PURSUING ANY OTHER REMEDIES IT MAY HAVE. THE OBLIGATIONS OF SURETY HEREUNDER ARE INDEPENDENT OF THE OBLIGATIONS OF PRINCIPAL, AND SPP MAY BRING AN ACTION AGAINST SURETY WITHOUT BRINGING AN ACTION AGAINST PRINCIPAL. SPP MAY FROM TIME TO TIME, WITHOUT

NOTICE OR DEMAND, AND WITHOUT AFFECTING SURETY'S LIABILITY HEREUNDER, TAKE AND HOLD OTHER SECURITY FOR PRINCIPAL'S OBLIGATIONS TO SPP AND EXCHANGE, WAIVE, RELEASE, OR APPLY SUCH SECURITY AS SPP DEEMS APPROPRIATE IN ITS SOLE DISCRETION. SURETY'S LIABILITY UNDER THIS SURETY BOND IS NOT CONDITIONED UPON THE VALIDITY OR ENFORCEABILITY OF PRINCIPAL'S OBLIGATIONS TO SPP. ..... 1

7. TERM OF SURETY BOND. THE TERM OF THIS SURETY BOND SHALL BEGIN ON THE DATE OF ITS ISSUANCE, AS SET FORTH ABOVE, AND SHALL CONTINUE IN FULL FORCE AND EFFECT UNTIL ALL AMOUNTS OWED BY PRINCIPAL PURSUANT TO THE AGREEMENTS, AS THAT TERM IS DEFINED IN THE OATT, ARE PAID IN FULL, INCLUDING ANY AMOUNTS OWED AS A RESULT OF TRUE-UPS OR OTHER CORRECTIONS TO PREVIOUS SETTLEMENTS; *PROVIDED, HOWEVER,* THAT SURETY MAY TERMINATE THIS SURETY BOND AS PROVIDED IN PARAGRAPH 8, BELOW..... 2

8. TERMINATION. SURETY MAY TERMINATE THIS SURETY BOND UPON NINETY (90) DAYS WRITTEN NOTICE TO SPP; *PROVIDED, HOWEVER,* THAT: (I) SURETY'S LIABILITY HEREUNDER SHALL SURVIVE SUCH TERMINATION AND REMAIN IN FULL FORCE AND EFFECT AS TO OBLIGATIONS INCURRED BY PRINCIPAL DURING THE TERM OF THIS SURETY BOND; AND (II) IN THE EVENT THAT PRINCIPAL FAILS TO PROVIDE AN ACCEPTABLE FORM OF REPLACEMENT FINANCIAL SECURITY TO SPP AT LEAST EIGHTY SEVEN (87) DAYS PRIOR TO THE TERMINATION OF THIS SURETY BOND, SURETY SHALL, UPON DEMAND, WITHOUT ANY NOTICE OTHER THAN SUCH DEMAND, AND WITHOUT ANY FURTHER ACTION BY SPP DELIVER CASH DEPOSIT TO SPP NOT LATER THAN THE NEXT BUSINESS DAY IN THE AMOUNT OF THE FULL REMAINING VALUE OF THIS SURETY BOND AS SECURITY FOR PRINCIPAL'S OBLIGATIONS TO SPP. A CASH DEPOSIT PROVIDED TO SPP BY SURETY AND NOT APPLIED BY SPP TO SATISFY UNPAID OBLIGATIONS OF PRINCIPAL SHALL BE RETURNED TO SURETY AT SUCH TIME AS: (I) PRINCIPAL PROVIDES ADEQUATE REPLACEMENT FINANCIAL SECURITY TO SPP OR (II) ALL AMOUNTS OWED BY PRINCIPAL TO SPP ARE PAID IN FULL, INCLUDING AMOUNTS OWED AS A RESULT OF TRUE-UPS OR OTHER CORRECTIONS TO PREVIOUS SETTLEMENTS. ..... 2

9. PRINCIPAL PAYS BOND COSTS. PRINCIPAL SHALL PAY ALL COMMISSIONS AND CHARGES FOR THIS SURETY BOND. PRINCIPAL'S FAILURE TO PAY ANY SUCH CHARGES SHALL NOT BE GROUNDS FOR TERMINATION OF THIS SURETY BOND, EXCEPT AS PROVIDED IN PARAGRAPH 8, ABOVE. ..... 2

10. EXPENSES. SURETY SHALL PAY ALL REASONABLE COSTS INCURRED BY SPP IN THE ENFORCEMENT OF THIS SURETY BOND, INCLUDING ATTORNEY FEES AND EXPENSES. SURETY'S OBLIGATION TO PAY SUCH COSTS SHALL BE IN ADDITION TO OTHER AMOUNTS OWED PURSUANT TO THIS SURETY BOND AND SHALL NOT BE LIMITED BY THE MAXIMUM STATED AMOUNT OF THIS SURETY BOND. ..... 2

11. COMMUNICATIONS. DEMANDS, NOTICES, AND OTHER COMMUNICATIONS SHALL BE DEEMED EFFECTIVE WHEN RECEIVED, SHALL BE IN WRITING, AND SHALL BE DELIVERED BY COURIER WITH RECEIPT OF DELIVERY OR BY REGISTERED MAIL, CERTIFIED MAIL, OR FACSIMILE TO THE FOLLOWING ADDRESSES:..... 2

Surety, SPP, or Principal may change the address provided for receipt of communications pursuant to this Surety Bond by providing written notice to the other parties. ..... 3

12. REPRESENTATIONS AND WARRANTIES. SURETY REPRESENTS AND WARRANTS TO SPP THAT:..... 3

13. ASSIGNMENT. SPP MAY ASSIGN ITS RIGHTS UNDER THIS SURETY BOND WITHOUT IN ANY WAY DIMINISHING SURETY'S OBLIGATIONS HEREUNDER. SURETY SHALL NOT BE PERMITTED TO ASSIGN OR TRANSFER ITS RIGHTS UNDER THIS SURETY BOND WITHOUT PRIOR WRITTEN CONSENT OF SPP. ..... 3

14. AMENDMENT AND WAIVER. THE TERMS AND PROVISIONS OF THIS SURETY BOND MAY NOT BE AMENDED OR WAIVED EXCEPT IN A WRITING SIGNED BY SPP AND SURETY. ELECTION NOT TO EXERCISE, FAILURE TO EXERCISE, OR DELAY IN EXERCISING ANY RIGHTS UNDER THIS SURETY BOND SHALL IN NO WAY OPERATE AS A WAIVER OF ANY RIGHTS OF SPP UNDER THIS SURETY BOND.... 3

15. ENTIRE AGREEMENT. THIS SURETY BOND EMBODIES THE ENTIRE AGREEMENT BETWEEN SURETY AND SPP WITH RESPECT TO THE MATTERS SET FORTH HEREIN AND SUPERSEDES ALL PRIOR SUCH AGREEMENTS. ..... 3

16. SEVERABILITY. SHOULD ANY PROVISION OF THIS SURETY BOND BE DETERMINED BY A COURT OF COMPETENT JURISDICTION TO BE UNENFORCEABLE, ALL OF THE OTHER PROVISIONS SHALL REMAIN EFFECTIVE..... 3

17. CHOICE OF LAW; JURISDICTION; VENUE; AND SERVICE OF PROCESS. THIS SURETY BOND SHALL BE GOVERNED BY THE LAWS OF THE STATE OF ARKANSAS WITHOUT REGARD TO

CONFLICT OF LAWS PRINCIPLES. SURETY IRREVOCABLY SUBMITS TO THE JURISDICTION OF ANY ARKANSAS COURT OR ANY UNITED STATES COURT SITTING IN ARKANSAS OVER ANY ACTION OR PROCEEDING ARISING OUT OF OR RELATING TO THIS SURETY BOND AND IRREVOCABLY AGREES THAT ALL CLAIMS IN SUCH ACTION OR PROCEEDING MAY BE HEARD AND DETERMINED BY SUCH COURT. SURETY AGREES THAT A FINAL JUDGMENT IN ANY SUCH ACTION OR PROCEEDING SHALL BE CONCLUSIVE AND MAY BE ENFORCED IN OTHER JURISDICTIONS BY SUIT ON THE JUDGMENT OR IN ANY OTHER MANNER PROVIDED BY LAW. SURETY WAIVES ANY OBJECTION TO VENUE ON THE BASIS OF FORUM NON CONVENIENS. SURETY IRREVOCABLY CONSENTS TO THE SERVICE OF PROCESS IN ANY ACTION OR PROCEEDING BY THE MAILING OF COPIES OF SUCH PROCESS TO SURETY AT ITS ADDRESS SET FORTH HEREIN. NOTHING HEREIN SHALL AFFECT THE RIGHT OF SPP TO BRING ANY ACTION OR PROCEEDING AGAINST SURETY OR ITS PROPERTY IN THE COURTS OF ANY OTHER JURISDICTIONS. 3

18. WAIVER OF JURY TRIAL. SURETY IRREVOCABLY, VOLUNTARILY, AND WITH ADVICE OF COUNSEL WAIVES ANY RIGHTS IT MAY HAVE TO A TRIAL BY JURY IN ANY ACTION ARISING IN CONNECTION WITH THIS SURETY BOND. 4

COMPENSATION FOR UPGRADE SPONSORS ..... 75

Sections I, II and III of this Attachment Z2 shall be applicable only to those Network Upgrades with an agreement authorizing construction of the upgrade that is executed on or before July 1, 2020. If such authorizing agreement is filed with the Commission unexecuted, then the applicable date is the effective date granted by the Commission in an order accepting the agreement. An Upgrade Sponsor for such a Network Upgrade is eligible to receive revenues from revenue crediting to the extent provided in Sections I, II, and III of this Attachment Z2 unless the Upgrade Sponsor selects and qualifies for candidate ILTCRs in accordance with Section IV of this Attachment Z2. For all Network Upgrades with an agreement authorizing construction of the upgrade with an execution date, or effective date granted by the Commission if filed unexecuted, after July 1, 2020 and for which an Upgrade Sponsor incurs Directly Assigned Upgrade Costs, any compensation of the Upgrade Sponsor shall be available only through candidate ILTCRs in accordance with Section IV of this Attachment Z2 and such upgrades shall not be Creditable Upgrades. ..... 76

8.3.4 Market Clearing Price Calculations ..... 755

**8.3.4.3 Operating Reserve Scarcity Factors** ..... 767

**8.3.4.4 Regulation Base Demand Price** ..... 770

On a monthly basis, the Transmission Provider calculates and posts a Regulation Base Demand Price as a function of the cost to commit a Resource to provide ramp or capacity to the market in accordance with the following rules: ..... 770

(1) Regulation Base Demand Price is the average cost per MW for all Resources to recover their qualified cold start-up, no-load, and Energy costs at their Minimum Normal Operating Limit or Minimum Discharge Limit, as applicable. ..... 770

(2) For each interval and Resource, a cold start-up time must be less than or equal to 10 minutes and the Real-Time commitment status must be Market, Reliability, or Self for the Resource costs to qualify for inclusion in the calculation. ..... 770

(3) By interval and Resource, the average cost per MW is based on the costs (cold start-up, no-load, and Energy) that would be incurred at the minimum load and minimum run time from three months of historical offer data. ..... 770

8.4 Price Corrections ..... 771

8.5 Day-Ahead Market Settlement ..... 774

8.5.2 Day-Ahead Regulation Service Amount ..... 778

8.5.3 Day-Ahead Spinning Reserve Amount ..... 779

8.5.4 Day-Ahead Supplemental Reserve Amount ..... 780

8.5.5 Day-Ahead Regulation-Up Service Distribution Amount ..... 781

8.5.6 Day-Ahead Regulation-Down Service Distribution Amount ..... 782

8.5.7 Day-Ahead Spinning Reserve Distribution Amount ..... 783

8.5.8 Day-Ahead Supplemental Reserve Distribution Amount ..... 784

8.5.9 Day-Ahead Make Whole Payment Amount ..... 785

8.5.10 Day-Ahead Make Whole Payment Distribution Amount ..... 795

8.5.11 Transmission Congestion Rights Funding Amount ..... 796

8.5.12 Transmission Congestion Rights Daily Uplift Amount ..... 797

8.5.13 Transmission Congestion Rights Monthly Payback Amount ..... 798

8.5.14 Transmission Congestion Rights Annual Payback Amount ..... 799

8.5.15 Transmission Congestion Rights Annual Closeout Amount ..... 800

8.5.16 Day-Ahead Over-Collected Losses Distribution Amount ..... 801

8.5.17 Reserved for Future Use ..... 802

8.5.24 Day-Ahead Demand Reduction Amount ..... 809

8.5.25 Day-Ahead Demand Reduction Distribution Amount ..... 810

(2) An Asset Owner's Day-Ahead Demand Reduction Distribution Quantity at a Settlement Location for an hour is equal to that Asset Owner's net cleared Energy withdrawals at that Settlement Location for that hour. An Asset Owner's net cleared Energy withdrawal at a Settlement Location is calculated as the sum of the positive MWh value for the Asset Owner's cleared Demand Bids, cleared Self-Charging MSR Offers, the positive MWh value for the Asset Owner's net cleared Export and Import Interchange Transactions, the positive MWh value for the Asset Owner's net cleared Virtual Energy Bids and Offers at that Settlement Location. ..... 810

**8.5.26 DAY-AHEAD RAMP CAPABILITY AMOUNT** ..... 811

**8.5.27 DAY-AHEAD RAMP CAPABILITY UP DISTRIBUTION AMOUNT** ..... 812

**8.5.28 DAY-AHEAD RAMP CAPABILITY DOWN DISTRIBUTION AMOUNT** ..... 813

8.6 Real-Time Balancing Market Settlement ..... 814

8.6.1 Real-Time Energy Amount ..... 815

8.6.2 Real-Time Regulation Service Amount ..... 821

8.6.3 Real-Time Spinning Reserve Amount ..... 825

8.6.4 Real-Time Supplemental Reserve Amount..... 826

**8.6.5 Reliability Unit Commitment Make Whole Payment Amount**..... 827

8.6.6 Real-Time Out-of-Merit Amount..... 840

8.6.7 Reliability Unit Commitment Make Whole Payment Distribution Amount..... 842

8.6.8 Real-Time Regulation Service Distribution Amount ..... 847

8.6.9 Real-Time Spinning Reserve Distribution Amount ..... 848

8.6.10 Real-Time Supplemental Reserve Distribution Amount..... 849

8.6.11 Real-Time Regulation Service Non-Performance Amount..... 850

8.6.12 Real-Time Regulation Service Non-Performance Distribution Amount..... 852

8.6.13 Real-Time Contingency Reserve Deployment Failure Amount..... 853

8.6.14 Real-Time Contingency Reserve Deployment Failure Distribution Amount..... 854

8.6.15 Real-Time Regulation Service Deployment Adjustment Amount..... 855

8.6.16 Over-Collected Losses Distribution Amount..... 857

8.6.17 Real-Time Reserve Sharing Group Amount..... 861

8.6.18 Real-Time Reserve Sharing Group Distribution Amount..... 862

8.6.19 Unused Regulation-Up Mileage Make Whole Payment..... 863

8.6.20 Unused Regulation-Down Mileage Make Whole Payment..... 867

(iv) Day-Ahead Unused Regulation-Down Mileage is calculated under Section 8.6.20(1)(b)(iii) of this Attachment AE; ..... 870

8.6.21 Real-Time Demand Reduction Amount ..... 871

8.6.22 Real-Time Demand Reduction Distribution Amount ..... 873

8.6.23 Real-Time Pseudo-Tie Congestion Amount ..... 874

8.6.24 Real-Time Pseudo-Tie Losses Amount ..... 875

**8.6.25 REAL-TIME RAMP CAPABILITY AMOUNT** ..... 876

**8.6.26 REAL-TIME RAMP CAPABILITY DISTRIBUTION AMOUNT** ..... 878

**8.6.27 REAL-TIME RAMP CAPABILITY NON-PERFORMANCE AMOUNT** ..... 879

**8.6.28 REAL-TIME RAMP CAPABILITY NON-PERFORMANCE DISTRIBUTION AMOUNT** ..... 881

8.7 Auction Revenue Rights and Transmission Congestion Rights Auction Settlement ..... 882

8.7.1 Transmission Congestion Rights Auction Transaction Amount ..... 883

8.7.2 Auction Revenue Rights Funding Amount ..... 884

8.7.3 Auction Revenue Rights Uplift Amount ..... 885

8.7.4 Auction Revenue Rights Monthly Payback Amount ..... 886

8.7.5 Auction Revenue Rights Annual Payback Amount ..... 887

8.7.6 Auction Revenue Rights Annual Closeout Amount ..... 888

8.8 Revenue Neutrality Uplift Distribution Amount ..... 889

8.9 GFA Carve Out or FSE Uplift ..... 891

**8.10 MARKET ADMINISTRATION SERVICES AMOUNT** ..... 892

9.0 Release of Offer Curve Data ..... 893

29.1 Condition Precedent for Receiving Service
29.2 Application Procedures
29.3 Technical Arrangements to be Completed Prior to Commencement of Service
29.4 Network Customer Facilities
29.5 Filing of Service Agreement
30 Network Resources
30.1 Designation of Network Resources
30.2 Designation of New Network Resources
30.3 Termination of Network Resources
30.4 Operation of Network Resources
30.5 Network Customer Redispatch Obligation
30.6 Transmission Arrangements for Network Resources Not Physically Interconnected With The Transmission Provider
30.7 Limitation on Designation of Network Resources
30.8 Use of Interface Capacity by the Network Customer
30.9 Network Customer Owned Transmission Facilities
31 Designation of Network Load
31.1 Network Load
31.2 Delivery Points Connected With the Transmission Provider
31.2a New Delivery Point
31.2b Abandonment of a Delivery Point
31.2c Modification of Delivery Points
31.2d Construction and Cost Recovery
31.2e Delivery Point Transfers
31.3 Taxes on Contributions in Aid of Construction
31.4 Delivery Points Not Physically Interconnected with the Transmission Provider
31.5 Changes in Service Requests
31.6 Annual Load and Resource Information Updates
32 Additional Study Procedures For Network Integration Transmission Service Requests
32.1 Notice of Need for System Impact Study
32.2 System Impact Study Agreement and Cost Reimbursement
32.3 System Impact Study Procedures

32.4 Facilities Study Procedures
32.5 Penalties for Failure to Meet Study Deadlines
32.6 Facilities Study Modifications
32.7 Due Diligence in Completing New Facilities
32.8 Partial Interim Service
32.9 Expedited Procedures for New Facilities
32.10 Delays in Construction of New Facilities
32.11 Alternatives to the Original Facility Additions
33 Load Shedding and Curtailments
33.1 Procedures
33.2 Transmission Constraints
33.3 Cost Responsibility for Relieving Transmission Constraints
33.4 Curtailments of Scheduled Deliveries
33.5 Allocation of Curtailments
33.6 Load Shedding
33.7 System Reliability
34 Rates and Charges
34.1 Monthly Demand Charge
34.2 Monthly Demand Charge – Zone 1
34.3 Monthly Demand Change – Zone 11
34.4 Determination of Network Customer's Monthly Network Load
34.5 Determination of Transmission Provider's Monthly Zone Transmission Load
34.6 Network Customer Obligations for Redispatch Charge
34.7 Stranded Cost Recovery
34.8 SPP Costs
34.9 Monthly Demand Charge – Zone 10
35 Operating Arrangements
35.1 Operation under the Network Operating Agreement
35.2 Network Operating Agreement
36 Scheduling
IV. SPECIAL RULES ON USE OF TARIFF
37 During Transition Period
37.1 Service Not Required for Bundled Customers or Customers Under Retail Access Programs
37.2 Availability of Network Integration Transmission Service
37.3 Unbundled Wholesale
37.4 Grandfathered Transactions
38 After Transition Period
38.1 Applicability to Retail Load Having Choice
38.2 Applicability to Retail Load Not Having Choice
38.3 Grandfathered Agreements
39 Applicability of Non-Rate Terms and Conditions
39.1 Subject to State Laws and Regulations and Public Power Rate Schedules
39.2 Bundled Retail and Grandfathered Load

39.3 Participation by Western Area Power Administration Subject to Federal Laws and Regulations
39.4 Applicability to Rural Electric Cooperatives
V. RECOVERY OF COSTS FOR BASE PLAN UPGRADES AND APPROVED BALANCED PORTFOLIOS
40 Base Plan Zonal Charge and Region-wide Charge
41 Applicability to Resident Load
42 Applicability to Point-To-Point Transmission Service

# I. COMMON SERVICE PROVISIONS

# 1 Definitions

## A - Definitions

**Accredited Revenue Requirements:** The revenue requirements calculated for Service Upgrades and previously approved Base Plan Upgrades, Balanced Portfolios and/or Zonal Reliability Upgrades that are deferred or displaced due to a subsequently identified transmission upgrade.

**Affiliate:** With respect to a corporation, partnership or other entity, each such other corporation, partnership or other entity that directly or indirectly, through one or more intermediaries, controls, is controlled by, or is under common control with, such corporation, partnership or other entity.

**Aggregate Facilities Study:** A Facilities Study performed under the Aggregate Transmission Service Study process described in Attachment Z1.

**Aggregate Transmission Service Study:** Transmission facilities studies as described in Attachment Z1 that aggregate Transmission Service requests received over an open season. These requests are evaluated simultaneously to provide for optimization of transmission expansion.

**Ancillary Services:** Those services that are necessary to support the transmission of capacity and energy from resources to loads while maintaining reliable operation of the Transmission Provider's and Transmission Owner's(s) Transmission System in accordance with Good Utility Practice.

**Annual Transmission Cost:** The total annual cost of the Transmission System for purposes of Network Integration Transmission Service shall be the amount specified in Attachment H until amended by the Transmission Provider or modified by the Commission.

**Application:** A request by an Eligible Customer for transmission service pursuant to the provisions of the Tariff.

**Attachment Facilities:** Facilities that serve to interconnect a generating unit with a Transmission Owner’s transmission facilities.

## B - Definitions

**Balanced Portfolio:** A set of transmission upgrades that provides economic benefits across the SPP Region that meet the requirements in Sections IV.3 and IV.4 of Attachment O.

**Balanced Portfolio Region-wide Annual Transmission Revenue Requirement:** The annual transmission revenue requirement for an approved Balanced Portfolio determined in accordance with Attachment J to this Tariff.

**Balancing Authority:** The responsible entity that integrates resource plans ahead of time, maintains load-interchange-generation balance within a Balancing Authority Area, and supports Interconnection frequency in real time in order to:

(1) Match, at all times, the power output of the generators within the electric power system(s) and capacity and energy purchased from entities outside the electric power system(s), with the load within the electric power system(s);

(2) Maintain scheduled interchange with other Balancing Authority Areas, within the limits of Good Utility Practice;

(3) Maintain the frequency of the electric power system(s) within reasonable limits in accordance with Good Utility Practice; and

(4) Provide for sufficient generating capacity to maintain operating reserves in accordance with Good Utility Practice.

**Balancing Authority Area:** The collection of generation, transmission, and loads within the metered boundaries of the Balancing Authority. The Balancing Authority maintains load-resource balance within this area.

**Base Plan Region-wide Annual Transmission Revenue Requirement:** The sum of the annual transmission revenue requirement for each Base Plan Upgrade and of the Accredited Revenue Requirement(s), if any, that are allocated to the SPP Region in accordance with Attachment J to this Tariff.

**Base Plan Upgrades:** Those upgrades included in and constructed pursuant to the SPP Transmission Expansion Plan in order to ensure the reliability of the Transmission System. Base Plan Upgrades shall also include: (i) those Service Upgrades required for new or changed Designated Resources to the extent allowed for in Attachment J to this Tariff, (ii) Network Upgrades required pursuant to the study results under Attachment AQ to this Tariff, (iii) ITP Upgrades that are approved for construction by the SPP Board of Directors, (iv) high priority upgrades, excluding Balanced Portfolios, that are approved for construction by the SPP Board of Directors, and (v) Network Upgrades due to the retirement of a Resource in accordance with Attachment AB to this Tariff. For Zones 1 through 15, all such upgrades shall specifically exclude planned Transmission System facilities identified in the SPP Transmission Expansion Plan that are: (i) placed in service during the 2005 calendar year or (ii) required to be in service to meet the SPP Criteria and the NERC Reliability Standards for the summer of 2005. For Zones 16, 17, and 18, all such upgrades shall specifically exclude planned Transmission System facilities in those zones identified in the SPP Transmission Expansion Plan Report (2009 – 2018) that are required to be in service to meet the SPP Criteria and the NERC Reliability Standards for the summer of 2008 or which are in operation prior to January 1, 2009, except for those upgrades that are in service prior to January 1, 2009 and are components of Phase 1 of the NPPD 345kV Norfolk to Lincoln (ETR) project or OPPD Sub 1255/3455 Transformer project. Network Upgrades that are components of Phase 1 of the NPPD 345kV Norfolk to Lincoln (ETR) project or OPPD Sub 1255/3455 Transformer project that are in service prior to January 1, 2009 will be Base Plan Upgrades, however, the Zonal component of the costs shall be 100% allocated to the respective host zone. The Base Plan Upgrades in Zones 1 through 18 identified by the Transmission Provider with a need date prior to October 1, 2015 shall not be allocable to Zone 19. The upgrades in Zone 19 identified by the Transmission Provider with a need date prior to October 1, 2015, shall not constitute Base Plan Upgrades. The facilities identified in Schedule 2 to Attachment J are expressly deemed to be Base Plan Upgrades pursuant to Attachment J, Section III.A.2.

**Base Plan Zonal Annual Transmission Revenue Requirement:** For each Zone, the sum of the annual transmission revenue requirement for each Base Plan Upgrade and of the Accredited Revenue Requirement(s), if any, that are allocated to the Zone in accordance with Attachments J and S to this Tariff.

**Base Plan Zonal Charge:** Zonal component of the charge assessed by the Transmission Provider in accordance with Schedule 11 to recover the revenue requirement of facilities classified as Base Plan Upgrades.

**Base Plan Zonal Load Ratio Share:** Ratio of a Network Customer's or Transmission Owner's Resident Load in a Zone to the total load in that Zone computed in accordance with Section II.B to Schedule 11 of this Tariff and calculated on a calendar year basis, for the prior calendar year. Customer loads used to determine the Base Plan Zonal Load Ratio Share shall be adjusted for real power losses in accordance with the provisions set out in Section 28.5 of this Tariff.

**Base Plan Zonal Rate:** Zonal component of the rate (per kW of Reserved Capacity for Point-To-Point Transmission Service) assessed by the Transmission Provider in accordance with Schedule 11 to recover the revenue requirement of facilities classified as Base Plan Upgrades.

**Business Day:** A day on which the Federal Reserve System is open for business.

## C - Definitions

**Calendar Day:** Any day including Saturday and Sunday.

**Commission:** The Federal Energy Regulatory Commission.

**Completed Application:** An Application that satisfies all of the information and other requirements of the Tariff, including a Credit Application and any required Financial Security.

**Credit Policy:** The Credit Policy set forth in Attachment X to the Tariff.

**Creditable Upgrade:** Any Network Upgrade which meets the requirements of Section I of Attachment Z2.

**Curtailment:** A reduction in firm or non-firm transmission service in response to a transmission capacity shortage as a result of system reliability conditions.

## D - Definitions

**Day-Ahead Market:** The market for Energy and Operating Reserve that is conducted on the day prior to the Operating Day.

**Delivering Party:** The entity supplying capacity and energy to be transmitted at Point(s) of Receipt.

**Delivery Point Transfer:** The transfer of responsibility for serving an existing delivery point (i) from one Network Customer or Transmission Customer to a different Network Customer or Transmission Customer; or (ii) from one Service Agreement to another Service Agreement with the same Network Customer or Transmission Customer.

**Designated Agent:** Any entity that performs actions or functions required under the Tariff on behalf of the Transmission Provider, a Transmission Owner, an Eligible Customer, or the Transmission Customer.

**Designated Resource:** Any designated generation resource owned, purchased or leased by a Transmission Customer to serve load in the SPP Region. Designated Resources do not include any resource, or any portion thereof, that is committed for sale to third parties or otherwise cannot be called upon to meet the Transmission Customer's load on a non-interruptible basis.

**Designated Transmission Owner ("DTO"):** A Transmission Owner that has been designated by the Transmission Provider pursuant to Attachment Y of this Tariff to construct a transmission project.

**Directly Assigned Upgrade Costs:** An Eligible Customer's share of the cost of a Service Upgrade or Network Upgrade, or a Project Sponsor's share of the cost of a Sponsored Upgrade, determined in accordance with Attachments J, V and Z1, which includes any Network Upgrade costs that are (i) directly assigned to an Eligible Customer

for a Service Upgrade in excess of the normally applicable transmission access charges for the associated transmission service; (ii) directly assigned to an Eligible Customer that are in excess of the Safe Harbor Cost Limit for Service Upgrades associated with new or changed Designated Resource; (iii) directly assigned to a Project Sponsor for a Sponsored Upgrade; or (iv) directly assigned to a Generation Interconnection Customer resulting from a request for generation interconnection.

**Direct Assignment Facilities:** Facilities or portions of facilities that are constructed by any Transmission Owner(s) for the sole use/benefit of a particular Transmission Customer or a particular group of customers or a particular Generation Interconnection Customer requesting service under the Tariff. Direct Assignment Facilities shall be specified in the Service Agreements that govern service to the Transmission Customer(s) and Generation Interconnection Customer(s) and shall be subject to Commission approval.

## E - Definitions

**Eastern Interconnection:** A major alternating-current electrical grid in North America. The Eastern Interconnection reaches from Central Canada eastward to the Atlantic coast (excluding Quebec), south to Florida, and back west to the foot of the Rockies (excluding most of Texas).

**Effective Date:** For Short-Term Firm and Non-Firm Point-To-Point Transmission Service the Effective Date of this Tariff is June 1, 1998. For Long-Term Firm Point-To-Point Transmission Service the Effective Date of this Tariff is April 1, 1999. For Network Integration Transmission Service the Effective Date of this Tariff is February 1, 2000.

**Electric Storage Resource ("ESR")**

A resource capable of receiving electric energy and storing it for later injection of electric energy to the grid. A resource that is either (1) physically incapable of injecting electric energy to the Transmission System due to its design or configuration or (2) contractually barred from injecting electric energy to the Transmission System is excluded from this definition.

**Eligible Customer:** (i) Any electric utility (including the Transmission Owner(s) and any power marketer), Federal Power Marketing Agency, or any person generating electric energy for sale for resale. Electric energy sold or produced by such entity may be electric energy produced in the United States, Canada or Mexico. However, with respect to transmission service that the Commission is prohibited from ordering by Section 212(h) of the Federal Power Act, such entity is eligible only if the service is provided pursuant to a state requirement that a Transmission Owner offer the unbundled transmission service, or pursuant to a voluntary offer of such service by a Transmission Owner. (ii) Any retail customer or eligible person taking unbundled transmission service pursuant to a state requirement that a Transmission Owner offer the transmission service, or pursuant to a voluntary offer of such service by a Transmission Owner, is an Eligible Customer under the Tariff.

**Emergency Condition:** A condition or situation determined by the Transmission Provider that is imminently likely to cause a material adverse effect on the security of, or damage to the Transmission System.

**Energy:** As defined in Attachment AE to this Tariff.

**Energy and Operating Reserve Markets**: The Day-Ahead Market and Real-Time Balancing Market, including the Reliability Unit Commitment processes.

**Export Interchange Transaction:** As defined in Attachment AE to this Tariff.

**External Resource:** A Resource, other than a Designated Resource, located outside of the SPP Balancing Authority that is included in the SPP Balancing Authority through an External Resource Pseudo-Tie.

**External Resource Pseudo-Tie:** A non-physical electrical interconnection point between Balancing Authorities, whereby all or a portion of an External Resource is electronically moved from a Balancing Authority external to the SPP Balancing Authority. Energy delivered from an External Resource to the SPP Balancing Authority is treated as a Balancing Authority interchange from the source Balancing Authority to the SPP Balancing Authority.

## F - Definitions

**Facilitating Transmission Owner:** The Facilitating Transmission Owner is responsible for the Zonal Planning Criteria responsibilities as described in Attachment O of this Tariff. By April 2nd, the Network Customer with the largest total Network Load in the Zone, computed in accordance with Sections 34.4 and 34.5 of the Tariff on an average calendar year basis for the prior calendar year, shall designate a Transmission Owner with a Zonal Annual Transmission Revenue Requirement for facilities in the Zone as the Facilitating Transmission Owner for the Zone each year. Zonal Planning Criteria for Zone 10 shall be subject to Attachment AD of the Tariff.

**Facilities Study:** An engineering study conducted by the Transmission Provider in collaboration with the affected Transmission Owner(s) to determine the required modifications to the Transmission System, including the cost and scheduled completion date for such modifications, that will be required to provide the requested transmission service or Generator Interconnection Service. The Transmission Provider shall have the ultimate responsibility for any such studies. However, the Transmission Provider's final decision must be consistent with Good Utility Practice. Facilities studies for any facilities not under the operational control of the Transmission Provider shall be performed by the Transmission Owner or any entity it designates to perform the studies.

**Feasibility Study:** A coordinated preliminary determination by the Transmission Provider and the affected Transmission Owner(s) of the Attachment Facilities, other Direct Assignment Facilities, and system upgrades that are needed to accept power into the grid at the interconnection receipt point, that will be necessary to accommodate a Generator Interconnection Request made under Attachment V.

**Federal Power-Southwestern:** All power and energy generated at reservoir projects under the control of the Department of the Army in the marketing area of the Southwestern Power Administration (Southwestern) plus power and energy delivered to Southwestern from other sources for the purpose of fulfilling Southwestern's contractual

obligations for the sale of power and energy pursuant to Southwestern's Federal power allocations.

**Federal Power–Western-UGP:** All power and energy generated at reservoir projects under the control of the Department of the Army or the Bureau of Reclamation in the marketing area of the Western-UGP for the purpose of fulfilling Western-UGP's Statutory Load Obligations for the sale of power and energy. This shall also include any power and energy delivered to or from Western-UGP under the grandfathered bi-directional agreement with Southwestern Power Administration through Associated Electric Cooperative, Inc. ("AECI") for delivery and receipt at AECI's Maryville Substation. Western-UGP's deliveries to Southwestern shall be considered part of Western-UGP's Statutory Load Obligations, and receipts from Southwestern to Western-UGP will be considered as coming from Federal resources. Federal Power-Western-UGP resources shall be eligible to be considered as Designated Resources.

**Federal Power Marketing Agency:** This term shall include the term "Federal Power Marketing Administration" and have the same definition that is set forth in the Federal Power Act at 16 U.S.C. § 796(19), which defines "Federal power marketing agency" as "any agency or instrumentality of the United States (other than the Tennessee Valley Authority) which sells electric energy[.]"

**Federal Service Exemption:** Western-UGP's exemption from certain charges described in Section 39.3(e) of this Tariff.

**Firm Point-To-Point Transmission Service:** Transmission Service under this Tariff that is reserved and/or scheduled between specified Points of Receipt and Delivery pursuant to Part II of this Tariff.

## G - Definitions

**Generation Interconnection Customer:** An entity that submits a Generator Interconnection Request under Attachment V.

**Generator Interconnection Agreement:** Shall be as defined in Attachment V.

**Generator Interconnection Request:** Shall be defined as "Interconnection Request" in Attachment V.

**Generator Interconnection Service:** Shall be as defined as "Interconnection Service" in Attachment V.

**Generator Owner:** Shall be as defined in Attachment AA.

**Generator Retirement Process:** Process by which retirement of a Resource is evaluated and analyzed pursuant to Attachment AB of this Tariff.

**Generator Retirement Upgrade:** A Network Upgrade identified and analyzed through the Generator Retirement Process described in Attachment AB of this Tariff.

**Good Utility Practice:** Any of the practices, methods and acts engaged in or approved by a significant portion of the electric utility industry during the relevant time period, or any of the practices, methods and acts which, in the exercise of reasonable judgment in light of the facts known at the time the decision was made, could have been expected to accomplish the desired result at a reasonable cost consistent with good business practices, reliability, safety and expedition. Good Utility Practice is not intended to be limited to the optimum practice, method, or act to the exclusion of all others, but rather to be acceptable practices, methods, or acts generally accepted in the region, including those practices required by Federal Power Act section 215(a)(4).

**Grandfathered Agreements or Transactions:** Grandfathered Agreements or Transactions include (1) agreements providing long term firm transmission service executed prior to April 1, 1999 and Network Integration Transmission Service executed prior to February 1, 2000; (2) bundled wholesale contracts (that reserve transmission as part of the contract); (3) short-term firm and non-firm point-to-point transmission transactions which were accepted and confirmed prior to the Effective Date; (4) existing or new contracts entered into by the Southwestern Power Administration on behalf of the United States for the use of transmission facilities of the Southwestern Power Administration that are constructed or acquired by purchase or other agreement, as authorized under Section 5 of the Flood Control Act of 1944, for the transmission of Federal Power-Southwestern; (5) contracts executed before the Effective Date, regardless of term, entered into by the Southwestern Power Administration on behalf of the United States for the transmission of power or energy across transmission facilities owned and operated by the Southwestern Power Administration; (6) contracts entered into by a Nebraska or South Dakota public-power entity prior to the transfer of functional control of its transmission facilities to the Transmission Provider; (7) existing contracts entered into by a Member which is a Nebraska or South Dakota public-power entity with any retail or wholesale electric utility customer that has a right under state law to obtain electric transmission service or energy service from such Member; (8) new contracts entered into by a Member which is a Nebraska or South Dakota public-power entity with any retail or wholesale electric utility customer that has a right under state law to obtain electric transmission service or energy service from such Member to the extent that provision of service under the Tariff would not satisfy such Member's obligation under state law; (9) agreements entered into by Southwestern Public Service Company (SPS) and Public Service Company of Colorado (PSCo) for transmission service across the Lamar HVDC Tie Line to integrate generation resources and loads pursuant to the Xcel Energy Operating Companies Joint Operating Agreement and other service under the Xcel Energy Operating Companies Open Access Transmission Tariff pursuant to FERC orders on the merger of the Xcel Energy Operating Companies, Public Service Company of Colorado, et al., 75 FERC ¶ 61,325 (1996), Order Conditionally Approving Settlement and Conditionally Authorizing Merger, 78 FERC ¶ 61,267 (1997); Cheyenne Light, Fuel

and Power Co., et al., 78 FERC ¶ 61,268 (1997); and Northern States Power Company, et. al., 90 FERC ¶ 61,020 (2000), and the FERC approved Offers of Settlement in Docket Nos. ER04-1174-000 et al. and ER08-313-000 et al.; and (10) contracts executed by Western-UGP prior to the transfer of functional control of Western-UGP transmission facilities to the Transmission Provider, regardless of term, for the transmission of power or energy. These agreements are set forth on the list which is Attachment W to this Tariff. Umbrella service agreements are specifically not Grandfathered.

## I - Definitions

**Import Interchange Transaction:** As defined in Attachment AE to this Tariff.

**Incremental Long-Term Congestion Right ("ILTCR"):** An instrument that entitles an Upgrade Sponsor to a Transmission Congestion Right that results from the incremental ATC created from the portion of an upgrade for which there is a Directly Assigned Upgrade Cost, which is awarded during the Transmission Provider's annual LTCR allocation process.

**Integrated Marketplace:** As defined in Attachment AE to this Tariff.

**Integrated Transmission Planning Assessment:** Shall be as defined in Section III of Attachment O.

**Integrated Transmission Planning Manual:** Shall be as defined in Section II of Attachment O.

**Interregional Planning Process:** The process whereby an Interregional Project is evaluated and approved for construction by the participating Interregional Planning Regions in accordance with the procedures identified in Attachment O.

**Interregional Planning Region(s):** A Commission approved planning region as identified in Section VIII of Attachment O.

**Interregional Project:** A Network Upgrade that has been approved through the Interregional Planning Process in accordance with Attachment O.

**Interruption:** A reduction in non-firm transmission service due to economic reasons pursuant to Section 14.7.

**ITP Upgrades:** Those upgrades identified and analyzed through the Integrated Transmission Planning Assessment described in Section III of Attachment O.

## L - Definitions

**Load Ratio Share:** Ratio of a Transmission Customer's Network Load in a Zone to the total load in that Zone computed in accordance with Sections 34.4 and 34.5 of the Network Integration Transmission Service under Part III of this Tariff and calculated on a calendar year basis, for the prior calendar year. Customer loads used to determine the Load Ratio Share shall be adjusted for real power losses in accordance with the provisions set out in Section 28.5 of this Tariff.

**Load Shedding:** The systematic reduction of system demand by temporarily decreasing load in response to Transmission System or area capacity shortages, system instability, or voltage control considerations under Part III of the Tariff.

**Long-Term Firm Point-To-Point Transmission Service:** Firm Point-To-Point Transmission Service under Part II of the Tariff with a term of one year or more.

**Long-Term Service:** Long-Term Firm Point-To-Point Transmission Service or Network Integration Transmission Service of one year or longer.

## M - Definitions

**Market Participant:** An entity that generates, transmits, distributes, purchases, or sells electricity or provides Ancillary Services with respect to such services (or contracts to perform any of the foregoing activities) within, into, out of, or through the Transmission System or an Upgrade Sponsor receiving Incremental LTCRs. Market Participant expressly includes:

(a) Transmission Owner(s) and any of their Affiliates including Transmission Owners providing transmission service to: (i) bundled retail load for which such Transmission Owners are taking neither Network Integration Transmission Service nor Firm Point-To-Point Transmission Service under this Tariff; and (ii) load being served under Grandfathered Agreements for which such Transmission Owners are taking neither Network Integration Transmission Service nor Firm Point-To-Point Transmission Service under this Tariff, (b) Transmission Customers, (c) Network Customers, (d) Generation Interconnection Customers, (e) any Eligible Customer offering Resources for sale into the Energy and Operating Reserve Markets that executes the Service Agreement specified in Attachment AH, or on whose behalf an unexecuted Service Agreement has been filed at the Commission, (f) any retail customer or eligible person that is not precluded under the laws or regulations of the relevant electric retail regulatory authority including state-approved retail tariff(s) from participating directly in wholesale demand response programs in the Energy and Operating Reserve Markets and that is technically qualified to offer Demand Response Load (as defined in Attachment AE of this Tariff) into the Energy and Operating Reserve Markets or an aggregator of such retail customers that offers qualified Demand Response Load into the Energy and Operating Reserve Markets under Section 2.8 of Attachment AE, (g) an entity that executes the Service Agreement specified in Attachment AH and registers the assets of one or more Asset Owners, and (h) an Upgrade Sponsor that executes the Service Agreement specified in Attachment AH.

**Market Protocols:** The protocols implementing the Integrated Marketplace as amended from time to time in accordance with the SPP Membership Agreement.

**Market Storage Resource ("MSR")**

As defined in Attachment AE of this Tariff.

**Member:** A member of SPP.

## N - Definitions

**Native Load Customers:** The wholesale and retail power customers of the Transmission Owner(s) on whose behalf the Transmission Owner(s), by statute, franchise, regulatory requirement, or contract, has (have) undertaken an obligation to construct or operate the Transmission Owner's(s') system(s) to meet the reliable electric needs of such customers. In addition, Native Load Customers also may include the customers of the Federal Government on whose behalf the Government, by policy, statute, regulatory requirement, or contract, delivers Federal capacity and energy to meet all or a portion of the reliable electric needs of such customers.

**Network Customer:** An entity receiving transmission service pursuant to the terms of the Transmission Provider's Network Integration Transmission Service under Part III of the Tariff.

**Network Customer Transmission Credits:** Financial credits applied against a Network Customer’s monthly demand charges under Schedule 9 of this Tariff in accordance with the provisions of Section 30.9 of the Tariff.

**Network Integration Transmission Service:** The transmission service provided under Part III of the Tariff.

**Network Load:** The load that a Network Customer designates for Network Integration Transmission Service under Part III of the Tariff. The Network Customer's Network Load shall include all load served by the output of any Network Resources designated by the Network Customer. A Network Customer may elect to designate less than its total load as Network Load but may not designate only part of the load at a discrete Point of Delivery. Where an Eligible Customer has elected not to designate a particular load at discrete points of delivery as Network Load, the Eligible Customer is responsible for making separate arrangements under Part II of the Tariff for any Point-To-Point Transmission Service that may be necessary for such non-designated load.

**Network Operating Agreement:** An executed agreement that contains the terms and conditions under which the Network Customer shall operate its facilities and the technical and operational matters associated with the implementation of Network Integration Transmission Service under Part III of the Tariff.

**Network Resource:** Any designated generating resource owned, purchased or leased by a Network Customer under the Network Integration Transmission Service Tariff. Network Resources do not include any resource, or any portion thereof, that is committed for sale to third parties or otherwise cannot be called upon to meet the Network Customer's Network Load on a non-interruptible basis, except for purposes of fulfilling obligations under a reserve sharing program.

**Network Upgrades:** All or a portion of the modifications or additions to transmission-related facilities that are integrated with and support the Transmission Provider's overall Transmission System for the general benefit of all Users of such Transmission System.

**Next-Hour-Market Service:** Non-firm transmission service that (a) is reserved for one clock hour and (b) is requested within sixty (60) minutes before the start of the next clock hour for service commencing at the start of that clock hour.

**Non-Firm Point-To-Point Transmission Service:** Point-To-Point Transmission Service under the Tariff that is reserved and scheduled on an as-available basis and is subject to Curtailment or Interruption as set forth in Section 14.7 under Part II of this Tariff. Non-Firm Point-To-Point Transmission Service is available on a stand-alone basis for periods ranging from one hour to one month.

**Non-Firm Sale:** An energy sale for which receipt or delivery may be interrupted for any reason or no reason, without liability on the part of either the buyer or seller.

**Notification to Construct ("NTC"):** A written notice from the Transmission Provider directing an entity that has been selected to construct one or more transmission

project(s)to begin or continue implementation of the transmission project(s) in accordance with Attachment Y.

## O - Definitions

**OATT:** See "Tariff."

**Open Access Same-Time Information System (OASIS):** The information system and Internet location where the Transmission Provider posts the information required by 18 C.F.R. § 37 of the Commission's regulations, and where the Transmission Provider may also post the information required to be posted on its Internet website by 18 C.F.R. § 358 of the Commission's regulations.

**Operating Reserve Only Resource:** A Resource that cannot be cleared or dispatched for Energy that is qualified to provide any or all of the Operating Reserve products: Regulation-Up, Regulation-Down, Spinning Reserve, Supplemental Reserve, Ramp Capability Up, or Ramp Capability Down.

**Oversight Committee:** The organizational group defined in Section 6.4 of the SPP Bylaws.

## P - Definitions

**Part I:** Tariff Definitions and Common Service Provisions contained in Sections 2 through 12.

**Part II:** Tariff Sections 13 through 27 pertaining to Point-To-Point Transmission Service in conjunction with the applicable Common Service Provisions of Part I and appropriate Schedules and Attachments.

**Part III:** Tariff Sections 28 through 36 pertaining to Network Integration Transmission Service in conjunction with the applicable Common Service Provisions of Part I and appropriate Schedules and Attachments.

**Part IV:** Tariff Sections 37 through 39 pertaining to special Tariff provisions related to the applicability of the Tariff during and after the Transition Period and special Tariff provisions related to participation by the United States.

**Part V:** Tariff Sections 40 through 42, and related Schedules and Attachments, pertaining to recovery of costs for Base Plan Upgrades and approved Balanced Portfolios.

**Parties:** The Transmission Provider and the Transmission Customer receiving service under the Tariff.

**Point(s) of Delivery:** Point(s) on the Transmission Provider's Transmission System where capacity and energy transmitted by the Transmission Provider will be made available to the Receiving Party under Part II of the Tariff. The Point(s) of Delivery shall be specified in the Service Agreement for Long-Term Firm Point-To-Point Transmission Service.

**Point(s) of Receipt:** Point(s) of interconnection on the Transmission Provider's Transmission System where capacity and energy will be made available to the

Transmission Provider by the Delivering Party under Part II of the Tariff. The Point(s) of Receipt shall be specified in the Service Agreement for Long-Term Firm Point-To-Point Transmission Service.

**Point-To-Point Transmission Service:** The reservation and transmission of capacity and energy on either a firm or non-firm basis from the Point(s) of Receipt to the Point(s) of Delivery under Part II of the Tariff.

**Power Purchaser:** The entity that is purchasing the capacity and energy to be transmitted under the Tariff.

**Pre-Confirmed Application:** An Application that commits the Eligible Customer to execute a Service Agreement upon receipt of notification that the Transmission Provider can provide the requested Transmission Service.

**Project Sponsor:** One or more entities that voluntarily agree to bear a portion or all of the costs of a Sponsored Upgrade.

**Public Policy Requirements:** Requirements established by local, state or federal laws or regulations, including duly enacted statutes or regulations promulgated by a relevant jurisdiction, whether within a state, or at the federal level.

## R - Definitions

**Real-Time:** As defined in Attachment AE to this Tariff.

**Real-Time Balancing Market (RTBM):** The market operated by the Transmission Provider continuously in real-time to balance the system through deployment of Energy and to clear Regulation-Up, Regulation-Down, Spinning Reserve, Supplemental Reserve, Ramp Capability Up, and Ramp Capability Down.

**Receiving Party:** The entity receiving the capacity and energy transmitted by the Transmission Provider to Point(s) of Delivery.

**Region-wide Annual Transmission Revenue Requirement:** The sum of the annual transmission revenue requirements as set forth in Attachment H, Table 2-A and Table 2-B.

**Region-wide Charge:** Regional component of the charge assessed by the Transmission Provider in accordance with Schedule 11 to recover the Region-wide Annual Transmission Revenue Requirement.

**Region-wide Load Ratio Share:** For application to Section I, Table 2-A of Attachment H, the ratio of a Network Customer’s or Transmission Owner’s Resident Load to total Resident Load in Zones 1 through 18, computed in accordance with Section II.B to Schedule 11 of this Tariff, and calculated on a calendar year basis for the prior calendar year. For application to Section I, Table 2-B of Attachment H, the ratio of a Network Customer's or Transmission Owner’s Resident Load to total Resident Load in the SPP Region, with both numerator and denominator limited to Resident Loads subject to the Region-wide Charge, computed in accordance with Section II.C to Schedule 11 of this Tariff, and calculated on a calendar year basis for the prior calendar year. Customer loads used to determine the Region-wide Load Ratio Share shall be adjusted for real power losses in accordance with the provisions set out in Section 28.5 of this Tariff.

**Region-wide Rate:** Regional component of the rate per kW of Reserved Capacity assessed by the Transmission Provider in accordance with Schedule 11 to recover the Region-wide Annual Transmission Revenue Requirement.

**Regional State Committee:** A voluntary organization comprised of one designated commissioner from each participating state regulatory commission having jurisdiction over an SPP Member, established to collectively provide both direction and input on all matters pertinent to the participation of the Members in SPP pursuant to the SPP Bylaws.

**Regional Transmission Group (RTG):** A voluntary organization of Transmission Owners, transmission users and other entities approved by the Commission to efficiently coordinate transmission planning (and expansion), operation and use on a regional (and interregional) basis.

**Reliability Unit Commitment:** As defined in Attachment AE of this Tariff.

**Reserve Sharing System:** The Transmission Provider’s computer system that receives and records contingency events and requests for assistance by Reserve Sharing Group members, calculates and communicates the appropriate reserve capacity obligations and reserve energy responsibilities for events to all Reserve Sharing Group members and creates applicable Energy schedules for deployment by the Reserve Sharing Group members.

**Reserved Capacity:** The maximum amount of capacity and energy that the Transmission Provider agrees to transmit for the Transmission Customer over the Transmission Provider's Transmission System between the Point(s) of Receipt and the Point(s) of Delivery under Part II of the Tariff. Reserved Capacity shall be expressed in terms of whole megawatts on a sixty (60) minute interval (commencing on the clock hour) basis.

**Resident Load:** The load specified in Section 41 of the Tariff.

**Resource:** An asset that injects energy into the transmission grid or reduces the withdrawal of energy from the transmission grid including a Demand Response Resource, a Variable Energy Resource, a Dispatchable Resource, and External Resource, External Dynamic Resource.

**Revenue Requirements and Rates File (RRR File):** A file posted on the SPP website as a reference to: (i) Annual Transmission Revenue Requirements (ATRRs) for Network Integration Transmission Service, as referenced in Attachment H to this Tariff; (ii) Base Plan ATRR allocation; (iii) allocation factors for Base Plan funded projects; (iv) notes on the calculation of Base Plan ATRR amounts on a Region-wide and Zonal basis; (v) ATRR reallocation for Balanced Portfolio projects; (vi) the calculation of Base Plan Point-To-Point Transmission Service rates on a Region-wide and Zonal basis in accordance with Schedule 11; and (vii) the rates for Point-To-Point Transmission Service as referenced in Attachment T in accordance with Schedules 7 and 8.

## S - Definitions

**Screening Study:** A study conducted pursuant to Attachment AR of the Tariff to evaluate potential Long-Term Service request options or a proposed Delivery Point Transfer.

**Screening Study Agreement:** An agreement between Transmission Provider and a Network Customer or Transmission Customer for the performance of a Screening Study pursuant to Attachment AR of the Tariff.

**Service Agreement:** The initial agreement and any amendments or supplements thereto entered into by the Transmission Customer and the Transmission Provider for service under the Tariff.

**Service Commencement Date:** The date the Transmission Provider begins to provide service pursuant to the terms of an executed Service Agreement, or the date the Transmission Provider begins to provide service in accordance with Section 15.3 or Section 29.1 under the Tariff.

**Service Upgrades:** Network Upgrades required to provide transmission service requested by an Eligible Customer in accordance with Attachment Z1 to this Tariff.

**Short-Term Firm Point-To-Point Transmission Service:** Firm Point-To-Point Transmission Service under Part II of the Tariff with a term of less than one year.

**Short-Term Service:** Short-Term Firm Point-To-Point Transmission Service or Network Integration Transmission Service of less than one year.

**Sponsored Upgrades:** Network Upgrades, requested by a Transmission Customer or other entity, which do not meet the definition of any other category of Network Upgrades.

**SPP:** The Southwest Power Pool, Inc.

**SPP Bylaws:** The Bylaws of SPP filed at FERC that set forth the governance structure and other organizational authorities and obligations for SPP.

**SPP Criteria:** The SPP Planning Criteria and SPP Operating Criteria collectively, as approved by the Board of Directors in accordance with the SPP Bylaws, and posted on the SPP website.

**SPP Membership Agreement:** The Southwest Power Pool Membership Agreement detailing the rights and obligations of the SPP and SPP Members.

**SPP Region:** The geographic area of the Transmission System.

**SPP Transmission Expansion Plan (STEP):** The plan that describes the transmission expansion projects being considered over the planning period and developed through the stakeholder process in accordance with this Tariff and approved by the SPP Board.

**Statutory Load Obligations**: Western-UGP's power marketing function obligations under Federal law to deliver power and energy from the output of the Federal hydroelectric projects operated by the Department of the Army and the Bureau of Reclamation to loads which include project use loads, preference power customer loads in Iowa, Minnesota, Montana, Nebraska, North Dakota, and South Dakota located in a marketing area defined pursuant to a power marketing plan, and other loads required to be served under Federal law.

**System Condition:** A specified condition on the Transmission Provider's system or on a neighboring system, such as a constrained transmission element or flowgate, that may trigger Curtailment of Long-Term Firm Point-To-Point Transmission Service using the

curtailment priority pursuant to Section 13.6. Such conditions must be identified in the Transmission Customer's Service Agreement.

**System Impact Study:** A coordinated assessment by the Transmission Provider and the affected Transmission Owner(s) of (i) the adequacy of the Transmission System to accommodate Short-Term Service or (ii) to determine the Attachment Facilities, other Direct Assignment Facilities, and system upgrades that are needed to accept power into the grid at the interconnection receipt point, required to accommodate a request for generation interconnection in accordance with Attachment V and (iii) whether any additional costs may be incurred in order to provide transmission service or generation interconnection.

## T - Definitions

**Tariff:** The Open Access Transmission Tariff or "OATT", including all schedules or attachments thereto, of the Transmission Provider as amended from time to time and approved by the Commission.

**Third-Party Sale:** Any sale for resale in interstate commerce to a Power Purchaser that is not designated as part of Network Load under the Network Integration Transmission Service.

**Transition Period:** The period from the Effective Date of this Tariff for the provision of Network Integration Transmission Service to the last day of the fifth year thereafter. The Transition Period for a Member that is a Nebraska public-power entity shall be the period from the effective date of the transfer of functional control to the last day of the fifth year thereafter.

**Transmission Congestion Rights:** As defined in Attachment AE to this Tariff.

**Transmission Customer:** Any Eligible Customer (or its Designated Agent) that (i) executes a Service Agreement, or (ii) requests in writing that the Transmission Provider file with the Commission, a proposed unexecuted Service Agreement to receive transmission service under Part II of the Tariff. This term is used in the Part I Common Service Provisions to include customers receiving transmission service under Part II and Part III of this Tariff.

**Transmission Owner:** Each Member of SPP that has executed an SPP Membership Agreement as a Transmission Owner and therefore has the obligation to construct, own, operate, and maintain transmission facilities as directed by the Transmission Provider and: (i) whose Tariff facilities (in whole or in part) make up the Transmission System; or (ii) who has accepted a Notification to Construct but does not yet own transmission facilities under SPP's functional control. Those Transmission Owners that are not

regulated by the Commission shall not become subject to Commission regulation by virtue of their status as Transmission Owners under this Tariff; provided, however, that service over their facilities classified as transmission and covered by the Tariff shall be subject to Commission regulation.

**Transmission Provider:** The Southwest Power Pool, Inc., acting in its role as administrator of this Tariff.

**Transmission Provider's Monthly Transmission System Peak:** The maximum firm usage of the Transmission Provider's Transmission System in a calendar month.

**Transmission Service:** Point-To-Point Transmission Service provided under Part II of the Tariff on a firm and non-firm basis.

**Transmission System:** The facilities used by the Transmission Provider to provide transmission service under Part II, Part III and Part IV of the Tariff.

## U - Definitions

**Upper Missouri Zone:** The Upper Missouri Zone ("UMZ" or "Zone 19") is the rate pricing zone initially consisting of the following facilities that meet the requirements of Attachment AI, upon the transfer of those facilities to the functional control of the Transmission Provider: (i) the facilities of Western-UGP within the Eastern and Western Interconnections; (ii) the facilities owned or leased by Basin Electric Power Cooperative or Heartland Consumers Power District within the Eastern Interconnection; (iii) a portion of the facilities owned or leased by Basin Electric Power Cooperative within the Western Interconnection; and (iv) other facilities of the Western Area Power Administration in the Eastern Interconnection transferred to the functional control of the Transmission Provider, not included in the facilities of Western-UGP in (i) above.

**Users:** Transmission Customers or other entities that are parties to transactions under the Tariff.

**Upgrade Sponsor:** A Transmission Customer, Network Customer, Generation Interconnection Customer, or Project Sponsor paying Directly Assigned Upgrade Costs for a Network Upgrade.

## V – Definitions

**Virtual Energy Bid:** As defined in Attachment AE to this Tariff.

**Virtual Energy Offer:** As defined in Attachment AE to this Tariff.

## W - Definitions

**Western Area Power Administration-Rocky Mountain Region ("Western-RMR"):** A division of the Western Area Power Administration that markets and transmits Federal power generated from certain U.S. Bureau of Reclamation hydroelectric facilities collectively known as the Loveland Area Projects. Western-RMR also operates the Western Area Colorado Missouri Balancing Authority Area, known as WACM, and the Western Area Lower Colorado Balancing Authority Area, known as WALC, and provides transmission services, including, but not limited to, transmission service across Western-owned transmission facilities within the two Balancing Authority Areas.

**Western Area Power Administration-Upper Great Plains Region ("Western-UGP"):** A division of the Western Area Power Administration that markets and transmits Federal power from reservoir projects under the control of the Department of the Army or the U.S. Bureau of Reclamation. Western-UGP operates the WAUW Balancing Authority Area in the Western Interconnection, where certain of its transmission facilities are located. Western-UGP has transferred Federal transmission facilities in both the Eastern Interconnection and Western Interconnection to the functional control of the Transmission Provider.

**Western Interconnection:** A major alternating current power grid in North America. The Western Interconnection stretches from Western Canada south to Baja California in Mexico, reaching eastward over the Rockies to the Great Plains. Western Interconnection is comprised of the states of Washington, Oregon, California, Idaho, Nevada, Utah, Arizona, Colorado, Wyoming, portions of Montana, South Dakota, Nebraska, New Mexico and Texas in the United States, the Provinces of British Columbia and Alberta in Canada, and a portion of the Comisión Federal de Electricidad's system in Baja California in Mexico.

**Wholesale Distribution Service:** The provision of service over a Transmission Owner's Distribution Facilities necessary to effectuate Network Integration Transmission Service or Point-To-Point Transmission Service under this Tariff. To the extent such Wholesale

Distribution Service is required; it shall be specified in the Service Agreement for the associated service being provided under the Tariff. The charges for Wholesale Distribution Service are described in Schedule 10.

## XYZ - Definitions

**Zonal Annual Transmission Revenue Requirement:** The revenue requirements for facilities in each Zone and the Accredited Revenue Requirement(s), if any, that are allocated to the Zone in accordance with Attachment J to this Tariff as set forth in Attachment H, Table 1, Column (3).

**Zonal Planning Criteria:** In each Zone, the set of measuring systems and performance standards that is used for assessing the actual or projected ability of the Transmission System to deliver power to load reliably. Zonal Planning Criteria for Zone 10 shall be subject to Attachment AD of the Tariff.

**Zonal Reliability Upgrades:** Those upgrades included in and constructed pursuant to the SPP Transmission Expansion Plan in order to ensure the reliability of the Transmission System identified because of application of Zonal Planning Criteria. Zonal Planning Criteria for Zone 10 shall be subject to Attachment AD of the Tariff.

**Zone:** The geographic area of the facilities of a Transmission Owner or a specific combination of Transmission Owners as specified in Schedules 7, 8, and 9.

# 2 Initial Allocation and Renewal Procedures

## 2.1 Initial Allocation of Available Transfer Capability:

For purposes of determining whether existing capability on the Transmission Provider's Transmission System is adequate to accommodate a request for firm service under this Tariff, all Completed Applications for new firm transmission service received during the initial sixty (60) day period commencing with the Effective Date of the Tariff will be deemed to have been filed simultaneously. A lottery system conducted by the Transmission Provider shall be used to assign priorities for Completed Applications filed simultaneously. All Completed Applications for firm transmission service received after the initial sixty (60) day period shall be assigned a priority pursuant to Section 13.2.

**2.2 Reservation Priority For Existing Firm Service Customers:**

Existing firm service customers (wholesale requirements and transmission-only, with a contract term of five years or more, and retail) of the Transmission Owner(s) or Transmission Provider have the right to continue to take transmission service from the Transmission Provider when the contract expires, rolls over or is renewed. This transmission reservation priority is independent of whether the existing customer continues to purchase capacity and energy from the Transmission Owner(s) or elects to purchase capacity and energy from another supplier. The existing customer must notify the Transmission Provider no later than one year prior to the end of the term of its firm transmission contract that it is exercising its transmission reservation priority; otherwise it shall forfeit the transmission reservation priority associated with the contract. If at the time of this notification, the Transmission Provider's Transmission System cannot accommodate all of the requests for transmission service, the existing firm service customer must agree to accept a contract term at least equal to a competing request by any new Eligible Customer and to pay the current just and reasonable rate, as approved by the Commission, for such service; provided that, the firm service customer shall have the right of first refusal at the end of such service only if the new contract is for five years or more. The existing firm service customer must provide notice to the Transmission Provider whether it will exercise its right of first refusal no less than one year prior to the expiration date of this transmission service agreement. This transmission reservation priority for existing firm service customers is an ongoing right that may be exercised in the manner specified above at the end of all firm contract terms of five years or longer. This reservation priority only applies to the facilities of the Transmission Owner(s) where such facility costs have been included as part of the firm service rates that the firm service customer has been paying. If competing existing firm service requirements customers apply for service that cannot be fully provided, the priority rights will be ranked in accordance with first-come, first-served principles. If firm service customers tie, then the capacity for which they receive priority rights under this Tariff shall be apportioned on a pro rata basis.

## 3 Ancillary Services

As shown on Schedules 1 and 2, the Transmission Provider will provide Scheduling and Tariff Administration Service and will facilitate and arrange for the supply of Reactive Supply and Voltage Control from Generation or Other Sources Service. All Transmission Customers are required to purchase these two services from the Transmission Provider based on the charges in Schedules 1 and 2. In addition, the Transmission Owners may continue to provide Scheduling, System Control and Dispatch Services related to transmission service under this Tariff. Each Transmission Owner must maintain a schedule showing the charges for such services. Any amounts charged the Transmission Provider by a Transmission Owner for such service shall be passed through to the Transmission Customer without mark-up. Each Transmission Owner's schedules for Scheduling, System Control and Dispatch Service and for Reactive Supply and Voltage Control from Generation or Other Sources Service shall be available through the SPP OASIS.

The Transmission Provider also shall maintain the Ancillary Service schedules which provide (1) Regulation and Frequency Response Service, (2) Energy Imbalance Service, (3) Operating Reserve - Spinning Reserve Service, and (4) Operating Reserve - Supplemental Reserve Service as described under Schedules 3, 4, 5 and 6 respectively. Transmission Customers shall pay the Transmission Provider providing any of these services directly for the service. The Transmission Customer serving load within the SPP Balancing Authority Area is required to acquire these four Ancillary Services, whether from the Transmission Provider, from a third party, or by self-supply. The Transmission Customer may not decline the Transmission Provider’s offer of Ancillary Services unless it demonstrates that it has acquired the Ancillary Services from another source.

A Transmission Customer that exceeds its firm reserved capacity at any Point of Receipt or Point of Delivery or an Eligible Customer that uses Transmission Service at a Point of Receipt or Point of Delivery that it has not reserved is required to pay for all of the Ancillary Services identified in this section that were provided by the Transmission Provider associated with the unreserved service. The Transmission Customer or Eligible Customer will pay for Ancillary Services based on the amount of transmission service it used but did not reserve. The Transmission Provider shall determine whether the Transmission Customer has adequately demonstrated that it has acquired the Ancillary Services from another source. If the

Transmission Provider determines that the Transmission Customer is taking Ancillary Services that it has not paid for or otherwise has not made adequate arrangements for Ancillary Services, then the Transmission Provider may impose a penalty equal to 200% of the applicable Ancillary Service charge for the entire length of the reserved period but not exceeding one month.

A Transmission Customer that is serving load utilizing Network Integration Transmission Service will not require any additional transmission service arrangements for the delivery of Ancillary Services.

A Transmission Customer with load not served under Network Integration Transmission Service must have sufficient transmission service arrangements for the delivery of all services including Ancillary Services.

## 4 Open Access Same-Time Information System (OASIS)

Terms and conditions regarding the Open Access Same-Time Information System and standards of conduct are set forth in 18 CFR § 37 of the Commission's regulations (Open Access Same-Time Information Systems), 18 C.F.R. § 38 of the Commission's regulations (Business Practice Standards and Communication Protocols for Public Utilities), and 18 C.F.R. § 358 of the Commission's regulations (Standards of Conduct for Transmission Providers). In the event available transfer capability as posted on the OASIS is insufficient to accommodate a request for firm transmission service, additional studies may be required as provided by this Tariff pursuant to Sections 19 and 32.

The Transmission Provider shall post on OASIS and its public website an electronic link to all rules, standards and practices that (i) relate to the terms and conditions of transmission service, (ii) are not subject to a North American Energy Standards Board (NAESB) copyright restriction, and (iii) are not otherwise included in this Tariff. The Transmission Provider shall post on OASIS and on its public website an electronic link to the NAESB website where any rules, standards and practices that are protected by copyright may be obtained. The Transmission Provider shall also post on OASIS and on its public website an electronic link to a statement of the process by which the Transmission Provider shall add, delete or otherwise modify the rules, standard and practices that are not included in this Tariff. Such process shall set forth the means by which the Transmission Provider shall provide reasonable advance notice to Transmission Customers and Eligible Customers of any such additions, deletions or modifications, the associated effective date, and any additional implementation procedures that the Transmission Provider deems appropriate.

# 5 Local Furnishing Bonds

## 5.1 Transmission Owners That Own Facilities Financed by Local Furnishing or Other Tax-Exempt Bonds or that are Tax Exempt Entities:

This provision is applicable only to Transmission Owners that have financed facilities for the local furnishing of electric energy with tax-exempt bonds, as described in Section 142(f) of the Internal Revenue Code ("local furnishing bonds") or facilities with other bonds the interest on which is excluded from gross income under Section 103 of the Internal Revenue Code ("other tax-exempt bonds"), or that are tax-exempt entities, described in Section 501(c) of the Internal Revenue Code. Notwithstanding any other provision of this Tariff, the Transmission Provider shall not be required to provide transmission service to any Eligible Customer pursuant to this Tariff if the provision of such transmission service would jeopardize the tax-exempt status of any local furnishing bond(s) or other tax-exempt bonds used to finance a Transmission Owner's facilities that would be used in providing such transmission service or would jeopardize the tax-exempt status of the tax-exempt entity.

## 5.2 Alternative Procedures for Requesting Transmission Service:

(i) If the Transmission Provider determines that the provision of transmission service requested by an Eligible Customer would jeopardize the tax-exempt status of any local furnishing bond(s) or other tax-exempt bonds used to finance a Transmission Owner's facilities that would be used in providing such transmission service or would jeopardize the tax-exempt status of the Transmission Owner, the Transmission Provider shall advise the Eligible Customer within thirty (30) days of receipt of the Completed Application.

(ii) If the Eligible Customer thereafter renews its request for the same transmission service referred to in (i) by tendering an application under Section 211 of the Federal Power Act, the Transmission Provider and the relevant Transmission Owner, within ten (10) days of receiving a copy of the Section 211 application, will waive any rights to a request for service under Section 213(a) of the Federal Power Act and to the issuance of a proposed order under Section 212(c) of the Federal Power Act. The Commission, upon receipt of the Transmission Provider's and/or Transmission Owner's waiver of rights to a request for service under Section 213(a) of the Federal Power Act and to the issuance of a proposed order under Section 212(c) of the Federal Power Act, shall issue an order under Section 211 of the Federal Power Act. Upon issuance of the order under Section 211 of the Federal Power Act, the Transmission Provider shall be required to provide the requested transmission service over the affected Transmission Owner's facilities in accordance with the terms and conditions of this Tariff.

## 6 Reciprocity

A Transmission Customer receiving transmission service under this Tariff agrees to provide comparable transmission service that it is capable of providing to all the Transmission Owners on similar terms and conditions over facilities used for the transmission of electric energy in interstate commerce owned, controlled or operated by the Transmission Customer and over facilities used for the transmission of electric energy in interstate commerce owned, controlled or operated by the Transmission Customer's corporate Affiliates. A Transmission Customer that is a member of, or takes transmission service from, a power pool, Regional Transmission Group, Regional Transmission Organization (RTO), Independent System Operator (ISO) or other transmission organization approved by the Commission for the operation of transmission facilities also agrees to provide comparable transmission service to the transmission-owning members of such power pool and Regional Transmission Group, RTO, ISO or other transmission organization on similar terms and conditions over facilities used for the transmission of electric energy owned, controlled or operated by the Transmission Customer and over facilities used for the transmission of electric energy owned, controlled or operated by the Transmission Customer's corporate Affiliates.

This reciprocity requirement applies not only to the Transmission Customer that obtains transmission service under the Tariff, but also to all parties to a transaction that involves the use of transmission service under the Tariff, including the power seller, buyer and any intermediary, such as a power marketer. This reciprocity requirement also applies to any Eligible Customer that owns, controls or operates transmission facilities that uses an intermediary, such as a power marketer, to request transmission service under the Tariff. If the Transmission Customer does not own, control or operate transmission facilities, it must include in its Application a sworn statement of one of its duly authorized officers or other representatives that the purpose of its Application is not to assist an Eligible Customer to avoid the requirements of this provision

## 7 Billing and Payment

This Section 7 shall not apply to the Integrated Marketplace. All billing and payment matters associated with the Integrated Marketplace shall be as specified in Attachment AE.

**7.1 Billing Procedure**:

Within a reasonable time after the first day of each month, the Transmission Provider shall submit an invoice to the Transmission Customer for the charges for services furnished under the Tariff. The invoice shall be paid by the Transmission Customer within fifteen (15) days of receipt. All payments shall be made in immediately available funds payable to the Transmission Provider, or by wire transfer to a bank named by the Transmission Provider. Invoices may be issued using estimated data, to the extent actual data is not available by the fifth (5th) working day of the month following service. Adjustments reflecting the difference in billing between the estimated and actual data will be included on the next regular invoice, with such adjustment being due when that invoice is due. Any other corrections found to be necessary will be made on the next regular monthly invoice.

Bills will be adjusted to correct for all provable meter errors. Billing adjustments for reasons other than (a) the replacement of estimated data with actual data for service provided, or (b) provable meter error, shall be limited to those corrections and adjustments found to be appropriate for such service within one year after rendition of the bill reflecting the actual data for such service. Adjustments shall be made for any billing with a monetary impact in excess of 2% of the billing for the relevant period for an individual Transmission Customer or any aggregation thereof. At its sole discretion, the Transmission Provider may make billing adjustments for lesser amounts.

## 7.2 Interest on Unpaid Balances:

Interest on any unpaid amounts (not including amounts held by SPP as Financial Security) shall be calculated in accordance with the methodology specified for interest on refunds in the Commission's regulations at 18 C.F.R. § 35.19a(a)(2)(iii). Interest on delinquent amounts shall be calculated from the due date of the bill to the date of payment. When payments are made by mail, bills shall be considered as having been paid on the date of receipt by the Transmission Provider.

## 7.3 Financial Security Held By SPP:

All monies deposited by a Customer as Financial Security with SPP pursuant to the Credit Policy or otherwise will be held by SPP in a separate, interest-bearing, account in SPP's name and within SPP's sole control subject to the conditions and provisions in the Credit Policy. One Hundred percent (100%) of the interest earned will accrue to the benefit of that Customer. Interest shall be calculated from the date of the receipt of deposit until the date that the deposit is returned or converted into another form of Financial Security. When deposits are made by mail, they shall be considered having been paid on the date of receipt by the Transmission Provider.

## 7.4 Customer Default:

In the event the Transmission Customer fails, for any reason other than a billing dispute as described below, to make payment to the Transmission Provider on or before the due date as described above, and such failure of payment is not corrected within two (2) business days of receipt by the Transmission Customer of a written notice to cure such failure sent by the Transmission Provider, via any normal means of business communication, a default by the Transmission Customer shall be deemed to exist. The written notice to cure may be delivered by Certified mail, or by other means where receipt of the notice by the addressee is confirmed in writing. This notice shall include a copy of the unpaid invoice for which the accompanying notice is being sent to the Transmission Customer. Upon the occurrence of such a default, the Transmission Provider may initiate a proceeding with the Commission to terminate service but shall not terminate service until the Commission so approves any such request. Any such default or termination shall not relieve the Transmission Customer of its obligation to compensate the Transmission Provider for all amounts owed for the full term of the Service Agreement as if such default or termination had not occurred. In the event of a billing dispute between the Transmission Provider and the Transmission Customer, the Transmission Provider will continue to provide service under the Service Agreement as long as the Transmission Customer (i) continues to make all payments not in dispute, and (ii) pays into an escrow account the portion of the invoice in dispute, pending resolution of such dispute. If the Transmission Customer fails to meet these two requirements for continuation of service, then the Transmission Provider may provide notice to the Transmission Customer of its intent to suspend service in sixty (60) days, in accordance with Commission policy.

## 8 Accounting for Use of the Tariff

The Transmission Provider and Owner(s) shall record the following amounts, as outlined below, where applicable.

## 8.1 Study Costs and Revenues:

The Transmission Provider and each Transmission Owner shall include in a separate transmission operating expense account or subaccount, costs properly chargeable to expense that are incurred in the performance of any System Impact Studies or Facilities Studies which the Transmission Provider and/or the Transmission Owner(s) conduct or is(are) involved in to determine if construction of new facilities or upgrades are required for the uses of the Transmission Owner(s), including third party sales under the Tariff. The Transmission Provider and each Transmission Owner shall include in a separate operating revenue account or subaccount the revenues the Transmission Provider and Transmission Owner(s) received for its (their) role in conducting such System Impact Studies or Facilities Studies.

## 9 Regulatory Filings

Nothing contained in the Tariff or any Service Agreement shall be construed as affecting in any way the right of the Transmission Provider or Transmission Owner(s) to unilaterally make application to the Commission for a change in rates, terms and conditions, charges, classification of service, Service Agreement, rule or regulation under Section 205 of the Federal Power Act and pursuant to the Commission's rules and regulations promulgated thereunder; provided, however, the Transmission Provider and the Transmission Owners are restricted in their ability to make certain changes as detailed in the SPP Membership Agreement.

Nothing contained in the Tariff or any Service Agreement shall be construed as affecting in any way the ability of any Party receiving service under the Tariff to exercise its rights under the Federal Power Act and pursuant to the Commission's rules and regulations promulgated thereunder.

# 10 Force Majeure and Indemnification

**10.1 Force Majeure:**

An event of Force Majeure means any act of God, labor disturbance, act of the public enemy, war, insurrection, riot, fire, storm or flood, explosion, breakage or accident to machinery or equipment, any Curtailment, order, regulation or restriction imposed by governmental, military, or lawfully established civilian authorities, or any other cause beyond a Party's control. A Force Majeure event does not include an act of negligence or intentional wrongdoing. Neither the Transmission Provider, the Transmission Owner(s), nor the Transmission Customer will be considered in default as to any obligation under this Tariff if prevented from fulfilling the obligation due to an event of Force Majeure. However, a Party whose performance under this Tariff is hindered by an event of Force Majeure shall make all reasonable efforts to perform its obligations under this Tariff.

**10.2 Liability:**

(a) The Transmission Provider shall not be liable for money damages or other compensation to any Transmission Customer or Users for actions or omissions by the Transmission Provider or Transmission Owner in performing its obligations under this Tariff or any Service Agreement thereunder, except to the extent such act or omission by the Transmission Provider is found to result from its gross negligence or intentional wrongdoing.

(b) A Transmission Owner shall not be liable for money damages or other compensation to any Transmission Customer or Users for actions or omissions by such Transmission Owner or Transmission Provider in performing its obligations under this Tariff or any Service Agreement thereunder, except to the extent such act or omission by such Transmission Owner is found to result from its gross negligence or intentional wrongdoing.

(c) A Transmission Customer or Users may not seek to enforce any claims against the directors, members, shareholders, officers, employees or agents of the Transmission Provider or a Transmission Owner or Affiliate of either solely by reason of their status as directors, members, shareholders, officers, employees or agents of the Transmission Provider or a Transmission Owner or Affiliate of either. Notwithstanding the foregoing, a Transmission Customer or Users shall be liable to the Transmission Provider for all amounts owed for the full term of any Service Agreement under the Tariff.

(d) In no event shall the Transmission Provider, a Transmission Owner or any Transmission Customer or Users be liable for any incidental, consequential, punitive, special, exemplary or indirect damages, attorney's fees and costs, loss of revenues or profits, arising out of, or connected in any way with the performance or non-performance under this Tariff or any Service Agreement thereunder.

### 10.3 Indemnification:

The Transmission Customer shall at all times indemnify, defend, and save the Transmission Provider and Transmission Owner(s) harmless from, any and all damages, losses, claims, including claims and actions relating to injury to or death of any person or damage to property, demands, suits, recoveries, costs and expenses, court costs, attorney fees, and all other obligations by or to third parties, arising out of or resulting from the Transmission Provider's or Transmission Owner's(s') performance of obligations under this Tariff on behalf of the Transmission Customer, except in cases of gross negligence or intentional wrongdoing by the Transmission Provider or a Transmission Owner. If the Transmission Provider engages in gross negligence or intentional wrongdoing, but the Transmission Owner(s) does (do) not, that will not affect the indemnification of the Transmission Owner(s) under this Section 10.3 and vice-versa.

**10.4 Further Limitation of Liability:**

Neither the Transmission Owner nor the Transmission Provider shall be liable for damages arising out of services provided under this Tariff including, but not limited to any act or omission that results in an interruption, deficiency or imperfection of service, occurring as a result of conditions or circumstances beyond the control of the Transmission Owner or Transmission Provider, as applicable, or resulting from electric system design common to the domestic electric utility industry or electric system operation practices or conditions common to domestic electric utility industry. Transmission Owners shall not be liable for acts or omissions done in compliance or good faith attempts to comply with directives of Transmission Provider.

### 10.5 Transmission Provider Recovery:

To the extent that the Transmission Provider is required to pay any money damages or compensation or pay amounts due to its indemnification of any other party, the Transmission Provider shall be allowed to recover any such amounts (subject to crediting all amounts recovered by Transmission Provider through insurance or through any indemnification it receives) under Schedule 1-A of this Tariff as part of the Administrative Charges, provided that the cap in Schedule 1-A shall not apply to or prohibit the recovery of these amounts.

## 10.6 Limitation on Claims:

Except as otherwise specified in Section 7.1 of this Tariff or Sections 10.1 or 10.3 of Attachment AE to this Tariff, or as may be required to comply with the requirements of this Tariff or applicable Commission directives:

(a) No claim seeking an adjustment in the billing for any service, transaction, or charge under the Tariff may be asserted if more than two years has elapsed since the first date upon which the billing for that week or month occurred. The Transmission Provider shall make no adjustment to billing with respect to any service, transaction, or charge under this Tariff if more than two years has elapsed since the first date upon which the billing for that week or month occurred, unless a claim seeking such adjustment had been received by the Transmission Provider prior to the end of the two-year period.

(b) For claims that arose prior to the effective date of Section 10.6 of the Tariff, the claimant shall have two years from the effective date of Section 10.6 to assert such claims.

## 11. Creditworthiness:

The Transmission Provider will specify its Creditworthiness procedures in Attachment X.

# 12 Dispute Resolution Procedures

**12.1 Internal Dispute Resolution Procedures:**

Any dispute between a Transmission Customer and the Transmission Provider involving transmission service under the Tariff (excluding applications for rate changes or other changes to the Tariff, or to any Service Agreement entered into under the Tariff, which shall be presented directly to the Commission for resolution) shall be referred to a designated senior representative of the Transmission Provider and a senior representative of the Transmission Customer for resolution on an informal basis as promptly as practicable. In the event the designated representatives are unable to resolve the dispute within thirty (30) days [or such other period as the Parties may agree upon] by mutual agreement, such dispute may be submitted to arbitration and resolved in accordance with the arbitration procedures set forth below.

## 12.2 External Arbitration Procedures:

Any arbitration initiated under the Tariff shall be conducted before a single neutral arbitrator appointed by the Parties. If the Parties fail to agree upon a single arbitrator within ten (10) days of the referral of the dispute to arbitration, each Party shall choose one arbitrator who shall sit on a three-member arbitration panel, except that if more than two Parties are involved, the Parties shall agree on procedures to choose these two arbitrators. If the Parties are unable to agree, then the American Arbitration Association shall be asked to appoint the arbitrator(s) who must be knowledgeable in matters involving the electric power industry. The two arbitrators so chosen shall within twenty (20) days select a third arbitrator to chair the arbitration panel. In either case, the arbitrators shall be knowledgeable in electric utility matters, including electric transmission and bulk power issues, and shall not have any current or past substantial business or financial relationships with any party to the arbitration (except prior arbitration). The arbitrator(s) shall provide each of the Parties an opportunity to be heard and, except as otherwise provided herein, shall generally conduct the arbitration in accordance with the Commercial Arbitration Rules of the American Arbitration Association and any applicable Commission regulations or Regional Transmission Group rules.

### 12.3 Arbitration Decisions:

Unless otherwise agreed, the arbitrator(s) shall render a decision within ninety (90) days of appointment and shall notify the Parties in writing of such decision and the reasons therefore. The arbitrator(s) shall be authorized only to interpret and apply the provisions of the Tariff and any Service Agreement entered into under the Tariff and shall have no power to modify or change any of the above in any manner. The decision of the arbitrator(s) shall be final and binding upon the Parties, and judgment on the award may be entered in any court having jurisdiction; provided, however, that final decisions with the Federal Government as one of the parties are nonbinding. The decision of the arbitrator(s) may be appealed solely on the grounds that the conduct of the arbitrator(s), or the decision itself, violated the standards set forth in the Federal Arbitration Act and/or the Administrative Dispute Resolution Act. The final decision of the arbitrator must also be filed with the Commission if it affects jurisdictional rates, terms and conditions of service or facilities.

**12.4 Costs:**

Each Party shall be responsible for its own costs, including its attorney's fees and costs, incurred during the arbitration process and for the following costs, if applicable:

(i) the cost of the arbitrator chosen by the Party or Parties to sit on the three member panel and its equal share of the cost of the third arbitrator chosen; or

(ii) its equal share of the cost of the single arbitrator jointly chosen by the Parties.

## 12.5 Rights Under The Federal Power Act:

Nothing in this section shall restrict the rights of any party to file a Complaint with the Commission under relevant provisions of the Federal Power Act.

# II. POINT-TO-POINT TRANSMISSION SERVICE

Preamble

The Transmission Provider will provide Firm and Non-Firm Point-To-Point Transmission Service pursuant to the applicable terms and conditions of this Tariff. Point-To-Point Transmission Service is for the receipt of capacity and energy at designated Point(s) of Receipt and the transfer of such capacity and energy to designated Point(s) of Delivery.

# 13 Nature of Firm Point-To-Point Transmission Service

**13.1 Term:**

The minimum term of Firm Point-To-Point Transmission Service shall be one day and the maximum term shall be specified in the Service Agreement.

**13.2 Reservation Priority:**

(i) Long-Term Firm Point-To-Point Transmission Service shall be available based on the results of an aggregate study. Requests will be aggregated during an open season and all Point-To-Point service requests and designated network resource requests received during that time shall be deemed received at the same time if they are not using a contractually limited interface (e.g. a DC-Tie). For contractually limited interfaces, the first-come, first-served principles shall apply for the purpose of allocating limited interface capacity only. The allocation of remaining ATC on contractually limited interfaces shall occur as if all requests are received at the same time.

(ii) Reservations for Short-Term Firm Point-To-Point Transmission Service will be conditional based upon the length of the requested transaction or reservation and relative impact on available transfer capability. However, Pre-Confirmed Applications for Short-Term Point-To-Point Transmission Service will receive priority over earlier-submitted requests that are not Pre-Confirmed and that have equal or shorter duration. Among requests or reservations with the same duration, as relevant, and pre-confirmation status (pre-confirmed, confirmed or not confirmed), priority will be given to an Eligible Customer's request or reservation that offers the highest price, followed by the date and time of the request or reservation.

(iii) If the Transmission System becomes oversubscribed, requests for service may preempt competing reservations up to the following conditional reservation deadlines: one day before the commencement of daily service, one week before the commencement of weekly service, and one month before the commencement of monthly service. This right of preemption only applies, however, if the longer term service involves the same Points of Receipt and Delivery as the shorter term service. Before the conditional reservation deadline, if available transfer capability is insufficient to satisfy all requests and reservations, an Eligible Customer with a reservation for shorter term service or equal duration service with a

lower price has the right of first refusal to match any longer term request or equal duration service with a higher price before losing its reservation priority. A longer term competing request for Short-Term Firm Point-To-Point Transmission Service will be granted if the Eligible Customer with the right of first refusal does not agree to match the competing request within 24 hours (or earlier if necessary to comply with the scheduling deadlines provided in Section 13.8) from being notified by the Transmission Provider of a longer-term competing request for Short-Term Firm Point-To-Point Transmission Service. When a longer duration request preempts multiple shorter duration reservations, the shorter duration reservations shall have simultaneous opportunities to exercise the right of first refusal. Duration, price and time of response will be used to determine the order by which the multiple shorter duration reservations will be able to exercise the right of first refusal. After the conditional reservation deadline, service will commence pursuant to the terms of Part II of the Tariff. Firm Point-To-Point Transmission Service will always have a reservation priority over Non-Firm Point-To-Point Transmission Service under the Tariff or non-firm transmission service under Grandfathered Agreements. All Long-Term Firm Point-To-Point Transmission Service will have equal reservation priority with Native Load Customers and Network Customers. Reservation priorities for existing firm service customers are provided in Section 2.2.

### 13.3 Use of Firm Transmission Service by the Transmission Owners:

Each Transmission Owner will be subject to the rates, terms and conditions of Part II of the Tariff when making third-party sales under (i) agreements executed on or after the Effective Date of the Tariff or (ii) agreements executed prior to the aforementioned date that the Commission requires to be unbundled after the Effective Date of the Tariff.

**13.4 Service Agreements:**

The Transmission Provider shall offer a standard form Firm Point-To-Point Transmission Service Agreement (Attachment A) to an Eligible Customer when it submits a Completed Application for Long-Term Firm Point-To-Point Transmission Service. The Transmission Provider shall offer a standard form Firm Point-To-Point Transmission Service Agreement (Attachment A) to an Eligible Customer when it first submits a Completed Application for Short-Term Firm Point-To-Point Transmission Service pursuant to the Tariff. Transactions under the Short-Term Firm Point-To-Point Transmission Service Agreement shall be arranged by providing the information listed in Section 17.2 of the Tariff and on the confirmation sheet contained in Attachment Q. Executed Service Agreements that contain the information required under the Tariff shall be filed with the Commission in compliance with applicable Commission regulations. An Eligible Customer that uses Transmission Service at a Point of Receipt or Point of Delivery that it has not reserved and that has not executed a Service Agreement will be deemed, for purposes of assessing any appropriate charges and penalties, to have executed the appropriate Service Agreement.

**13.5 Transmission Customer Obligations for Facility Additions or Redispatch Costs:**

In cases where the Transmission Provider determines that the Transmission System is not capable of providing Firm Point-To-Point Transmission Service without (1) degrading or impairing the reliability of service to Native Load Customers, Network Customers and other Transmission Customers taking Firm Point-To-Point Transmission Service, or (2) interfering with a(the) Transmission Owner's(s') ability to meet prior firm contractual commitments to others, the relevant Transmission Owner(s) will be obligated to expand or upgrade its (their) Transmission System(s) pursuant to the terms of Section 15.4 of this Tariff. The Transmission Customer must agree to pay the Transmission Provider for any necessary transmission facility additions pursuant to the terms of Section 27 of this Tariff. Network Upgrade or Direct Assignment Facilities costs to be charged to the Transmission Customer on an incremental basis under the Tariff will be specified in the Service Agreement prior to initiating service. To the extent that the Transmission Provider can relieve a system constraint by redispatching resources registered to participate in the Energy and Operating Reserve Markets, it shall do so. Any redispatch costs incurred to relieve a system constraint to be charged to the Transmission Customer shall be collected and paid as part of the Energy and Operating Reserve Market settlement procedures described under Attachment AE of this Tariff. Transmission Customers having Firm Point-To-Point Transmission Service subject to redispatch will be eligible to nominate Candidate Auction Revenue Rights associated with that service only for those times of the year and for only the amounts of service that are not subject to redispatch. Long-Term Firm Point-to-Point Transmission Service with a redispatch requirement will not be eligible for any Candidate Long-Term Congestion Rights because it does not have continuous service covering the entirety of the associated Transmission Congestion Right year.

**13.6 Curtailment of Firm Transmission Service:**

In the event that a Curtailment on the Transmission Provider's Transmission System, or a portion thereof, is required to maintain reliable operation of such System and the systems directly and indirectly connected with the Transmission System, Curtailments will be made on a non-discriminatory basis to the transaction(s) that effectively relieve the constraint. The Transmission Provider may elect to implement such Curtailments pursuant to the Transmission Loading Relief procedures specified in Attachment R. If multiple transactions require Curtailment, to the extent practicable and consistent with Good Utility Practice, the Transmission Provider will curtail (or cause to be curtailed) service to Network Customers and Transmission Customers taking Firm Point-To-Point Transmission Service on a basis comparable to the curtailment of service to the Transmission Owner's(s') Native Load Customers, and to transmission customers taking firm transmission service under Grandfathered Agreements. All Curtailments will be made on a non-discriminatory basis; however, Non-Firm Point-To-Point Transmission Service as well as any non-firm transmission service provided under Grandfathered Agreements shall be subordinate to Firm Point-To-Point Transmission Service. When the Transmission Provider determines that an electrical emergency exists on the Transmission System and implements emergency procedures to curtail firm Transmission Service, the Transmission Customer shall make the required reductions upon request of the Transmission Provider. However, the Transmission Provider reserves the right to curtail or to effect the Curtailment of, in whole or in part, any firm Transmission Service provided under the Tariff when, in the Transmission Provider's sole discretion, an emergency or other unforeseen condition impairs or degrades the reliability of the Transmission System. The Transmission Provider will notify all affected Transmission Customers in a timely manner of any scheduled Curtailments. In the event that the Transmission Customer fails to cease or reduce service in response to a directive by the Transmission Provider, the Transmission Customer shall pay any applicable charges and the following penalty (in addition to the charges for all of

the firm capacity used): 100% of the Firm Point-To-Point Transmission Service charges under Schedules 7 and 11 for the entire length of the reserved period but not exceeding one month. This penalty shall apply only to the portion of the service that the Transmission Customer fails to curtail in response to a Curtailment directive.

**13.7 Classification of Firm Transmission Service:**

(a) The Transmission Customer taking Firm Point-To-Point Transmission Service may (1) change its Receipt and Delivery Points to obtain service on a non-firm basis consistent with the terms of Section 22.1 or (2) request a modification of the Points of Receipt or Delivery on a firm basis pursuant to the terms of Section 22.3.

(b) The Transmission Customer may purchase transmission service to make sales of capacity and energy from multiple generating units that are interconnected to the Transmission Provider's Transmission System. For such a purchase of transmission service, the resources will be designated as multiple Points of Receipt, unless (i) the multiple generating units are at the same generating plant in which case the units would be treated as a single Point of Receipt, or (ii) the generating units or plants comprise a registered Resource Hub as defined in Attachment AE in which case the units or plants also would be considered as a single Point of Receipt. In the event of a change in the ownership or control of generation resources previously aggregated as a single Point of Receipt under this provision, such generation may be disaggregated and treated as multiple Points of Receipt, provided that all other terms of this Tariff and the Service Agreement are met.

(c) The Transmission Provider shall provide firm deliveries of capacity and energy from the Point(s) of Receipt to the Point(s) of Delivery. Each Point of Receipt at which firm transfer capability is reserved by the Transmission Customer shall be set forth in the Firm Point-To-Point Service Agreement for long-term firm Transmission Service along with a corresponding capacity reservation associated with each Point of Receipt. Points of Receipt and corresponding capacity reservations shall be as mutually agreed upon by the Parties for short-term firm Transmission. Each Point of Delivery at which firm transfer capability is reserved by the Transmission Customer shall be set forth in the Firm Point-To-Point Service Agreement for long-term firm Transmission Service along with a

corresponding capacity reservation associated with each Point of Delivery. Points of Delivery and corresponding capacity reservations shall be as mutually agreed upon by the Parties for short-term firm Transmission Service. The greater of either (1) the sum of the capacity reservations at the Point(s) of Receipt, or (2) the sum of the capacity reservations at the Point(s) of Delivery shall be the Transmission Customer's Reserved Capacity. The Transmission Customer will be billed for its Reserved Capacity under the terms of Schedules 7 and 11. The Transmission Customer may not exceed its firm capacity reserved at each Point of Receipt and each Point of Delivery except as otherwise specified in Section 22. In the event that a Transmission Customer (including third-party sales by a Transmission Owner) exceeds its firm reserved capacity at any Point of Receipt or Point of Delivery or uses Transmission Service at a Point of Receipt or Point of Delivery that it has not reserved, except for an MSR under instruction as specified in Section 2.17 of Attachment AE, the Transmission Customer shall pay the following penalty (in addition to the applicable charges for all of the firm capacity actually used): 100% of the Firm Point-To-Point Transmission Service charges under Schedules 7 and 11 for the period for which the unreserved service was actually used. The charges for the unreserved service shall be based upon the duration of the period when the unreserved capacity was used. For example, one hour shall be billed at the charge for weekday deliveries, repeated daily use of unreserved capacity within a seven day period shall increase the duration of the period to a weekly duration and multiple instances of unreserved use during more than one seven day period during a calendar month shall increase the duration of the period to a monthly duration. The Transmission Provider shall compensate the Transmission Owners for 100% of the (i) Firm Point-To-Point Transmission Service charge, (ii) Base Plan Zonal Charge and (iii) Region-wide Charge for the period for which they have provided service. The penalty revenues in excess of the amount distributed to Transmission Owners shall be used to reduce the

Schedule 1-A1 charges collected by the Transmission Provider from the Transmission Customers. All Transmission Customers, except the penalized Transmission Customer, shall receive a reduction of Schedule 1-A1 charges pursuant to this section. Such penalty revenues shall be distributed by the Transmission Provider to Transmission Customers on a pro-rata basis of each Transmission Customer's monthly Schedule 1-A1 charge, except for the penalized Transmission Customer, for the next billing period ending at least 15 calendar days after the date the Transmission Provider collects the penalty revenues from the penalized Transmission Customer. For the amounts exceeding reserved capacity, the Transmission Customer also must purchase losses as required by this Tariff.

**13.8 Scheduling of Firm Point-To-Point Transmission Service**:

All scheduling practices and schedules submitted by Transmission Customers will comply with applicable North American Electric Reliability Council Policies and SPP Criteria. Transmission Customers shall submit all schedules electronically in a form specified by the Transmission Provider. Schedules for the Transmission Customer's Firm Point-To-Point Transmission Service associated with transactions into, out of or through the SPP Balancing Authority Area must be submitted to the Transmission Provider in accordance with the times in Attachment P. Schedules submitted after the applicable time specified on Attachment P will be accommodated, if practicable. Customers may schedule intra-hour Firm Point-To-Point Transmission Service in whole-minute increments. Hour-to-hour and intra-hour schedules of any capacity and energy that is to be delivered must be stated in increments of 1,000 kW per hour. Transmission Customers within a Transmission Owner's service area with multiple requests for Transmission Service at a Point of Receipt, each of which is under 1,000 kW per hour, may consolidate their service requests at a common point of receipt into units of 1,000 kW per hour for scheduling and billing purposes. Scheduling changes will be accommodated as provided in Attachment P. However, in the event of a system contingency such as a generation or transmission outage, or curtailment or interruption of transmission service, scheduling changes will be implemented as soon as practicable. The Transmission Provider will furnish to the Delivering Party's system operator, hour-to-hour and intra-hour schedules equal to those furnished by the Receiving Party and shall deliver the capacity and energy provided by the Delivering Party. Should the Transmission Customer, Delivering Party or Receiving Party revise or terminate any schedule, such party shall immediately notify the Transmission Provider, and the Transmission Provider shall have the right to adjust accordingly the schedule for capacity and energy to be received and to be delivered.

# 14 Nature of Non-Firm Point-To-Point Transmission Service

**14.1 Term:**

Non-Firm Point-To-Point Transmission Service will be available for periods ranging from one (1) hour to one (1) month. However, a Purchaser of Non-Firm Point-To-Point Transmission Service will be entitled to reserve a sequential term of service (such as a sequential monthly term without having to wait for the initial term to expire before requesting another monthly term) so that the total time period for which the reservation applies is greater than one month, subject to the requirements of Section 18.3.

**14.2 Reservation Priority**:

Non-Firm Point-To-Point Transmission Service shall be available from transfer capability in excess of that needed for reliable service to Native Load Customers, Network Customers, and other Transmission Customers taking Long-Term and Short-Term Firm Point-To-Point Transmission Service and customers under other transmission tariffs or agreements taking network or firm point-to-point transmission service from the Transmission Owner(s). A higher priority will be assigned first to requests or reservations with a longer duration of service involving the same Points of Receipt and Delivery and second to Pre-Confirmed Applications. In the event the Transmission System is constrained, competing requests of the same Pre-Confirmation status and equal duration involving the same Points of Receipt and Delivery will be prioritized based on the highest price offered by the Eligible Customer for the Transmission Service; provided, however, this provision assigning priority based upon the highest price offered shall not affect the priority of transmission contracts not under this Tariff. Eligible Customers that have already reserved shorter term service have the right of first refusal to match any longer term request before being preempted. A longer term competing request for Non-Firm Point-To-Point Transmission Service will be granted if the Eligible Customer with the right of first refusal does not agree to match the competing request: (a) immediately for hourly Non-Firm Point-To-Point Transmission Service after notification by the Transmission Provider; and (b) within 24 hours (or earlier if necessary to comply with the scheduling deadlines provided in Section 14.6) for Non-Firm Point-To-Point Transmission Service other than hourly transactions after notification by the Transmission Provider. Transmission service for Network Customers and for network customers under Grandfathered Agreements involving the affected Transmission Owner(s) from resources other than designated Network Resources will have a higher priority than any Non-Firm Point-To-Point Transmission Service. Non-Firm Point-To-Point Transmission Service over secondary Point(s) of Receipt and Point(s) of Delivery will have the second lowest reservation priority under the Tariff, and Non-Firm Point-To-Point Transmission Service used

for Next-Hour-Market Service will have the lowest reservation priority under the Tariff.

### 14.3 Use of Non-Firm Point-To-Point Transmission Service by the Transmission Owner(s):

Each Transmission Owner will be subject to the rates, terms and conditions of Part II of the Tariff when making third-party sales under (i) agreements executed on or after the Effective Date of the Tariff or (ii) agreements executed prior to the aforementioned date that the Commission requires to be unbundled after the Effective Date of the Tariff.

**14.4 Service Agreements:**

The Transmission Provider shall offer a standard form Non-Firm Point-To-Point Transmission Service Agreement (Attachment B) to an Eligible Customer when it first submits a Completed Application for Non-Firm Point-To-Point Transmission Service pursuant to the Tariff. Transactions under this Non-Firm Point-To-Point Transmission Service Agreement shall be arranged by providing the information on the confirmation sheet which is contained in Attachment Q. Executed Service Agreements that contain the information required under the Tariff shall be filed with the Commission in compliance with applicable Commission regulations.

**14.5 Classification of Non-Firm Point-To-Point Transmission Service:**

Non-Firm Point-To-Point Transmission Service shall be offered under terms and conditions contained in Part II of the Tariff. The Transmission Provider and Transmission Owners undertake no obligation under the Tariff to plan the Transmission System in order to have sufficient capacity for Non-Firm Point-To-Point Transmission Service. Parties requesting Non-Firm Point-To-Point Transmission Service for the transmission of firm power do so with the full realization that such service is subject to availability and to Curtailment or Interruption under the terms of the Tariff. The Transmission Customer will be billed for its Reserved Capacity under the terms of Schedules 8 and 11. In the event that a Transmission Customer (including third-party sales by a Transmission Owner) exceeds its non-firm capacity reservation, except for an MSR under instruction as specified in Section 2.17 of Attachment AE, the Transmission Customer shall pay the following penalty (in addition to the charges for all of the non-firm capacity used): 100% of the Non-Firm Point-To-Point Transmission Service charges under Schedules 8 and 11 for the duration of the period when the additional service was used as specified below not to exceed one month for the amount in excess of such capacity reservation. An excess of one hour or less shall be billed at the charge for weekday deliveries, repeated daily use of unreserved capacity within a seven day period shall increase the duration of the period to a weekly duration and multiple instances of unreserved use during more than one seven day period during a calendar month shall increase the duration of the period to a monthly duration. The Transmission Provider shall compensate the Transmission Owners for 100% of the (i) Non-Firm Point-To-Point Transmission Service charge, (ii) Base Plan Zonal Charge and (iii) Region-wide Charge for the period for which they have provided service. The penalty revenues in excess of the amount distributed to Transmission Owners shall be used to reduce the Schedule 1-A1 charges collected by the Transmission Provider from the Transmission Customers. All Transmission Customers, except the penalized Transmission Customer, shall receive a reduction of Schedule 1-A1 charges pursuant to this section. Such penalty revenues shall be distributed by the Transmission Provider to Transmission Customers on a pro-rata basis of each Transmission Customer's monthly Schedule 1-A1 charge, except for the penalized Transmission Customer, for the next billing period ending at least 15

calendar days after the date the Transmission Provider collects the penalty revenues from the penalized Transmission Customer. For the amounts exceeding the non-firm capacity reservation, the Transmission Customer must purchase losses as required by this Tariff. Non-Firm Point-To-Point Transmission Service shall include transmission of energy on an hourly basis and transmission of scheduled short-term capacity and energy on a daily, weekly or monthly basis, but not to exceed one month's reservation for any one Application, under Schedules 8 and 11.

**14.6 Scheduling of Non-Firm Point-To-Point Transmission Service:**

All scheduling practices and schedules submitted by Transmission Customers will be consistent with applicable North American Electric Reliability Council Policies and SPP Criteria. Transmission Customers shall submit all schedules electronically in a form specified by the Transmission Provider. Schedules for Non-Firm Point-To-Point Transmission Service, other than for Next-Hour-Market Service, associated with transactions into, out of or through the SPP Balancing Authority Area must be submitted to the Transmission Provider in accordance with the times in Attachment P. Schedules submitted after the applicable time specified in Attachment P will be accommodated if practicable. Schedules for Non-Firm Point-To-Point Transmission Service for Next-Hour-Market Service must be submitted to the Transmission Provider no later than 20 minutes and no earlier than 60 minutes before the start of the next clock hour. Schedules submitted less than 20 minutes prior to the start of the next clock hour will be accommodated, if practicable. Customers may schedule intra-hour Non-Firm Point-To-Point Transmission Service in whole-minute increments. Hour-to-hour and intra-hour schedules of energy that is to be delivered must be stated in increments of 1,000 kW per hour. Transmission Customers within a Transmission Owner's service area with multiple requests for Transmission Service at a Point of Receipt, each of which is under 1,000 kW per hour, may consolidate their schedules at a common Point of Receipt into units of 1,000 kW per hour. Scheduling changes will be accommodated in accordance with Attachment P. The Transmission Provider will furnish to the Delivering Party's system operator, hour-to-hour and intra-hour schedules equal to those furnished by the Receiving Party and shall deliver the capacity and energy provided by the Delivering Party. Should the Transmission Customer, Delivering Party or Receiving Party revise or terminate any schedule, such party shall immediately notify the Transmission Provider, and the Transmission Provider shall have the right to adjust accordingly the schedule for capacity and energy to be received and to be delivered.

**14.7 Curtailment or Interruption of Service:**

The Transmission Provider reserves the right to curtail (or cause to be Curtailed), in whole or in part, Non-Firm Point-To-Point Transmission Service provided under the Tariff for reliability reasons when, an emergency or other unforeseen condition threatens to impair or degrade the reliability of the Transmission System or the systems directly or indirectly interconnected with the Transmission Provider's Transmission System. The Transmission Provider may elect to implement such Curtailments pursuant to the Transmission Loading Relief procedures specified in Attachment R. The Transmission Provider reserves the right to Interrupt(or to effect the Interruption of), in whole or in part, Non-Firm Point-To-Point Transmission Service provided under the Tariff for economic reasons in order to accommodate (1) a request for firm Transmission Service under this Tariff or for firm transmission service provided by a Transmission Owner under a Grandfathered Agreement, (2) a request for Non-Firm Point-To-Point Transmission Service, from the same Point of Receipt to the same Point of Delivery, of greater duration under this Tariff or for non-firm transmission of greater duration provided by a Transmission Owner under a Grandfathered Agreement, (3) a request for Non-Firm Point-To-Point Transmission Service, from the same Point of Receipt to the same Point of Delivery, of equal duration with a higher price under this Tariff or for non-firm transmission of equal duration, from the same Point of Receipt to the same Point of Delivery, with a higher price provided by a Transmission Owner under a Grandfathered Agreement, or (4) transmission service for Network Customers from non-designated resources under this Tariff or under a Grandfathered Agreement. Point-To-Point Transmission Service for Next-Hour-Market Service will always have the lowest priority. The Transmission Provider also will discontinue or reduce service to the Transmission Customer to the extent that deliveries for transmission are discontinued or reduced at the Point(s) of Receipt. Where required, Curtailments or Interruptions will be made on a non-discriminatory basis to the transaction(s) that effectively relieve the constraint; however, Non-Firm Point-To-Point Transmission Service shall be subordinate to

firm Transmission Service under this Tariff or firm transmission service provided by a Transmission Owner under Grandfathered agreements. If multiple transactions require Curtailment or Interruption, to the extent practicable and consistent with Good Utility Practice, Curtailments or Interruptions will be made first to Next-Hour-Market Service and then to remaining transactions beginning with those to transactions of the shortest term (e.g., hourly non-firm transactions will be Curtailed or Interrupted before daily non-firm transactions and daily non-firm transactions will be Curtailed or Interrupted before weekly non-firm transactions). Transmission service for Network Customers from resources other than designated Network Resources will have a higher priority than any Non-Firm Point-To-Point Transmission Service under the Tariff. Non-Firm Point-To-Point Transmission Service over secondary Point(s) of Receipt and Point(s) of Delivery will have a higher priority than Next-Hour-Market Service, but will have a lower priority than any other Non-Firm Point-To-Point Transmission Service under the Tariff. The Transmission Provider will provide advance notice of Curtailment or Interruption where such notice can be provided consistent with Good Utility Practice. In the event that the Transmission Customer fails to cease or reduce service in response to a directive by the Transmission Provider, the Transmission Customer shall pay any applicable charges and the following penalty (in addition to the charges for all of the non-firm capacity used): 100% of the Non-Firm Point-To-Point Transmission Service charge under Schedules 8 and 11 for the entire length of the reserved period not to exceed one month for the amount in excess of such capacity reservation. This penalty shall apply only to the portion of the service that the Transmission Customer fails to curtail in response to a Curtailment directive.

# 15 Service Availability

## 15.1 General Conditions:

The Transmission Provider will provide Firm and Non-Firm Point-To-Point Transmission Service over, on or across its Transmission System to any Transmission Customer that has met the requirements of Section 16.

## 15.2 Determination of Available Transfer Capability:

A description of the Transmission Provider's specific methodology for assessing available transfer capability posted on the Transmission Provider's OASIS (Section 4) is contained in Attachment C of the Tariff. In the event sufficient transfer capability may not exist to accommodate a Short Term Service request, the Transmission Provider will respond by offering to perform or cause to be performed a System Impact Study. Long-Term Service requests will be evaluated by the Transmission Provider through an Aggregate Transmission Service Study in accordance with the procedures set forth in Attachment Z1 to this Tariff.

### 15.3 Initiating Service in the Absence of an Executed Service Agreement:

If the Transmission Provider and the Transmission Customer requesting Firm or Non-Firm Point-To-Point Transmission Service cannot agree on all the terms and conditions of the Point-To-Point Service Agreement, the Transmission Provider shall file with the Commission, within thirty (30) days after the date the Transmission Customer provides written notification directing the Transmission Provider to file, an unexecuted Point-To-Point Service Agreement containing terms and conditions deemed appropriate by the Transmission Provider for such requested Transmission Service. The Transmission Provider shall commence providing Transmission Service subject to the Transmission Customer agreeing to (i) compensate the Transmission Provider at whatever rate the Commission ultimately determines to be just and reasonable, and (ii) comply with the terms and conditions of the Tariff including posting appropriate Financial Security in accordance with the terms of Section 17.3.

**15.4 Obligation to Provide Transmission Service that Requires Expansion or Modification of the Transmission System:**

If the Transmission Provider determines that it cannot accommodate a Completed Application for Firm Point-To-Point Transmission Service because of insufficient capability on the Transmission System, the Transmission Provider and the affected Transmission Owner(s) will use due diligence to expand or modify the Transmission System to provide the requested firm Transmission Service, consistent with its planning obligations in Attachment O, provided the Transmission Customer agrees to compensate the Transmission Provider for such costs pursuant to the terms of Section 27. The Transmission Provider and the affected Transmission Owner(s) will conform to Good Utility Practice and its planning obligations in Attachment O, in determining the need for new facilities and in the design and construction of such facilities. The obligation applies only to those facilities that the affected Transmission Owner(s) has (have) the right to expand or modify.

**15.5 Deferral of Service:**

The Transmission Provider may defer providing service until construction is completed of new transmission facilities or upgrades needed to provide Firm Point-To-Point Transmission Service whenever the Transmission Provider determines that providing the requested service would, without such new facilities or upgrades, impair or degrade reliability to any existing firm services.

## 15.6 Other Transmission Service Schedules:

Eligible Customers receiving transmission service under Grandfathered Transactions may continue to receive transmission service under those agreements until such time as those agreements may be modified by the Commission.

### 15.7 Real Power Losses:

Real power losses are associated with all Transmission Service. As stated in Schedules 7 and 8, the Transmission Customer shall be responsible for any real power losses in accordance with Attachment M.

# 16 Transmission Customer Responsibilities

## 16.1 Conditions Required of Transmission Customers:

Point-To-Point Transmission Service shall be provided under this Tariff only if the following conditions are satisfied by the Transmission Customer:

a. The Transmission Customer has pending a Completed Application for service;

b. The Transmission Customer meets the creditworthiness criteria set forth in Section 11;

c. The Transmission Customer will have arrangements in place for any other transmission service necessary to effect the delivery from the generating source to the Transmission Provider prior to the time service under Part II of the Tariff commences;

d. The Transmission Customer agrees to pay for any facilities constructed and chargeable to such Transmission Customer under Part II of the Tariff, whether or not the Transmission Customer takes service for the full term of its reservation;

e. The Transmission Customer provides the information required by the Transmission Provider's planning process established in Attachment O; and

f. The Transmission Customer has executed a Point-To-Point Service Agreement or has agreed to receive service pursuant to Section 15.3.

**16.2 Transmission Customer Responsibility for Third-Party Arrangements:**

Any scheduling arrangements that may be required by other electric systems shall be the responsibility of the Transmission Customer requesting service. The Transmission Customer shall provide, unless waived by the Transmission Provider, notification to the Transmission Provider identifying such systems and authorizing them to schedule the capacity and energy to be transmitted by the Transmission Provider pursuant to Part II of the Tariff on behalf of the Receiving Party at the Point of Delivery or the Delivering Party at the Point of Receipt. However, the Transmission Provider will undertake reasonable efforts to assist the Transmission Customer in making such arrangements, including without limitation, providing any information or data required by such other electric system pursuant to Good Utility Practice.

# 17 Procedures for Arranging Firm Point-To-Point Transmission Service

**17.1 Application:**

A request for Firm Point-To-Point Transmission Service for periods of one year or longer must be submitted on the Transmission Provider's OASIS, consistent with Section 2.2, no later than one year prior to the end of the term of its firm transmission contract for renewals under Section 2.2 and for new Long-Term Service in accordance with Attachment Z1. The Transmission Provider will consider requests for such firm service on shorter notice when feasible. Requests for firm service for periods of less than one year shall be subject to expedited procedures that shall be negotiated between the Parties within the time constraints provided in Section 17.5. All Firm Point-To-Point Transmission Service requests should be submitted by entering the information listed in Section 17.2 on the Transmission Provider's OASIS.

**17.1a Time Requirements:**

Attachment P lists the time requirements applicable to when the requests must be made, the evaluation of the requests, and the Transmission Customer responses. Requests for Long-Term Service received during any specified open season shall be processed in accordance with Attachment Z1 to this Tariff.

**17.2 Completed Application:**

A Completed Application shall provide all of the information included in 18 CFR § 2.20 including but not limited to the following:

(i) The identity, address, telephone number and facsimile number of the entity requesting service;

(ii) A statement that the entity requesting service is, or will be upon commencement of service, an Eligible Customer under the Tariff;

(iii) The location of the Point(s) of Receipt and Point(s) of Delivery and the identities of the Delivering Parties and the Receiving Parties;

(iv) The location of the generating facility(ies) supplying the capacity and energy and the location of the load ultimately served by the capacity and energy transmitted. The Transmission Provider will treat this information as confidential except to the extent that disclosure of this information is required by this Tariff, by regulatory or judicial order, by law or by statute, for reliability purposes pursuant to Good Utility Practice or pursuant to RTG transmission information sharing agreements. The Transmission Provider shall treat this information consistent with the standards of conduct contained in Part 37 of the Commission's regulations;

(v) A description of the supply characteristics of the capacity and energy to be delivered;

(vi) An estimate of the capacity and energy expected to be delivered to the Receiving Party;

(vii) The Service Commencement Date and the term of the requested Transmission Service; and

(viii) The transfer capability requested for each Point of Receipt and each Point of Delivery on the Transmission Provider's Transmission System; customers may combine their requests for service in order to satisfy the minimum transfer capability requirement.

(ix) A statement indicating that, if the Eligible Customer submits a Pre-Confirmed Application, the Eligible Customer will execute a Service

Agreement upon receipt of notification that the Transmission Provider can provide the requested Transmission Service; and

(x) Any additional information required by the Transmission Provider's planning process established in Attachment O.

The Transmission Provider shall treat this information consistent with the standards of conduct contained in Part 37 of the Commission's regulations.

### 17.3 Credit Arrangements:

A Completed Application for Firm Point-To-Point Transmission Service also shall include all information required for SPP to complete a Credit Assessment pursuant to its Credit Policy set out in Attachment X, and satisfaction of all requirements set out therein. If the Application is rejected by the Transmission Provider because it does not meet the conditions for service as set forth herein, or in the case of requests for service arising in connection with losing bidders in a Request For Proposals (RFP), all Financial Security shall be returned with accrued interest, if any, less any reasonable costs incurred by the Transmission Provider in connection with the review of the losing bidder's Application. All Financial Security also will be returned with accrued interest, if any, less any reasonable costs incurred by the Transmission Provider if the Transmission Provider is unable to complete new facilities needed to provide the service. If an Application is withdrawn or the Eligible Customer decides not to enter into a Service Agreement for Firm Point-To-Point Transmission Service, all Financial Security shall be returned in full, with accrued interest, if any, less reasonable costs incurred by the Transmission Provider to the extent such costs have not already been recovered by the Transmission Provider from the Eligible Customer. The Transmission Provider will provide to the Eligible Customer a complete accounting of all costs deducted from the returned Financial Security, which the Eligible Customer may contest if there is a dispute concerning the deducted costs. Financial Security associated with construction of new facilities is subject to the provisions of Section 19. If a Service Agreement for Firm Point-To-Point Transmission Service is executed, all Financial Security, including accrued interest, if any, will be returned to the Transmission Customer upon expiration or termination of the Service Agreement for Firm Point-To-Point Transmission Service. Applicable interest shall be computed in accordance with the Credit Policy.

**17.4 Notice of Deficient Application:**

If an Application fails to meet the requirements of the Tariff, the Transmission Provider shall notify the entity requesting service of the reasons for such failure within the applicable time period shown in Attachment P for responding to Applications. The Transmission Provider will attempt to remedy minor deficiencies in the Application through informal communications with the Eligible Customer. If such efforts are unsuccessful, the Transmission Provider shall return the Application, along with all Financial Security, with accrued interest, if any. Upon receipt of a new or revised Application that fully complies with the requirements of Part II of the Tariff, the Eligible Customer shall be assigned a new priority consistent with the date of the new or revised Application.

**17.5 Response to a Completed Application:**

Following receipt of a Completed Application for Firm Point-To-Point Transmission Service, the Transmission Provider shall make a determination of available transfer capability as required in Section 15.2. The Transmission Provider shall notify the Eligible Customer within the applicable times listed in Attachment P after the date of receipt of a Completed Application either (i) if it will be able to provide service without performing a System Impact Study for Short-Term Service requests or (ii) if a System Impact Study is needed to evaluate the impact of the Application for Short-Term Service requests pursuant to Section 19.1. For Long-Term Service requests, the Transmission Provider will evaluate Completed Applications within the Aggregate Transmission Service Study in accordance with procedures specified in Attachment Z1 to this Tariff. Responses by the Transmission Provider must be made as soon as practicable to all Completed Applications (including Applications by the Transmission Owner(s') own merchant function) and the timing of such responses must be made on a nondiscriminatory basis.

**17.6 Execution of Service Agreement:**

Whenever the Transmission Provider determines that a System Impact Study is not required and that the service can be provided, it shall notify the Eligible Customer within the applicable time periods allowed to determine available capacity as shown in Attachment P after receipt of the Completed Application. Where a System Impact Study is required, the provisions of Section 19 will govern the execution of a Service Agreement or the confirmation of a Completed Application, whichever is applicable. Failure of an Eligible Customer to execute and return the Service Agreement or request the filing of an unexecuted service agreement pursuant to Section 15.3, or to confirm a Completed Application (subject to completion of the System Impact Study), whichever is applicable, within the time frames shown in Attachment P will be deemed a withdrawal and termination of the Application and any Financial Security submitted shall be refunded with accrued interest, if any. Nothing herein limits the right of an Eligible Customer to file another Application after such withdrawal and termination of the Application and any deposit submitted shall be refunded with interest. Nothing herein limits the right of an Eligible Customer to file another Application after such withdrawal and termination.

**17.7 Extensions for Commencement of Service:**

The Transmission Customer can obtain, subject to availability up to five (5) one-year extensions for the commencement of service. The Transmission Customer may postpone service by paying a non-refundable annual reservation fee equal to one-month's charge for firm Transmission Service for each year or fraction thereof within 15 days of notifying the Transmission Provider it intends to extend the commencement of service. For extensions of one (1) year or more, the Transmission Customer must request the extension no later than ninety (90) days before the Service Commencement Date. For extensions of less than one (1) year, the Transmission Customer must request the extension no later than sixty (60) days before the Service Commencement Date. If during any extension for the commencement of service an Eligible Customer submits a Completed Application for firm Transmission Service, and such request can be satisfied only by releasing all or part of the Transmission Customer's Reserved Capacity, the original Reserved Capacity will be released unless the following condition is satisfied. Within thirty (30) days, the original Transmission Customer agrees to pay the Firm Point-To-Point transmission rate for its Reserved Capacity concurrent with the new Service Commencement Date. In the event the Transmission Customer elects to release the Reserved Capacity, the reservation fees or portions thereof previously paid will be forfeited.

## 17.8 Designated Resources Using Long-Term Firm Point-To-Point Transmission Service

If a Transmission Customer requests Long-Term Firm Point-To-Point Transmission Service to deliver the output from a Designated Resource to a load in the SPP Region, the Transmission Customer shall provide to the Transmission Provider all the information required in Section 29.2 for (i) its load in the SPP Region and (ii) its Designated Resources. This information shall be used for the purposes of (i) performing Aggregate Transmission Service Studies in accordance with Attachment Z1, (ii) classifying Service Upgrades associated with Designated Resources as Base Plan Upgrades pursuant to Section III.B of Attachment J and (iii) developing the SPP Transmission Expansion Plan pursuant to Attachment O. The requirements for Network Resources in Sections 30.1, 30.2 and 30.7 shall apply to Designated Resources using Long-Term Firm Point-To-Point Transmission Service.

## 17.9 Interconnection of Delivery Points

The addition, modification, or abandonment of any delivery point in conjunction with the provision of Point-To-Point Transmission Service shall be governed by the applicable provisions of Sections 31.2, 31.3, and Attachment AQ.

# 18 Procedures for Arranging Non-Firm Point-To-Point Transmission Service

**18.1 Application:**

Eligible Customers seeking Non-Firm Point-To-Point Transmission Service must submit a Completed Application to The Transmission Provider. Applications should be submitted by entering the information listed below on the Transmission Provider's OASIS.

**18.2 Completed Application:**

A Completed Application shall provide all of the information included in 18 CFR § 2.20 including but not limited to the following:

(i) The identity, address, telephone number and facsimile number of the entity requesting service;

(ii) A statement that the entity requesting service is, or will be upon commencement of service, an Eligible Customer under the Tariff;

(iii) The Point(s) of Receipt and the Point(s) of Delivery;

(iv) The maximum amount of capacity requested at each Point of Receipt and Point of Delivery; and

(v) The proposed dates and hours for initiating and terminating transmission service hereunder.

In addition to the information specified above, when required to properly evaluate system conditions, the Transmission Provider also may ask the Transmission Customer to provide the following:

(vi) The electrical location of the initial source of the power to be transmitted pursuant to the Transmission Customer's request for service; and

(vii) The electrical location of the ultimate load.

The Transmission Provider will treat this information in (vi) and (vii) as confidential at the request of the Transmission Customer except to the extent that disclosure of this information is required by this Tariff, by regulatory or judicial order, by law or statute, for reliability purposes pursuant to Good Utility Practice, or pursuant to RTG transmission information sharing agreements. The Transmission Provider shall treat this information consistent with the standards of conduct contained in Part 37 of the Commission's regulations.

(viii) A statement indicating that, if the Eligible Customer submits to a Pre-Confirmed Application, the Eligible Customer will execute a Service Agreement upon receipt of notification that the Transmission Provider can provide the requested Transmission Service.

**18.3 Timing of Requests and Responses Regarding Reservation of Non-Firm Point-To-Point Transmission Service:**

Attachment P lists the time requirements applicable to when the requests must be made, the evaluation of the requests, and the Transmission Customer responses and requests for Next-Hour-Market Service shall be submitted no earlier than 60 minutes before the start of the next clock hour. Requests for service, except for Next-Hour-Market Service, received later than the applicable time prior to the day service is scheduled to commence and requests for Next-Hour-Market Service submitted later than 20 minutes before the start of the next clock hour will be accommodated if practicable.

**18.4 Determination of Available Transfer Capability:**

Following receipt of a tendered schedule, the Transmission Provider will make a determination on a non-discriminatory basis of available transfer capability pursuant to Section 15.2. Such determination shall be made in accordance with the applicable time periods set forth in Attachment P.

## 19 Additional Study Procedures For Firm Point-To-Point Transmission Service Requests

Study procedures for Short-Term Firm Point-To-Point Transmission Service requests shall be performed in accordance with the System Impact Study provisions of Section 19 and in accordance with Attachment AC to this Tariff. Facilities Studies are not performed for requests of less than one year. Study procedures for Long-Term Firm Point-To-Point Transmission Service requests shall be performed using the Aggregate Transmission Service Study process in accordance with Attachment Z1 to this Tariff and the Facilities Study provisions of Section 19 to this Tariff. System Impact Studies are not performed for Long Term Firm Point-To-Point Transmission Service requests.

**19.1 Notice of Need for System Impact Study:**

After receiving a request for Short-Term Firm Point-To-Point Transmission Service, the Transmission Provider shall determine based on Attachment AC whether a System Impact Study is needed. A description of the methodology for completing a System Impact Study is provided in Attachment D.

**19.2 System Impact Study Agreement and Cost Reimbursement:**

The Eligible Customer's completion of the OASIS reservation with the following statement in the customer comment field "exercise System Impact Study option" shall provide the Transmission Provider with the required notification that the Eligible Customer elects to move forward with the System Impact Study option, as provided in Attachment AC of this Tariff. Completing the reservation in this manner constitutes Eligible Customer's agreement to pay for all System Impact Studies necessary to support the evaluation of the service.

### 19.3 System Impact Study Procedures:

The System Impact Study for Short-Term Firm Point-To-Point Transmission Service shall be in accordance with Attachment AC of this Tariff.

**19.4 Facilities Study Procedures:**

Study procedures for Long-Term Firm Point-To-Point Transmission Service requests shall be performed using the Aggregate Transmission Service Study process in accordance with Attachment Z1 of this Tariff.

**19.5 Facilities Study Modifications:**

Any change in design arising from inability to site or construct facilities as proposed will require development of a revised good faith estimate. New good faith estimates also will be required in the event of new statutory or regulatory requirements that are effective before the completion of construction or other circumstances beyond the control of the Transmission Provider or the affected Transmission Owner(s) that significantly affect the final cost of new facilities or upgrades to be charged to the Transmission Customer pursuant to the provisions of Part II of the Tariff.

**19.6 Due Diligence in Completing New Facilities:**

The Transmission Provider and the affected Transmission Owner(s) shall use due diligence to add necessary facilities or upgrade the Transmission System within a reasonable time. The Transmission Provider will not allow the upgrade to the existing or planned Transmission System in order to provide the requested Firm Point-To-Point Transmission Service if doing so would impair system reliability or otherwise impair or degrade existing firm service.

**19.7 Partial Interim Service:**

If the Transmission Provider determines that there will not be adequate transfer capability to satisfy the full amount of a Completed Application for Firm Point-To-Point Transmission Service, the Transmission Provider nonetheless shall be obligated to offer and provide the portion of the requested Firm Point-To-Point Transmission Service that can be accommodated without addition of any facilities and through redispatch. However, the Transmission Provider shall not be obligated to provide the incremental amount of requested Firm Point-To-Point Transmission Service that requires the addition of facilities or upgrades to the Transmission System until such facilities or upgrades have been placed in service.

**19.8 Expedited Procedures for New Facilities:**

In lieu of the procedures set forth above, the Eligible Customer shall have the option to expedite the process by requesting the Transmission Provider to tender at one time, together with the results of required studies, an "Expedited Service Agreement" pursuant to which the Eligible Customer would agree to compensate the Transmission Provider and affected Transmission Owner(s) for all costs incurred pursuant to the terms of the Tariff. In order to exercise this option, the Eligible Customer shall request in writing an Expedited Service Agreement covering all of the above-specified items within the time limits set forth in Attachment P from the time it receives the results of the System Impact Study or Aggregate Transmission Service Study identifying needed facility additions or upgrades or costs incurred in providing the requested service. While the Transmission Provider and affected Transmission Owner(s) agree to provide the Eligible Customer with their best estimate of the new facility costs and other charges that may be incurred, such estimate shall not be binding and the Eligible Customer must agree in writing to compensate the Transmission Provider and affected Transmission Owner(s) for all costs incurred pursuant to the provisions of the Tariff. The Eligible Customer shall execute and return such an Expedited Service Agreement within fifteen (15) days of its receipt or the Eligible Customer's request for service will cease to be a Completed Application and will be deemed terminated and withdrawn.

**19.9 Reporting Failure to Meet Study Deadlines:**

Sections 19.3 and 19.4 require a Transmission Provider to use due diligence to meet 60-day study completion deadlines for System Impact Studies and Facilities Studies.

(i) The Transmission Provider is required to file a notice with the Commission in the event that more than twenty (20) percent of System Impact Studies and Facilities Studies completed by the Transmission Provider in any two consecutive calendar quarters are not completed within the 60-day study completion deadlines. Such notice must be filed within thirty (30) days of the end of the calendar quarter triggering the notice requirement.

(ii) For the purposes of calculating the percent of System Impact Studies and Facilities Studies processed outside of the 60-day study completion deadlines, the Transmission Provider shall consider all System Impact Studies and Facilities Studies that it completes during the calendar quarter. The percentage should be calculated by dividing the number of those studies which are completed on time by the total number of completed studies. The Transmission Provider may provide an explanation in its notification filing to the Commission if it believes there are extenuating circumstances that prevented it from meeting the 60-day study completion deadlines.

(iii) The Transmission Provider is subject to an operational penalty if it completes ten (10) percent or more of non-Affiliates' System Impact Studies and Facilities Studies outside of the 60-day study completion deadlines for each of the two calendar quarters immediately following the quarter that triggered its notification filing to the Commission. The operational penalty will be assessed for each calendar quarter for which an operational penalty applies, starting with the calendar quarter immediately following the quarter that triggered the Transmission Provider's notification filing to the Commission. The operational penalty will continue to be assessed each quarter until the Transmission Provider

completes at least ninety (90) percent of all non-Affiliates' System Impact Studies and Facilities Studies within the 60-day deadline.

(iv) For penalties assessed in accordance with subsection (iii) above, the penalty amount for each System Impact Study or Facilities Study shall be equal to $500 for each day the Transmission Provider takes to complete that study beyond the 60-day deadline.

# 20 Procedures if the Transmission Provider is Unable to Complete New Transmission Facilities for Firm Point-To-Point Transmission Service

**20.1 Delays in Construction of New Facilities:**

If any event occurs that will materially affect the time for completion of new facilities, or the ability to complete them, the Transmission Provider shall promptly notify the Transmission Customer. In such circumstances, the Transmission Provider shall within thirty (30) days of notifying the Transmission Customer of such delays, convene a technical meeting with the Transmission Customer and affected Transmission Owner(s) to evaluate the alternatives available to the Transmission Customer. The Transmission Provider also shall make available to the Transmission Customer studies and work papers related to the delay, including all information that is in the possession of the Transmission Provider and affected Transmission Owner(s) that is reasonably needed by the Transmission Customer to evaluate any alternatives.

### 20.2 Alternatives to the Original Facility Additions:

When the review process of Section 20.1 determines that one or more alternatives exist to the originally planned construction project, the Transmission Provider together with the affected Transmission Owner(s) shall present such alternatives for consideration by the Transmission Customer. If, upon review of any alternatives, the Transmission Customer desires to maintain its Completed Application subject to construction of the alternative facilities, it may request the Transmission Provider to submit a revised Service Agreement for Firm Point-To-Point Transmission Service. If the alternative approach solely involves Non-Firm Point-To-Point Transmission Service, the Transmission Provider shall promptly tender a Service Agreement for Non-Firm Point-To-Point Transmission Service providing for the service. In the event the Transmission Provider concludes that no reasonable alternative exists and the Transmission Customer disagrees, the Transmission Customer may seek relief under the dispute resolution procedures pursuant to Section 12 or it may refer the dispute to the Commission for resolution.

### 20.3 Refund Obligation for Unfinished Facility Additions:

If the Transmission Provider and the Transmission Customer mutually agree that no other reasonable alternatives exist and the requested service cannot be provided out of existing capability under the conditions of Part II of the Tariff, the obligation to provide the requested Firm Point-To-Point Transmission Service shall terminate and any Financial Security posted by the Transmission Customer shall be returned with accrued interest, if any. However, the Transmission Customer shall be responsible for all prudently incurred costs by the Transmission Provider and the affected Transmission Owner(s) through the time construction was suspended.

# 21 Provisions Relating to Transmission Construction and Services on the Systems of Other Utilities

## 21.1 Responsibility for Third-Party System Additions:

The Transmission Provider and the Transmission Owners shall not be responsible for making arrangements for any necessary engineering, permitting, and construction of transmission or distribution facilities on the system(s) of any other entity or for obtaining any regulatory approval for such facilities. The Transmission Provider and the affected Transmission Owner(s) will undertake reasonable efforts to assist the Transmission Customer in obtaining such arrangements, including without limitation, providing any information or data required by such other electric system pursuant to Good Utility Practice.

## 21.2 Coordination of Third-Party System Additions:

In circumstances where the need for transmission facilities or upgrades is identified pursuant to the provisions of Part II of the Tariff, and if such upgrades further require the addition of transmission facilities on other systems, the affected Transmission Owner(s) in coordination with the Transmission Provider shall have the right to coordinate construction on its (their) own system(s) with the construction required by others. The Transmission Provider together with the affected Transmission Owner(s), after consultation with the Transmission Customer and representatives of such other systems, may defer construction of its new transmission facilities, if the new transmission facilities on another system cannot be completed in a timely manner. The Transmission Provider shall notify the Transmission Customer in writing of the basis for any decision to defer construction and the specific problems which must be resolved before construction of new facilities will be initiated or resumed. Within sixty (60) days of receiving written notification by the Transmission Provider of the intent to defer construction pursuant to this section, the Transmission Customer may challenge the decision in accordance with the dispute resolution procedures pursuant to Section 12 or it may refer the dispute to the Commission for resolution.

# 22 Changes in Service Specifications

**22.1 Modifications On a Non-Firm Basis:**

The Transmission Customer taking Firm Point-To-Point Transmission Service may request the provision of transmission service on a non-firm basis over Receipt and Delivery Points other than those specified in the Service Agreement for long-term firm Transmission Service or the confirmed Application for Short-Term Transmission Service ("Secondary Receipt and Delivery Points"), in amounts not to exceed its firm capacity reservation, without incurring an additional Non-Firm Point-To-Point Transmission Service charge (except as provided in Section 22.2) or executing a new Service Agreement for long-term firm Transmission Service or submitting a new Application for short-term firm Transmission Service, subject to the following conditions.

(a) Service provided over Secondary Receipt and Delivery Points will be non-firm only, on an as-available basis and will not displace any firm or non-firm service reserved or scheduled by third-parties under the Tariff or under any other transmission tariff or agreement where the service is being provided by the Transmission Owner or by the Transmission Owner on behalf of its (their) Native Load Customers.

(b) The sum of all Firm and Non-Firm Point-To-Point Transmission Service provided to the Transmission Customer at any time pursuant to this section shall not exceed the Reserved Capacity in the relevant Service Agreement for Long-Term Firm Transmission or Application for Short-Term Firm Transmission Service under which such services are provided.

(c) The Transmission Customer shall retain its right to schedule Firm Point-To-Point Transmission Service at the Receipt and Delivery Points specified in the relevant Service Agreement for long-term firm Transmission Service or Application for short-term firm Transmission Service in the amount of its original capacity reservation.

(d) Service over Secondary Receipt and Delivery Points on a non-firm basis shall not require the filing of an Application for Non-Firm Point-To-Point Transmission Service under the Tariff. However, all other requirements of Part II of the Tariff (except as to transmission rates) shall apply to

transmission service on a non-firm basis over Secondary Receipt and Delivery Points.

**22.2 Additional Charge To Prevent Abuse:**

If a Transmission Customer making the modifications in Section 22.1 takes service over a transmission path that costs more than the path the Transmission Customer initially reserved, then for the service the Transmission Customer schedules, the Transmission Customer shall pay in addition to the amounts based on its initial reservation the additional costs (i.e., the difference between the zonal rates) associated with the new path. In addition, the Transmission Customer shall be responsible for losses (in accordance with Attachment M) and pay for any redispatch costs (as determined in accordance with Attachment K) based on the actual transmission path used.

**22.3 Modification On a Firm Basis:**

Any request by a Transmission Customer to modify Receipt and Delivery Points on a firm basis shall be treated as a new request for service in accordance with Section 17 hereof. While such new request is pending, the Transmission Customer shall retain its priority for service at the existing firm Receipt and Delivery Points specified in its Service Agreement for long-term firm Transmission Service or confirmed Application for short-term firm Transmission Service. In any instance where the remaining term of service, after modification pursuant to this provision, is less than twelve (12) months the Transmission Customer will maintain existing rights of reservation priority on the original reservation.

# 23 Sale or Assignment of Transmission Service

**23.1 Procedures for Assignment or Transfer of Service:**

A Transmission Customer may sell, assign, or transfer all or a portion of its rights under its Service Agreement ("Reseller's Service Agreement"), but only to another Eligible Customer (the Assignee). The Transmission Customer that sells, assigns or transfers its rights under its Service Agreement is hereafter referred to as the Reseller, and the portion of service reassigned is hereafter referred to as the Reassigned Service. Compensation to Resellers shall be at rates established by agreement between the Reseller and the Assignee.

The Assignee must execute a Service Agreement with the Transmission Provider governing reassignments of transmission service prior to the date on which the Reassigned Service commences.

If the Reseller has not obtained a release from its obligations with respect to the Reassigned Service under Section 23.4, the Transmission Provider shall charge the Reseller, as appropriate, at the rate stated in the Reseller's Service Agreement with the Transmission Provider or the associated OASIS schedule and credit the Reseller with the price reflected in the Assignee's Service Agreement with the Transmission Provider or the associated OASIS schedule; provided that, such credit shall be reversed in the event of non-payment by the Assignee. The Transmission Provider may also require the Assignee to pay the amount in excess of the Transmission Provider's rates directly to the Reseller. If the Assignee does not request any change in the Point(s) of Receipt or the Point(s) of Delivery, or a change in any other term or condition set forth in the original Service Agreement for Long-Term Firm Transmission Service or original confirmed Application for Short-Term Firm Transmission Service, the Assignee will receive the same services as did the Reseller and the priority of service for the Assignee will be the same as that of the Reseller. The Assignee will be subject to all terms and conditions of this Tariff. If the Assignee requests a change in service, the reservation priority of service will be determined by the Transmission Provider pursuant to Section 13.2.

If the Reseller has obtained a release from its obligations with respect to the Reassigned Service under Section 23.4, the Transmission Provider shall

charge the Assignee for the Reassigned Service at the rates established in the Assignee's Service Agreement with the Transmission Provider, which shall not be less than the rates established in the Reseller's Service Agreement.

**23.2 Limitations on Assignment or Transfer of Service:**

If the Assignee requests a change in the Point(s) of Receipt or Point(s) of Delivery, or a change in any other specifications set forth in the original Service Agreement for long-term firm Transmission Service or original confirmed Application for short-term firm Transmission Service, the Transmission Provider will consent to such change subject to the provisions of the Tariff and the Transmission Customer's or the Assignee's agreement to pay any additional charges consistent with Section 22 of the Tariff, provided that the change will not impair the operation and reliability of the Transmission Owner's(s') generation, transmission, or distribution systems. The Assignee shall pay the Transmission Provider for the costs of performing any System Impact Study or Aggregate Transmission Service Study needed to evaluate the capability of the Transmission System to accommodate the proposed change and any additional costs resulting from such change. The Reseller shall remain liable for the performance of all obligations under the Service Agreement, except as specifically agreed to by the Transmission Provider and the Reseller through an amendment to the Service Agreement or as provided in Section 23.4 of the Tariff.

### 23.3 Information on Assignment or Transfer of Service:

In accordance with Section 4, all sales or assignments of capacity must be conducted through or otherwise posted on the Transmission Provider's OASIS on or before the date the Reassigned Service commences and are subject to Section 23.1. Resellers may also use Transmission Provider's OASIS to post transfer capability available for resale.

### 23.4 Release of Reseller

To the extent that the Reseller assigns all of its rights and obligations under the Reseller's Service Agreement with respect to the Reassigned Service, the Reseller may request a release from the Reseller's Service Agreement with respect to the Reassigned Service. Upon the Transmission Provider's determination that the Assignee satisfies all of the terms and conditions of this Tariff, including but not limited to the requirements set forth in the Credit Policy in Attachment X of this Tariff, and the Assignee has executed a Service Agreement governing the Reassigned Service, the Transmission Provider will release the Reseller of its obligations under the Reseller's Service Agreement with respect to the Reassigned Service.

# 24 Metering and Power Factor Correction at Receipt and Delivery Points(s)

**24.1 Transmission Customer Obligations:**

Unless otherwise agreed, the Transmission Customer shall be responsible for the cost of installing and maintaining compatible metering and communications equipment to accurately account for the capacity and energy being transmitted under Part II of the Tariff and to communicate the information to the Transmission Provider. Unless otherwise specified in an agreement for the construction of facilities, such equipment installed on the Transmission Customer's system shall remain the property of the Transmission Customer. Unless otherwise specified in an agreement for the construction of facilities, such equipment installed on the Transmission Owner's(s') system shall remain the property of the Transmission Owner(s).

### 24.2 Transmission Provider Access to Metering Data:

The Transmission Provider or its agent shall have access to metering data, which may reasonably be required to facilitate measurements and billing under the Service Agreement.

### 24.3 Power Factor:

Unless otherwise agreed, the Transmission Customer is required to maintain a power factor within the same range specified by the Transmission Provider, in consultation with the appropriate Transmission Owners, pursuant to Good Utility Practices. The power factor requirements are specified in the Service Agreement where applicable.

## 25 Compensation for Transmission Service

Rates for Firm and Non-Firm Point-To-Point Transmission Service are provided in the Schedules appended to the Tariff: Firm Point-To-Point Transmission Service (Schedule 7); and Non-Firm Point-To-Point Transmission Service (Schedule 8). In addition the Transmission Customer shall pay any applicable Ancillary Service costs, Wholesale Distribution Service charges (Schedule 10), Base Plan Zonal Charges (Schedule 11), and Region-wide Charges (Schedule 11).

## 26 Stranded Cost Recovery

This Tariff does not affect in any way the right of any Transmission Owner to seek and receive stranded cost recovery or the right of anyone to oppose such stranded cost recovery. Thus, the Transmission Owner(s) may seek to recover stranded costs from the User(s) in accordance with the terms, conditions and procedures set forth in FERC Order No. 888. However, the Transmission Owner(s) must separately file any specific proposed stranded cost charge under Section 205 of the Federal Power Act. If the Commission approves stranded cost charges to be recovered through schedules to be implemented by the Transmission Provider, the Transmission Provider as agent for the Transmission Owner(s) shall charge and collect the appropriate charge(s) from the relevant User(s) and distribute the appropriate amounts directly to the relevant Transmission Owner(s).

## 27 Compensation for New Facilities and Redispatch Costs

a) Whenever an Aggregate Facilities Study performed by the Transmission Provider in connection with the provision of Long-Term Firm Point-To-Point Transmission Service identifies the need for new facilities, the recovery of such costs shall be governed by Attachments J and Z1 of this Tariff. Whenever an Aggregate Facilities Study performed by the Transmission Provider in connection with the provision of Long-Term Firm Point-To-Point Transmission Service identifies capacity constraints that may be relieved by redispatching electric generating resources to eliminate such constraints, redispatch will be handled in accordance with Attachment K of this Tariff.

b) Whenever a System Impact Study performed by the Transmission Provider in connection with the provision of Short-Term Firm Point-To-Point Transmission Service identifies capacity constraints that may be relieved by redispatching electric generating resources to eliminate such constraints, redispatch will be handled in accordance with Attachment K of this Tariff.

# III. NETWORK INTEGRATION TRANSMISSION SERVICE

Preamble

The Transmission Provider will provide Network Integration Transmission Service pursuant to the applicable terms and conditions contained in the Tariff and Service Agreement. Network Integration Transmission Service allows the Network Customer to integrate, economically dispatch and regulate its current and planned Network Resources to serve its Network Load in a manner comparable to that in which the Transmission Owners utilize the Transmission System to serve their Native Load Customers. Network Integration Transmission Service also may be used by the Network Customer to deliver economy energy purchases to its Network Load from non-designated resources on an as-available basis without additional charge. Transmission service for sales to non-designated loads will be provided pursuant to the applicable terms and conditions of Part II of the Tariff. The Transmission Provider shall recognize the requirements of the Federal Service Exemption to allow Western-UGP to meet its Statutory Load Obligations.

# 28 Nature of Network Integration Transmission Service

**28.1 Scope of Service:**

Network Integration Transmission Service is a transmission service that allows Network Customers to efficiently and economically utilize their Network Resources (as well as other non-designated generation resources) to serve their Network Load. The Network Customer taking Network Integration Transmission Service must obtain or provide Ancillary Services pursuant to Section 3.

**28.2 Transmission Provider and Transmission Owners Responsibilities:**

The Transmission Provider and Transmission Owners will plan, operate, and cause to be maintained its Transmission System in accordance with Good Utility Practice and its planning obligations in Attachment O in order to provide the Network Customer with Network Integration Transmission Service over the Transmission System. The Transmission Owners, on behalf of their Native Load Customers, shall be required to designate resources and loads in the same manner as any Network Customer under Part III of this Tariff. This information must be consistent with the information used by the Transmission Provider to calculate available transfer capability. The Transmission Provider shall include the Network Customer's Network Load in Transmission System planning and shall, consistent with Good Utility Practice and Attachment O, endeavor to cause to be constructed and placed into service sufficient transfer capability to deliver the Network Customer's Network Resources to serve its Network Load on a basis comparable to the Transmission Owner(s') delivery of electric generating and purchased resources to Native Load Customers.

### 28.3 Network Integration Transmission Service:

The Transmission Provider will provide firm transmission service over the Transmission System to the Network Customer for the delivery of capacity and energy from its designated Network Resources to service its Network Loads on a basis that is comparable to the Transmission Owner(s') use of the Transmission System to reliably serve Native Load Customers.

**28.4 Secondary Service:**

The Network Customer may use the Transmission System to deliver energy to its Network Loads from resources that have not been designated as Network Resources. Such energy shall be transmitted, on an as-available basis, with no additional charges imposed under Schedules 7, 8, 9, or 11. Secondary service shall not require the filing of an Application for Network Integration Transmission Service under the Tariff. However, all other requirements of Part III of the Tariff (except for transmission rates) shall apply to secondary service. Deliveries from resources other than Network Resources will have a higher priority than any Non-Firm Point-To-Point Transmission Service under Part II of the Tariff or any non-firm point-to-point service under any other transmission tariff or agreement where the service is being provided by a Transmission Owner. A Network Customer seeking to utilize such secondary service to deliver energy to its Network Load must submit a request on the Transmission Provider's OASIS for each transaction. For any single hour scheduling period of time, a Network Customer's total Reserved Capacity for secondary service shall not exceed the greater of (i) 200 MW or (ii) 125 percent times the Network Customer's average of the highest hourly non-firm network schedules from four (4) separate days for the previous twelve (12) calendar month period or (iii) 25% of the Network Customer's peak Network Load from the prior calendar year; provided, however, that the Reserved Capacity for such secondary service shall not exceed 110 percent of the Network Customer's peak Network Load from the prior calendar year. For the first twelve (12) calendar months that a new Network Customer is receiving Network Integration Transmission Service, the new Network Customer's Reserved Capacity for secondary service shall not exceed 110 percent of its peak Network Load from the prior calendar year. If requested by the Network Customer, the Transmission Provider shall determine on a non-discriminatory basis whether an exception to the limits to secondary service set forth in this Section shall be granted.

### 28.5 Real Power Losses:

Real power losses are associated with all Network Integration Transmission Service. As stated in Schedule 9, the Network Customer shall be responsible for any real power losses associated with all Network Integration Transmission Service in accordance with Attachment M.

### 28.6 Restrictions on Use of Service:

The Network Customer shall not use Network Integration Transmission Service for (i) sales of capacity and energy to non-designated loads, or (ii) direct or indirect provision of transmission service by the Network Customer to third parties. All Network Customers taking Network Integration Transmission Service shall use Point-To-Point Transmission Service under Part II of the Tariff for any Third-Party Sale which requires use of the Transmission Provider's Transmission System except for service where the purchaser is a Network Customer of the Transmission Provider. In the event that a Network Customer uses Network Integration Transmission Service or secondary service pursuant to Section 28.4 to facilitate a wholesale sale that does not serve its Network Load, it shall pay the penalty set forth in Section 13.7 for the amount of the service used to facilitate the wholesale sale.

# 29 Initiating Service

**29.1 Condition Precedent for Receiving Service:**

Subject to the terms and conditions of Part III of the Tariff, the Transmission Provider will provide Network Integration Transmission Service to any Eligible Customer, provided that (i) the Eligible Customer completes an Application for service as provided under Part III of the Tariff, (ii) the Eligible Customer and the Transmission Provider in coordination with the affected Transmission Owner(s) complete(s) the technical arrangements set forth in Sections 29.3 and 29.4, (iii) the Eligible Customer executes a Service Agreement pursuant to Attachment F for service under Part III of the Tariff or requests in writing that the Transmission Provider file a proposed unexecuted Service Agreement with the Commission, and (iv) the Eligible Customer executes a Network Operating Agreement with the Transmission Provider pursuant to Attachment G, or requests in writing that the Transmission Provider file a proposed unexecuted Network Operating Agreement.

**29.2 Application Procedures:**

An Eligible Customer requesting service under Part III of the Tariff must submit an Application, which includes all information required for SPP to complete a Credit Assessment pursuant to its Credit Policy set out in Attachment X and satisfaction of all requirements set out therein. Unless subject to the procedures in Section 2, Completed Applications for new or changed designated Network Resources, having a term of one year or longer, associated with Network Integration Transmission Service will be part of the Aggregate Transmission Service Study as defined in Attachment Z1. Completed Applications for new designated Network Resources, having a term of less than one year, will be assigned a priority according to the date and time the Application is received, with the earliest Application receiving the highest priority. Applications should be submitted by entering the information listed below on the Transmission Provider's OASIS. A Completed Application shall provide all of the information included in 18 CFR § 2.20 including but not limited to the following:

(i) The identity, address, telephone number and facsimile number of the party requesting service;

(ii) A statement that the party requesting service is, or will be upon commencement of service, an Eligible Customer under the Tariff;

(iii) A description of the Network Load at each delivery point. This description should separately identify and provide the Eligible Customer's best estimate of the total loads to be served at each transmission voltage level, and the loads to be served from each Transmission Provider substation at the same transmission voltage level. The description should include a ten (10) year forecast of summer and winter load and resource requirements beginning with the first year after the service is scheduled to commence;

(iv) The amount and location of any interruptible loads included in the Network Load. This shall include the summer and winter capacity requirements for each interruptible load (had such load not been interruptible), that portion of the load subject to interruption, the

conditions under which an interruption can be implemented and any limitations on the amount and frequency of interruptions. An Eligible Customer should identify the amount of interruptible customer load (if any) included in the 10 year load forecast provided in response to (iii) above;

(v) A description of Network Resources (current and 10-year projection). For each on-system Network Resource, such description shall include:

- Unit size and amount of capacity from that unit to be designated as Network Resource
- Regulation Qualified resource capability
- Spin Qualified resource capability
- Supplemental Qualified resource capabilty
- VAR capability (both leading and lagging) of all generators
- Operating restrictions
    - Any periods of restricted operations through-out the year
    - Maintenance schedules
    - Minimum loading level of unit
    - Normal operating level of unit
    - Any must-run unit designations required for system reliability - or contract reasons
- Arrangements governing sale and delivery of power to third parties from generating facilities located in the Transmission Provider Balancing Authority Area, where only a portion of unit output is designated as a Network Resource:

For each off-system Network Resource, such description shall include:

- Identification of the Network Resource as an off-system resource
- Amount of power to which the customer has rights
- Identification of the Balancing Authority Area from which the power will originate
- Delivery point(s) to the Transmission Provider's Transmission System
- Transmission arrangements on the external transmission system(s)

- Operating restrictions, if any
- Any periods of restricted operations thoughout the year
- Maintenance schedules
- Minimum loading level of unit
- Normal operating level of unit
- Any must-run designations required for system reliability or contract reasons

(vi) Description of Eligible Customer's transmission system:

- Load flow and stability data, such as real and reactive parts of the load, lines, transformers, reactive devices and load type, including normal and emergency ratings of all transmission equipment in a load flow format compatible with that used by the Transmission Provider
- Operating restrictions needed for reliability
- Operating guides employed by system operators
- Contractual restrictions or committed uses of the Eligible Customer's transmission system, other than the Eligible Customer's Network Loads and Resources
- Location of Network Resources described in subsection (v) above
- 10 year projection of system expansions or upgrades
- Transmission System maps that include any proposed expansions or upgrades
- Thermal ratings of Eligible Customer's ties with Balancing Authority Areas other than the SPP Balancing Authority Area;

(vii) Service Commencement Date and the term of the requested Network Integration Transmission Service. The minimum term for Network Integration Transmission Service is one year; however, if service is provided hereunder pursuant to a state retail pilot program, the minimum term may be the lesser of one year or the remainder of the pilot, but not less than one month;

(viii) A statement signed by an authorized officer from or agent of the Network Customer attesting that all of the Network Resources listed pursuant to Section 29.2(v) satisfy the following conditions: (1) the Network Customer owns the resource, has committed to purchase generation pursuant to an executed contract, or has committed to purchase generation where execution of a contract is contingent upon the availability of transmission service under Part III of the Tariff; and (2) the Network Resources do not include any resources, or any portion thereof, that are committed for sale to non-designated third party load or otherwise cannot be called upon to meet the Network Customer's Network Load on a noninterruptible basis, except for purposes of fulfilling obligations under a reserve sharing program; and

(ix) Any additional information required of the Transmission Customer as specified in the Transmission Provider’s planning process established in Attachment O.

Unless the Parties agree to a different time frame, the Transmission Provider must acknowledge the request within ten (10) days of receipt. The acknowledgment must include a date by which a response, including a Service Agreement, will be sent to the Eligible Customer. If an Application fails to meet the requirements of this section, the Transmission Provider shall notify the Eligible Customer requesting service within fifteen (15) days of receipt and specify the reasons for such failure. Wherever possible, the Transmission Provider will attempt to remedy deficiencies in the Application through informal communications with the Eligible Customer. If such efforts are unsuccessful, the Transmission Provider shall return the Application without prejudice to the Eligible Customer filing a new or revised Application that fully complies with the requirements of this section. The Eligible Customer will be assigned a new priority consistent with the date of the new or revised Application. The Transmission Provider shall treat this information consistent with the standards of conduct contained in Part 37 of the Commission's regulations. The Transmission

Provider may, on a non-discriminatory basis, waive the requirements of subsections 29.2 (iii), (iv), (v) and (vi), to the extent such information is not applicable or, in the case of service being requested for retail access load, is unknown at the time of the Application.

### 29.3 Technical Arrangements to be Completed Prior to Commencement of Service:

Network Integration Transmission Service shall not commence until the Transmission Provider, the affected Transmission Owner(s), and the Network Customer, or a third party, have completed installation of all equipment specified under the Network Operating Agreement consistent with Good Utility Practice and any additional requirements reasonably and consistently imposed to ensure the reliable operation of the Transmission System. The Transmission Provider and the affected Transmission Owner(s) shall exercise reasonable efforts, in coordination with the Network Customer, to complete such arrangements as soon as practicable taking into consideration the Service Commencement Date.

### 29.4 Network Customer Facilities:

The provision of Network Integration Transmission Service shall be conditioned upon the Network Customer's constructing, maintaining and operating the facilities on its side of each delivery point or interconnection necessary to reliably deliver capacity and energy from the Transmission Provider's Transmission System to the Network Customer. The Network Customer shall be solely responsible for constructing or installing all facilities on the Network Customer's side of each such delivery point or interconnection.

### 29.5 Filing of Service Agreement:

The Transmission Provider will file Service Agreements with the Commission in compliance with applicable Commission regulations.

# 30 Network Resources

### 30.1 Designation of Network Resources:

Network Resources shall include all generation owned, purchased or leased by the Network Customer designated to serve Network Load under the Tariff. Network Resources may not include resources, or any portion thereof, that are committed for sale to non-designated third party load or otherwise cannot be called upon to meet the Network Customer's Network Load on a non-interruptible basis, except for purposes of fulfilling obligations under a reserve sharing program. Any owned or purchased resources that were serving the Network Customer's loads under firm agreements entered into on or before the Service Commencement Date shall initially be designated as Network Resources until the Network Customer terminates the designation of such resources.

### 30.2 Designation of New Network Resources:

The Network Customer may designate a new Network Resource by providing the Transmission Provider with as much advance notice as practicable. A designation of a new Network Resource must be made through the Transmission Provider's OASIS by a request for modification of service pursuant to an Application under Section 29. This request must include a statement that the new Network Resource satisfies the following conditions: (1) the Network Customer owns the resource, has committed to purchase generation pursuant to an executed contract, or has committed to purchase generation where execution of a contract is contingent upon the availability of transmission service under Part III of the Tariff; and (2) The Network Resources do not include any resources, or any portion thereof, that are committed for sale to non-designated third party load or otherwise cannot be called upon to meet the Network Customer's Network Load on a non-interruptible basis, except for purposes of fulfilling obligations under a reserve sharing program. The Network Customer's request will be deemed deficient if it does not include this statement and the Transmission Provider will follow the procedures for a deficient Application as described in Section 29.2 of the Tariff.

Requests for new or changed Network Resources having a term of one year or longer associated with Network Integration Transmission Service shall be part of the Aggregate Transmission Service Study as specified in Attachment Z1. The Transmission Provider shall combine all transmission service requests, having a term of one year or longer, received during the open season as specified in Section III of Attachment Z1, into a single and distinct Aggregate Transmission Service Study. Requests for new or changed Network Resources, having a term of less than one year, shall be assigned a priority according to the date and time the Application is received, with the earliest Application receiving the highest priority.

#### 30.2.1 Transfer of Designation:

The designation of a Network Resource may be transferred to a different generator at the same electrical point of interconnection without study by submitting a request to the Transmission Provider no later than 30 days prior to the termination date of the Network Resource in the NITS agreement. The request for transfer of designation shall include the information specified in Section 29.2 part (v) and (viii). The amount of capacity designated as a Network Resource to be transferred to the new generator must be less than or equal to the amount of capacity designated as a Network Resource from the existing generator. In order to designate additional capacity from the new generator, a new request must be submitted pursuant to Section 30.2 for the additional capacity.

Unless the Parties agree to a different time frame, the Transmission Provider must acknowledge the request within ten (10) days of receipt. The acknowledgment must include a date by which a response will be sent to the Eligible Customer. If request to transfer designation fails to meet the requirements of this section, the Transmission Provider shall notify the Eligible Customer requesting the transfer within fifteen (15) days of receipt and specify the reasons for such failure. Wherever possible, the Transmission Provider will attempt to remedy deficiencies in the request through informal communications with the Eligible Customer. If such efforts are unsuccessful, the Transmission Provider shall return the request without prejudice to the Eligible Customer filing a new or revised request that fully complies with the requirements of this section.

Upon confirmation of receipt of a valid request to transfer designation, the Transmission Provider will amend the NITS agreement to reflect the transfer of designation.

**30.3 Termination of Network Resources:**

The Network Customer may terminate the designation of all or part of a generating resource as a Network Resource by providing notification to the Transmission Provider through the OASIS as soon as reasonably practicable. Any request for termination of Network Resource status must be submitted on OASIS, and should indicate whether the request is for indefinite or temporary termination. A request for indefinite termination of Network Resource status must indicate the date and time that the termination is to be effective, and the identification and capacity of the resource(s) or portions thereof to be indefinitely terminated. A request for temporary termination of Network Resource status must include the following:

(i) Effective date and time of temporary termination;

(ii) Effective date and time of redesignation, following period of temporary termination;

(iii) Identification and capacity of resource(s) or portions thereof to be temporarily terminated;

(iv) Resource description and attestation for redesignating the Network Resource following the temporary termination, in accordance with Section 30.2; and

(v) Identification of any related transmission service requests to be evaluated concomitantly with the request for temporary termination, such that the requests for undesignation and the request for these related transmission service requests must be approved or denied as a single request. The evaluation of these related transmission service requests must take into account the termination of the Network Resources identified in (iii) above, as well as all competing transmission service requests of higher priority.

As part of a temporary termination, a Network Customer may only redesignate the same resource that was originally designated, or a portion thereof. Requests to redesignate a different resource and/or a resource with increased capacity will be deemed deficient and the Transmission Provider will follow the procedures for a deficient Application as described in Section 29.2 of the Tariff.

### 30.4 Operation of Network Resources:

The Network Customer shall not operate its designated Network Resources such that the output of those facilities exceeds its designated Network Load, plus Non-Firm sales delivered pursuant to Part II of the Tariff, plus losses, plus power sales under a reserve sharing program, plus sales that permit curtailment without penalty to serve its designated Network Load. This limitation shall not apply to changes in the operation of a Transmission Customer's Network Resources at the request of the Transmission Provider through normal operation of the Energy and Operating Reserve Markets as described under Attachment AE or to respond to an emergency or other unforeseen condition which may impair or degrade the reliability of the Transmission System. For all Network Resources not physically connected with the Transmission Provider's Transmission System, the Network Customer may not schedule delivery of energy in excess of the Network Resource's capacity, as specified in the Network Customer's Application pursuant to Section 29, unless the Network Customer supports such delivery within the Transmission Provider's Transmission System by either obtaining Point-To-Point Transmission Service or utilizing secondary service pursuant to Section 28.4. In the event that a Network Customer's schedule at the delivery point for a Network Resource not physically interconnected with the Transmission Provider's Transmission System exceeds the Network Resource's designated capacity, excluding energy delivered using secondary service or Point-To-Point Transmission Service, it shall pay the penalty set forth in Section 13.7 for the amount of the service exceeding the Network Resource's designated capacity.

### 30.5 Network Customer Redispatch Obligation:

As a condition to receiving Network Integration Transmission Service, the Network Customer agrees to redispatch its Network Resources as requested by the Transmission Provider pursuant to Section 33.2 and in accordance with the Energy and Operating Reserve Markets procedures in Attachment AE.

### 30.6 Transmission Arrangements for Network Resources Not Physically Interconnected With The Transmission Provider:

The Network Customer shall be responsible for any arrangements necessary to deliver capacity and energy from a Network Resource not physically interconnected with the Transmission System. The Transmission Provider will undertake reasonable efforts to assist the Network Customer in obtaining such arrangements, including without limitation, providing any information or data required by such other entity pursuant to Good Utility Practice.

### 30.7 Limitation on Designation of Network Resources:

The Network Customer must demonstrate that it owns or has committed to purchase generation pursuant to an executed contract in order to designate a generating resource as a Network Resource. Alternatively, the Network Customer may establish that execution of a contract is contingent upon the availability of transmission service under Part III of the Tariff.

### 30.8 Use of Interface Capacity by the Network Customer:

There is no specific limitation upon a Network Customer's use of the Transmission System at the interface(s) to the SPP Balancing Authority Area (where the Network Customer's load is located) to integrate the Network Customer's Network Resources (or substitute economy purchases) with its Network Loads. However, a Network Customer's use of the interface capacity with other transmission systems may not exceed the Network Customer's Load or the applicable interface capacity.

**30.9 Network Customer Owned Transmission Facilities:**

The Network Customer that owns existing transmission facilities that are integrated with the Transmission Provider's Transmission System may be eligible to receive consideration either through a billing credit or some other mechanism. In order to receive such consideration the Network Customer must demonstrate that its transmission facilities are integrated into the plans or operations of a Transmission Owner to serve the Transmission Owner's power and transmission customers. For facilities added by the Network Customer subsequent to May 14, 2007, the Network Customer shall receive credit for such transmission facilities added if such facilities are integrated into the operations of the Transmission System; provided however, the Network Customer's transmission facilities shall be presumed to be integrated if such transmission facilities, if owned by the Transmission Owners, would be eligible for inclusion in the Transmission Owners' Annual Transmission Revenue Requirement as specified in Attachment H. The revenue requirements for Network Customer Transmission Credits and the application of Network Customer Transmission Credits to the Network Customer's transmission service charges shall be in accordance with Section III. of Attachment H of this Tariff. The eligible Network Customer is only entitled to receive the value of Network Customer Transmission Credits netted against but not to exceed, the Network Customer's monthly transmission charges, and shall not be entitled to additional payments for transmission service sold on its transmission facilities that would otherwise be recoverable by a Transmission Owner under the Tariff. Calculation of any credit under this subsection shall be addressed in either the Network Customer's Service Agreement or any other agreement between the Parties. This crediting provision does not apply to Network Customer transmission facilities that are reflected in the rates for service under this Tariff.

# 31 Designation of Network Load

### 31.1 Network Load:

The Network Customer must designate the individual Network Loads on whose behalf the Transmission Provider will provide Network Integration Transmission Service. The Network Loads shall be specified in the Service Agreement.

## 31.2 Delivery Points Connected with the Transmission Provider:

With respect to physical load connections to the Transmission System, the addition, modification, or abandonment of any delivery point shall be governed by the provisions of Section 31.2 and Attachment AQ. The Network Customer shall provide the Transmission Provider and the Transmission Owner with as much advance notice as reasonably practicable of any physical addition or abandonment of a delivery point, or any modifications requiring action by the Transmission Owner to existing delivery points. Such notice shall be provided in writing by the Network Customer and generally in a manner and form as shown in the Sample Request for Change in Local Delivery Facilities attached to this Tariff as Addendum 1 to Attachment AQ, Delivery Point Assessment Process.

**31.2a New Delivery Point:**

When a Network Customer requests a new delivery point to be built to serve its load such notification and processing of the request shall be governed by the provisions of Attachment AQ.

**31.2b Abandonment of a Delivery Point:**

In the event that a Network Customer desires to abandon an existing delivery point, it shall initiate the process of abandonment by notifying the Transmission Provider and Transmission Owner. Such notification and processing of such request shall be governed by the provisions of Attachment AQ. In the event that there are modifications to other delivery points associated with the abandonment, all such desired changes in delivery point configuration shall be noticed and processed simultaneously.

**31.2c Modification of Delivery Points:**

In the event that a Network Customer desires to modify an existing delivery point in a manner requiring action by a Transmission Owner, it shall initiate such modification by notifying the Transmission Provider and Transmission Owner of this desired change. Such notification, processing and cost recovery of all facilities associated with such request shall be governed by the provisions of Section 31.2a. above and Attachment AQ hereto.

### 31.2d Construction and Cost Recovery

The costs related to the construction, operation, maintenance and/or retirement of a Network Customer's delivery point(s), other than any required Network Upgrades, shall be charged to the Network Customer in accordance with this Tariff and Commission policies. In the event that Network Upgrades are required pursuant to the study results of Attachment AQ make changes in delivery point facilities to upgrade, retire, replace or establish a delivery point, such Network Upgrades shall be to ensure the reliability of the Transmission System and funded pursuant to the provisions of Section III of Attachment J. The Transmission Provider together with affected Transmission Owner(s) will use due diligence to install any transmission facilities required to interconnect a new Network Load designated by the Network Customer.

### 31.2e Delivery Point Transfers

Requests for Delivery Point Transfers will be studied in accordance with Section 32.4 of the Tariff (the Aggregate Transmission Service Study process), except that, upon request of a Network Customer, the Transmission Provider alternatively will evaluate a proposed Delivery Point Transfer in accordance with the Screening Study process set forth in Section 3 of Attachment AR if the Network Customer is able to serve the additional load without changing its Designated Resources. If, upon completion of the Screening Study, the Transmission Provider determines that no third party issues and no Network Upgrades for thermal or voltage mitigations are indicated as a result of the Delivery Point Transfer, no further studies will be required pursuant to Section 32.4 of the Tariff and the Network Customer proposing the Delivery Point Transfer will be tendered a Service Agreement and any necessary supplemental documents reflecting the transferred delivery point(s) and the Network Customer or Transmission Customer serving the load prior to the Delivery Point Transfer will be tendered a Service Agreement and any necessary supplemental documents with the transferred delivery point(s) removed. If the results of the Screening Study indicate that the Delivery Point Transfer will have third party issues or require Network Upgrades for thermal or voltage mitigations, then the Transmission Provider will not tender the Network Customer a Service Agreement, but rather will notify the Network Customer: (i) of results of the Screening Study; and (ii) that to proceed with its Delivery Point Transfer request, the Delivery Point Transfer must be studied pursuant to the Aggregate Transmission Service Study process pursuant to Section 34.2 of the Tariff.

**31.3 Taxes on Contributions in Aid of Construction:**

When the Network Customer funds the construction of Host Transmission Owner-owned facilities pursuant to a contribution in-aid of construction ("CIAC"), the Network Customer also shall reimburse Host Transmission Owner for the tax effect of such CIAC (a "Tax Effect Recovery Factor" or "TERF"), where such payment is considered taxable income and subject to income tax under the Internal Revenue Service (IRS) and/or a state department of revenue (State) requirements. The TERF shall be computed consistent with the methodology set forth in Ozark Gas Transmission Corp., 56 F.E.R.C ¶ 61,349 as reflected in the following formula: TERF = (Current Tax Rate x (Gross Income Amount - Present Value of Tax Depreciation))/(1-Current Tax Rate). The Present Value of Tax Depreciation Amount shall be computed by discounting Host Transmission Owner's anticipated tax depreciation deductions with respect to the constructed property by Host Transmission Owner's current weighted average cost of capital. If, based on current law, Host Transmission Owner determines such contribution by the Network Customer shall not be taxable, Host Transmission Owner will not charge a TERF; however, in the event that such contribution is later determined by the IRS or state tax authority to be taxable, the Network Customer shall reimburse Host Transmission Owner in the amount of the TERF, including any interest and penalty charged to Host Transmission Owner by the IRS and/or state. Such reimbursement is due within thirty (30) Calendar Days of the date upon which Host Transmission Owner notifies the Network Customer of such determination. If, based on current law, Host Transmission Owner determines such contribution by the Network Customer is taxable, Host Transmission Owner will charge a TERF; however, in the event that such contribution is later determined by the IRS or state tax authority not to be taxable, the Host Transmission Owner shall reimburse Network Customer in the amount of the TERF, including any interest calculated in accordance with the methodology set forth in FERC's regulations at 18 CFR § 35.19a(a)(2)(iii). Such reimbursement is due within thirty (30) Calendar Days of the date upon which the

IRS or state tax authority notifies Host Transmission Owner of such determination.

At Network Customer's request and expense, Host Transmission Owner shall file with the IRS a request for a private letter ruling as to whether any CIAC paid, or to be paid, by Network Customer to Host Transmission Owner is subject to federal income taxation. Network Customer will prepare the initial draft of the request for a private letter ruling, and will certify under penalties of perjury that all facts represented in such request are true and accurate to the best of Network Customer's knowledge. Host Transmission Owner and Network Customer shall cooperate in good faith with respect to the submission of such request. Host Transmission Owner shall keep Network Customer fully informed of the status of such request for a private letter ruling and shall execute either a privacy act waiver or a limited power of attorney, in a form acceptable to the IRS that authorizes Network Customer to participate in all discussions with the IRS regarding such request for a private letter ruling. Host Transmission Owner shall allow Network Customer to attend all meetings with IRS officials about the request and shall permit Network Customer to prepare the initial drafts of any follow-up letters in connection with the request.

If Network Customer shall have reimbursed Host Transmission Owner for the TERF, upon request by Network Customer and at Network Customer’s expense, Host Transmission Owner shall contest the taxability of such CIAC; provided, however, that Host Transmission Owner shall not be required to contest such taxability if Host Transmission Owner waives the payment by Network Customer of any amount that might otherwise be payable by Network Customer.

**31.4 Delivery Points Not Physically Interconnected with the Transmission Provider:**

This section applies to both initial designation pursuant to Section 31.1 and the subsequent addition of new Network Load not physically interconnected with the Transmission System. To the extent that the Network Customer desires to obtain transmission service for a load outside the Transmission System, the Network Customer shall have the option of (1) electing to include the entire load as Network Load for all purposes under Part III of the Tariff and designating Network Resources in connection with such additional Network Load, or (2) excluding that entire load from its Network Load and purchasing Point-To-Point Transmission Service under Part II of the Tariff. Notwithstanding the provisions of any agreement Network Customer may have with the other transmission provider, the addition, modification, or abandonment of any delivery point shall be governed by the provisions of this section and, as applicable, Attachment AQ hereto. To the extent that the Network Customer gives notice of its intent to add a new delivery point as part of its Network Load pursuant to this section and such request for the addition of a new delivery point involves the use of existing Designated Resources across an interface where preexisting transmission service rights to serve existing delivery points from an existing Designated Resource exist, such new delivery point shall be governed by the applicable provisions in Sections 31.2a through 31.2d and Attachment AQ hereto. In the case where there are no preexisting transmission service rights from an existing Designated Resource across the interface to serve the new delivery point, such request for a new delivery point must be made through a modification of service pursuant to a new Application.

### 31.5 Changes in Service Requests:

Under no circumstances shall the Network Customer's decision to cancel or delay a requested change in Network Integration Transmission Service (e.g. the addition of a new Network Resource or designation of a new Network Load) in any way relieve the Network Customer of its obligation to pay the costs of transmission facilities caused to be constructed by the Transmission Provider and charged to the Network Customer as reflected in the Service Agreement. However, the Transmission Provider must treat any requested change in Network Integration Transmission Service in a non-discriminatory manner.

**31.6 Annual Load and Resource Information Updates:**

The Network Customer shall provide the Transmission Provider with annual updates of Network Load and Network Resource forecasts consistent with those included in its Application for Network Integration Transmission Service under Part III of the Tariff including, but not limited to, any information provided under section 29.2(ix) pursuant to the Transmission Provider's planning process in Attachment O. The Network Customer also shall provide the Transmission Provider with timely written notice of material changes in any other information provided in its Application relating to the Network Customer's Network Load, Network Resources, its transmission system or other aspects of its facilities or operations affecting the Transmission Provider's ability to provide reliable service.

## 32 Additional Study Procedures For Network Integration Transmission Service Requests

Study procedures for Network Integration Transmission Service requests of less than one year shall be performed in accordance with the System Impact Study provisions of Section 32 and in accordance with Attachment AC to this Tariff. Facilities Studies are not performed for requests of less than one year. Study procedures for Network Integration Transmission Service requests of one year or more shall be performed using the Aggregate Transmission Service Study process in accordance with Attachment Z1 and the Facilities Study provisions of Section 32 to this Tariff. System Impact Studies are not performed for Long-Term Service requests.

### 32.1 Notice of Need for System Impact Study:

After receiving a request of less than one year for service, the Transmission Provider shall determine based on Attachment AC whether a System Impact Study is needed. A description of the Transmission Provider's methodology for completing a System Impact Study is provided in Attachment D.

### 32.2 System Impact Study Agreement and Cost Reimbursement:

The Eligible Customer's completion of the OASIS reservation with the following statement in the customer comment field "exercise System Impact Study option" shall provide the Transmission Provider with the required notification that the Eligible Customer elects to move forward with the System Impact Study option, as provided in Attachment AC of this Tariff. Completing the reservation in this manner constitutes Eligible Customer's agreement to pay for all System Impact Studies necessary to support the evaluation of the service.

## 32.3 System Impact Study Procedures:

The System Impact Study for Network Integration Transmission Service requests of less than one year shall be in accordance with Attachment AC of the Tariff.

### 32.4 Facilities Study Procedures:

Study procedures for Network Integration Transmission Service requests of one year or longer shall be performed using the Aggregate Transmission Service Study process in accordance with Attachment Z1 of this Tariff.

## 32.5 Penalties for Failure to Meet Study Deadlines:

Section 19.9 defines penalties that apply for failure to meet the 60-day study completion due diligence deadlines for System Impact Studies and Facilities Studies under Part II of the Tariff. These same requirements and penalties apply to service under Part III of the Tariff.

**32.6 Facilities Study Modifications:**

Any change in design arising from inability to site or construct facilities as proposed will require development of a revised good faith estimate. New good faith estimates also will be required in the event of new statutory or regulatory requirements that are effective before the completion of construction or other circumstances beyond the control of the Transmission Provider or the affected Transmission Owner(s) that significantly affect the final cost of new facilities or upgrades to be charged to the Eligible Customer pursuant to the provisions of Part III of the Tariff.

## 32.7 Due Diligence in Completing New Facilities:

The Transmission Provider and the affected Transmission Owner(s) shall use due diligence to add necessary facilities or upgrade the Transmission System within a reasonable time. The Transmission Provider will not allow the upgrade to the existing or planned Transmission System in order to provide the requested Firm Network Integration Transmission Service if doing so would impair system reliability or otherwise impair or degrade existing firm service

### 32.8 Partial Interim Service:

If the Transmission Provider determines that there will not be adequate transfer capability to satisfy the full amount of a Completed Application for Firm Network Integration Transmission Service, the Transmission Provider nonetheless shall be obligated to offer and provide the portion of the requested Firm Network Integration Transmission Service that can be accommodated without addition of any facilities and through redispatch. However, the Transmission Provider shall not be obligated to provide the incremental amount of requested Firm Network Integration Transmission Service that requires the addition of facilities or upgrades to the Transmission System until such facilities or upgrades have been placed in service.

**32.9 Expedited Procedures for New Facilities:**

In lieu of the procedures set forth above, the Eligible Customer shall have the option to expedite the process by requesting the Transmission Provider to tender at one time, together with the results of required studies, an "Expedited Service Agreement" pursuant to which the Eligible Customer would agree to compensate the Transmission Provider and affected Transmission Owner(s) for all costs incurred pursuant to the terms of the Tariff. In order to exercise this option, the Eligible Customer shall request in writing an Expedited Service Agreement covering all of the above-specified items within the time limits set forth in Attachment P from the time it receives the results of the System Impact Study or Aggregate Transmission Service Study identifying needed facility additions or upgrades or costs incurred in providing the requested service. While the Transmission Provider and affected Transmission Owner(s) agree to provide the Eligible Customer with their best estimate of the new facility costs and other charges that may be incurred, such estimate shall not be binding and the Eligible Customer must agree in writing to compensate the Transmission Provider and affected Transmission Owner(s) for all costs incurred pursuant to the provisions of the Tariff. The Eligible Customer shall execute and return such an Expedited Service Agreement within fifteen (15) days of its receipt or the Eligible Customer's request for service will cease to be a Completed Application and will be deemed terminated and withdrawn.

**32.10 Delays in Construction of New Facilities:**

If any event occurs that will materially affect the time for completion of new facilities, or the ability to complete them, the Transmission Provider shall promptly notify the Eligible Customer. In such circumstances, the Transmission Provider shall within thirty (30) days of notifying the Eligible Customer of such delays, convene a technical meeting with the Eligible Customer and affected Transmission Owner(s) to evaluate the alternatives available to the Eligible Customer. The Transmission Provider also shall make available to the Eligible Customer studies and work papers related to the delay, including all information that is in the possession of the Transmission Provider and affected Transmission Owner(s) that is reasonably needed by the Eligible Customer to evaluate any alternatives.

### 32.11 Alternatives to the Original Facility Additions:

When the review process of Section 32.10 determines that one or more alternatives exist to the originally planned construction project, the Transmission Provider together with the affected Transmission Owner(s) shall present such alternatives for consideration by the Eligible Customer. If upon review of the alternatives, the Eligible Customer desires to maintain its Completed Application subject to construction of the alternative facilities, it may request the Transmission Provider to submit a revised Service Agreement for Firm Network Integration Transmission Service. The alternative approach may include redispatch in accordance with Attachment K to this Tariff. In the event the Transmission Provider concludes that no reasonable alternative exists and the Eligible Customer disagrees, the Eligible Customer may seek relief under the dispute resolution procedures pursuant to Section 12 or it may refer the dispute to the Commission for resolution.

# 33 Load Shedding and Curtailments

## 33.1 Procedures:

Prior to the Service Commencement Date, the Transmission Provider, in coordination with the affected Transmission Owner(s), and the Network Customer shall establish Load Shedding and Curtailment procedures pursuant to the Network Operating Agreement with the objective of responding to contingencies on the Transmission System and on systems directly and indirectly interconnected with the Transmission System. The Parties including the affected Transmission Owner(s) will implement such programs during any period when the Transmission Provider determines that a system contingency exists and such procedures are necessary to alleviate such contingency. The Transmission Provider will notify all affected Network Customers and affected Transmission Owners in a timely manner of any scheduled Curtailment.

### 33.2 Transmission Constraints:

During any period when the Transmission Provider determines that a transmission constraint exists on the Transmission System, and such constraint may impair the reliability of the Transmission System, the Transmission Provider will take whatever actions, consistent with Good Utility Practice, that are reasonably necessary to maintain the reliability of the Transmission System. To the extent the Transmission Provider determines that the reliability of the Transmission System can be maintained by redispatching resources, the Transmission Provider will initiate procedures pursuant to the Network Operating Agreement to redispatch all Network Resources on a least cost basis without regard to the ownership of such resources in accordance with the Energy and Operating Reserve Markets procedures in Attachment AE. Any redispatch under this section may not unduly discriminate between the Transmission Owners' use of the Transmission System on behalf of their Native Load Customers and any Network Customer's use of the Transmission System to serve its designated Network Load.

### 33.3 Cost Responsibility for Relieving Transmission Constraints:

Whenever the Transmission Provider implements least cost redispatch procedures in response to a transmission constraint, all Transmission Owners and Network Customers shall pay their share of redispatch costs as determined through the operation and settlement of the Energy and Operating Reserve Markets as described in Attachment AE.

### 33.4 Curtailments of Scheduled Deliveries:

If the Transmission Provider determines that it is necessary to curtail scheduled deliveries, the Parties and the affected Transmission Owner(s) shall curtail such schedules in accordance with the Network Operating Agreement and pursuant to the Transmission Loading Relief procedures specified in Attachment R.

### 33.5 Allocation of Curtailments:

The Transmission Provider shall, on a non-discriminatory basis, curtail the transaction(s) that effectively relieve the constraint. However, to the extent practicable and consistent with Good Utility Practice, any Curtailment will be shared by the affected Transmission Owner(s) and Network Customer in proportion to their respective Load Ratio Shares. The Transmission Provider shall not direct the Network Customer to curtail schedules to an extent greater than the Transmission Provider would curtail the Transmission Owner's schedules under similar circumstances.

### 33.6 Load Shedding:

To the extent that a system contingency exists on the Transmission Provider's Transmission System and the Transmission Provider determines that it is necessary for the affected Transmission Owner(s) and the Network Customer to shed load, the Parties shall shed load in accordance with previously established procedures under the Network Operating Agreement.

**33.7 System Reliability:**

Notwithstanding any other provisions of this Tariff, the Transmission Provider reserves the right, consistent with Good Utility Practice and on a not unduly discriminatory basis, to curtail Network Integration Transmission Service without liability on the Transmission Provider's or Transmission Owner's part for the purpose of making necessary adjustments to, changes in, or repairs on the Transmission Owner's lines, substations and facilities, and in cases where the continuance of Network Integration Transmission Service would endanger persons or property. In the event of any adverse condition(s) or disturbance(s) on the Transmission System or on any other system(s) directly or indirectly interconnected with the Transmission System, the Transmission Provider, consistent with Good Utility Practice, also may curtail Network Integration Transmission Service in order to (i) limit the extent or damage of the adverse condition(s) or disturbance(s), (ii) prevent damage to generating or transmission facilities, or (iii) expedite restoration of service. The Transmission Provider will give the Network Customer as much advance notice as is practicable in the event of such Curtailment. Any Curtailment of Network Integration Transmission Service will be not unduly discriminatory relative to the Transmission Owner's use of the Transmission System on behalf of its (their) Native Load Customers. In the event that the Network Customer (or any Transmission Owner that is not a Network Customer with regard to its bundled load) fails to respond to established Load Shedding and Curtailment procedures or to cease or reduce service in response to a directive by the Transmission Provider, the Network Customer shall pay any applicable charges and the following penalty (in addition to the charges for all of the service used): For the applicable month, 100% of the Network Integration Transmission Service charge under Schedule 9 plus 100% of the charges assessed under Schedule 11. This penalty shall apply only to the portion of the service that the Transmission Customer fails to curtail in response to a Curtailment directive. The Transmission Provider shall compensate the Transmission Owners for 100% of the (i) Network Integration Transmission

Service charge, (ii) Base Plan Zonal Charge and (iii) Region-wide Charge for the period for which they have provided service.

## 34 Rates and Charges

The Network Customer shall pay the Transmission Provider for any Direct Assignment Facilities, Directly Assigned Upgrade Costs, Ancillary Services, Base Plan Zonal Charges (Schedule 11), Region-wide Charges (Schedule 11) and applicable study costs, consistent with Commission policy, along with the following:

**34.1 Monthly Demand Charge:**

For all Network Load served by the Transmission Provider, except as provided under Sections 34.2, 34.3, and 34.9, the Network Customer shall pay a monthly Demand Charge, which shall be determined by multiplying its Load Ratio Share times one twelfth (1/12) of the Zonal Annual Transmission Revenue Requirement ("Zonal ATRR") specified in Attachment H less:

1) any amount reallocated in accordance with Section IV.A of Attachment J of this Tariff; and

2) any revenues for the previous calendar year (i) distributed to each Transmission Owner in the Zone under Attachment L resulting from charges under Schedules 7 and 8, and (ii) distributed to each Transmission Owner in the Zone under Section IV of Attachment AU and allocated in proportion to Schedule 7 and 8 revenues under Section V of Attachment AU, subject to the limitations in subsections a and b below. Any such adjustment made by the Transmission Provider shall be set forth in the RRR File.

   a. For each Transmission Owner utilizing a formula rate, the Transmission Provider shall not make an adjustment for Schedule 7 and 8 revenues and for revenues distributed and allocated under Attachment AU if the Schedule 7 and 8 revenues and revenues distributed and allocated under Attachment AU are credited and updated on an annual basis in the Transmission Owner formula rate in a manner that reduces the Zonal ATRR.

   b. For each Transmission Owner utilizing a stated rate or utilizing a formula rate without annual update of the revenue credits, the revenue adjustment described in this Section 34.1(2) shall be *only the difference, whether positive or negative, between the previous calendar year Schedule 7 and 8 revenues and* the amount of Schedule 7 and 8 revenues and revenues distributed and allocated

under Attachment AU, if any, already credited in the calculation of the Zonal ATRR shown in Table 1, Section I of Attachment H. The amount of Schedule 7 and 8 revenues and revenues distributed and allocated under Attachment AU already credited in calculation of the Zonal ATRR shown in Table 1, Section I of Attachment H for such Transmission Owner is shown in Table 3, Section I of Attachment H.

**34.2 Monthly Demand Charge – Zone 1:**

For Network Load located within Zone 1, the Network Customer shall pay a monthly Demand Charge. The component of such Demand Charge for American Electric Power's revenue requirement shall be calculated in accordance with Addendum 1 to Attachment H. The components of such Demand Charge for other Transmission Owners' revenue requirements in Zone 1 shall be calculated in accordance with Section 34.1 of this Tariff. All components of the Demand Charge for Zone 1 shall be adjusted as provided in Section 34.1 for any amount reallocated in accordance with Section IV.A of Attachment J and for any Schedule 7 and 8 revenues distributed to each Transmission Owner in the Zone under Attachment L and for any revenues distributed and allocated in accordance with Attachment AU.

**34.3 Monthly Demand Charge – Zone 11:**

For Network Load located within Zone 11, the Network Customer shall pay a monthly Demand Charge. The component of such Demand Charge for Southwestern Public Service's revenue requirement shall be calculated in accordance with Addendum 5 of Attachment H. The components of such Demand Charge for other Transmission Owners' revenue requirements in Zone 11 shall be calculated in accordance with Section 34.1 of this Tariff. All components of the Demand Charge for Zone 11 shall be adjusted as provided in Section 34.1 for any amount reallocated in accordance with Section IV.A of Attachment J and for any Schedule 7 and 8 revenues distributed to each Transmission Owner in the Zone under Attachment L and for any revenues distributed and allocated in accordance with Attachment AU.

**34.4 Determination of Network Customer's Monthly Network Load:**

The Network Customer's monthly Network Load is its hourly load (60 minute, clock-hour); provided, however, the Network Customer's monthly Network Load will be its hourly load coincident with the monthly peak of the Zone where the Network Customer load is physically located. Where a Network Customer has Network Load in more than one Zone, the monthly Network Load will be determined separately for each Zone. Where a Network Customer has designated Network Load not physically interconnected with the Transmission System under Section 31.4, the Network Customer's monthly Network Load will be its hourly load coincident with the monthly peak of the Zone that is the basis for charges under Schedule 9.

**34.5 Determination of Transmission Provider's Monthly Zone Transmission Load:**

The Transmission Provider's monthly Transmission System load shall be determined for each Zone on a non-coincident basis. The Transmission Provider’s monthly Zone transmission load is the Zone's Monthly Transmission System Peak.

## 34.6 Network Customer Obligations for Redispatch Costs:

Any redispatch costs incurred to relieve a system constraint to be charged to the Network Customer shall be collected and paid as part of the Energy and Operating Reserve Market settlement procedures described under Attachment AE of this Tariff. Network Customers having Network Service subject to redispatch (until requisite transmission upgrades are placed into service ) will be eligible to nominate Candidate Auction Revenue Rights associated with that service only for those times of the year and for only the amounts of service that are not subject to redispatch. Network Service with a redispatch requirement (until requisite transmission upgrades are placed into service) will not be eligible for any Candidate Long-Term Congestion Rights because it does not have continuous service covering the entirety of the associated Transmission Congestion Right year.

The Candidate Auction Revenue Rights and Candidate Long-Term Congestion Rights eligibility limitations set forth herein shall apply prospectively to Candidate Auction Revenue Rights and Candidate Long-Term Congestion Rights granted after October 19, 2017. All Auction Revenue Rights granted prior to October 19, 2017 shall remain in effect until the end of the allocation year. Long-Term Congestion Rights granted prior to October 19, 2017 shall remain in effect, unless surrendered pursuant to Section 7.2.4 of Attachment AE of this Tariff.

## 34.7 Stranded Cost Recovery:

This Tariff does not affect in any way the right of any Transmission Owner to seek and receive stranded cost recovery or the right of anyone to oppose such stranded cost recovery. Thus, the Transmission Owner(s) may seek to recover stranded costs from the User(s) in accordance with the terms, conditions and procedures set forth in FERC Order No. 888. However, the Transmission Owner(s) must separately file any specific proposed stranded cost charge under Section 205 of the Federal Power Act, if FERC jurisdictional. If the Commission approves stranded cost charges to be recovered through schedules to be implemented by the Transmission Provider, the Transmission Provider as agreed shall charge and collect the appropriate charge(s) from the relevant User(s) and distribute the appropriate amounts directly to the relevant Transmission Owner(s).

## 34.8 SPP Costs:

The Network Customer shall pay SPP's administrative costs in accordance with Schedule 1-A.

**34.9 Monthly Demand Charge – Zone 10:**

A. Calculation of the Monthly Demand Charge

1. For all Network Load located within Zone 10, the Network Customer shall pay monthly Demand Charges, which shall be determined by multiplying its Load Ratio Share times one twelfth (1/12) of the total Zonal ATRR for Zone 10.

2. The total Zonal ATRR for Zone 10 for purposes of the Monthly Demand Charge for Network Integration Transmission Service shall be calculated in accordance with the following:

a. The component of the total Zonal ATRR associated with Southwestern Power Administration's Non-Federal Transmission Service ("NFTS") ATRR shall be the NITS ATRR shown in 10a(i) of Column (3) of Table 1 of Attachment H of the Tariff and shall be calculated in accordance with Section II.8 of Attachment H of the Tariff.

b. The component of the total Zonal ATRR for a Transmission Owner other than Southwestern Power Administration in Zone 10 shall be as provided in Table 1 of Attachment H of the Tariff.

B. Reduction of Network Integration Transmission Service Charges for Deliveries of Federal Power-Southwestern

1. A Network Customer taking Network Integration Transmission Service in Zone 10 may have its Network Load reduced for deliveries of Federal Power-Southwestern. The Transmission Provider shall apply a reduction of the Network Customer's monthly zonal Demand Charge under Schedule 9 and Schedule 11 of this Tariff for the amount of energy scheduled under Transmission Transactions (as defined in Attachment AD of this Tariff) during the hour of the monthly Zonal peak.

2. Such reduction shall be one hundred percent (100%) of the scheduled deliveries of Federal Power-Southwestern to the Network Customer's charges for only Schedule 9 and Schedule 11 of this Tariff. All other Tariff

charges, as applicable, shall be based on the total Network Load of the Network Customer.

3. The reduction of Network Integration Transmission Service charges provided pursuant to this Section 34.9.B shall only be provided to Network Customers where the point of delivery identified for deliveries of Federal Power-Southwestern shall also be a point of delivery identified in the Network Customer's Service Agreement which is physically connected to Southwestern Power Administration transmission facilities located in Zone 10.

# 35 Operating Arrangements

**35.1 Operation under the Network Operating Agreement:**

The Network Customer shall plan, construct, operate and maintain its facilities in accordance with Good Utility Practice and in conformance with the Network Operating Agreement.

**35.2 Network Operating Agreement:**

The terms and conditions under which the Network Customer shall operate its facilities and the technical and operational matters associated with the implementation of Part III of the Tariff shall be specified in the Network Operating Agreement. The Network Operating Agreement shall provide for the Parties, including the affected Transmission Owner(s), to (i) operate and maintain equipment necessary for integrating the Network Customer within the Transmission System (including, but not limited to, remote terminal units, metering, communications equipment and relaying equipment), (ii) transfer data between the Transmission Provider and the Network Customer (including, but not limited to, heat rates and operational characteristics of Network Resources, generation schedules for units outside the Transmission System, interchange schedules, unit outputs for redispatch required under Section 33, voltage schedules, loss factors and other real time data), (iii) use software programs required for data links and constraint dispatching, (iv) exchange data on forecasted loads and resources necessary for long-term planning, and (v) address any other technical and operational considerations required for implementation of Part III of the Tariff, including scheduling protocols. The Network Operating Agreement will recognize that the Network Customer shall either (i) satisfy its Balancing Authority Area requirements, including all necessary Ancillary Services, by contracting with the Transmission Provider, or (ii) satisfy its Balancing Authority Area requirements, including all necessary Ancillary Services requirements, by contracting with another entity, consistent with Good Utility Practice, which satisfies the applicable reliability guidelines of the Electric Reliability Organization and SPP Criteria. The Transmission Provider shall not unreasonably refuse to accept contractual arrangements with another entity for Ancillary Services. The Network Operating Agreement is included in Attachment G.

## 36. Scheduling

Each Network Customer shall ensure that all necessary information required for the Energy and Operating Reserve Markets is submitted in accordance with Attachment AE.

# IV. SPECIAL RULES ON USE OF TARIFF

# 37. During Transition Period

**37.1 Service Not Required for Bundled Customers or Customers Under Retail Access Programs**:

A Transmission Owner shall not be obligated to take Network Integration Transmission Service or Point-To-Point Transmission Service from the Transmission Provider in accordance with this Tariff for (1) bundled retail load not having a choice of power suppliers or (2) for bundled retail load it continues to serve that had the right to choose a different power supplier under a state retail access program or legislation and that was retail load served by the Transmission Owner prior to the retail load receiving the right to choose a different supplier.

## 37.2 Availability of Network Integration Transmission Service:

All Transmission Owners shall have the option of electing Network Integration Transmission Service for retail loads or customers whether or not such loads or customers have the right to choose a different power supplier during the Transition Period.

### 37.3 Unbundled Wholesale:

A Transmission Owner shall be obligated to take Network Integration Transmission Service or Point-To-Point Transmission Service from the Transmission Provider in accordance with this Tariff for any sales to wholesale load the Commission requires to be unbundled unless such service is arranged by another entity or is pursuant to a Grandfathered Agreement.

## 37.4 Grandfathered Transactions:

During the Transition Period, transmission provided pursuant to Grandfathered Agreements shall continue to term in accordance with the provisions of the Grandfathered Agreement unless the parties agree otherwise. Grandfathered Transactions are defined in Section 1.14a.

# 38 After Transition Period

## 38.1 Applicability to Retail Load Having Choice:

Beginning on the first day after the end of the Transition Period, this Tariff shall be applicable to all transmission service over the Transmission System provided for retail loads having the right to choose a different power supplier except for deliveries made pursuant to Grandfathered Agreements.

## 38.2 Applicability to Retail Load Not Having Choice:

Beginning at the end of the fifth year after the last day of the Transition Period, the Transmission Owner or in the case of a Nebraska public-power entity beginning after the fifth year of the transfer of functional control of such entity's transmission facilities to the Transmission Provider, shall take Network Integration Transmission Service or Point-To-Point Transmission Service from the Transmission Provider in accordance with this Tariff for sales to retail customers not having the right to choose a different power supplier.

## 38.3 Grandfathered Agreements:

Transmission Service provided pursuant to Grandfathered Agreements shall continue to term in accordance with the provisions of the Grandfathered Agreements unless the parties agree otherwise. Grandfathered Agreements are defined in Section 1 of this Tariff.

# 39. Applicability of Non-Rate Terms and Conditions

## 39.1 Subject to State Laws and Regulations and Public Power Rate Schedules

The participation in this Tariff by a Transmission Owner that is not a public utility under the Federal Power Act, but rather is a public-power entity, is subject in all respects to the laws and regulations of the state of its creation and to rate schedules adopted by its governing board under state law. The Commission has exclusive jurisdiction to interpret the provisions of this Tariff and how the provisions apply to such public-power entity(ies). However, in the event that the governing board of such public-power entity(ies), subject to state court review, determines that a conflict exists between the applicable state law, regulations, or rate schedules, and provisions of this Tariff as interpreted by the Commission, such state law, regulations, or rate schedules shall govern with respect to the application of this Tariff to such public-power entity(ies). Should the governing board of such public-power entity(ies) determine that such a conflict exists, the public-power entity(ies) must file, with the Commission, such necessary documents notifying the Commission of the governing board determination of such a conflict and explaining both the conflict (including what state law, regulations, or rate schedules, and what Tariff provisions are at issue) and what actions the governing board is taking in response to that determination.

### 39.2 Bundled Retail and Grandfathered Load:

Notwithstanding Sections 37 and 38 of this Tariff, each Transmission Owner (which is not otherwise taking Network Integration Transmission Service) is subject to the non-rate and conditions of this Tariff for: (1) its bundled retail load not having a choice of power suppliers; (2) its bundled retail load that had the right to choose a different power supplier under a state retail access program or legislation and that was retail load served by the Transmission Owner prior to the retail load receiving the right to choose a different supplier; and (3) its bundled load under Grandfathered Agreements. For purposes of this provision the non-rate terms and conditions are those that would apply to Network Customers. In addition, unless a Transmission Owner executes a Service Agreement under this Part III, it will not be considered as taking Network Integration Transmission Service.

## 39.3 Participation by Western Area Power Administration Subject to Federal Laws and Regulations

### (a) Subject to Acts of Congress

The participation by the United States through Western-UGP and/or Western-RMR in this Tariff is subject in all respects to acts of Congress and to regulations of the Secretary of Energy established thereunder, and to rate schedules promulgated by the Secretary of Energy. This reservation includes, but is not limited to, the statutory limitations upon the authority of the Secretary of Energy to submit disputes arising under this Tariff to arbitration. In the event of a conflict between these Federal participation provisions in Section 39.3 of this Tariff and any other provision of this Tariff, these Federal participation provisions shall have precedence with respect to the application of this Tariff to Western-UGP and/or Western-RMR.

### (b) Contingent Upon Appropriations and Authorization

Where activities provided for in this Tariff extend beyond the current fiscal year, continued expenditures by the United States through Western-UGP and/or Western-RMR are contingent upon Congress making the necessary appropriations required for the continued performance of the obligations of the United States under this Tariff. In case such appropriation is not made, the Parties hereby release the United States from its contractual obligations under this Tariff and from all liability due to the failure of Congress to make such appropriation.

### (c) Employment Practices; Contractor Agreement

For the purpose of this Federal participation provision, the term "Contract" shall mean this Tariff and the term "Contractor" shall mean a Party having transactions with Western-UGP and/or Western-RMR. During the performance of this Contract, the Contractor agrees to the provisions set forth in Section 39.3 and its subdivisions. In addition, the Contractor will include the following provisions in every subcontract or purchase order involving Western-UGP and/or Western-RMR unless exempted by rules, regulations, or order of the Secretary of Labor.

#### (i) Equal Opportunity Employment Practices

Section 202 of Executive Order No. 11246, 30 Fed. Reg. 12319 (1965), as amended by Executive Order No. 12086, 43 Fed. Reg. 46501 (1978), which provides, among other things, that the Contractor will not discriminate against any employee or applicant for employment because of race, color, religion, sex, or national origin, is incorporated by reference

in the Contract by reference to same as if the specific language had been written into the Contract, except that Indian Tribes and tribal organizations may apply Indian Preference to the extent permitted by federal law.

**(ii) Contract Work Hours and Safety Standards**

The Contract, to the extent that it is of a character specified in Section 103 of the Contract Work Hours and Safety Standards Act ("Act"), 40 U.S.C. § 3701, as amended or supplemented, is subject to the provisions of the Act, 40 U.S.C. § 3701-3708, as amended or supplemented, and to regulations promulgated by the Secretary of Labor pursuant to the Act.

**(iii) Use of Convict Labor**

The Contractor agrees not to employ any person undergoing sentence of imprisonment in performing the Contract except as provided by 18 U.S.C. § 3622(c), as amended or supplemented, and Executive Order No. 11755, 39 Fed. Reg. 779 (1973), as amended or supplemented.

**(d) Western-UGP Co-supply Arrangement**

If Western-UGP is a Network Customer and designates Network Load within Zone 19, or outside of the Transmission Provider's Transmission System, the amount of Western-UGP's Network Load shall be based upon its Statutory Load Obligations. Western-UGP's Statutory Load Obligations to its customers are limited because it is not the full-requirements power supplier, except in certain limited cases, and therefore, Western-UGP generally does not serve the total load at a delivery point. The portion of load that exceeds Western-UGP's obligation at a delivery point must be served by another transmission customer ("Co-Supplier"). A Co-Supplier to load in excess of Western-UGP's Statutory Load Obligations shall be allowed to designate its portion of the total load at a delivery point as Network Load. In such case, that Co-Supplier's Network Load shall be the total load at each delivery point less Western-UGP's Statutory Load Obligations.

**(e) Western-UGP Federal Service Exemption**

The Federal Service Exemption applies to transmission of Federal Power-Western-UGP to the Statutory Load Obligations under this Tariff. Western-UGP was established on December 21, 1977, pursuant to Section 302 of the Department of Energy Organization Act, Public Law 95-91, dated August 4, 1977. By law, Western-UGP markets Federal Power-Western-UGP to meet its Statutory Load Obligations. Western-UGP's transmission system was built

primarily to enable the delivery of Federal power to satisfy these obligations. Use of transmission facilities that Western-UGP owns, operates, or to which it has contract rights for delivery of Federal long-term firm capacity and energy to project use and firm electric service customers is a Western-UGP responsibility under the terms and conditions of marketing criteria and electric service contracts implementing Statutory Load Obligations to market Federal power. This is complementary with the provisions of transmission service under the Tariff. Capacity in transmission facilities provided by Western-UGP under this Tariff is solely for the use of Available Transfer Capability in excess of the capability Western-UGP requires for the delivery of long-term firm capacity and energy to Statutory Load Obligations. Western-UGP retains the Available Transfer Capability from its Federal Power-Western-UGP in the UMZ to deliver to its Statutory Load Obligations.

**(i)** Western-UGP shall be exempt from the Region-wide Charge associated with Western-UGP's delivery of Federal Power-Western-UGP to Statutory Load Obligations internal to the UMZ or external to the Transmission Provider. The Transmission Provider will not assess load served by Western UGP in the Western Interconnection for the Region-wide Charge, associated with transmission facilities in the Eastern Interconnection, to the extent that load that is located in the Western Interconnection is served only by resources in the Western Interconnection.

**(ii)** Western-UGP shall be exempt from congestion and marginal loss charges in accordance with Attachment AE of this Tariff for deliveries from Federal Power-Western-UGP resources across the UMZ to Western-UGP's Statutory Load Obligations. Western-UGP shall be responsible for providing the Transmission Provider real power losses for the energy delivered from the Federal Power-Western-UGP resources under the Federal Service Exemption across Zone 19 in accordance with Attachment M of this Tariff.

**(f) Federal Projects**

The individual hydroelectric projects from which the Western-UGP markets power and energy are owned and controlled by the Department of the Army or the U.S. Bureau of Reclamation. These projects are operated to satisfy multiple purposes such as irrigation, navigation, flood control, fish and wildlife, and recreation, as well as power production. Any operation of, and maintenance, modification or addition to such projects is subject to the requirements and express approval of either the Department of the Army or the U.S. Bureau of

Reclamation. Western-UGP's transmission system is integrated at various locations through switchyard facilities owned and operated by the Department of the Army or U.S. Bureau of Reclamation. Any operation of, and maintenance, modification, or addition to such facilities, including the funding of such activities, is subject to the requirements and express approval of the Department of the Army or U.S. Bureau of Reclamation. Western-UGP shall communicate and coordinate with the Department of the Army on any operation of, and maintenance, modification, or addition to the Department of the Army or the U.S. Bureau of Reclamation facilities as requested by the Transmission Provider; provided that compliance with the Transmission Provider's request shall be within the discretion of, and subject to the approval of, the Department of the Army or the U.S. Bureau of Reclamation. In the event the Transmission Provider requests changes to a hydroelectric generation facility due to redispatch, operation, maintenance or addition to hydroelectric generation owned and operated by the Department of the Army or U.S. Bureau of Reclamation and marketed by Western-UGP, Western-UGP shall coordinate its operations with the Department of the Army and U.S. Bureau of Reclamation to accommodate the Transmission Provider's request to the extent allowed by the Department of the Army or U.S. Bureau of Reclamation. Nothing in this section is intended to change the Department of the Army or U.S. Bureau of Reclamation obligations pursuant to their registration with NERC.

**(g) Federal Projects as Designated Resources**

The Federal Power-Western-UGP resources will be deemed to be eligible as Western-UGP Designated Resources.

**(h) Transmission Expansion, Interconnections, Modifications, and Additions**

As a Federal agency, Western-UGP must comply with various environmental and natural resource laws regulating the construction, operation and maintenance of its transmission facilities, including but not limited to the National Historic Preservation Act, 16 U.S.C. § 470 to 470x-6, the National Environmental Policy Act of 1969, 42 U.S.C. §§ 4321-4347 ("NEPA"), the Endangered Species Act, 16 U.S.C. §§ 1531-1544, and the Archaeological Resources Protection Act of 1979, 16 U.S.C. § 470aa-470mm (2006); and regulations and Executive Orders implementing these laws, as they may be amended or supplemented, as well as any other existing or subsequent applicable laws, regulations and Executive Orders. The Transmission Provider shall assist Western-UGP in complying with the environmental laws, regulations and resource protection measures that apply to Western-UGP for changes to the Western-UGP transmission facilities. Transmission expansion, interconnections, modifications and additions of, and or

to, Western-UGP's transmission facilities are dependent on Western-UGP's conclusions and decisions reached in the record of decision under NEPA, or other such appropriate NEPA document, concerning the respective project. Western-UGP's NEPA review could result in a decision not to take action or to delay action. Transmission Provider agrees to abide by such decision and it shall not be subject to the dispute resolution procedures of this Tariff.

**(i) Advance Funding**

In the absence of appropriated funds, Western-UGP requires advance deposit of funds when it is required to perform any work for third parties. As such, Western-UGP must receive an advance deposit of funds pursuant to Federal law prior to Western-UGP committing to perform any work pursuant to the Tariff.

**(j) Liability**

Western-UGP and/or Western-RMR, each in the capacity of a Transmission Customer as defined in Part I of this Tariff cannot indemnify, defend, and save harmless the Transmission Provider and Transmission Owner(s) pursuant to Section 10.3 of this Tariff due to the Antideficiency Act, 31 U.S.C. § 1341, et seq, as amended or supplemented. Western-UGP's and/or Western-RMR's liability as a Transmission Customer is instead determined in accordance with the Federal Tort Claims Act, 28. U.S.C. § 1346(b), 2401(b), 2402, 2671, 2672, 2674-2680, as amended or supplemented.

**(k) Western-UGP Rate Review**

Western-UGP's transmission service rates and revenue requirements shall only be reviewed in accordance with Delegation Order No. 00-037.00A from the Secretary of Energy to the Federal Power Marketing Agencies and the Commission, as superseded or amended, and in accordance with the regulations implementing the review authority found in 10 C.F.R. Part 903 and 18 C.F.R. Part 300, as superseded or amended.

**(l) Inapplicability of Section 39.1 to a Federal Power Marketing Agency**

Section 39.1 of this Tariff shall not apply to Western-UGP.

**(m) No Expansion of Jurisdiction, Waiver Of Defenses, Liability For Penalties, Or Inconsistent Obligations**

Western-UGP and/or Western-RMR have/has not waived or conceded any defense, including sovereign immunity, intergovernmental immunity, or lack of subject matter jurisdiction in any action against it by an Enforcement Authority,

nor has either Western-UGP and/or Western-RMR accepted any liability, responsibility, or obligation to pay any civil monetary penalties or fines imposed by an Enforcement Authority to which it would not have been subject in the absence of this Tariff. “Enforcement Authority” means the Commission, Electric Reliability Organization (ERO), or Regional Entities with enforcement authority pursuant to a delegation from an ERO or Commission for the purpose of proposing and enforcing reliability standards. The Transmission Provider does not concede or accept responsibility for any portion of a penalty or fine attributable to the actions or omissions of Western-UGP and/or Western-RMR. The Transmission Provider will identify the amount of any penalty or fine that the Transmission Provider allocates to Western-UGP and/or Western-RMR or that the Transmission Provider determines is attributable to Western-UGP and/or Western-RMR and will identify that amount to FERC as uncollectable and not otherwise owed by the Transmission Provider.

## 39.4 Applicability to Rural Electric Cooperatives

The participation in this Tariff by a Transmission Owner that is an electric cooperative that receives financing under the Rural Electrification Act of 1936 (7 U.S.C. 901 et seq.) is subject in all respects to the laws and regulations of the state of its creation and to rate schedules adopted by its governing board under state law. The Commission has exclusive jurisdiction to interpret the provisions of this Tariff and how the provisions apply to such entity. However, in the event that the governing board of such entity, subject to state court review, determines that a conflict exists between the applicable state law, regulations, or rate schedules, and provisions of this Tariff as interpreted by the Commission, such state law, regulations, or rate schedules shall govern with respect to the application of this Tariff to such entity. Should the governing board of such entity determine that such a conflict exists, the entity must file with the Commission such necessary documents notifying the Commission of the governing board's determination of such a conflict and explaining both the conflict (including what state law, regulations, or rate schedules and what Tariff provisions are at issue) and what actions the governing board is taking in response to that determination.

# V. RECOVERY OF COSTS FOR BASE PLAN UPGRADES AND APPROVED BALANCED PORTFOLIOS

## 40. Base Plan Zonal Charge and Region-wide Charge

The Transmission Provider shall assess Base Plan Zonal Charges and Region-wide Charges specified in Schedule 11 to recover the Base Plan Zonal Annual Transmission Revenue Requirements and the Region-wide Annual Transmission Revenue Requirement.

## 41. Applicability to Resident Load

### A. Resident Load in Zones 1 through 9 and 11 through 19

Base Plan Zonal Charges and Region-wide Charges shall be determined in accordance with Schedule 11 and assessed to:

(1) Network Customers taking Network Integration Transmission Service to serve their Network Load under the Tariff; and

(2) Transmission Owners providing transmission service to: (a) bundled retail load for which such Transmission Owners are not taking Network Integration Transmission Service or Firm Point-To-Point Transmission Service under the Tariff; and (b) load being served under Grandfathered Agreements for which such Transmission Owners are not taking Network Integration Transmission Service or Firm Point-To-Point Transmission Service under the Tariff. Load being served under Grandfathered Agreements shall be treated as Resident Load only in the Zone of the Point of Delivery or the point of exit from the SPP Region, as applicable, and shall not be treated as Resident Load if its continuous transmission path includes one or more segments with Firm Point-To-Point Transmission Service under this Tariff.

### B. Resident Load in Zone 10

Base Plan Zonal Charges and Region-wide Charges shall be determined in accordance with Schedule 11 and assessed to loads defined in Sections 41.A.(1) and (2), except that the determination of Resident Load for Zone 10 shall not include:

(1) Transmission Transactions (as defined in Attachment AD of this Tariff) related to Grandfathered Agreements of Southwestern Power Administration listed in Attachment W of this Tariff; and

(2) Scheduled deliveries of Federal Power-Southwestern to Network Customers pursuant to Section 34.9 of this Tariff.

### C. Reporting Resident Load

For the purposes of Schedule 11, the load defined in Sections 41.A and 41.B shall be classified as Resident Load. All entities responsible for reporting Resident Load information to the Transmission Provider, for the purpose of determining charges under Schedule 11, shall

provide such information no later than January 25 of each year for the twelve months of the prior calendar year. If January 25 falls on a weekend, the information shall be provided no later than the immediately preceding Friday. The Transmission Provider shall post on its website and/or communicate to the membership of the Markets and Operations Policy Committee the reporting status of the entities responsible for reporting Resident Load information.

## 42. Applicability to Point-To-Point Transmission Service

Base Plan Zonal Charges and Region-wide Charges shall be determined in accordance with Schedule 11 and assessed to Transmission Customers taking Point-To-Point Transmission Service under the Tariff.

# VI. MISCELLANEOUS PROVISIONS

**43. Market Import Service** Market Import Service is used by a Market Participant to submit offers to sell energy from a generating resource external to the SPP Balancing Authority Area into the Day-Ahead Market or Real-Time Balancing Market for use by the Transmission Provider to serve Network Load from a non-designated generating resource. Market Import Service is available to a Market Participant that is a Transmission Customer (as that term is used in Part I of the Tariff), on an as-available basis, with no charges imposed under Schedules 7, 8, 9, or 11 of this Tariff. Market Import Service shall carry a reservation priority equivalent to non-designated Network Service. A Market Participant must reserve and schedule Market Import Service in accordance with the procedures specified in the SPP Business Practices. Market Import Service is not available for energy withdrawals out of the SPP Balancing Authority Area or to support a Third-Party Sale or purchase. Use of Market Import Service for any other purpose than defined in this Section 43 shall subject the Market Participant to unreserved use penalties pursuant to Section 14.5 of this Tariff.

## SCHEDULE 1
## SCHEDULING, SYSTEM CONTROL AND DISPATCH SERVICE

Scheduling, System Control and Dispatch Service is required to operate a Transmission Owner's Tariff facilities and schedule movement of power through, out of, within or into the Transmission Provider's Balancing Authority Area and certain parts of the Transmission System not located within the Transmission Provider's Balancing Authority Area.

A. Through and Out Transactions

1) For Transmission Customers taking Firm or Non-Firm Point-To-Point Transmission Service, for through and out transactions, the Schedule 1 charge shall be the product of the capacity reserved, expressed in MW and the appropriate rate set forth in the Revenue Requirements and Rates File ("RRR File"), Schedule 1 tab, posted on the SPP website. The yearly rate for such transactions is computed as the ratio of the sum of the accepted or approved revenue requirements most recently determined for each Transmission Owner having a Schedule 1charge and the prior calendar year's average of the 12 monthly peaks of the total Resident Load (expressed in MW) in the SPP Region.

On-Peak:

Monthly Rate/MW: the yearly rate divided by 12

Weekly Rate/MW: the yearly rate divided by 52

Daily Rate/MW: the yearly rate divided by 260

Hourly Rate/MW: the yearly rate divided by 4160

Off-Peak:

Daily Rate/MW: the yearly rate divided by 365

Hourly Rate/MW: the yearly rate divided by 8760

On-Peak and Off-Peak Periods

Off-Peak days shall be Saturdays and Sundays and all NERC holidays. All other days shall be On-Peak. All hours during Off-Peak days shall be Off-Peak. On-Peak hours during On-Peak days shall be all hours from HE 0700 through HE 2200 Central Prevailing Time. All other hours during On-Peak days shall be Off-Peak.

2) For Network Customers taking Network Integration Transmission Service for Load not physically interconnected with the Transmission System, designated as Network Load

pursuant to Section 31.4, the Network Customer's Schedule 1 charge shall be the charge computed pursuant to the approved rate of the Zone to which the Network Load is located or assigned in accordance with Section 31.4.

B. Transactions Sinking within the Transmission System

1) For Transmission Customers taking Firm or Non-Firm Point-To-Point Transmission Service, for transactions into and within the Transmission System, the Schedule 1 charge shall be the charge computed pursuant to the approved rate of the Zone that is the Point of Delivery.

2) For Network Customers taking Network Integration Transmission Service, the Schedule 1 charge shall be the charge computed pursuant to the approved rate of the Zone in which the load is located.

C. Multi-owner Zones

For those Zones with more than one Transmission Owner with approved or accepted Schedule 1 rates, the Transmission Provider shall calculate a Schedule 1 rate for that Zone by summing the rates set forth in the Zonal Sch 1 tab of the RRR file of each Transmission Owner in that Zone.

D. Adjustments to the Schedule 1 Revenue Requirements

The revenue requirements listed in Table 1 ("Schedule 1 RR") shall be adjusted for any Schedule 1 revenue received by the Transmission Owner for Point-to-Point transactions. Any such adjustment made by the Transmission Provider shall be set forth in the RRR File.

1) The Transmission Provider shall not adjust a Transmission Owner's Schedule 1 RR if that Transmission Owner has a formula rate calculation which updates its Schedule 1 RR annually and reduces: (i) its Schedule 1 RR or (ii) its other gross revenue requirement for any Schedule 1 Point-to-Point revenues received by that Transmission Owner.

2) For each Transmission Owner utilizing a stated rate or utilizing a formula rate calculation without an annual update of the Schedule 1 revenue credits, the Transmission Provider shall reduce the Schedule 1 RR by the difference between the previous calendar year Schedule 1 Point-to-Point revenues and the amount of Schedule 1 Point-to-Point already credited in the calculation of the Schedule 1 RR. The amount of Point-to-Point revenues

already credited in each Transmission Owner's Schedule 1 RR shall be posted in Table 2 of Schedule 1 of this Tariff.

# SCHEDULE 1-A
# TARIFF ADMINISTRATION SERVICES

The Transmission Provider shall provide administration services described in this Schedule 1-A to carry out its responsibilities under this Tariff. Transmission Customers and Market Participants must purchase these services from the Transmission Provider. Unless otherwise collected under this Tariff, the Transmission Provider will recover 100% of its budgeted costs for the fiscal year in which services are provided, including an adjustment for over or under recovery for prior fiscal years ("Schedule 1-A Recoverable Costs"). Schedule 1-A Recoverable Costs divided by the total billing determinants of Schedule 1-A1, shall not exceed $0.465.

## 1. Schedule 1-A1 Transmission Administration Service

Transmission administrative service is provided by the Transmission Provider to all Transmission Customers under this Tariff and includes the provision of: (1) reliability coordination; (2) transmission scheduling; (3) system control; and (4) transmission planning services ("Schedule 1-A1 Service").

### a. Schedule 1-A1 Service Rate Calculation

The Schedule 1-A1 Service charge provides for the recovery of any costs incurred by the Transmission Provider in providing this Schedule 1-A1 Service.

#### i. Costs

The costs associated with providing Schedule 1-A1 Service will be recovered under this Schedule 1-A1, as identified in the formula rate template in Addendum 1 of this Schedule 1-A ("Schedule 1-A1 Costs").

#### ii. Billing Determinants

For Network Integration Transmission Service, the billing determinants in each Zone where the load is located are the sum of the prior calendar year's average of the twelve (12) monthly coincident peak demands multiplied by the number of all hours of the applicable month for the following:

(1) Network Customer's total Network Load;

(2) bundled retail load for which Transmission Owners are not taking Network Integration Transmission Service or Firm Point-To-Point Transmission Service under the Tariff; and

(3) load being served under Grandfathered Agreements for which Transmission Owners are not taking Network Integration Transmission Service or Firm Point-To-Point Transmission Service under the Tariff. Load being served under Grandfathered Agreements shall be included only in the Zone of the Point of Delivery or the point of exit from the SPP Region, as applicable, and shall not be included if its continuous transmission path includes one or more segments with Firm Point-To-Point Transmission Service under this Tariff.

For Point-to-Point Transmission Service, the billing determinants are the MW hours reserved.

**iii. Rate Formula**

Annually, the Transmission Provider will determine the Schedule 1-A1 Service rate for each calendar year as described in Addendum 1 of this Schedule 1-A.

**iv. Charges to Transmission Customers**

The Schedule 1-A1 charge is the product of the Schedule 1-A1 rate and the Transmission Customer's billing determinants.

**2. <u>Transmission Service Request Charges</u>:**

The Transmission Customer shall pay the Transmission Provider a charge for each new Transmission Service Request as follows:

(a) For Firm Point-To-Point Transmission Service:
Reservations less than one month: $100
Reservations one month or longer: $200

(b) For Non-Firm Point-To-Point Transmission Service:
Each Reservation: $0.

However, the Transmission Customer shall have this fee rebated to it once the Transmission Customer becomes legally obligated to pay the applicable Firm Point-To-Point Transmission Service charges under this Tariff or if the requested Firm Point-To-Point Transmission Service is denied by the Transmission Provider.

## 3. Schedule 1-A2 Transmission Congestion Rights Administration Service

Transmission Congestion Rights ("TCR") administration service is provided by the Transmission Provider to all Market Participants that hold TCRs issued and settled by the Transmission Provider ("TCR Holder"). This service includes the provision of: (1) TCR administration through allocation, assignment, auction or any other process under this Tariff; (2) simultaneous feasibility tests and other applicable studies to determine the total TCRs that can be accommodated by the Transmission System; (3) TCR tools; and (4) a secondary market for TCRs ("Schedule 1-A2 Service").

### a. Schedule 1-A2 Service Charge

The Schedule 1-A2 Service charge provides for the recovery of any costs incurred by the Transmission Provider in providing this Schedule 1-A2 Service.

#### i. Costs

The costs associated with providing Schedule 1-A2 Service will be recovered under this Schedule 1-A2, as identified in the formula rate template in Addendum 1 of this Schedule 1-A ("Schedule 1-A2 Costs").

#### ii. Billing Determinants

The Schedule 1-A2 billing determinant is the total amount of TCR volume in MWh for all TCR Holders.

#### iii. Rate Formula

Annually, the Transmission Provider will determine the Schedule 1-A2 Service rate for each calendar year as described in Addendum 1 of this Schedule 1-A.

### b. Charges To TCR Holders

The Schedule 1-A2 charge is the product of the Schedule 1-A2 rate and the TCR Holder's billing determinants.

## 4. Schedule 1-A3 Integrated Marketplace Clearing Administration Service

Integrated Marketplace clearing administration service is provided by the Transmission Provider to all Market Participants that participate in transactions pursuant to Attachment AE of this Tariff or an applicable Market Participant Service Agreement as contained in Attachment AH of this Tariff. This service includes the provision of: (1) market settlements; (2) credit evaluation and risk mitigation services; (3) market monitoring functions; (4) information technology support; and (5) customer service ("Schedule 1-A3 Service").

### a. Integrated Marketplace Clearing Administration Service Charge

The Schedule 1-A3 Service charge provides for the recovery of any costs incurred by the Transmission Provider in providing this Schedule 1-A3 Service.

#### i. Costs

The costs associated with providing Schedule 1-A3 Service will be recovered under this Schedule 1-A3, as identified in the formula rate template in Addendum 1 of this Schedule 1-A ("Schedule 1-A3 Costs").

#### ii. Billing Determinants

The Schedule 1-A3 billing determinants as expressed in MWh are:

(1) all Real-Time Energy injected into and withdrawn from the Transmission System;

(2) all Import Interchange Transactions in Real-Time and all Export Interchange Transactions in Real-Time; and

(3) all cleared Virtual Energy Bids and all cleared Virtual Energy Offers.

#### iii. Rate Formula

Annually, the Transmission Provider will determine the Schedule 1-A3 Service rate for each calendar year as described in Addendum 1 of this Schedule 1-A.

### b. Charges To Market Participants

The Schedule 1-A3 charge is the product of the Schedule 1-A3 rate and the Market Participant's billing determinants.

**5. Schedule 1-A4 Integrated Marketplace Facilitation Administration Service**

Integrated Marketplace facilitation administration service is provided by the Transmission Provider to all Market Participants that participate in transactions, except for cleared Virtual Energy Bids and cleared Virtual Energy Offers, pursuant to Attachment AE of this Tariff or an applicable Market Participant Service Agreement as contained in Attachment AH of this Tariff. This service includes the provision and operation of the: (1) Day-Ahead Market; (2) Real-Time Balancing Market; and (3) Reliability Unit Commitment processes ("Schedule 1-A4 Service").

**a. Integrated Marketplace Facilitation Administration Service Charge**

The Schedule 1-A4 Service charge provides for the recovery of any costs incurred by the Transmission Provider in providing this Schedule 1-A4 Service.

**i. Costs**

The costs associated with providing Schedule 1-A4 Service will be recovered under this Schedule 1-A4, as identified in the formula rate template in Addendum 1 of this Schedule 1-A ("Schedule 1-A4 Costs").

**ii. Billing Determinants**

The Schedule 1-A4 billing determinants are:

(1) all Real-Time Energy injected into and withdrawn from the Transmission System; and

(2) all Import Interchange Transactions in Real-Time and all Export Interchange Transactions in Real-Time.

**iii. Rate Formula**

Annually, the Transmission Provider will determine the Schedule 1-A4 Service rate for each calendar year as described in Addendum 1 of this Schedule 1-A.

**b. Charges To Market Participants**

The Schedule 1-A4 charge is the product of the Schedule 1-A4 rate and the Market Participant's billing determinants.

# ANNUAL FORMULA RATE IMPLEMENTATION PROTOCOLS

## Section 1 Applicability

The formula rate template and these Annual Formula Rate Implementation Protocols (collectively, the "Formula Rate") comprise the Transmission Provider's filed Schedule 1-A Tariff Administration Services rates. The Transmission Provider shall follow the Formula Rate to calculate annually its Transmission Administration Service Rate ("Schedule 1-A1 Rate"), Transmission Congestion Rights Administration Service Rate ("Schedule 1-A2 Rate"), Integrated Marketplace Clearing Administration Service Rate ("Schedule 1-A3 Rate"), and Integrated Marketplace Facilitation Administration Service Rate ("Schedule 1-A4 Rate"); (collectively "Rates"). The Formula Rate and the charges produced thereunder shall be effective on and after January 1, 2021. Thereafter, the Formula Rate shall be applicable on and after January 1 of each calendar year for service from January 1 – December 31 of each calendar year (the "Rate Year"), subject to the true-up procedures of this Addendum 1.

## Section 2 Annual Updates

a. Within ten (10) business days after the Transmission Provider's annual budget is approved by the Transmission Provider's Board of Directors, the Transmission Provider, shall determine and post, its annual update to be effective during the next Rate Year, and shall consist of the following ("Annual Update"):

(i) a data-populated version of the Formula Rate template setting forth the projected Rates for the next Rate Year ("Projected Rates") including any applicable True-up Adjustment, as defined in Section 3, produced by operation of the Formula Rate;

(ii) supporting documentation, including, but not limited to, fully functioning Excel files (or such other native format files), required to support,

demonstrate and explain information upon which the Annual Update is based;

(iii) disclosure of the following changes to the extent any has taken effect since January 1, 2021, and materially affects the Formula Rate or calculation of the Annual Update or the allocation of costs or revenues to the Transmission Provider's Rates:

(a) any Federal Energy Regulatory Commission ("FERC" or "Commission") ratemaking orders applicable to the Transmission Provider's Formula Rate; and

(b) the accounting practices or procedures of the Transmission Provider.

Changes in items (a) and (b) collectively referred to as "***Material Changes***".

b. The Transmission Provider shall post the Annual Update on the Transmission Provider's website and notify interested parties via the Transmission Provider's email exploder titled "Formula Rate Posting Information Notification". The posting shall include fully functioning Excel file (or such other native format file) of all materials contained in the Annual Update.

c. The Annual Update for the new Rate Year shall:

(i) be based upon the Transmission Provider's most recent budget and other information for the new Rate Year, that reasonably projects costs to be recorded on the books and records of the Transmission Provider's consistent with, the Transmission Provider's practices or procedures, and the Transmission Provider's Tariff; and

(ii) compute the Projected Rates.

d. In the posting of the Annual Update, the Transmission Provider shall request written comments be provided for the period of two (2) weeks after the posting of the Annual Update.

e. The Transmission Provider shall file the revised Annual Update with the Commission in its submission of the annual operating budget informational filing.

**Section 3 True-up Adjustment**

Assuming an effective date of January 1, 2021, the true up process for the 2021 Rate Year will occur over the next two (2) Rate Years. During the 2022 budget process, the Transmission Provider will calculate the estimated over/under recovery for the 2021 Rate Year using forecasted data, consisting of actual data available for 2021 and forecasted data for the remainder of 2021. Comparing the forecasted data available for both tariff administrative fee revenue and net revenue requirement to the respective budgeted amounts, the Transmission Provider will arrive at a projected over/under recovery for 2021 to be included as a true-up adjustment in the 2022 Rate Year. During the determination for the 2023 Rate Year, the Transmission Provider will calculate the final over/under recovery for the 2021 Rate Year using actual results for the tariff administrative fee revenue and net revenue requirement in comparison to the 2021 approved budget. The final over/under recovery for the 2021 Rate Year will then be compared against the estimated true-up calculation included in the 2022 Rate Year, and the difference will be included as a true-up adjustment in the 2023 Rate Year. This process will continue in following Rate Years.

**Section 4 Changes to Formula Rate Initiated by the Transmission Provider**

Any changes to the Formula Rate initiated by the Transmission Provider, including any changes necessitated by Material Changes, may only be implemented as a result of a filing with FERC.

**Section 5 Changes to the Stated Inputs in the Formula Rate**

The following Formula Rate inputs shall be stated values to be used in the Formula Rate (both for the Annual Update and True-up Adjustment) until changed by a filing with FERC:

(a) the allocation percentages reflected in the Formula Rate to determine salary, benefits and direct employee cost; and

(b) the allocation percentages reflected in the Formula Rate to determine network and communication expenses.

# SCHEDULE 2
# REACTIVE SUPPLY AND VOLTAGE CONTROL FROM GENERATION OR OTHER SOURCES SERVICE

## I. GENERAL

**1. Definitions (These definitions are to be used in this Schedule 2 only; to the extent of a conflict between these definitions and other definitions in the Tariff, these definitions control in the interpretation of this Schedule 2; other capitalized terms are defined elsewhere in this Tariff)**

**1.1 Dead Band (DB):** A contiguous range of Power Factor operation where an hourly PF is greater than or equal to 0.95 (lead or lag).

**1.2 Point of Interconnection (POI):** The location where the generator connects to the Transmission System.

**1.3. Power Factor (PF):** The power factor of a QG as measured or determined by the integrated hourly MW and MVAr values at its POI.

**1.4 Qualified Generator (QG):** A generator, or a single generator that is part of a group of generators at a single Point of Receipt, that has been recognized by the Transmission Provider as meeting the criteria specified in Section II to receive compensation under this Schedule 2.

**1.5 Reactive Compensation (RC):** The monthly amount as calculated in Section III.B.

**1.6 Reactive Compensation Rate (RCR):** The amount per MVArh specified in Section III.A.

**1.7 Reactive Power Inside Deadband (RPID):** As defined in Section III.B.2.

**1.8 Reactive Power Outside Deadband (RPOD):** As calculated in Section III.B.2.

**1.9 Through and Out Reactive Revenue (T&O Reactive Revenue):** The amount of reactive power revenue allocated to a Zone each month that was collected by the Transmission Provider from Through and Out transactions.

**1.10 Zonal Reactive Compensation (ZRC):** The monthly sum of the RC for all QGs in the pricing zone.

**1.11 Zonal Peak Demand:** The Zone's monthly transmission peak.

**1.12 Zone:** SPP pricing zone as defined in the SPP OATT.

**2. Purpose**

In order to maintain Transmission System voltages within acceptable limits, generation facilities and non-generation resources capable of providing this service that are connected to the Transmission System are operated to produce (or absorb) reactive power. Reactive Supply and Voltage Control from Generation or Other Sources Service (Reactive Supply) must be provided to support each transaction on the Transmission System. The amount of Reactive Supply required in real time to maintain Transmission System voltages within limits that are generally accepted in the region and consistently adhered to by the Transmission Provider will vary with conditions on the Transmission System. Generators operating within a range of 0.95 leading to 0.95 lagging PF will not receive compensation for supplying such reactive power. Generators meeting the requirements of this Schedule 2 will be compensated for producing reactive power outside the DB when such operation is at the direction of the Transmission Provider or the applicable transmission operator. This Schedule 2 provides the criteria specifying which generators qualify to receive compensation for reactive power and sets out the rates and charges necessary to comparably compensate all QGs for such operation.

## II. QUALIFIED GENERATOR REQUIREMENTS

**A. General:** All existing generation owners eligible to collect charges for Reactive Supply for generators connected to the Transmission System under a cost-based rate schedule on file with the Commission as of October 1, 2006, as well as non-jurisdictional generation owners operating generating facilities that are being compensated for the provision of reactive supply and voltage control services to SPP as of October 1, 2006, are deemed to have met the technical requirements of Section II.B and therefore are QGs. Initially, in order to receive compensation under this Schedule 2, all other owners of generation must apply to the Transmission Provider for QG status and provide the necessary operating data set

forth in Addendum 1 to this Schedule 2 to the Transmission Provider no later than 30 days following the final approval of this Schedule 2 by the Commission. Subsequently, owners of other generation must apply to the Transmission Provider for QG status and provide the necessary operating data to the Transmission Provider. The Transmission Provider shall recognize new QGs throughout the year if the generator meets the requirements set out in Section II.B. A new QG will be eligible for compensation at the beginning of the first month after SPP acceptance of the generation owner's application. To the extent the operating data requested in Addendum 1 has been previously provided to SPP pursuant to a generation interconnection agreement or through input for SPP transmission operational or planning models, that operating data shall not be required with the application. Once the QG provides the necessary operating data to SPP, it shall be eligible to receive compensation under this Schedule 2 as provided in Section III. The QG's RC will be included under this Schedule 2 in the first full billing month after the required information is received. The Transmission Provider shall have the right to remove the QG status of any generation resource that fails to meet any requirements of Section II.B.

**B. Technical:**

1. Each QG shall designate the entity that is to receive reactive dispatch instructions and the entity to receive compensation.
2. The generation resource must be able to produce reactive power outside the Dead Band at its Point of Interconnection with the Transmission System.
3. Each QG shall maintain the capability to provide MWh, MVArh and voltage data, by such means of transmittal, at such intervals and at such accuracy level as SPP shall require.
4. The generation resource must be able to follow a voltage schedule and respond to reactive dispatch instructions from the Transmission Provider and/or the applicable transmission operator.

## III. RATES, CHARGES, AND REVENUE DISTRIBUTION

The following sets forth the rates, charges and revenue distribution pursuant to this Schedule 2. All QGs shall be treated the same.

**A. Reactive Compensation Rate**

The RCR shall be based on the cost of reactive power production from recently constructed generators so as to reflect the upper end of such costs. The RCR shall be $2.26 per MVArh. The Transmission Provider may periodically review the RCR to determine whether it remains at or near the upper end of a reasonable range of cost of producing reactive power by generators recently connected to the Transmission System.

**B. Qualified Generator Compensation**

The compensation paid to QGs each month will be based on the calculations as set forth below.

1. Determine the integrated hourly values for real and reactive power generated by each Qualifying Generator for each month.
2. Calculate the Reactive Power Outside the Dead Band (RPOD). For each hour of each month, calculate the amount of Reactive Power inside the Dead Band (in MVArh) that the QG would have had to produce or absorb to maintain a PF of 0.95 at its actual real power output level (RPID). Then subtract the absolute value of the RPID from the absolute value of the actual reactive power output from the QG for that hour (in MVArh). If the absolute value of RPID is greater than the absolute value of the actual reactive power output of the QG, then the RPOD for that hour is zero. The monthly RPOD is the sum of the hourly RPOD calculations for each QG for each month.
3. Calculate the total compensation that the owner of each QG will receive for each month (RC) by multiplying the QG's monthly RPOD, times the RCR.

   RCmonthly = RCR * RPOD monthly

**C. Calculation of Rates**

The rates paid by Transmission Customers will be based on the calculations set forth below. All of the amounts calculated below shall be actuals for each month with no true-ups.

1. Calculate the amount of T&O Reactive Revenue allocated to each Zone by taking the total amount of revenue generated by this Schedule 2 from Through and Out transactions for each month and allocate it on a pro-rata share based on the ZRC for the same month.

2. Calculate the total amount of revenue to be collected for each month by Zone, by summing the RC for each QG by Zone less the T&O Reactive Revenue.

   ZRC = Σn=1 to x(RC)– T&O Reactive Revenue; where: x=Total number of QGs in the Zone

3. Calculate the Schedule 2 Rates, for each Zone, as shown below.
   a. Monthly Rate ($/MW/Mo) = ZRC / Zonal Peak Demand
   b. Weekly Rate ($/MW/Wk) = Monthly Rate times 12 / 52
   c. Daily Off-Peak Rate ($/MW/Day) = Weekly Rate / 7
   d. Daily On-Peak Rate ($/MW/Day) = Weekly Rate / 5
   e. Hourly Off-Peak Rate ($/MW/Hr) = Daily Off-Peak Rate / 24
   f. Hourly On-Peak Rate ($/MW/Hr) = Daily On-Peak Rate / 16

   The total charge in any day, pursuant to an hourly service reservation, shall not exceed the applicable rate for daily service specified above for the applicable Zone, times the highest amount of hourly service reserved in any hour during such day. In addition, the total charge in any week pursuant to a reservation for hourly or daily service shall not exceed the rate for weekly service specified above for the applicable Zone, times the highest amount of hourly or daily service reserved in any hour or day during such week.

   **On-Peak and Off Peak**

   Off-Peak days shall be Saturdays and Sundays and all NERC holidays. All other days shall be On-Peak. All hours during Off-Peak days shall be

Off-Peak. On-Peak hours during On-Peak days shall be all hours from HE 0700 through HE 2200 Central Prevailing Time. All other hours during On-Peak days shall be Off-Peak.

4. For the purposes of determining the charge applicable to transactions under this Tariff, the transaction will be charged based on the applicable zonal rate where the load is physically located.

5. If the service is a Through and Out transaction, the transaction will be charged based on the simple average of all zonal rates for the applicable period of service.

6. The data used in the calculations under this Section III. C. shall be from the same month as the monthly RPOD used to calculate the RC in Section III. B.

**D. Collection of Charges and Distribution of Revenues**

1. All load shall pay the Transmission Provider a charge for Reactive Supply determined by multiplying the applicable rate as calculated in Section III.C by the Reserved Capacity for the Transmission Customer taking Point-To-Point Transmission Service during that month or the Network Customer's and non-rate terms and conditions customer's coincident peak during the month. The billing units used herein will be for the same month as the month used to determine the RPOD. After it has sufficient data to calculate the monthly RPOD, SPP shall bill customers for monthly charges under this Schedule 2 in the next billing cycle. SPP also will post the applicable monthly Schedule 2 charges promptly after it possesses the data necessary to calculate such charges.

2. In the event that the monthly revenue collected for a Zone does not match the ZRC in a month, the revenues distributed that month to each QG in the affected Zone shall be based upon its RC for that month divided by the applicable ZRC for that month multiplied by total zonal revenues collected pursuant to this Schedule 2 for that month.

**E. Joint Owned Units**

The Transmission Provider will compensate the entity designated in II.B.1 for a jointly owned QG. The Transmission Provider is not responsible for disbursing revenue to other owners.

**F. Multiple Generators Behind a Common Meter**

If more than one generator exists behind a single meter, the Transmission Provider must individually certify all the generators behind the meter as QGs. Compensation will be handled in the same way as an owner with multiple units in the same Zone.

## IV. QUALIFIED GENERATOR STATUS

**A. Re-Evaluation of Qualified Generator Status**

1. If a QG fails to comply with the Transmission Provider's or transmission operator's voltage control requirements three or more times in a calendar month, or six or more times in the preceding twelve month period, for reasons other than planned or unscheduled outages, the transmission operator shall notify the Transmission Provider and the Transmission Provider shall determine whether the generation resource should continue to be a QG based on the criteria established in Section II.B of this Schedule 2.
2. In making a determination of whether a generation resource should continue to be a QG, the Transmission Provider will evaluate, among other factors, whether the generation resource was operated consistently with its design characteristics, if the QG responded in accordance with other agreements and whether system conditions prevented it from responding as required by the applicable transmission operator or Transmission Provider.
3. If the Transmission Provider determines that the generator should not continue to be a QG, the Transmission Provider shall notify the owner and stop providing reactive compensation to such generator owner.

**B. Regaining Qualified Generator Status:**

If a generator has had its status as a QG removed by the Transmission Provider, such generator may be reinstated to receive reactive compensation six (6) billing months after disqualification. If the owner of the generator desires to be reinstated, it must make application for such reinstatement to the Transmission Provider and demonstrate that the cause(s) for the disqualification has been remedied. The Transmission Provider shall waive the six month period and immediately reinstate the QG status if it determines that such status was erroneously removed.

## V. QUALIFIED GENERATOR DISPATCH CRITERIA

All QGs will be required to maintain reactive supply pursuant to a voltage schedule provided by the Transmission Provider or the applicable transmission operator. The Transmission Provider and the transmission operator shall issue voltage schedules to all QGs on a non-discriminatory basis. Voltage schedules issued by the transmission operator shall be made available to SPP in accordance with SPP Criteria.

In the event of a system contingency or emergency situation that requires specific attention to reactive production, the Transmission Provider or the applicable transmission operator will determine, based on real-time data and engineering studies of current and prospective conditions, the most effective solution to maintain transmission system reliability. For a circumstance that requires specific attention to reactive production, the Transmission Provider or the applicable transmission operator will perform an engineering study to determine the most effective operational plan. The Transmission Provider or the applicable transmission operator will issue reactive dispatch instructions or revised voltage schedules on a non-discriminatory basis based upon generator availability, location, and reactive capability, for such purpose. Reactive dispatch instructions or revised voltage schedules issued by the transmission operator shall be made available to SPP in accordance with SPP Criteria.

## ADDENDUM 1 TO SCHEDULE 2

### Operating Data to be Provided by Generator Operators Seeking QG Status

The following is the list of necessary operating data to be provided as part of an application to become a QG.

1. Nameplate data, certified factory test reports, and reactive capability curves for the generator.

2. Real and reactive power loads at maximum generator output for station service load served from the generator leads before delivery into the transmission system.

3. Nameplate data and copies of certified factory test reports for the generator step-up transformer. For transformers having tapped windings, identify the tap connections at which the transformer is operated.

4. One line schematics showing the connection of the generator to the SPP Transmission System, location of service to station service loads, and the location of metering and telemetry points.

5. Identification of the interconnection agreement governing the connection of the generator to the transmission system and citation to those provisions in the agreement that govern the production of reactive power and voltage regulation.

6. Self assessment (or certification) by generator owner of the ability of the generator to provide deliveries of real and reactive power to the SPP Transmission System, net of all loads served prior to the connection with the SPP Transmission System, with a power factor outside the +/- 95% deadband, to receive and follow reactive power dispatch instructions, and to regulate the voltage at a the point of interconnection with transmission system pursuant to a voltage schedule.

7. A copy of the most recent tests of the generator, the generator's protection system, the generator's control system and the generator's excitation system as performed in accord with the SPP Criteria.

# SCHEDULE 3
# REGULATION AND FREQUENCY RESPONSE SERVICE

Regulation and Frequency Response Service is necessary to provide for the continuous balancing of resources (generation and interchange) with load and for maintaining scheduled Interconnection frequency at sixty cycles per second (60 Hz). Regulation and Frequency Response Service is accomplished by committing on-line generation whose output is raised or lowered (predominantly through the use of automatic generating control equipment) and by other non-generation resources capable of providing this service as necessary to follow the moment-by-moment changes in load. The obligation to maintain this balance between resources and load lies with the Transmission Provider. The Transmission Customer must either purchase this service from the Transmission Provider or make alternative comparable arrangements to satisfy its Regulation and Frequency Response Service obligation. Unless the Transmission Customer makes alternative comparable arrangements, the Transmission Provider will provide this service and the Transmission Customer will pay the Transmission Provider for this service through the operation and settlement of the Energy and Operating Reserve Markets as described in Attachment AE. The Transmission Provider will take into account the speed and accuracy of regulation Resources in its determination of Regulation and Frequency Response reserve requirements, including as it reviews whether a self-supplying Transmission Customer has made alternative comparable arrangements. Upon request by the self-supplying Transmission Customer, the Transmission Provider will share with the Transmission Customer its reasoning and any related data used to make the determination of whether the Transmission Customer has made alternative comparable arrangements.

## SCHEDULE 4
## ENERGY IMBALANCE SERVICE

Energy Imbalance Service is provided when a difference occurs between Energy cleared in the Day-Ahead Market and the actual delivery of Energy to/from the Transmission System over a single Dispatch Interval. The Market Participant must purchase this service from the Transmission Provider or make comparable alternate arrangements with another Market Participant who will purchase this service from the Transmission Provider. All loads on the Transmission System will be subject to settlement in the Real-Time Balancing Market. The Transmission Provider will obtain and provide this service and the Market Participant shall utilize this service in accordance with Attachment AE. Charges and payments for use and provision of this service shall be calculated by the Transmission Provider pursuant to Attachment AE.

# SCHEDULE 5
# OPERATING RESERVE - SPINNING RESERVE SERVICE

Spinning Reserve Service is needed to serve load immediately in the event of a system contingency. Spinning Reserve Service may be provided by generating units that are on-line and loaded at less than maximum output and by non-generation resources capable of providing this service. The Transmission Customer must either purchase this service from the Transmission Provider or make alternative comparable arrangements to satisfy its Spinning Reserve Service obligation. Unless the Transmission Customer makes alternative comparable arrangements, the Transmission Provider will provide the service and the Transmission Customer will pay for this service through the operation and settlement of the Energy and Operating Reserve Markets as described in Attachment AE.

# SCHEDULE 6
# OPERATING RESERVE - SUPPLEMENTAL RESERVE SERVICE

Supplemental Reserve Service is needed to serve load in the event of a system contingency; however, it is not available immediately to serve load but rather within a short period of time. Supplemental Reserve Service may be provided by generating units that are on-line but unloaded, by quick-start generation or by interruptible load or other non-generation resources capable of providing this service. The Transmission Customer must either purchase this service from the Transmission Provider or make alternative comparable arrangements to satisfy its Supplemental Reserve Service obligation. Unless the Transmission Customer makes alternative comparable arrangements, the Transmission Provider will provide this service and the Transmission Customer will pay for this service through the operation and settlement of the Energy and Operating Reserve Markets as described in Attachment AE.

# SCHEDULE 7
# LONG-TERM FIRM AND SHORT-TERM FIRM POINT-TO-POINT TRANSMISSION SERVICE

The Transmission Customer shall compensate the Transmission Provider each month for Reserved Capacity at the sum of the applicable charges set forth below in addition to other applicable charges specified in the Tariff. All effective rates under this schedule shall be posted on the SPP OASIS.

**1. Zonal Rates:** The Transmission Customer shall pay the zonal rate (per kW of reserved capacity) based upon the Zone where the load is located for Firm Point-To-Point Transmission Service where the generation source is outside the SPP Region and the load is located within the SPP Region and for Firm Point-To-Point Transmission Service where both the generation source and the load are located within the SPP Region. For Firm Point-To-Point Transmission Service where the generation source is located within the SPP Region and the load is located outside of the SPP Region, and for Firm Point-To-Point Transmission Service where both the generation source and the load are located outside of the SPP Region, the Transmission Customer shall pay the zonal rate (per kW of reserved capacity) for the Zone interconnected with the Balancing Authority Area, external to the SPP Region, that is the designated Point of Delivery. Where there is more than one Zone interconnected with such Balancing Authority Area, the lowest zonal rate of the interconnected Zones is applicable. The zonal rates are stated in Attachment T.

The Zones are as follows:

Zone 1: American Electric Power – West

Zone 2: Kansas City Board of Public Utilities

Zone 3: City Utilities of Springfield, Missouri

Zone 4: Empire District Electric Company

Zone 5: Grand River Dam Authority

Zone 6: Evergy Metro, Inc.

Zone 7: Oklahoma Gas & Electric Company

Zone 8: Midwest Energy, Inc.

Zone 9: Evergy Missouri West, Inc.

Zone 10: Southwestern Power Administration

Zone 11: Southwestern Public Service

Zone 12: Sunflower Electric Power Corporation

Zone 13: Western Farmers Electric Cooperative

Zone 14: Evergy Kansas Central, Inc. (Evergy Kansas South, Inc. and Evergy Kansas Central, Inc.)

Zone 15: Reserved for Future Use

Zone 16: Lincoln Electric System

Zone 17: Nebraska Public Power District

Zone 18: Omaha Public Power District

Zone 19: Upper Missouri Zone

No changes in Zones shall be made without submitting a filing to the Commission.

**2. Caps:** The total demand charge in any week, pursuant to a reservation for Daily delivery, shall not exceed the weekly rate times the highest amount in kilowatts of Reserved Capacity in any day during such week.

**3. Real Power Losses:** The Transmission Customer shall be responsible for real power losses determined in accordance with Attachment M.

**4. a. Direct Assignment Costs:** Where a Facilities Study indicates the need to construct Direct Assignment Facilities to accommodate a request for Transmission Service, the Transmission Customer shall be charged the full cost of such Direct Assignment Facilities in addition to the charges specified in this Schedule and Tariff. The annual costs of the facility shall be calculated by multiplying the levelized fixed charge rate of the Transmission Owner by the nondepreciated cost of the facility. Each month the Transmission Customer shall pay a charge based on such annual costs divided by twelve. Any such charge will be filed with the Commission.

**b. Directly Assigned Upgrade Costs:** Where a Facilities Study indicates the need to construct Network Upgrades to accommodate a request for Transmission Service, the Transmission Customer may be allocated Directly Assigned Upgrade Costs in accordance with Attachments J and Z1. Any such charge will be filed with the Commission. The Transmission Customer shall be charged the higher of (i) the charges specified in Schedules 7 and 11 or (ii) the Directly Assigned Upgrade Costs. The Transmission Customer shall also be charged any other applicable charges under the Tariff. If the Transmission Customer is charged the Directly

Assigned Upgrade Costs, upon completion of construction of such assigned upgrades, the Transmission Provider shall reconcile the Directly Assigned Upgrade Costs against the actual construction costs. Based on the reconciliation, the Transmission Customer's cost responsibility shall be adjusted as appropriate.

**5. Wholesale Distribution Service:** Where Wholesale Distribution Service is provided to effectuate Firm Point-To-Point Transmission Service, the Transmission Customer shall pay all charges levied pursuant to the Wholesale Distribution Service Agreement and Schedule 10.

**6. Base Plan Zonal Charges and Region-wide Charges:** The Transmission Customer shall pay all charges assessed pursuant to Schedule 11 to the extent the revenue from such charges is not recovered by the Transmission Provider from the Transmission Customer pursuant to Section 5.b of this Schedule.

**7. Resales**: The rates and rules governing charges and discounts stated above shall not apply to resales of transmission service, compensation for which shall be governed by section 23.1 of the Tariff.

# SCHEDULE 8
# NON-FIRM POINT-TO-POINT TRANSMISSION SERVICE

The Transmission Customer shall compensate the Transmission Provider for Non-Firm Point-To-Point Transmission Service up to the sum of the applicable charges set forth below in addition to other applicable charges specified in the Tariff. All effective rates under this schedule shall be posted on the SPP OASIS.

**1. Zonal Rates:** The Transmission Customer shall pay the zonal rate (per KW of reserved capacity) based upon the Zone where the load is located for Non-Firm Point-To-Point Transmission Service where the generation source is outside the SPP Region and the load is located within the SPP Region and for Non-Firm Point-To-Point Transmission Service where both the generation source and the load are located within the SPP Region. For Non-Firm Point-To-Point Transmission Service where the generation source is located within the SPP Region and the load is located outside of the SPP Region, and for Non-Firm Point-To-Point Transmission Service where both the generation source and the load are located outside of the SPP Region, the Transmission Customer shall pay the zonal rate (per KW of reserved capacity) for the Zone interconnected with the Balancing Authority Area, external to the SPP Region, that is the designated Point of Delivery. Where there is more than one Zone interconnected with such Balancing Authority Area, the lowest zonal rate of the interconnected Zones is applicable. The zonal rates are stated in Attachment T.

The Zones are as follows:

Zone 1: American Electric Power – West
Zone 2: Kansas City Board of Public Utilities
Zone 3: City Utilities of Springfield, Missouri
Zone 4: Empire District Electric Company
Zone 5: Grand River Dam Authority
Zone 6: Evergy Metro, Inc.
Zone 7: Oklahoma Gas & Electric Company
Zone 8: Midwest Energy, Inc.
Zone 9: Evergy Missouri West, Inc.
Zone 10: Southwestern Power Administration
Zone 11: Southwestern Public Service

Zone 12: Sunflower Electric Power Corporation

Zone 13: Western Farmers Electric Cooperative

Zone 14: Evergy Kansas Central, Inc. (Evergy Kansas Central, Inc. and Evergy Kansas South, Inc.)

Zone 15: Reserved for Future Use

Zone 16: Lincoln Electric System

Zone 17: Nebraska Public Power District

Zone 18: Omaha Public Power District

Zone 19: Upper Missouri Zone

No changes in Zones shall be made without submitting a filing to the Commission.

**2. Caps:** The total demand charge in any week, pursuant to a reservation for Daily delivery, shall not exceed the weekly rate times the highest amount in kilowatts of Reserved Capacity in any day during such week. The total demand charge in any day, pursuant to a reservation for Hourly delivery, shall not exceed the daily rate times the highest amount in kilowatts of Reserved Capacity in any hour during such day. In addition, the total demand charge in any week, pursuant to a reservation for Hourly or Daily delivery, shall not exceed the weekly rate above times the highest amount in kilowatts of Reserved Capacity in any hour during such week.

**3. Redispatch Costs:** The redispatch costs shall be calculated in accordance with the formula and protocols shown on Attachment K.

**4. Discounts:** The Transmission Provider may offer discounts under this Schedule. Three principal requirements apply to discounts for transmission service as follows: (1) any offer of a discount made by the Transmission Provider must be announced to all Eligible Customers solely by posting on the OASIS, (2) any customer-initiated requests for discounts must occur solely by posting on the OASIS, and (3) once a discount is negotiated, details must be immediately posted on the OASIS. For any discount agreed upon for service on a path, from Point(s) of Receipt to Point(s) of Delivery, the Transmission Provider must offer the same discounted transmission service rate for the same time period to all Eligible Customers on all unconstrained transmission paths that go to the same Point(s) of Delivery on the Transmission System. In offering discounts, the Transmission Provider's goal shall be to maximize transmission revenues.

**4(a) Next-Hour-Market Service:** The basic charge shall be that agreed upon by the Parties at the time this service is reserved and in no event shall exceed the applicable charges posted on OASIS. In the event that transmission service is curtailed or interrupted by the Transmission Provider, either acting directly or indirectly at the request of another transmission provider or a Security Coordinator, the Transmission Customer shall be charged only for that portion of the hour of actual transmission service used. The pro-rata portion must be agreed upon between the Transmission Provider and the Transmission Customer.

**5. Real Power Losses:** The Transmission Customer shall be responsible for real power losses determined in accordance with Attachment M.

**6. Wholesale Distribution Service:** Where Wholesale Distribution Service is provided to effectuate Non-Firm Point-To-Point Transmission Service, the Transmission Customer shall pay all charges levied pursuant to the Wholesale Distribution Service Agreement and Schedule 10.

**7. Base Plan Zonal Charges and Region-wide Charges:** The Transmission Customer shall pay all charges assessed pursuant to Schedule 11.

**8. Resales**: The rates and rules governing charges and discounts stated above shall not apply to resales of transmission service, compensation for which shall be governed by section 23.1 of the Tariff.

# SCHEDULE 9
# NETWORK INTEGRATION TRANSMISSION SERVICE

The Transmission Customer shall compensate the Transmission Provider for Network Integration Transmission Service at the applicable charges set forth below in addition to other applicable charges specified in the Tariff.

**1. Zonal Rates:** The Transmission Customer taking Network Integration Transmission Service shall pay a monthly demand charge for the Zone where the load is located. Each month, the Transmission Customer shall pay the Transmission Provider the applicable monthly zonal Demand Charge, determined in accordance with Section 34.1. If a Transmission Customer has load in multiple Zones, the Transmission Customer shall pay the monthly demand charge for each Zone in which its load is located. For load not physically interconnected with the Transmission System designated as Network Load pursuant to Section 31.3, the Network Customer shall pay the zonal Demand Charge for the Zone interconnected with the Balancing Authority Area, external to the SPP Region, that is the designated Point of Delivery. For Network Customers in Zones 1 through 18 designating load external to the SPP Region, where there is more than one Zone interconnected with such Balancing Authority Area, the lowest zonal Demand Charge of the interconnected Zones is applicable. For Network Customers in Zone 19 designating load external to the SPP Region, where there is more than one Zone interconnected with such Balancing Authority Area, the zonal Demand Charge of Zone 19 is applicable. For Network Customers in Zone 10 that receive deliveries of Federal Power-Southwestern from the Southwestern Power Administration, the Network Customer shall have its Demand Charge under this Schedule 9 reduced in accordance with the provisions of Section 34.9 of this Tariff. A Transmission Customer that is serving load on the Xcel Energy Operating Companies' transmission system taking Network Integration Transmission Service under the Xcel Energy Operating Companies' OATT and also takes transmission service under Part III of this Tariff to export over the Lamar Tie Line resources from the SPS Zone to serve load on the Public Service Company of Colorado (PSCo) transmission system shall have its zonal rate charges under this Schedule 9 reduced by 100%. A Transmission Customer that is serving load on the Xcel Energy Operating Companies' transmission system taking Network Integration Transmission Service under the Xcel Energy Operating Companies' OATT and also takes transmission service under Part III of this Tariff to import over the Lamar Tie Line resources to

serve its load in the SPS Zone shall be subject to the applicable charges under this Schedule 9, without reduction. The Zonal Annual Transmission Revenue Requirement of each Zone is stated in Attachment H. Notwithstanding anything to the contrary in this Tariff, a Transmission Owner taking Network Integration Transmission Service may elect not to pay (in whole or in part) the monthly demand charges specified in the preceding paragraph to the extent that the Transmission Owner would have received under Attachment L (revenue distribution) the amounts it seeks to not pay under this provision. A Transmission Owner electing this option shall remain obligated to pay any applicable charges for transmission services using any other Transmission Owner's facilities unless the transmission is provided pursuant to a Grandfathered Agreement (in which case compensation provisions under the Grandfathered Agreement control). A Transmission Owner electing this option shall remain responsible for any credits pursuant to Section 30.9 and for all other applicable charges under this Tariff. This election will only be effective through January 31, 2010.

The Zones are as follows:

Zone 1: American Electric Power - West

Zone 2: Kansas City Board of Public Utilities

Zone 3: City Utilities of Springfield, Missouri

Zone 4: Empire District Electric Company

Zone 5: Grand River Dam Authority

Zone 6: Evergy Metro, Inc.

Zone 7: Oklahoma Gas & Electric Company

Zone 8: Midwest Energy, Inc.

Zone 9: Evergy Missouri West, Inc.

Zone 10: Southwestern Power Administration

Zone 11: Southwestern Public Service

Zone 12: Sunflower Electric Power Corporation

Zone 13: Western Farmers Electric Cooperative

Zone 14: Evergy Kansas Central, Inc. (Evergy Kansas Central, Inc. and Evergy Kansas South, Inc.)

Zone 15: Reserved for Future Use

Zone 16: Lincoln Electric System

Zone 17: Nebraska Public Power District

Zone 18: Omaha Public Power District

Zone 19: Upper Missouri Zone

No changes in Zones shall be made without submitting a filing to the Commission.

**2. Redispatch Costs:** The redispatch costs shall be calculated in accordance with the formula and protocols shown on Attachment K.

**3. Real Power Losses:** The Transmission Customer shall be responsible for real power losses determined in accordance with Attachment M.

**4. a.) Direct Assignment Costs:** Where a Facilities Study indicates the need to construct Direct Assignment Facilities to accommodate a request for Transmission Service, the Transmission Customer shall be charged the full cost of such Direct Assignment Facilities in addition to the charges specified in this Schedule and Tariff. The annual costs of the facility shall be calculated by multiplying the levelized fixed charge rate of the Transmission Owner by the nondepreciated cost of the facility. Each month the Transmission Customer shall pay a charge based on such annual costs divided by twelve. Any such charge will be filed with the Commission.

**b.) Directly Assigned Upgrade Costs:** Where a Facilities Study indicates the need to construct Network Upgrades to accommodate a request for Transmission Service, the Transmission Customer may be allocated Directly Assigned Upgrade Costs in accordance with Attachments J and Z1. Any such charge will be filed with the Commission. The Transmission Customer shall be charged the Directly Assigned Upgrade Costs in addition to the charges specified in this Schedule and any other applicable charges under this Tariff. If the Transmission Customer is charged the Directly Assigned Upgrade Costs, upon completion of construction of such assigned upgrades, the Transmission Provider shall reconcile the Directly Assigned Upgrade Costs against the actual construction costs. Based on the reconciliation, the Transmission Customer's cost responsibility shall be adjusted as appropriate.

**5. Wholesale Distribution Service:** Where Wholesale Distribution Service is provided to effectuate Network Integration Transmission Service, the Network Customer shall pay all charges levied pursuant to the Wholesale Distribution Service Agreement and Schedule 10.

**6. Base Plan Zonal Charges and Region-wide Charges:** The Transmission Customer shall pay all charges assessed pursuant to Schedule 11.

# SCHEDULE 10
# WHOLESALE DISTRIBUTION SERVICE

Wholesale Distribution Service will be provided by the individual Transmission Owners as necessary to provide Point-To-Point Transmission Service or Network Integration Transmission Service under this Tariff. The transaction-specific information, including all customer-specific rates and charges, will be set forth in the Service Agreement between the Transmission Provider and the Transmission Customer for the associated service being provided pursuant to the Tariff. All rates and charges for Wholesale Distribution Service shall be on file with the appropriate agency as required by law or regulation. To the extent that a Service Agreement containing provisions for Wholesale Distribution Service is required to be filed with the Commission, the Transmission Provider, in consultation with the appropriate Transmission Owner, shall provide along with the filing, adequate cost support to justify the customer-specific rates and charges being assessed under this Schedule 10.

Wholesale Distribution Service will be provided subject to the same scheduling deadlines and procedures for alternative dispute resolution as apply to the associated service. Unless otherwise specified, the provision of Wholesale Distribution Service will commence on the same day as service for the associated transaction, and shall terminate on the same day as service for the associated transaction.

# SCHEDULE 11
# BASE PLAN ZONAL CHARGE AND REGION-WIDE CHARGE

## I. Introduction

Except as provided herein, pursuant to Part V of this Tariff, Base Plan Zonal Charges and Region-wide Charges shall be assessed to Network Customers and, where applicable, Transmission Owners based on Resident Load. Likewise, Base Plan Zonal Charges and the Region-wide Charge shall be assessed to each Transmission Customer taking Point-To-Point Transmission Service under the Tariff based on Reserved Capacity. These charges will be applied only to service taken in whole or in part within the Eastern Interconnection. Western-UGP shall be exempt from the Region-wide Charge under this Schedule 11 in accordance with Section 39.3(e) of this Tariff. For the purpose of determining the Region-wide Load Ratio Shares for application of Schedule 11, transmission of Federal Power-Western-UGP to the Statutory Load Obligations served by Western-UGP shall be excluded from the Transmission Provider's monthly Zone transmission load for Zone 19 used as a component of the divisor for all Zones and from the numerator used for Zone 19. The charges stated in Schedule 11 shall not be changed absent a filing with the Commission.

## II. Base Plan Zonal Charges and Region-wide Charge to Resident Load

### A. Calculation of Annual Transmission Revenue Requirement

In calculating the Base Plan Zonal Annual Transmission Revenue Requirements and Region-wide Annual Transmission Revenue Requirement, the Transmission Provider shall sum the applicable, Commission-approved annual transmission revenue requirements for upgrades eligible for cost recovery under this Schedule 11, as allocated in accordance with Attachment J of this Tariff. Subject to the limitations in subsections 1 and 2 below, such annual transmission revenue requirements shall be reduced by the previous calendar year’s amount of (i) point-to-point revenue received by each Transmission Owner resulting from charges under Section III of this Schedule 11 and (ii) revenue distributed to each Transmission Owner under Section IV of Attachment AU and allocated in proportion to Point-To-Point Transmission Service Schedule 11 revenue under Section V of Attachment AU. Any such adjustment for the previous calendar year point-to-point revenue shall be set forth in the RRR File.

**1.** For each Transmission Owner utilizing a formula rate, the Transmission Provider shall not make an adjustment of the Transmission Owner's annual transmission revenue requirements under this Section II.A if point-to-point revenue resulting from charges under Section III of this Schedule 11 and revenue distributed and allocated under Attachment AU is credited and updated on an annual basis in the Transmission Owner's formula rate in a manner that reduces the annual transmission revenue requirements for upgrades eligible for cost recovery under this Schedule 11.

**2.** For each Transmission Owner utilizing a stated rate or utilizing a formula rate without annual update of the Schedule 11 revenue credits, the revenue adjustment described in this Section II.A shall be only the difference, whether positive or negative, between the previous calendar year Point-To-Point Transmission Service Schedule 11 revenue and the amount of point-to-point revenue and revenue distributed and allocated under Attachment AU, if any, already credited in the calculation of the Transmission Owner's annual transmission revenue requirements included in the Base Plan Zonal Annual Transmission Revenue Requirements and Region-wide Annual Transmission Revenue Requirement. The amount of revenue resulting from charges under Section III of this Schedule 11 and revenue distributed and allocated under Attachment AU that is already credited in the calculation of the Transmission Owner's annual transmission revenue requirements included in the Base Plan Zonal Annual Transmission Revenue Requirements and Region-wide Annual Transmission Revenue Requirement is shown in Table 3, Section 1 of Attachment H.

**B. Base Plan Zonal Charge to Resident Load**

The Network Customer and the Transmission Owner shall pay a monthly Base Plan Zonal Charge, which shall be determined by multiplying its Base Plan Zonal Load Ratio Share by one twelfth (1/12) of the Base Plan Zonal Annual Transmission Revenue Requirement specified in Attachment H less any amount reallocated in accordance with Section IV.A of Attachment J for each Zone in which the Network Customer's or

Transmission Owner's Resident Load is physically located. Where a Network Customer has designated Network Load not physically interconnected with the Transmission System under Section 31.3, Network Customer shall pay a monthly Zonal Base Plan Charge, which shall be determined by multiplying its Base Plan Zonal Load Ratio Share by one twelfth (1/12) of the Base Plan Zonal Annual Transmission Revenue Requirement specified in Attachment H less any amount reallocated in accordance with Section IV.A of Attachment J for the Zone that is the basis for charges under Schedule 11.

**1. Determination of Network Customer's and Transmission Owner's Monthly Zonal Resident Load**

The Network Customer's or Transmission Owner's monthly zonal Resident Load is its integrated hourly load coincident with the monthly peak of the Zone where the Resident Load is physically located. Where a Network Customer or Transmission Owner has Resident Load in more than one Zone, the monthly Resident Load will be determined separately for each Zone. Where a Network Customer has designated Network Load not physically interconnected with the Transmission System under Section 31.3, the Network Customer's monthly Resident Load will be its hourly load coincident with the monthly peak of the Zone that is the basis for charges under Schedule 11.

**2. Determination of Network Customer's and Transmission Owner's Monthly Zonal Resident Load for Zone 10**

The Network Customer's or Transmission Owner's monthly zonal Resident Load shall be calculated in accordance with Section B.1 of this Schedule 11; except that the Network Customer's monthly zonal Resident Load shall be reduced by the Federal-Power Southwestern as identified in Section 34.9 of this Tariff.

**3. Determination of Transmission Provider's Monthly Zone Transmission Load**

The Transmission Provider's monthly Transmission System load shall be determined in accordance with Section 34.5 of this Tariff.

**C. Region-wide Charge to Resident Load**

Network Customers and Transmission Owners shall pay a monthly Region-wide Charge, which shall be determined as (i) the product of its Region-wide Load Ratio Share

applicable to Section I, Table 2-A of Attachment H and one twelfth (1/12) of the Region-wide Annual Transmission Revenue Requirement specified in Section I, Table 2-A of Attachment H, plus (ii) the product of its Region-wide Load Ratio Share applicable to Section I, Table 2-B of Attachment H and one twelfth (1/12) of the Region-wide Annual Transmission Revenue Requirement specified in Section I, Table 2-B of Attachment H.

**1. Determination of Network Customer's and Transmission Owner's Monthly Regional Resident Load in Zones 1 through 9 and 11 through 18**

For Zones 1 through 9 and 11 through 18, the Network Customer's or Transmission Owner's monthly regional Resident Load is the sum of its monthly zonal Resident Load for each Zone, where the monthly zonal Resident Load is determined separately for each Zone coincident with the monthly peak of the Zone in accordance with Section II.B.1.

**2. Determination of Network Customer's and Transmission Owner's Monthly Regional Load in Zone 19**

For application of the Region-wide Charge under this Schedule 11, the Network Customer's or Transmission Owner's load for Zone 19 shall be the integrated hourly load coincident with the monthly peak of Zone 19 calculated in accordance with Section II.B.1 less: (i) load in the Western Interconnection to the extent that such load is served only by resources in the Western Interconnection, and (ii) service provided under the Western-UGP Federal Service Exemption.

**3. Determination of Network Customer's and Transmission Owner's Monthly Regional Load in Zone 10**

For application of the Region-wide Charge under this Schedule 11, the Network Customer's or Transmission Owner's load for Zone 10 shall be the integrated hourly load coincident with the monthly peak of Zone 10 calculated in accordance with Section II.B.2.

**4. Determination of Transmission Provider's Monthly Regional Transmission System Load**

The Transmission Provider's monthly regional Transmission System load is the sum of the monthly Zone transmission load for each Zone, where the monthly zone transmission load for each Zone is determined on a non-coincident

basis in accordance with Section II.B.2, but with (a) Zone 19 load modified in accordance with Section II.C.2 and (b) Zone 10 load modified in accordance with Section II.C.3.

**D. Special Provision for Non-Federal Service Exemption service to Western-UGP's Statutory Load Obligations**

Western-UGP's Statutory Load Obligations ordinarily served by Federal Power Western-UGP, may be served on occasion from resources where the Western-UGP Federal Service Exemption from Schedule 11 Region-wide Charges is not applicable. In any such instance, Region-wide Charges will be applied as calculated pursuant to Sections III.C.1.a and III.C.3 of this Schedule 11.

## III. Base Plan Zonal Charge and Region-wide Charge for Point-To-Point Transmission Service

### A. Base Plan Zonal Charge for Point-To-Point Transmission Service

The Base Plan Zonal Charge shall be assessed to Transmission Customers taking Firm or Non-Firm Point-To-Point Transmission Service under the SPP Tariff. The Transmission Customer shall pay the Base Plan Zonal Rate (per kW of Reserved Capacity) based upon the Zone where the load is located for Point-To-Point Transmission Service where the generation source is outside the SPP Region and the load is located within the SPP Region and for Point-To-Point Transmission Service where both the generation source and the load are located within the SPP Region. For Point-To-Point Transmission Service where the generation source is located within the SPP Region and the load is located outside of the SPP Region, and for Point-To-Point Transmission Service where both the generation source and the load are located outside of the SPP Region, the Transmission Customer shall pay the Base Plan Average Zonal Rate (per kW of Reserved Capacity). The Base Plan Zonal Rates and the Base Plan Average Zonal Rate shall be calculated in accordance with Section III.D and set forth in the RRR File posted on the SPP website.

### B. Region-wide Charge for Point-To-Point Transmission Service

The Region-wide Charge shall be assessed to Transmission Customers taking Firm or Non-Firm Point-To-Point Transmission Service under the SPP Tariff. The Transmission Customer shall pay the Region-wide Rate (per kW of Reserved Capacity) for Point-To-Point Transmission Service. The Region-wide Rate shall be calculated in accordance with Section III.C and set forth in the RRR File posted on the SPP website.

**C. Region-wide Rate for Point-To-Point Transmission Service**

**1. Determination of Annual Region-wide Rate**

a. The Region-wide Annual Transmission Revenue Requirement specified in Attachment H are the basis for the Region-wide Rate. Except for service where the load is located within Zone 19, the annual Region-wide Rate for Firm Point-To-Point Transmission Service shall be determined in accordance with the following formula:

RR = RATRR2A/MRTL 1 to 18 + RATRR2B/MRTL

in which

RR = the annual Region-wide Rate

RATRR2A = the Region-wide Annual Transmission Revenue Requirement specified in Table 2-A of Section I, Attachment H

RATRR2B = the Region-wide Annual Transmission Revenue Requirement specified in Table 2-B of Section I, Attachment H

MRTL 1 to 18 = the average of the monthly regional Transmission System loads in Zones 1 to 18 only, for the twelve months of the calendar year prior to the billing year. The monthly regional Transmission System load shall be determined in accordance with Section II.C.3 less the Zone 19 load modified in accordance with Section II.C.2.

MRTL = the average of the monthly regional Transmission System loads, for the twelve months of the calendar year prior to the billing year. The monthly regional Transmission System load is determined in accordance with Section II.C.3.

b. For service where the load is located within Zone 19, the annual Region-wide Rate for Firm Point-to-Point Transmission Service shall be determined in accordance with the following formula:

RR19= RATRR2B/MRTL

in which

RR19= the annual Region-wide Rate applicable to load in Zone 19

RATRR2B= as defined above

MRTL= as defined above

**2. Region-wide Rate for Firm Point-To-Point Transmission Service**

The Region-wide Rate for Firm Point-To-Point Transmission Service shall be:

| | |
|---|---|
| Per month = | annual Region-wide Rate divided by 12; |
| Per week = | annual Region-wide Rate divided by 52; |
| Per day "on-peak" = | the "per week" Region-wide Rate divided by 5; provided that the rate for 5 to 7 consecutive days may not exceed the "per week" Region-wide Rate; and |
| Per day "off-peak" = | the "per week" Region-wide Rate divided by 7. |

**3. Region-wide Rate for Non-Firm Point-To-Point Transmission Service**

The Region-wide Rate for Non-Firm Point-To-Point Transmission Service shall be:

| | |
|---|---|
| Per month = | annual Region-wide Rate divided by 12; |
| Per week = | annual Region-wide Rate divided by 52: |
| Per day "on-peak" = | the "per month" Region-wide Rate multiplied by 12 then divided by 260; |
| Per day "off-peak" = | the "per month" Region-wide Rate multiplied by 12 then divided by 365; |
| Per hour "on-peak" = | the "per month" Region-wide Rate multiplied by 12 then divided by 4160; and |
| Per hour "off-peak" = | the "per month" Region-wide Rate multiplied by 12 then divided by 8760. |

**4. Total Region-wide Charge**

The total Region-wide Charge paid by a Transmission Customer pursuant to a reservation for hourly delivery shall not exceed the above on-peak daily rate multiplied by the highest amount of Reserved Capacity in any hour during such day. The total Region-wide Charge in any week, pursuant to a reservation for hourly or daily delivery, shall not exceed the above Region-wide Rate specified

for weekly delivery multiplied by the highest amount of Reserved Capacity in any hour during such week.

**5. Rate Sheet for Region-wide Point-To-Point Transmission Service**

**Firm Point-To-Point Transmission Service**

The Transmission Customer shall compensate the Transmission Provider each month for Reserved Capacity at the sum of the applicable charges set forth in the ("RRR File") posted on the SPP website.

**Non-Firm Point-To-Point Transmission Service**

The Transmission Customer shall compensate the Transmission Provider for Non-Firm Point-To-Point Transmission Service up to the sum of the applicable charges set forth in the RRR File.

**D. Base Plan Zonal Rates for Point-To-Point Transmission Service**

**1. Determination of Annual Base Plan Zonal Rate**

The Base Plan Zonal Annual Transmission Revenue Requirement specified in Attachment H less any amount reallocated in accordance with Section IV.A of Attachment J is the basis for the Base Plan Zonal Rates. The annual Base Plan Zonal Rates for Firm Point-To-Point Transmission Service shall be determined in accordance with the following formula for each Zone.

BPZR = BPZATRR/MZTL

in which

BPZR = the annual Base Plan Zonal Rate for the Zone

BPZATRR = the Base Plan Zonal Annual Transmission Revenue Requirement for the Zone as specified in Attachment H less any amount reallocated in accordance with Section IV.A of Attachment J

MZTL = the average of the sum of the monthly Zone transmission load for the Zone for the twelve months of the calendar year prior to the billing year. The monthly Zone transmission load is determined in accordance with Section II.B.2.

**2. Base Plan Zonal Rate for Firm Point-To-Point Transmission Service**

The Base Plan Zonal Rate for Firm Point-To-Point Transmission Service for each Zone shall be:

Per month = annual Base Plan Zonal Rate for the Zone divided by 12;

Per week = annual Base Plan Zonal Rate for the Zone divided by 52;

Per day "on-peak" = the "per week" Base Plan Zonal Rate for the Zone divided by 5; provided that the rate for 5 to 7 consecutive days may not exceed the "per week" Base Plan Zonal Rate;

Per day "off-peak" = the "per week" Base Plan Zonal Rate for the Zone divided by 7.

**3. Base Plan Zonal Rate for Non-Firm Point-To-Point Transmission Service**

The Base Plan Zonal Rate for Non-Firm Point-To-Point Transmission Service for each Zone shall be:

Per month = annual Base Plan Zone Rate for the Zone divided by 12;

Per week = annual Base Plan Zonal Rate for the Zone divided by 52:

Per day "on-peak" = the "per month" Base Plan Zonal Rate for the Zone multiplied by 12 then divided by 260;

Per day "off-peak" = the "per month" Base Plan Zonal Rate for the Zone multiplied by 12 then divided by 365;

Per hour "on-peak" = the "per month" Base Plan Zonal Rate for the Zone multiplied by 12 then divided by 4160; and

Per hour "off-peak" = the "per month" Base Plan Zonal Rate for the Zone multiplied by 12 then divided by 8760.

**4. Base Plan Average Zonal Rate**

The total Base Plan Zonal Annual Transmission Revenue Requirement specified in Attachment H for all Zones less the total of all zonal amounts reallocated in accordance with Section IV.A of Attachment J is the basis for the Base Plan Average Zonal Rate. The annual Base Plan Average Zonal Rate for Firm Point-To-Point Transmission Service shall be determined in accordance with the following formula.

BPAZR = TBPZATRR/MRTL

in which

BPAZR = the annual Base Plan Average Zonal Rate

TBPZATRR = the total Base Plan Zonal Annual Transmission Revenue Requirement for all Zones as specified in Attachment H less the total of all zonal amounts reallocated in accordance with Section IV.A of Attachment J

MRTL = as defined in Section III.C.1

The Base Plan Average Zonal Rates for Firm Point-To-Point Transmission Service and Non-Firm Point-To-Point Transmission Service for each month, week, day on-peak, day off-peak, hour on-peak, and hour off-peak shall be based on the annual Base Plan Average Zonal Rate and calculated consistently with the formulas shown in Sections III.D.2 and III.D.3.

**5. Total Zonal Base Plan Charge**

The total zonal charge paid by a Transmission Customer under this Schedule 11 pursuant to a reservation for hourly delivery shall not exceed the applicable on-peak daily rate multiplied by the highest amount of Reserved Capacity in any hour during such day. The total zonal charge under this Schedule 11 in any week, pursuant to a reservation for hourly or daily delivery, shall not exceed the applicable rate specified for weekly delivery multiplied by the highest amount of Reserved Capacity in any hour during such week.

**6. Rate Sheets for Base Plan Zonal Point-To-Point Transmission Service**

**Firm Point-To-Point Transmission Service**

The Transmission Customer shall compensate the Transmission Provider each month for Reserved Capacity at the sum of the applicable charges set forth in the RRR File posted on the SPP website.

**Non-Firm Point-To-Point Transmission Service**

The Transmission Customer shall compensate the Transmission Provider for Non-Firm Point-To-Point Transmission Service up to the sum

of the applicable charges set forth in the RRR File posted on the SPP website.

**E. On-Peak and Off-Peak**

Off-Peak days shall be Saturdays and Sundays and all NERC holidays. All other days shall be On-Peak. All hours during Off-Peak days shall be Off-Peak. On-Peak hours during On-Peak days shall be all hours from HE 0700 through HE 2200 Central Prevailing Time. All other hours during On-Peak days shall be Off-Peak.

# Reserved for Future Use

# Reserved for Future Use

# SCHEDULE 12
# FERC ASSESSMENT CHARGE

## 1. INTRODUCTION

As a public utility, the Transmission Provider is subject to annual charges assessed by the Commission, pursuant to Part 382 of its regulations (the "FERC Assessment"). For each public utility, such assessment is based on the actual megawatt-hours of energy transmitted in interstate commerce during a calendar year, as reported on FERC Form 582. This Schedule 12 provides for recovery of the estimated amount to be assessed by the Commission in the next year for transmission service, with subsequent true-up to actual cost, when such cost is known.

## 2. APPLICABILITY

This charge shall apply to all energy delivered under Point-To-Point Transmission Service and Network Integration Transmission Service and to all energy delivered to Bundled Retail and Grandfathered Loads to which Section 39.2 of this Tariff applies.

## 3. RATE CHARGED

Prior to March 1 of each year the Transmission Provider shall calculate the FERC Assessment Charge Rate (FACR) and post the results on the SPP website, based on the following formula:

$$FACR_y = \frac{FEC_{y+1} + (FEC_y - Balance_{y-1})}{EMWh_y}$$

Where:

*y* — Year in which charge is calculated.

FACR — FERC Assessment Charge Rate.

FEC — FERC Estimated Charge is the amount expected to be assessed by the Commission in a calendar year.

Balance — Amount in the Schedule 12 account at the end of the calendar year net of all payments to the Commission, collections from

customers, and interest earned for the year prior for which the FACR is calculated.

EMWh Estimated MWh in the calendar year for the categories of energy set forth in Section 2 of this Schedule 12. The estimated amount will be based on previous year amount and adjusted for any known or expected change in energy quantity for the current year.

**4. BILLING**

The Transmission Provider shall bill Transmission Customers and Transmission Owners covered by Section 39.2 the charges specified under this Schedule 12 in accordance with the procedures in Section 7 of this Tariff. The FERC Assessment Charge Rate shall be effective March 1 of each year.

**ATTACHMENT A**
**FORM OF SERVICE AGREEMENT FOR FIRM POINT-TO-POINT TRANSMISSION SERVICE**

1.0 This Service Agreement, dated as of _____, is entered into, by and between Southwest Power Pool, Inc. ("The Transmission Provider"), and _____ ("Transmission Customer").

2.0 The Transmission Customer has been determined by The Transmission Provider to have a Completed Application for Firm Point-To-Point Transmission Service under the Tariff.

3.0 The Transmission Customer has completed all credit arrangements required pursuant to Section 17.3 and Attachment X of the Tariff.

4.0 Service under this agreement shall commence on the later of (l) the requested service commencement date, or (2) the date on which construction of any Direct Assignment Facilities and/or Network Upgrades are completed, or (3) such other date as it is permitted to become effective by the Commission. Service under this agreement shall terminate on such date as mutually agreed upon by The Transmission Provider and the Transmission Customer.

5.0 The Transmission Customer agrees to supply information The Transmission Provider deems reasonably necessary in accordance with Good Utility Practice in order for it to provide the requested service.

6.0 The Transmission Provider, as agent for the Transmission Owners, agrees to provide and the Transmission Customer agrees to take and pay for Firm Point-To-Point Transmission Service in accordance with the provisions of Parts I, II and V of the Tariff and this Service Agreement.

7.0 To the extent necessary to effectuate any transaction entered into pursuant to this Service Agreement, the following Transmission Owner(s) shall provide Wholesale Distribution Service over Distribution Facilities:

_____

8.0 Any notice or request made to or by either Party regarding this Service Agreement shall be made to the representative of the other Party as indicated below.

## FORM OF SERVICE AGREEMENT FOR THE RESALE, REASSIGNMENT OR TRANSFER OF POINT-TO-POINT TRANSMISSION SERVICE

1.0 This Service Agreement, dated as of _____, is entered into, by and between _____ (the Transmission Provider), and_____ (the Assignee).

2.0 The Assignee has been determined by the Transmission Provider to be an Eligible Customer under the Tariff and has satisfied all terms and conditions of the Tariff, including but not limited to the requirements set forth in the Credit Policy in Attachment X of the Tariff.

3.0 The terms and conditions for the transaction entered into under this Service Agreement shall be subject to the terms and conditions of Part II of the Transmission Provider's Tariff, except for those terms and conditions negotiated by the Reseller of the reassigned transmission capacity (pursuant to Section 23.1 of this Tariff) and the Assignee, to include: contract effective and termination dates, the amount of reassigned capacity or energy, Point(s) of Receipt and Delivery. Changes by the Assignee to the Reseller's Points of Receipt and Points of Delivery will be subject to the provisions of Section 23.2 of this Tariff.

4.0 The Transmission Provider shall credit the Reseller for the price reflected in the Assignee's Service Agreement or the associated OASIS schedule.

# ATTACHMENT B
# FORM OF SERVICE AGREEMENT FOR NON-FIRM POINT-TO-POINT TRANSMISSION SERVICE

1.0 This Service Agreement, dated as of _____, is entered into, by and between Southwest Power Pool, Inc.("The Transmission Provider"), and _____ (Transmission Customer).

2.0 The Transmission Customer has been determined by The Transmission Provider to be a Transmission Customer under Part II of the Tariff and has filed a Completed Application for Non-Firm Point-To-Point Transmission Service in accordance with Section 18.2 of the Tariff.

3.0 Service under this Agreement shall be provided by The Transmission Provider upon request by an authorized representative of the Transmission Customer.

4.0 The Transmission Customer agrees to supply information The Transmission Provider deems reasonably necessary in accordance with Good Utility Practice in order for it to provide the requested service.

5.0 The Transmission Provider, as agent for the Transmission Owners, agrees to provide and the Transmission Customer agrees to take and pay for Non-Firm Point-To-Point Transmission Service in accordance with the provisions of Parts I, II and V of the Tariff and this Service Agreement.

6.0 Any notice or request made to or by either Party regarding this Service Agreement shall be made to the representative of the other Party as indicated below.

Southwest Power Pool:

_____

201 Worthen Drive

Little Rock, AR 72223-4936

Transmission Customer:

_____

_____

_____

7.0 The Tariff is incorporated herein and made a part hereof.

IN WITNESS WHEREOF, the Parties have caused this Service Agreement to be executed by their respective authorized officials.

# ATTACHMENT C
# METHODOLOGY TO ASSESS AVAILABLE TRANSFER CAPABILITY

# 1. General

## 1.1 General Statement.

This Attachment C prescribes the specific methodology for calculating Available Transfer Capability ("ATC") posted on the Transmission Provider's OASIS, as required in Section 4 of this OATT. The Transmission Provider utilizes a Flowgate Methodology for calculating ATC. The Transmission Provider will develop and maintain implementation documents for the calculations specified below.

## 1.2 Definitions

The terms used in this Attachment C shall have the meanings as defined in this section 1.2 or as otherwise defined in this OATT.

### 1.2.1 Available Flowgate Capability ("AFC")

A measure of the flow capability remaining on a Flowgate for further commercial activity over and above already committed uses. It is defined as TFC less ETC, less a CBM, less a TRM, plus Postbacks, and plus Counterflows.

### 1.2.2 Available Transfer Capability ("ATC")

A measure of the transfer capability remaining in the physical transmission network for further commercial activity over and above already committed uses. It is defined as TTC less ETC (including retail customer service), less a CBM, less a TRM, plus Postbacks, plus Counterflows.

### 1.2.3 Available Transfer Capability Implementation Document ("ATCID")

A document that describes the implementation of a methodology for calculating ATC or AFC, and provides information related to a Transmission Service Provider's calculation of ATC or AFC.

### 1.2.4 Base Loading

The determined loading on a Flowgate resulting from the net effect of modeled existing transmission service commitments for the purpose of serving firm network load from NR and impacts from existing OASIS commitments, including rollover rights as established in section 2.2 of the OATT.

### 1.2.5 Capacity Benefit Margin ("CBM")

The amount of firm transmission transfer capability preserved by the transmission provider for LSE, whose loads are located on the Transmission Provider's system, to enable access by the LSEs to generation from interconnected systems to meet generation reliability requirements. Preservation of CBM for an LSE allows that entity to reduce its installed generating capacity

below that which may otherwise have been necessary without interconnections to meet its generation reliability requirements. The transmission transfer capability preserved as CBM is intended to be used by the LSE only in times of emergency generation deficiencies.

1.2.6 Contractual Limit

Contractual arrangements among two or more Transmission Owners that define transfer capability.

1.2.7 Counterflows

Adjustments to AFC as determined by the Transmission Provider and specified in [the] its ATCID.

1.2.8 Designated Resource ("DR")

As defined in Section 1 of the Tariff.

1.2.9 Existing Transmission Commitments ("ETC")

Committed uses of the Transmission Provider's Transmission System considered when determining ATC or AFC.

1.2.10 Flowgate

A mathematical construct, comprised of one or more monitored transmission facilities and optionally one or more contingency facilities, used to analyze the impact of power flows upon the bulk electric system.

1.2.11 Load-Serving Entity ("LSE")

Secures energy and transmission service (and related Interconnected Operations Services) to serve the electrical demand and energy requirements of its end-use customers.

1.2.12 Network Customer

An entity receiving transmission service pursuant to the terms of the Transmission Provider's Network Integration Transmission Service under Part III of the Tariff. (OATT Section 1.20)

1.2.13 Network Integration Transmission Service

The transmission service provided under Part III of the Tariff. (OATT Section 1.21)

1.2.14 Network Resource ("NR")

As defined in Section 1 of the Tariff.

1.2.15 Operating Procedure

A document that identifies specific steps or tasks that should be taken by one or more specific operating positions to achieve specific operating goal(s). The steps in an Operating Procedure should be followed in the order in which they are presented, and should be performed by the position(s) identified.

1.2.16 Outage Transfer Distribution Factor ("OTDF")

In the post-contingency configuration of the Transmission Provider's system, the electric PTDF with one or more system facilities removed from service (outaged).

1.2.17 Postbacks

Positive adjustments to ATC or AFC.

1.2.18 Power Transfer Distribution Factor ("PTDF")

In the pre-contingency configuration of the Transmission Provider's system, a measure of the responsiveness or change in electrical loadings on transmission system facilities due to a change in electric power transfer from one area to another, expressed in percent (up to 100%) of the change in power transfer.

1.2.19 Real-Time Response Factor Calculator ("RTRFCALC")

The application used for constructing models and calculating a component of ETC and DFs utilizing forecasted inputs and expected topology of future horizons for AFC calculations.

1.2.20 SPP Reliability Coordination Area

The collection of generation, transmission, and load that operate within the boundaries of the Balancing Authority Areas for which SPP provides Reliability Coordination services.

1.2. 21 Total Flowgate Capability ("TFC")

The maximum flow capability on a Flowgate, is not to exceed its thermal rating, or in the case of a Flowgate used to represent a specific operating constraint (such as a voltage or stability limit), is not to exceed the associated system operating limit.

1.2.22 Distribution Factor ("DF")

The portion of an Interchange Transaction, typically expressed in per unit that flows across a transmission facility (Flowgate). Used interchangeably for either OTDF or PTDF.

1.2.23 Transmission Reliability Margin ("TRM")

The amount of transmission transfer capability necessary to provide reasonable assurance that the interconnected transmission network will be secure. TRM accounts for the inherent uncertainty in system conditions and the need for operating flexibility to ensure reliable system operation as system conditions change.

## 2. Flowgates

### 2.1 Identification of Flowgates

Flowgates are identified as a selected power transmission element or group of elements that act as a proxy for the power transmission system capability and represent potential thermal, voltage, stability and/or contractual system limits to power transfer. The Transmission Provider identifies and eliminates Flowgates through an annual review process set forth in Section 2.2 of this Attachment C. Flowgates also are identified through requests from reliability coordinators, transmission service providers, transmission owners, and transmission operators to protect equipment or maintain system reliability regardless of the ownership of the Flowgate.

Once a set of transmission facilities have been identified as potential transfer constraints they can be grouped with their related components and identified as unique Flowgates. The rating of the Flowgate is called the TFC of the Flowgate and is monitored and used for evaluation of all viable transfers for commerce. The TFC values are consistent with those used for planning purposes.

### 2.2 Updating Flowgates

Updating the list of Flowgates is a continual process. Flowgate additions and eliminations and changes in TFC are the result of studies, analyses, and operating experience of the Transmission Provider and its member Transmission Owners. Additionally, at any time during the year, reliability coordinators, transmission service providers, transmission owners, and transmission operators may request that a Flowgate be added to protect equipment or maintain system reliability, regardless of the ownership of that Flowgate. Updating the Flowgate list may or may not require running a study. The following requirements apply when adding a Flowgate to the list:

- OTDF Flowgates may be added, provided that the contingency is valid, the TFC represents the total amount of power that can flow during the contingency without violating the emergency rating of the monitored facility, and no Operating Procedures apply to that Flowgate.

- PTDF Flowgates may be added, provided that it is a single facility Flowgate, the TFC is equal to the normal rating of the single facility, and no Operating Procedures apply to that Flowgate.

- Flowgates may be added on a temporary or permanent basis when required to maintain system reliability.

#### 2.2.1 Addition or Elimination of an Internal Flowgate

The Transmission Provider uses the following procedure to add or eliminate an internal Flowgate in its AFC Calculations.

(1) The Transmission Provider will add a permanent or temporary internal Flowgate at the request of the SPP Reliability Coordinator. The Transmission Provider will eliminate a temporary internal Flowgate at the request of the SPP Reliability Coordinator.

(2) The Transmission Provider will add an internal Flowgate at the request of SPP Transmission Owners and Transmission Operators.

(3) The Transmission Provider also administers an annual Flowgate assessment using Powerflow models to update the list of active internal Flowgates used for reliability purposes. Except as provided in (1) above, any request to eliminate an internal Flowgate is processed as part of the annual Flowgate assessment.

(a) Powerflow models are selected to cover the 12 month study horizon.

(b) DC and AC analyses are performed on the models to assess NERC Standards and SPP Criteria reliability performance. From these analyses, the Transmission Provider identifies a list of potential new Flowgates to be studied alongside the existing Flowgates.

(c) The new potential Flowgates are compared with existing Flowgates to determine which potential new Flowgates should be considered for addition to the Flowgate list and which existing Flowgates should be eliminated.

(d) The Transmission Owners review the proposed Flowgate changes on their facilities, considering their own operating experience and the results of the Transmission Provider's analyses conducted in accordance with (b) above.

(e) The Transmission Owners approve any additions, eliminations, or changes to the Flowgate list.

2.2.2 Addition or Elimination of an External Flowgate

The Transmission Provider uses the following procedure to add or eliminate an external Flowgate in its AFC Calculations. The Transmission Provider will consider requests to add or eliminate external Flowgates from: (1) reliability coordinators; (2) transmission service providers; (3) transmission owners; and (4) transmission operators. The Transmission Provider will add a requested external Flowgate upon confirming the rating of the facility(ies) involved. Addition or elimination of external Flowgates is governed by NERC Standards, SPP Criteria, and the following seams agreements, as applicable: Joint Operating Agreement Between the Midcontinent Independent System Operator, Inc. And Southwest Power Pool, Inc. (Rate Schedule FERC No. 9); Joint Operating Agreement Among and Between Southwest Power Pool, Inc. and Associated Electric Cooperative, Inc. (Rate Schedule FERC No. 10); and United States Department of

Energy Southwestern Power Administration Amendatory Agreement Between United States of America and Southwest Power Pool, Inc. (Attachment AD to this Tariff).

## 3. ATC Calculations

### 3.1 ATC Mathematical Equations.

The following equations are used in calculating ATC:

#### 3.1.1 Firm Existing Transmission Commitments (Firm ETC)*

Operating Horizon

Firm ETC = (Impacts of NRs and DRs serving load within the SPP Balancing Authority Area) + (Σ flows due to Firm Schedules into, out of and through the SPP Balancing Authority Area)

Planning Horizon

Firm ETC = (Impacts of NR serving load within the SPP Balancing Authority Area) + (Σ Positive Impacts due to Firm OASIS Commitments, Confirmed, Accepted, and Study)

Study Horizon

Firm ETC = (Impacts of NR serving load within the SPP Balancing Authority Area) + (Σ Positive Impacts > 3% due to Firm OASIS Commitments, Confirmed, Accepted, and Study)

#### 3.1.2 Non-Firm Existing Transmission Commitments (Non-Firm ETC)

Operating Horizon

Non-Firm ETC = (Σ Flows due to Non-Firm Schedules into, out of and through the SPP Balancing Authority Area) + (Σ Positive Impacts > 3% due to Non-Firm OASIS Commitments, Confirmed, Accepted and Study since last AFC calculation)

*Applicable pre-emption requirements of lower priority service types will be considered when evaluating requests for transmission service. Impacts resulting from queued Study reservations will be applied according to priority when evaluating requests for transmission service.

Planning Horizon

Non-Firm ETC = (Σ Positive Impacts due to Non-Firm OASIS Commitments, Confirmed, Accepted, and Study) - (Σ 50% of Counterflows due to Confirmed Firm OASIS Commitments)

Study Horizon

Non-Firm ETC = (Σ Positive Impacts due to Non-Firm OASIS Commitments, Confirmed, Accepted, and Study)

#### 3.1.3 Firm AFC:

• $AFC_F = TFC – ETC_{Fi} – CBM_i – TRM_i + Postbacks_{Fi} + Counterflows_{Fi}$

Where:

**$AFC_F$** is the firm Available Flowgate Capability for the Flowgate for that period.

**TFC** is the Total Flowgate Capability of the Flowgate.

**$ETC_{Fi}$** is the sum of the impacts of existing firm transmission commitments for the Flowgate during that period.

**$CBM_i$** is the impact of the Capacity Benefit Margin on the Flowgate during that period.

**$TRM_i$** is the impact of the Transmission Reliability Margin on the Flowgate during that period.

**$Postbacks_{Fi}$** are changes to firm AFC due to a change in the use of Transmission Service for that period, as defined in Business Practices.

**$Counterflows_{Fi}$** are adjustments to firm AFC as determined by the Transmission Provider and specified in its Available Transfer Capability Implementation Document.

3.1.4 Non-Firm AFC:

• $AFC_{NF} = TFC – ETC_{Fi} – ETC_{NFi} – CBM_{Si} – TRM_{Ui} + Postbacks_{NFi} + Counterflows$

Where:

**$AFC_{NF}$** is the non-firm Available Flowgate Capability for the Flowgate for that period.

**TFC** is the Total Flowgate Capability of the Flowgate.

**$ETC_{Fi}$** is the sum of the impacts of existing firm transmission commitments for the Flowgate during that period.

**$ETC_{NFi}$** is the sum of the impacts of existing non-firm transmission commitments for the Flowgate during that period.

**$CBM_{Si}$** is the impact of any schedules during that period using Capacity Benefit Margin.

**$TRM_{Ui}$** is the impact on the Flowgate of the Transmission Reliability Margin that has not been released (unreleased) for sale as non-firm capacity by the Transmission Provider during that period.

**Postbacks$_{NF}$** are changes to non-firm Available Flowgate Capability due to a change in the use of Transmission Service for that period, as defined in Business Practices.

**Counterflows$_{NF}$** are adjustments to non-firm AFC as determined by the Transmission Provider and specified in its Available Transfer Capability Implementation Document.

3.1.5 Converting Flowgate AFCs to ATCs for ATC Paths:

When converting Flowgate AFCs to ATCs for ATC Paths, the Transmission Provider shall convert those values based on the following algorithm:

$$ATC = \min(P)$$

$$P = \{PATC_1, PATC_2, \ldots PATC_n\}$$

$$PATC_n = AFCn / DF_{np}$$

**Where:**

**ATC** is the Available Transfer Capability.

**P** is the set of partial ATCs for all "impacted" Flowgates honored by the Transmission Provider; a Flowgate is considered "impacted" by a path if the Distribution Factor for that path is greater than the percentage threshold used for short-term transmission service used by the Transmission Provider on an OTDF Flowgate or PTDF Flowgate.

**PATC$_n$** is the partial Available Transfer Capability for a path relative to a Flowgate n.

**AFC$_n$** is the Available Flowgate Capability of a Flowgate n.

**DF$_{np}$** is the Distribution Factor for Flowgate n relative to path p.

3.2 AFC Calculation Horizons

AFC and ATC values are calculated for the following periods and frequency:

- Hourly values for at least the next 48 hours are calculated at least once per hour
- Daily values for at least the next 31 calendar days are calculated at least once per day
- Monthly values for at least the next 12 months (months 2-13) are calculated at least once per week

3.3 Transmission Model Update

The transmission models used for AFC calculations are updated for the following periods and frequency:

- Operating Horizon, including all hours of the current day (Day 1), and after 10:00 a.m., all hours of the next day (Day 2). Updated at least once per day.

- Planning Horizon, which extends from the end of the Operating Horizon through the thirty-first day (Day 31). Updated at least once per day.

- Study Horizon, which extends from the end of the Planning Horizon through the twelfth month (month 12). Updated at least once per month.

The actual mathematical algorithms for calculating AFC and ATC are posted on the Transmission Provider's website at: http://www.oatioasis.com/SWPP/SWPPdocs/ATC_Algorithm.doc

# 4. Base Case Models

The AFC process generates a base case model that simulates anticipated system conditions. The base system conditions include projected load, generation dispatch, network topology (based on system configuration and both planned and contingency outages), and base flow transactions.

The impacts on Flowgates due to transactions outside the purpose of representing NR exchange are removed by applying the DFs determined to each transaction identified in the base case. In addition to adjusting the model flow in this manner, positive and Counterflows of existing OASIS commitments are applied according to the type of Base Loading (Firm or Non-Firm) under consideration. 50% of Counterflows resulting from firm Confirmed reservations act to reduce the Non-Firm Base Loading. This process establishes the Base Loading expected to serve the Network Load.

The base flows are based on AC power flow calculations performed by RTRFCALC using the following data:

- Network topology
- Hourly load forecast data of the Balancing Authority Areas
- Net interchange of the Balancing Authority Areas
- Unit dispatch data

## 4.1 Operating Horizon

The AFC calculations of the Operating, Planning, and Study Horizons are performed by RTRFCALC in combination with webTrans.

WebTrans receives the following information from RTRFCALC:

- base flows for all Flowgates,
- DFs for all paths, and
- TFC values for all Flowgates.

The base flows are the product of the AC powerflow calculations performed by RTRFCALC using following data:

### 4.1.1 Network Topology

Network topology is established by the network topology model, either from EMS State Estimator or from Eastern Interconnect Interchange Distribution Calculator Model (IDC Model). Network topology models for the Operating Horizon are adjusted with outage data of generators, transmission lines and transformers within the SPP Reliability Coordination Area. This outage data includes both planned outages and contingency outages that are expected to remain in effect for each hour modeled. The Transmission Provider shall also include outage data from neighboring Reliability Coordinators that is available through System Data Exchange (SDX).

#### 4.1.2 Load Forecast

The Transmission Provider utilizes forecast data made available through SDX.

#### 4.1.3 Net Interchange

The net interchange of the Balancing Authority Areas that are part of the State Estimator Model is based on the existing schedules at the time the RTRFCALC application performs its Operating Horizon run at least once per day.

#### 4.1.4 Unit Dispatch

RTRFCALC utilizes forecasted dispatch data for all units within the SPP Balancing Authority Area.

### 4.2 Planning Horizon

The AFC calculations of the Operating, Planning, and Study Horizons are performed by RTRFCALC application in combination with webTrans.

WebTrans receives the following information from RTRFCALC:

- base flows for all Flowgates,
- DFs for all paths, and
- TFC values for all Flowgates.

The base flows are a product of the AC power flow calculations performed by RTRFCALC using following data:

#### 4.2.1 Network Topology

Network topology is established by the State Estimator or IDC Model and adjusted with hour-to-hour outage data of generators, transmission lines and transformers. Such outage data shall be as submitted by Transmission Operators and Generation Operators that are within the SPP Reliability Coordination Area and approved by the Reliability Coordinator. This outage data includes both planned outages and contingency outages that are expected to remain in effect for each time period modeled. The Transmission Provider includes outage data from neighboring Reliability Coordinators that is available through SDX.

#### 4.2.2 Load Forecast

The Transmission Provider utilizes forecast data made available through SDX.

#### 4.2.3 Net Interchange

Initially, the model assumes the net interchange of the Balancing Authority Areas is 0. If a Balancing Authority Area has a confirmed network reservation from a NR outside the Balancing Authority Area boundary, that reservation is incorporated into the net interchange of both Balancing Authority Areas. That particular network reservation will be added to the exclude file to prevent double counting of impacts.

#### 4.2.4 Unit Dispatch

RTRFCALC utilizes forecasted dispatch data for all units within the SPP Balancing Authority Area.

### 4.3 Study Horizon

The AFC calculations of the Operating, Planning, and Study Horizon are performed by RTRFCALC application in combination with webTrans.

WebTrans receives the following information from RTRFCALC:
- Base flows for all Flowgates,
- DFs for all paths, and
- TFC values for all Flowgates.

The base flows are a product of the AC power flow calculations performed by RTRFCALC using the following data:

#### 4.3.1 Network Topology

Network topology is established by the State Estimator or IDC Model and adjusted for outages of generators, transmission lines and transformers. Such outage data shall be as submitted by Transmission Operators and Generation Operators that are within the SPP Reliability Coordination Area and approved by the Reliability Coordinator. This outage data includes both planned outages and contingency outages that are expected to remain in effect for some period within this horizon. The Transmission Provider also includes outage data from neighboring Reliability Coordinators that is available through SDX. The Transmission Provider includes approved planned outages and contingency outages which are active on 15th of the month and last more than 15 days.

#### 4.3.2 Load Forecast

The Transmission Provider utilizes monthly forecast data that is made available through SDX.

#### 4.3.3 Net Interchange

Initially, the model assumes net interchange of the Balancing Authority Areas is 0. If a Balancing Authority Area has a confirmed network reservation from a NR outside the Balancing Authority Area boundary, that reservation is incorporated into the net interchange of both Balancing Authority Areas. That particular network reservation will be added to the exclude file to prevent double counting of impacts.

#### 4.3.4 Unit Dispatch

RTRFCALC utilizes forecasted dispatch data for all units within the SPP Balancing Authority Area.

### 4.4 Exclusion of Reservations in the Calculations of AFC Values

The Transmission Provider shall exclude or limit certain reservations under the following conditions:

- If total sum of reservations (Confirmed, Accepted, Study) impacting a specific corridor exceeds the total capacity of the corridor,

- If total sum of reservations (Confirmed, Accepted, Study) sinking in a Balancing Authority Area exceeds the total load of the Balancing Authority Area,

- If total sum of reservations (Confirmed, Accepted, Study) sourcing from a group of commonly dispatched units exceeds the total available generation capacity of that group of units.

- If the reservation is a network reservation from a NR outside the Balancing Authority Area boundary and that particular reservation is already included in the base flow calculations of the Study Horizon.

### 4.5 Resynchronization of Base Loading Values

The Transmission Provider uses webTrans to evaluate Transmission Service requests that are submitted by Transmission Customers on OASIS. RTRFCALC recalculates the base flows and DF values of the Operating Horizon for every hour at least once per day.

RTRFCALC recalculates the base flows and DF values of the Planning Horizon at least once per day.

The base flows of the Study Horizon are calculated and updated in webTrans at least once per month.

Finally, webTrans recalculates Firm and Non-Firm Base Loading upon each change of status of a reservation that impacts the relevant Base Loading. WebTrans makes adjustments to Firm and Non-Firm Base Loading upon the change of the following inputs:

For Firm ETC

• The transmission capability utilized in serving native load commitments, to include native load growth, load forecast error and losses not otherwise included in TRM or CBM.

• The impact of Firm Network Integration Transmission Service serving Network Load, to
include load forecast error and losses not otherwise included in TRM or CBM.

• The impact of grandfathered firm Transmission Service agreements and bundled contracts for energy and transmission, where executed prior to the effective date of a Transmission Service Provider's OATT or Safe Harbor Tariff accepted by FERC.

• The impact of Firm Point-To-Point Transmission Service into, out of or through the SPP Balancing Authority Area.

• The impact of maintaining roll-over rights for firm Transmission Service contracts, five years or longer in duration, granting Transmission Customers the right of first refusal to take or continue to take Transmission Service from a Transmission Owner when the Transmission Customer's Transmission Service contract expires or is eligible for renewal.

• The impact of any Ancillary Services not otherwise included in CBM or TRM.

• Postbacks of redirected or released Firm services.

• The impact of Counterflows not otherwise accounted for in the AFC calculation.

• The impact of any other services, contracts, or agreements not specified above using transmission that serves native load or Firm Network Integration Transmission Service.

• The impact of any relevant third-party firm Transmission Service that has not already been accounted for.

For Non-Firm ETC,

• The impact of Non-Firm Network Integration Transmission Service serving load, to include load forecast error and losses not otherwise included in TRM or CBM.

• The impact of grandfathered non-firm Transmission Service Agreements and
bundled contracts for energy and transmission, where executed prior to the effective date of a Transmission Service Provider's OATT or Safe Harbor Tariff accepted by FERC.

• The impact of Non-Firm Point-To-Point Transmission Service into, out of or through the SPP Balancing Authority Area.

• The impact of Counterflows not otherwise accounted for in the ATC calculation.

• Capacity utilized for TRM that the Transmission Service Provider has elected to be released for as Non-Firm ATC.

• Postbacks due to the reinstating of Firm from a "Firm-to-Non-Firm" redirect.

• The impact of any relevant third-party non-firm Transmission Service that has not already been accounted for.

### 4.6 Changes in TFC

In the event of a change in Network Topology due to actual or anticipated system conditions that impacts one or more TFC values, the Transmission Provider shall adjust the TFC in RTRFCALC for the applicable time periods. The Network Topology from the SPP State Estimator or IDC Model shall be adjusted as described in sections 4.1.1, 4.2.1, and 4.3.1 for the applicable horizons.

## 5. TRM

The Transmission Provider calculates TRM for each Flowgate at least once every 13 months. The TRM calculation for each Flowgate is designed to replicate the outage of the unit that has the largest impact on the Flowgate, assuming that the loss of generation is compensated by other generators that participate in the SPP Operating Reserve Sharing pool according to the reserve sharing rules and the capacity necessary to accommodate that compensation by other generators. The TRM calculations are performed with applicable off- line planning models and the following databases:

BASIC.MON - MUST input file listing definitions of the Flowgates for which TRMs are to be calculated.

SUBSYSTEM.SUB – MUST Input file detailing the SPP Reserve Sharing Group's generators and BAs.

STUDY.ASC - Response file for MUST command line. Instructions for MUST to perform the analysis.

RUNSTUDY.BAT - Batch file that opens MUST and executes study instructions in Study.asc.

UNITS.TXT - List of all units in the Reserve Sharing Group.

UNITS_TEMP.TXT - Data file with filtered results out of Units.txt used in the next IPLAN program.

STUDY OUTPUT.TXT – Output file from MUST with the DF impact for every generator on every Flowgate.

For external Flowgates monitored by the Transmission Provider, it will use appropriate CBM and TRM values provided and justified by the owner of the external Flowgate.

Usage of TRM:

The Transmission Provider decrements firm AFCs by the amount of TRM and thereby withholds TRM in the Planning and Study Horizon from firm sales. TRM is sold as non-firm service in the Operating, Planning, and Study Horizons. The Transmission Provider utilizes TRM to accommodate SPP's Operating Reserve Sharing Program. More specifically, TRM is used to accommodate the flow of replacement energy across one of more SPP Flowgates during a generator contingency requiring the usage of SPP Operating Reserves for the allowable duration of the reserve sharing event. As a result, the Transmission Provider may curtail non-firm service in the operating horizon as necessary to accommodate the loss of the relevant unit and avoid curtailment of firm load and/or curtailment

## 6. CBM

The Transmission Provider does not utilize CBM.

## 7. Coordination with Neighbors

The Transmission Provider shall make the following information available in a manner consistent with the rules as defined by NAESB and NERC. Additional data, that is considered to be proprietary, may be provided on a reciprocal basis.

### 7.1 Transmission Outage Schedules

The Transmission Provider will provide the projected status of transmission outage schedules above 230 kV over the next twelve (12) months or more if available. This data shall be updated no less than once daily for the full posting horizon and more often as required by system conditions. The data will include current, accurate and complete transmission facility maintenance schedules, including the "outage date" and "return date" of a transmission facility from a scheduled or forced outage. If the status of a particular transmission facility operating at voltages less than 230 kV is critical to the determination of TTC and ATC/AFC of the neighboring transmission provider, the status of this facility will also be provided.

### 7.2 Transmission Service Requests

(a) The Transmission Provider will make available actual transmission service request information for integration into the neighboring transmission provider's TTC/ATC/AFC determination process.

(b) The Transmission Provider will provide the neighboring transmission provider with the procedures developed and implemented to model requests for transmission service between the transmission providers.

(c) The Transmission provider shall also create, maintain and provide a list of reservations from its OASIS that should not be considered in ATC/AFC calculations. The reasons for these exceptions may include, for example, grandfathered agreements that grant access to more transmission than is necessary for the related generation capacity and unmatched partial path reservations.

### 7.3 Load Data.

The Transmission Provider shall provide peak load data for each period (*e.g.*, daily, weekly, and monthly). It shall either supply hourly load forecasts or daily peak load forecasts with a load profile for the next seven day horizon. All load forecasts will be provided on a Balancing Authority Area basis, with further granularity provided to reflect load forecasts by company within the Balancing Authority Area, as available.

### 7.4 Calculated Firm and Non-firm Available Flowgate Capability

The Transmission Provider will provide Firm and Non-firm AFC for all relevant Flowgates.

### 7.5 Total Flowgate Capability

The Transmission Provider will provide (seasonal, normal and emergency) TFCs as well as all limiting conditions (thermal, voltage, or stability). It will update this information in a timely manner as required by changes on the transmission system.

### 7.6 Identification of External Flowgates.

The Transmission Provider shall consider in its TTC and ATC/AFC determination process all external Flowgates: (i) that may initiate a TLR event, (ii) that are significantly impacted by the Transmission Provider's transactions, or (iii) as mutually agreed between the Transmission Provider and the neighboring transmission provider.

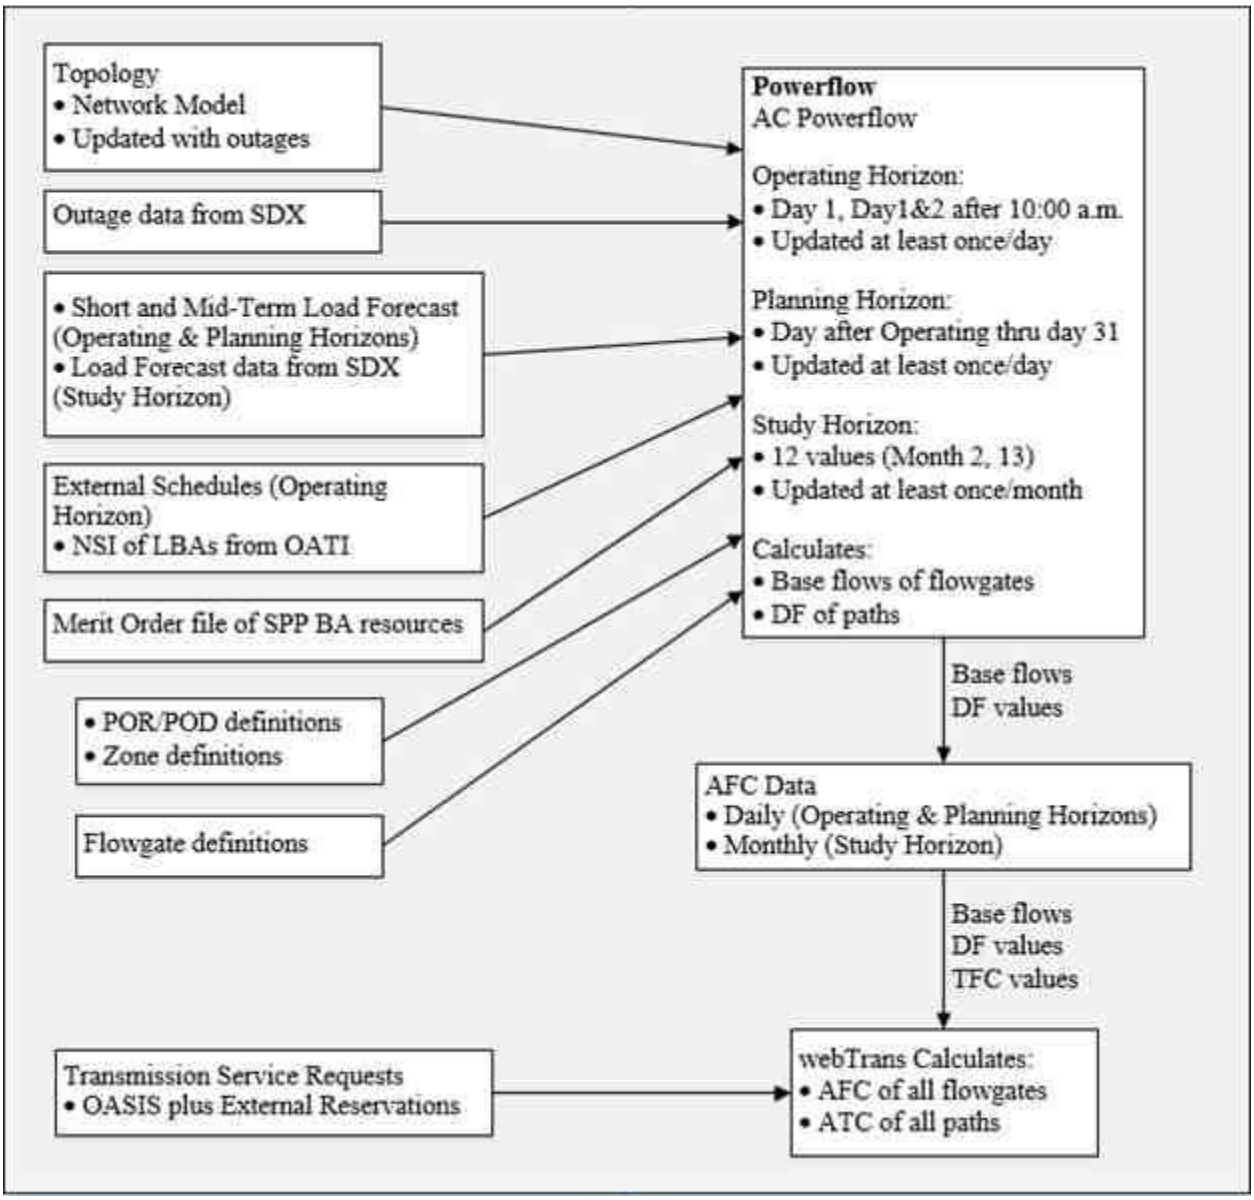
### 7.7 Configuration/Facility Changes (for power system model updates)

(a) The Transmission Provider shall, upon request, work with a neighboring transmission provider to address all significant system changes that need to be incorporated in the Transmission Provider's TTC/ATC/AFC calculation model.

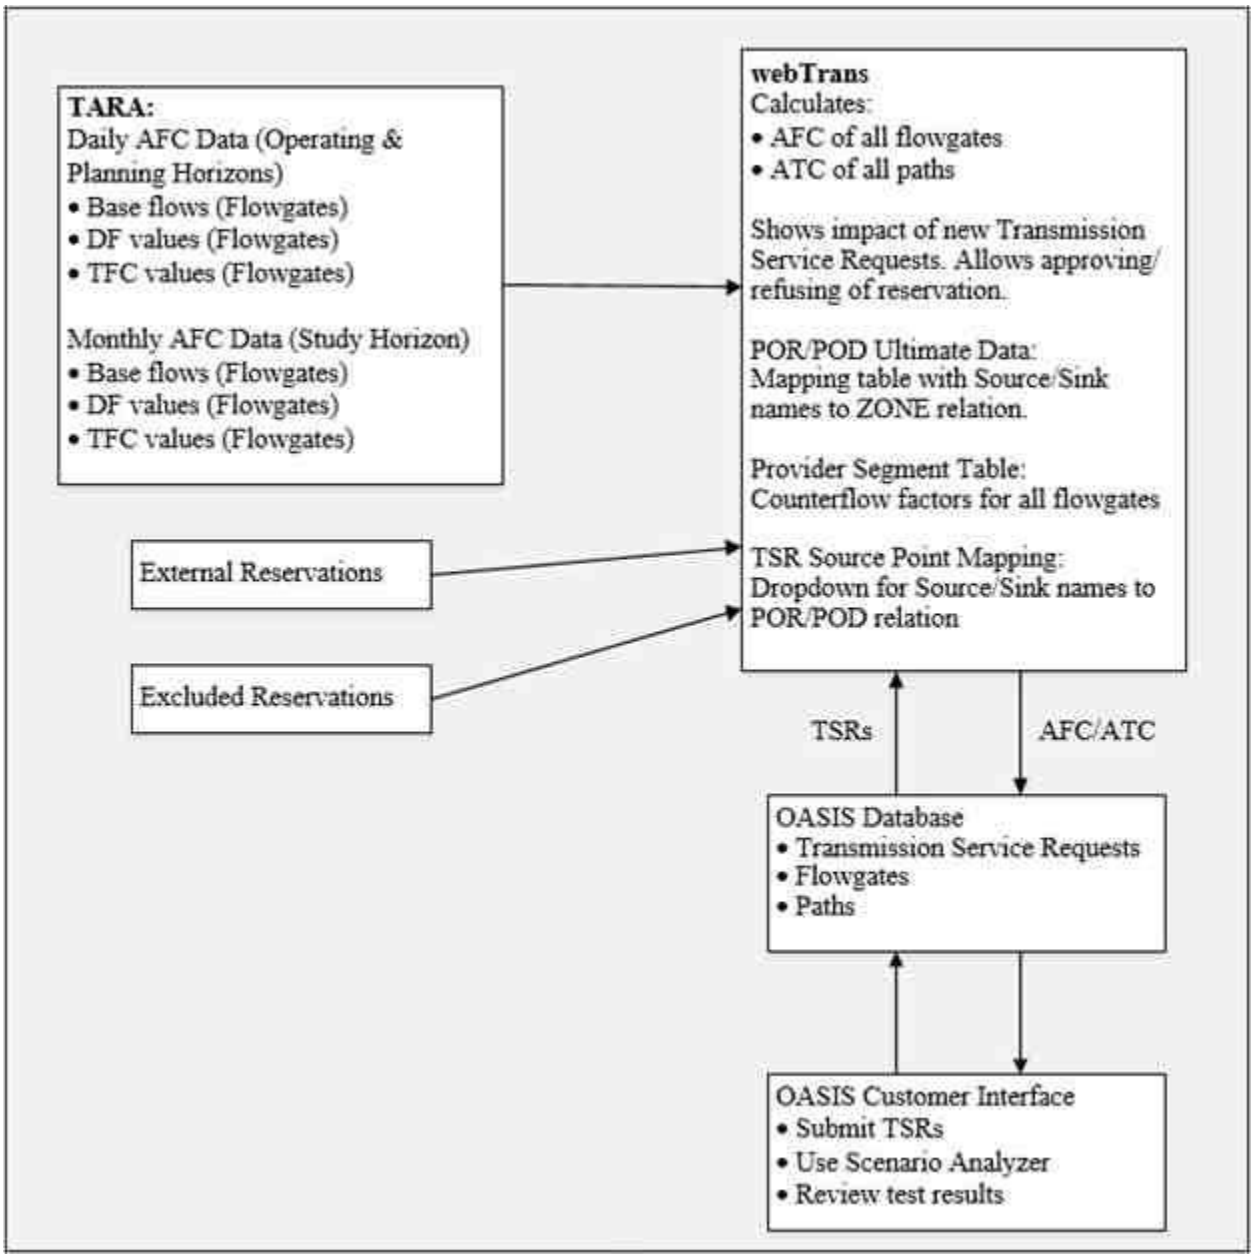
(b) The Transmission Provider shall provide TTC/TFC/ATC/AFC calculation models of its transmission system as soon as mechanisms can be established to facilitate the neighboring transmission provider's request.

## 8. AFC Flowchart

**Process Flow diagram Operating, Planning, and Study Horizons**



## Process Diagram webTrans



# ATTACHMENT D
# METHODOLOGY FOR COMPLETING A SYSTEM IMPACT STUDY

Upon receipt of an Eligible Customer's Completed Application for Short-Term Service, the Transmission Provider will evaluate the request in accordance with the provisions of Attachment C of this Tariff to determine whether sufficient transmission capacity exists to satisfy the request. If sufficient transmission capacity exists to support the transaction described in the Eligible Customer's request, as supplemented with necessary details such as the sources and sinks of the power to be scheduled under the request, the Transmission Provider will accept the reservation. If the Transmission Provider determines that existing transmission capacity is insufficient to provide the requested service, the Transmission Provider will initiate the reservation processing methodology pursuant to Section 3 of Attachment AC of this Tariff, and perform a System Impact Study, if requested by the Eligible Customer in accordance with Sections 19 and 32 of this Tariff.

Upon receipt of a completed System Impact Study Agreement, the Transmission Provider will perform a System Impact Study to determine whether the request for transmission service can be accommodated through redispatch. The System Impact Study will provide (i) information about the system constraints that prohibit Transmission Provider's acceptance of the requested service; and (ii) whether redispatch will permit Transmission Provider to accept the reservation. The Transmission Provider shall post the results of the System Impact Study on the OASIS.

System Impact Studies are not performed for Long-Term Service requests. Long-Term Service requests are evaluated through an Aggregate Facilities Study in accordance with the procedures set forth in Attachment Z1 of this Tariff.

# SERVICE AGREEMENT FOR NETWORK INTEGRATION TRANSMISSION SERVICE

This Network Integration Transmission Service Agreement ("Service Agreement") is entered into this ____ day of _____, ____, by and between _____ ("Network Customer"), and Southwest Power Pool, Inc. ("Transmission Provider"). The Network Customer and Transmission Provider shall be referred to individually as “Party” and collectively as "Parties."

WHEREAS, the Transmission Provider has determined that the Network Customer has made a valid request for Network Integration Transmission Service in accordance with the Transmission Provider’s Open Access Transmission Tariff ("Tariff") filed with the Federal Energy Regulatory Commission ("Commission") as it may from time to time be amended;

WHEREAS, the Transmission Provider administers Network Integration Transmission Service for Transmission Owners within the SPP Region and acts as agent for the Transmission Owners in providing service under the Tariff;

WHEREAS, the Network Customer has represented that it is an Eligible Customer under the Tariff; and

WHEREAS, the Parties intend that capitalized terms used herein shall have the same meaning as in the Tariff.

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein, the Parties agree as follows:

1.0 The Transmission Provider agrees during the term of this Service Agreement, as it may be amended from time to time, to provide Network Integration Transmission Service in accordance with the Tariff to enable delivery of power and energy from the Network Customer's Network Resources that the Network Customer has committed to meet its load.

2.0 The Network Customer agrees to take and pay for Network Integration Transmission Service in accordance with the provisions of Parts I, III and V of the Tariff and this Service Agreement with attached specifications.

3.0 The terms and conditions of such Network Integration Transmission Service shall be governed by the Tariff, as in effect at the time this Service Agreement is executed by the Network Customer, or as the Tariff is thereafter amended or by its successor tariff, if any. The Tariff, as it currently exists, or as it is hereafter amended, is incorporated in this Service Agreement by reference. In the case of any conflict between this Service Agreement and the Tariff, the Tariff shall control. The Network Customer has been determined by the Transmission Provider to have a Completed Application for Network Integration Transmission Service under the Tariff. The completed specifications are based on the information provided in the Completed Application and are incorporated herein and made a part hereof as Attachment 1.

4.0 Service under this Service Agreement shall commence on such date as it is permitted to become effective by the Commission. This Service Agreement shall be effective through _____. Upon termination, the Network Customer remains responsible for any outstanding charges including all costs incurred and apportioned or assigned to the Network Customer under this Service Agreement.

5.0 The Transmission Provider and Network Customer have executed a Network Operating Agreement as required by the Tariff.

6.0 Any notice or request made to or by either Party regarding this Service Agreement shall be made to the representative of the other Party as indicated below. Such representative and address for notices or requests may be changed from time to time by notice by one Party or the other.

7.0 This Service Agreement shall not be assigned by either Party without the prior written consent of the other Party, which consent shall not be unreasonably withheld. However, either Party may, without the need for consent from the other, transfer or assign this Service Agreement to any person succeeding to all or substantially all of the assets of such Party. However, the assignee shall be bound by the terms and conditions of this Service Agreement.

8.0 Nothing contained herein shall be construed as affecting in any way the Transmission Provider's or a Transmission Owner's right to unilaterally make application to the Federal Energy Regulatory Commission, or other regulatory agency having jurisdiction, for any change in the Tariff or this Service Agreement under Section 205 of the Federal Power Act, or other applicable statute, and any rules and regulations promulgated thereunder; or the Network Customer's rights under the Federal Power Act and rules and regulations promulgated thereunder.

9.0 By signing below, the Network Customer verifies that all information submitted to the Transmission Provider to provide service under the Tariff is complete, valid and accurate, and the Transmission Provider may rely upon such information to fulfill its responsibilities under the Tariff.

IN WITNESS WHEREOF, the Parties have caused this Service Agreement to be executed by their respective authorized officials.

# ATTACHMENT 1 TO THE NETWORK INTEGRATION TRANSMISSION SERVICE AGREEMENT

## BETWEEN SOUTHWEST POWER POOL AND _____ SPECIFICATIONS FOR NETWORK INTEGRATION TRANSMISSION SERVICE

**1.0 Network Resources**

The Network Resources are listed in Appendix 1.

**2.0 Network Loads**

The Network Load consists of the bundled native load or its equivalent for Network Customer load in the _____ Zone(s) as listed in Appendix 3.

The Network Customer's Network Load shall be measured on an hourly integrated basis, by suitable metering equipment located at each connection and delivery point, and each generating facility. The meter owner shall cause to be provided to the Transmission Provider, Network Customer and applicable Transmission Owner, on a monthly basis such data as required by Transmission Provider for billing. The Network Customer's load shall be adjusted, for settlement purposes, to include applicable Transmission Owner transmission and distribution losses, as applicable, as specified in Sections 8.5 and 8.6, respectively. For a Network Customer providing retail electric service pursuant to a state retail access program, profiled demand data, based upon revenue quality non-IDR meters may be substituted for hourly integrated demand data. Measurements taken and all metering equipment shall be in accordance with the Transmission Provider's standards and practices for similarly determining the Transmission Provider's load. The actual hourly Network Loads, by delivery point, internal generation site and point where power may flow to and from the Network Customer, with separate readings for each direction of flow, shall be provided.

**3.0 Affected Zone(s) and Intervening Systems Providing Transmission Service**

The affected Zone(s) is/are _____. The intervening systems providing transmission service are _____.

**4.0 Electrical Location of Initial Sources**

See Appendix 1.

**5.0 Electrical Location of the Ultimate Loads**

The loads of _____ identified in Section 2.0 hereof as the Network Load are electrically located within the _____ Zone(s).

**6.0 Delivery Points**

The delivery points are the interconnection points of _____ identified in Section 2.0 as the Network Load.

**7.0 Receipt Points**

The Points of Receipt are listed in Appendix 2.

**8.0 Compensation**

Service under this Service Agreement may be subject to some combination of the charges detailed below. The appropriate charges for individual transactions will be determined in accordance with the terms and conditions of the Tariff.

**8.1 Transmission Charge**

Monthly Demand Charge per Section 34 and Part V of the Tariff.

**8.2 System Impact and/or Facility Study Charge**

Studies may be required in the future to assess the need for system reinforcements in light of the ten-year forecast data provided. Future charges, if required, shall be in accordance with Section 32 of the Tariff.

**8.3 Direct Assignment Facilities Charge**

**8.4 Ancillary Service Charges**

**8.4.1** The following Ancillary Services are required under this Service Agreement.

a) Scheduling, System Control and Dispatch Service per Schedule 1 of the Tariff.

b) Tariff Administration Service per Schedule 1-A1 of the Tariff.

c) Reactive Supply and Voltage Control from Generation Sources Service per Schedule 2 of the Tariff.

d) Regulation and Frequency Response Service per Schedule 3 of the Tariff.

e) Energy Imbalance Service per Schedule 4 of the Tariff.

f) Operating Reserve - Spinning Reserve Service per Schedule 5 of the Tariff.

g) Operating Reserve - Supplemental Reserve Service per Schedule 6 of the Tariff.

The Ancillary Services may be self-supplied by the Network Customer or provided by a third party in accordance with Sections 8.4.2 through 8.4.4, with the exception of the Ancillary Services for Schedules 1, 1-A, and 2, which must be purchased from the Transmission Provider.

**8.4.2** In accordance with the Tariff, when the Network Customer elects to self-supply or have a third party provide Ancillary Services, the Network Customer shall indicate the source for its Ancillary Services to be in effect for the upcoming calendar year in its annual forecasts. If the Network Customer fails to include this information with its annual forecasts, Ancillary Services will be purchased from the Transmission Provider in accordance with the Tariff.

**8.4.3** When the Network Customer elects to self-supply or have third party provide Ancillary Services and is unable to provide its Ancillary Services, the Network Customer will pay the Transmission Provider for such services and associated penalties in accordance with the Tariff as a result of the failure of the Network Customer's alternate sources for required Ancillary Services.

**8.4.4** All costs for the Network Customer to supply its own Ancillary Services shall be the responsibility of the Network Customer.

**8.5 Real Power Losses - Transmission**

The Network Customer shall be responsible for losses in accordance with Attachment M of the Tariff.

**8.6 Real Power Losses - Distribution**

**8.7 Power Factor Correction Charge**

**8.8 Redispatch Charge**

Redispatch charges shall be in accordance with Section 33.3 of the Tariff.

**8.9 Wholesale Distribution Service Charge**

**8.10 Network Upgrade Charges**

**8.11 Meter Data Processing Charge**

**8.12 Other Charges**

**8.13 Candidate Incremental LTCRs**

* Source _____
* Sink _____

* Candidate Incremental LTCR MW _____

* Term (years from in-service date of Network Upgrade) _____

**9.0 Credit for Network Customer-Owned Transmission Facilities**

**10.0 Designation of Parties Subject to Reciprocal Service Obligation**

**11.0 Other Terms and Conditions**

# ATTACHMENT G
# NETWORK OPERATING AGREEMENT

This Network Operating Agreement ("Operating Agreement") is entered into this ____ day of _____, ____, by and between _____ ("Network Customer"), Southwest Power Pool, Inc. ("Transmission Provider") and _____ ("Host Transmission Owner"). The Network Customer, Transmission Provider and Host Transmission Owner shall be referred to individually as a “Party” and collectively as "Parties."

WHEREAS, the Transmission Provider has determined that the Network Customer has made a valid request for Network Integration Transmission Service in accordance with the Transmission Provider’s Open Access Transmission Tariff ("Tariff") filed with the Federal Energy Regulatory Commission ("Commission");

WHEREAS, the Transmission Provider administers Network Integration Transmission Service for Transmission Owners within the SPP Region and acts as an agent for these Transmission Owners in providing service under the Tariff;

WHEREAS, the Host Transmission Owner(s) owns the transmission facilities to which the Network Customer’s Network Load is physically connected;

WHEREAS, the Network Customer has represented that it is an Eligible Customer under the Tariff;

WHEREAS, the Network Customer and Transmission Provider have entered into a Network Integration Transmission Service Agreement (“Service Agreement”) under the Tariff; and

WHEREAS, the Parties intend that capitalized terms used herein shall have the same meaning as in the Tariff, unless otherwise specified herein.

NOW, THEREFORE, in consideration of the mutual covenants and agreements herein, the Parties agree as follows:

## 1.0 Network Service

This Operating Agreement sets out the terms and conditions under which the Transmission Provider, Host Transmission Owner, and Network Customer will cooperate and the Host Transmission Owner and Network Customer will operate their respective systems and specifies the equipment that will be installed and operated. The Parties shall operate and maintain their respective systems in a manner that will allow the Host Transmission Owner and the Network Customer to operate their systems and the Transmission Provider to perform its obligations consistent with Good Utility Practice. The Transmission Provider may, on a non-discriminatory basis, waive the requirements of Section 4.1 and Section 8.3 to the extent that such information is unknown at the time of application or where such requirement is not applicable.

## 2.0 Designated Representatives of the Parties

2.1 Each Party shall designate a representative and alternate ("Designated Representative(s)") from their respective company to coordinate and implement, on an ongoing basis, the terms and conditions of this Operating Agreement, including planning, operating, scheduling, redispatching, curtailments, control requirements, technical and operating provisions, integration of equipment, hardware and software, and other operating considerations.

2.2 The Designated Representatives shall represent the Transmission Provider, Host Transmission Owner, and Network Customer in all matters arising under this Operating Agreement and which may be delegated to them by mutual agreement of the Parties hereto.

2.3 The Designated Representatives shall meet or otherwise confer at the request of any Party upon reasonable notice, and each Party may place items on the meeting agenda. All deliberations of the Designated Representatives shall be conducted by taking into account the exercise of Good Utility Practice. If the Designated Representatives are unable to agree on any matter subject to their deliberation, that matter shall be resolved pursuant to Section 12.0 of the Tariff, or otherwise, as mutually agreed by the Parties.

## 3.0 System Operating Principles

3.1 The Network Customer must design, construct, and operate its facilities safely and efficiently in accordance with Good Utility Practice, NERC, SPP, or any successor requirements, industry standards, criteria, and applicable manufacturer's equipment specifications, and within operating physical parameter ranges (voltage schedule, load power factor, and other parameters) required by the Host Transmission Owner and Transmission Provider.

3.2 The Host Transmission Owner and Transmission Provider reserve the right to inspect the facilities and operating records of the Network Customer upon mutually agreeable terms and conditions.

3.3 Electric service, in the form of three phase, approximately sixty hertz alternating current, shall be delivered at designated delivery points and nominal voltage(s) listed in the Service Agreement. When multiple delivery points are provided to a specific Network Load identified in Appendix 3 of the Service Agreement, they shall not be operated in parallel by the Network Customer without the approval of the Host Transmission Owner and Transmission Provider. The Designated Representatives shall establish the procedure for obtaining such approval. The Designated Representatives shall also establish and monitor standards and operating rules and procedures to assure that transmission system integrity and the safety of customers, the public and employees are maintained or enhanced when such parallel operations is permitted either on a continuing basis or for intermittent switching or other service needs. Each Party shall exercise due diligence and reasonable care in maintaining and operating its facilities so as to maintain continuity of service.

3.4 The Host Transmission Owner and Network Customer shall operate their systems and delivery points in continuous synchronism and in accord with applicable NERC Standards, SPP Criteria, and Good Utility Practice.

3.5 If the function of any Party's facilities is impaired or the capacity of any delivery point is reduced, or synchronous operation at any delivery point(s) becomes interrupted, either manually or automatically, as a result of force majeure or maintenance coordinated by the Parties, the Parties will cooperate to remove the

cause of such impairment, interruption or reduction, so as to restore normal operating conditions expeditiously.

3.6 The Transmission Provider and Host Transmission Owner, if applicable, reserve the sole right to take any action necessary during an actual or imminent emergency to preserve the reliability and integrity of the Transmission System, limit or prevent damage, expedite restoration of service, ensure safe and reliable operation, avoid adverse effects on the quality of service, or preserve public safety.

3.7 In an emergency, the reasonable judgment of the Transmission Provider and Host Transmission Owner, if applicable, in accordance with Good Utility Practice, shall be the sole determinant of whether the operation of the Network Customer loads or equipment adversely affects the quality of service or interferes with the safe and reliable operation of the transmission system. The Transmission Provider or Host Transmission Owner, if applicable, may discontinue transmission service to such Network Customer until the power quality or interfering condition has been corrected. Such curtailment of load, redispatching, or load shedding shall be done on a non-discriminatory basis by Load Ratio Share, to the extent practicable. The Transmission Provider or Host Transmission Owner, if applicable, will provide reasonable notice and an opportunity to alleviate the condition by the Network Customer to the extent practicable.

## 4.0 System Planning & Protection

4.1 No later than October 1 of each year, the Network Customer shall provide the Transmission Provider and Host Transmission Owner the following information:

a) A ten (10) year projection of summer and winter peak demands with the corresponding power factors and annual energy requirements on an aggregate basis for each delivery point. If there is more than one delivery point, the Network Customer shall provide the summer and winter peak demands and energy requirements at each delivery point for the normal operating configuration;

b) A ten (10) year projection by summer and winter peak of planned generating capabilities and committed transactions with third parties which resources are expected to be used by the Network Customer to supply the peak demand and energy requirements provided in (a);

c) A ten (10) year projection by summer and winter peak of the estimated maximum demand in kilowatts that the Network Customer plans to acquire from the generation resources owned by the Network Customer, and generation resources purchased from others; and

d) A projection for each of the next ten (10) years of transmission facility additions to be owned and/or constructed by the Network Customer which facilities are expected to affect the planning and operation of the transmission system within the Host Transmission Owner's Zone.

This information is to be delivered to the Transmission Provider's and Host Transmission Owner's Designated Representatives pursuant to Section 2.0.

4.2 Information exchanged by the Parties under this article will be used for system planning and protection only, and will not be disclosed to third parties absent mutual consent or order of a court or regulatory agency.

4.3 The Host Transmission Owner, and Transmission Provider, if applicable, will incorporate this information in its system load flow analyses performed during the first half of each year. Following completion of these analyses, the Transmission Provider or Host Transmission Owner will provide the following to the Network Customer:

a) A statement regarding the ability of the Host Transmission Owner's transmission system to meet the forecasted deliveries at each of the delivery points;

b) A detailed description of any constraints on the Host Transmission Owner's system within the five (5) year horizon that will restrict forecasted deliveries; and

c) In the event that studies reveal a potential limitation of the Transmission Provider's ability to deliver power and energy to any of the delivery points, a Designated Representative of the Transmission Provider will coordinate with the Designated Representatives of the Host Transmission Owner and the Network Customer to identify appropriate remedies for such constraints including but not limited to: construction of new transmission facilities, upgrade or other improvements to existing transmission facilities or temporary modification to operating procedures designed to relieve identified constraints. Any constraints within the Transmission System will be remedied pursuant to the procedures of Attachment O of the Tariff.

For all other constraints the Host Transmission Owner, upon agreement with the Network Customer and consistent with Good Utility Practice, will endeavor to construct and place into service sufficient capacity to maintain reliable service to the Network Customer.

An appropriate sharing of the costs to relieve such constraints will be determined by the Parties, consistent with the Tariff and with the Commission's rules, regulations, policies, and precedents then in effect. If the Parties are unable to agree upon an appropriate remedy or sharing of the costs, the Transmission Provider shall submit its proposal for the remedy or sharing of such costs to the Commission for approval consistent with the Tariff.

4.4 The Host Transmission Owner and the Network Customer shall coordinate with the Transmission Provider: (1) all scheduled outages of generating resources and transmission facilities consistent with the reliability of service to the customers of

each Party, and (2) additions or changes in facilities which could affect another Party's system. Where coordination cannot be achieved, the Designated Representatives shall intervene for resolution.

4.5 The Network Customer shall coordinate with the Host Transmission Owner regarding the technical and engineering arrangements for the delivery points, including one line diagrams depicting the electrical facilities configuration and parallel generation, and shall design and build the facilities to avoid interruptions on the Host Transmission Owner's transmission system.

4.6 The Network Customer shall provide for automatic and underfrequency load shedding of the Network Customer Network Load in accordance with the SPP Criteria related to emergency operations.

## 5.0 Maintenance of Facilities

5.1 The Network Customer shall maintain its facilities necessary to reliably receive capacity and energy from the Host Transmission Owner's transmission system consistent with Good Utility Practice. The Transmission Provider or Host Transmission Owner, as appropriate, may curtail service under this Operating Agreement to limit or prevent damage to generating or transmission facilities caused by the Network Customer's failure to maintain its facilities in accordance with Good Utility Practice, and the Transmission Provider or Host Transmission Owner may seek as a result any appropriate relief from the Commission.

5.2 The Designated Representatives shall establish procedures to coordinate the maintenance schedules, and return to service, of the generating resources and transmission and substation facilities, to the greatest extent practical, to ensure sufficient transmission resources are available to maintain system reliability and reliability of service.

5.3 The Network Customer shall obtain: (1) concurrence from the Transmission Provider before beginning any scheduled maintenance of facilities which could impact the operation of the Transmission System over which transmission service is administered by Transmission Provider; and (2) clearance from the Transmission Provider when the Network Customer is ready to begin maintenance on a transmission line or substation. The Transmission Provider shall coordinate clearances with the Host Transmission Owner. The Network Customer shall notify the Transmission Provider and the Host Transmission Owner as soon as practical at the time when any unscheduled or forced outages occur and again when such unscheduled or forced outages end.

## 6.0 Scheduling Procedures

6.1 The Network Customer is responsible for providing its Resource and load information to the Transmission Provider in accordance with Attachment AE.

6.2 For Interchange Transactions the Network Customer shall submit, or arrange to have submitted, the schedule of Energy to or from the Transmission Provider and a transaction identification E-Tag for each such schedule where required by NERC Standard INT-001.

## 7.0 Ancillary Services

7.1 The Network Customer must make arrangements in appropriate amounts for all of the required Ancillary Services described in the Tariff. The Network Customer must obtain these services from the Transmission Provider or, where applicable, self-supply or obtain these services from a third party.

7.2 Where the Network Customer elects to self-supply or have a third party provide Ancillary Services, the Network Customer must demonstrate to the Transmission Provider that it has either acquired the Ancillary Services from another source or is capable of self-supplying the services.

7.3 The Network Customer must designate the supplier of Ancillary Services.

## 8.0 Metering

8.1 The Network Customer shall provide for the installation of meters, associated metering equipment and telemetering equipment. The Network Customer shall permit (or provide for, if the Network Customer is not the meter owner) the Transmission Provider's and Host Transmission Owner's representative to have access to the equipment at all reasonable hours and for any reasonable purpose, and shall not permit unauthorized persons to have access to the space housing the equipment. Network Customer shall provide to (or provide for, if the Network Customer is not the meter owner) the Host Transmission Owner access to load data and other data available from any delivery point meter. If the Network Customer does not own the meter, the Host Transmission Owner shall make available, upon request, all load data and other data obtained by the Host Transmission Owner from the relevant delivery point meter, if available utilizing existing equipment. The Network Customer will cooperate on the installation of advanced technology metering in place of the standard metering equipment at a delivery point at the expense of the requestor; provided, however, that meter owner shall not be obligated to install, operate or maintain any meter or related equipment that is not approved for use by the meter owner and/or Host Transmission Owner, and provided that such equipment addition can be accomplished in a manner that does not interfere with the operation of the meter owner's equipment or any Party's fulfillment of any statutory or contractual obligation.

8.2 The Network Customer shall provide for the testing of the metering equipment at suitable intervals and its accuracy of registration shall be maintained in accordance with standards acceptable to the Transmission Provider and consistent with Good Utility Practice. At the request of the Transmission Provider or Host Transmission Owner, a special test shall be made, but if less than two percent inaccuracy is found, the requesting Party shall pay for the test. Representatives of the Parties may be present at all routine or special tests and whenever any readings for purposes of settlement are taken from meters not having an automated record. If any test of metering equipment discloses an inaccuracy

exceeding two percent, the accounts of the Parties shall be adjusted. Such adjustment shall apply to the period over which the meter error is shown to have been in effect or, where such period is indeterminable, for one-half the period since the prior meter test. Should any metering equipment fail to register, the amounts of energy delivered shall be estimated from the best available data.

8.3 If the Network Customer is supplying energy to retail load that has a choice in its supplier, the Network Customer shall be responsible for providing all information required by the Transmission Provider for billing purposes. Metering information shall be available to the Transmission Provider either by individual retail customer or aggregated retail energy information for that load the Network Customer has under contract during the billing month. For the retail load that has interval demand metering, the actual energy used by interval must be supplied. For the retail load using standard kWh metering, the total energy consumed by meter cycle, along with the estimated demand profile must be supplied. All rights and limitations between Parties granted in Sections 8.1, and 8.2 are applicable in regards to retail metering used as the basis for billing the Network Customer.

## 9.0 Connected Generation Resources

9.1 The Network Customer's connected generation resources that have automatic generation control and automatic voltage regulation shall be operated and maintained consistent with regional operating standards, and the Network Customer or the operator shall operate, or cause to be operated, such resources to avoid adverse disturbances or interference with the safe and reliable operation of the transmission system as instructed by the Transmission Provider.

9.2 For all Network Resources of the Network Customer, the following generation telemetry readings shall be submitted to the Transmission Provider and Host Transmission Owner:

1) Analog MW;
2) Integrated MWHRS/HR;
3) Analog MVARS; and
4) Integrated MVARHRS/HR.

## 10.0 Redispatching, Curtailment and Load Shedding

10.1 In accordance with Section 33 of the Tariff, the Transmission Provider may require redispatching of Resources to relieve existing or potential transmission system constraints. The Transmission Provider shall redispatch Resources in accordance with the Energy and Operating Reserve Markets operations specified in Attachment AE. The Network Customer shall respond immediately to requests for redispatch from the Transmission Provider. The Transmission Provider will bill or credit the Network Customer as appropriate using the settlement procedures specified in Attachment AE.

10.2 The Parties shall implement load-shedding procedures to maintain the reliability and integrity for the Transmission System as provided in Section 33.1 of the Tariff and in accordance with applicable NERC and SPP requirements and Good Utility Practice. Load shedding may include (1) automatic load shedding, (2) manual load shedding, and (3) rotating interruption of customer load. When manual load shedding or rotating interruptions are necessary, the Host Transmission Owner shall notify the Network Customer's dispatcher or schedulers of the required action and the Network Customer shall comply immediately.

10.3 The Network Customer will coordinate with the Host Transmission Owner to ensure sufficient load shedding equipment is in place on their respective systems to meet SPP requirements. The Network Customer and the Host Transmission Owner shall develop a plan for load shedding which may include manual load shedding by the Network Customer.

## 11.0 Communications

11.1 The Network Customer shall, at its own expense, install and maintain communication link(s) for scheduling. The communication link(s) shall be used for data transfer and for voice communication.

11.2 A Network Customer self-supplying Ancillary Services or securing Ancillary Services from a third-party shall, at its own expense, install and maintain telemetry equipment communicating between the generating resource(s) providing such Ancillary Services and the Host Transmission Owner's Zone.

## 12.0 Cost Responsibility

12.1 The Network Customer shall be responsible for all costs incurred by the Network Customer, Host Transmission Owner, and Transmission Provider to implement the provisions of this Operating Agreement including, but not limited to, engineering, administrative and general expenses, material and labor expenses associated with the specification, design, review, approval, purchase, installation, maintenance, modification, repair, operation, replacement, checkouts, testing, upgrading, calibration, removal, and relocation of equipment or software, so long as the direct assignment of such costs is consistent with Commission policy.

12.2 The Network Customer shall be responsible for all costs incurred by Network Customer, Host Transmission Owner, and Transmission Provider for on-going operation and maintenance of the facilities required to implement the provisions of this Operating Agreement so long as the direct assignment of such costs is consistent with Commission policy. Such work shall include, but is not limited to, normal and extraordinary engineering, administrative and general expenses, material and labor expenses associated with the specifications, design, review, approval, purchase, installation, maintenance, modification, repair, operation, replacement, checkouts, testing, calibration, removal, or relocation of equipment required to accommodate service provided under this Operating Agreement.

## 13.0 Billing and Payments

Billing and Payments shall be in accordance with Attachment AE and Section 7 of the Tariff.

## 14.0 Dispute Resolution

Any dispute among the Parties regarding this Operating Agreement shall be resolved pursuant to Section 12 of the Tariff, or otherwise, as mutually agreed by the Parties.

## 15.0 Assignment

This Operating Agreement shall inure to the benefit of and be binding upon the Parties and their respective successors and assigns, but shall not be assigned by any Party, except to successors to all or substantially all of the electric properties and assets of such Party, without the written consent of the other Parties. Such written consent shall not be unreasonably withheld.

## 16.0 Choice of Law

The interpretation, enforcement, and performance of this Operating Agreement shall be governed by the laws of the State of Arkansas, except laws and precedent of such jurisdiction concerning choice of law shall not be applied, except to the extent governed by the laws of the United States of America.

## 17.0 Entire Agreement

The Tariff and Service Agreement, as they are amended from time to time, are incorporated herein and made a part hereof. To the extent that a conflict exists between the terms of this Operating Agreement and the terms of the Tariff, the Tariff shall control.

## 18.0 Unilateral Changes and Modifications

Nothing contained in this Operating Agreement or any associated Service Agreement shall be construed as affecting in any way the right of the Transmission Provider or a Transmission Owner unilaterally to file with the Commission, or make application to the Commission for, changes in rates, charges, classification of service, or any rule, regulation, or agreement related thereto, under section 205 of the Federal Power Act and pursuant to the Commission's rules and regulations promulgated thereunder, or under other applicable statutes or regulations.

Nothing contained in this Operating Agreement or any associated Service Agreement shall be construed as affecting in any way the ability of any Network Customer receiving Network Integration Transmission Service under the Tariff to exercise any right under the Federal Power Act and pursuant to the Commission's rules and regulations promulgated thereunder; provided, however, that it is expressly recognized that this Operating Agreement is necessary for the implementation of the Tariff and Service Agreement. Therefore, no Party shall propose a change to this Operating Agreement that is inconsistent with the rates, terms and conditions of the Tariff and/or Service Agreement.

## 19.0 Term

This Operating Agreement shall become effective on the date assigned by the Commission ("Effective Date"), and shall continue in effect until the Tariff or the Network Customer's Service Agreement is terminated, whichever shall occur first.

## 20.0 Notice

20.1 Any notice that may be given to or made upon any Party by any other Party under any of the provisions of this Operating Agreement shall be in writing, unless otherwise specifically provided herein, and shall be considered delivered when the notice is personally delivered or deposited in the United States mail, certified or registered postage prepaid, to the following:

[Transmission Provider]
[name]
[title]
[address]
[phone]
[fax]
[email address]

[Host Transmission Owner]
[name]
[title]
[address]
[phone]
[fax]
[email address]

[Network Customer]
[name]
[title]
[address]
[phone]
[fax]
[email address]

Any Party may change its notice address by written notice to the other Parties in accordance with this Article 20.

20.2 Any notice, request, or demand pertaining to operating matters may be delivered in writing, in person or by first class mail, e-mail, messenger, or facsimile transmission as may be appropriate and shall be confirmed in writing as soon as reasonably practical thereafter, if any Party so requests in any particular instance.

## 21.0 Execution in Counterparts

This Operating Agreement may be executed in any number of counterparts with the same effect as if all Parties executed the same document. All such counterparts shall be construed together and shall constitute one instrument.

IN WITNESS WHEREOF, the Parties have caused this Operating Agreement to be executed by their respective authorized officials, and copies delivered to each Party, to become effective as of the Effective Date.

# ATTACHMENT H
# ANNUAL TRANSMISSION REVENUE REQUIREMENT FOR NETWORK INTEGRATION TRANSMISSION SERVICE

## SECTION I: General Requirements

1. The Zonal Annual Transmission Revenue Requirement ("Zonal ATRR") for each Transmission Owner for purposes of determining the charges under Schedule 9, Network Integration Transmission Service, is specified in Column (3) Section I, of Table 1. The Base Plan Zonal Annual Transmission Revenue Requirement ("Base Plan Zonal ATRR") used to determine the zonal charges under Schedule 11 for Base Plan Upgrades issued a Notification to Construct ("NTC") prior to June 19, 2010 is specified in Column (4) Section I, of Table 1. The Base Plan Zonal ATRR used to determine the zonal charges under Schedule 11 for Base Plan Upgrades issued an NTC on or after June 19, 2010 is specified in Column (5) of Section I, Table 1. The amount of Zonal ATRR and Base Plan Zonal ATRR that is included in Columns (3), (4), (5), and (7) and reallocated to the Region-wide Annual Transmission Revenue Requirement ("Region-wide ATRR"), in accordance with Attachment J, is specified in Column (6) of Section I, Table 1. The Base Plan Zonal ATRR to pay Upgrade Sponsors in accordance with Attachment Z2 is specified in Column (7) of Section I, Table 1.

Note A: The Annual Transmission Revenue Requirements ("ATRR") for each Zone are set forth in the Revenue Requirements and Rates File ("RRR File") posted on the SPP website.

2. Table 2-A specifies the Region-wide ATRR for Network Upgrades needed prior to October 1, 2015 and Table 2-B specifies the Region-wide ATRR for Network Upgrades needed on or after October 1, 2015. The Region-wide ATRR, shown in Line 8 of Section I, Table 2-A, shall be the sum of (i) the Base Plan Region-wide Annual Transmission Revenue Requirements ("Base Plan Region-wide ATRR") (reflected in Line 1 and Line 2), (ii) the total Balanced Portfolio Region-wide Annual Transmission Revenue Requirements ("Balanced Portfolio Region-wide ATRR") (reflected in Line 3 and Line 4), (iii) for transmission service beginning prior to October 1, 2015, the Base Plan Region-wide ATRR to pay Upgrade Sponsors as determined in accordance with Attachment Z2 of this Tariff (reflected in Line 5), and (iv) the Interregional Planning Region Annual Transmission Revenue Requirements ("Interregional Planning Region ATRR") allocable to customers receiving transmission service under this Tariff for any Interregional Project(s) constructed within the SPP Region (Line 6) and/or within other Interregional Planning Regions (Line 7).

The Region-wide ATRR shown in Line 8 of Section I, Table 2-B, shall be the sum of (i) the Base Plan Region-wide ATRR (reflected in Line 1 and Line 2), (ii) the total Balanced Portfolio Region-wide ATRR (reflected in Line 3 and Line 4) and (iii) for transmission service beginning on or after October 1, 2015, the Base Plan Region-wide ATRR to pay Upgrade Sponsors as determined in accordance with Attachment Z2 of this Tariff (reflected in Line 5), (iv) the Interregional Planning Region Annual Transmission Revenue Requirements ("Interregional Planning Region ATRR") allocable to customers receiving transmission service under this Tariff for any Interregional Project(s) constructed within the SPP Region (Line 6) and/or within other Interregional Planning Regions (Line 7a), and (v) the Annual Transmission Revenue Requirements approved for

inclusion in the Region-wide ATRR (Line 7b) and associated with any transmission upgrade approved pursuant to the coordination agreements listed in Addendum 1 to Attachment O.

As described in Schedule 11, the Region-wide Charges for Zones 1 through 18 shall be based upon Line 8 of Table 2-A and Line 8 of Table 2-B. The Region-wide Charges for Zone 19 shall be based upon Line 8 of Table 2-B.

Table 2-A

| 8 | Region-wide ATRR (Sum of Lines 1 through 7) | See Att. H tab, posted RRR File |

Table 2-B

(See Notes B and C below)

| | | |
|---|---|---|
| 1 | Base Plan Region-wide ATRR (NTC prior to June 19, 2010) | See Att. H tab, posted RRR File |
| 2 | Base Plan Region-wide ATRR (NTC on or after June 19, 2010) | See Att. H tab, posted RRR File |
| 3 | Total ATRR reallocated to Balanced Portfolio Region-wide ATRR from Column (6), Section I, Table 1 | See Att. H tab, posted RRR File |
| 4 | Balanced Portfolio Region-wide ATRR | See Att. H tab, posted RRR File |
| 5 | Base Plan Region-wide ATRR to pay Upgrade Sponsors | See Att. H tab, posted RRR File |

| | | |
|---|---|---|
| 6 | SPP Interregional Planning Region ATRR | See Att. H tab, posted RRR File |
| 7a | Other Interregional Planning Region ATRR | See Att. H tab, posted RRR File |
| 7b | Other transmission provider ATRR | See Att. H tab, posted RRR File |
| 8 | Region-wide ATRR (Sum of Lines 1 through 7) | See Att. H tab, posted RRR File |

Note B: The Region-wide ATRRs are set forth in the RRR File posted on the SPP website.

Note C: The Region-wide ATRR provided in Line 7b of Table 2-B includes the revenue requirements for the Morgan Transformer Project, as set forth in the Cost Sharing and Usage Agreement Between Southwest Power Pool, Inc. and Associated Electric Cooperative, Inc.; and for the Blackberry Substation Upgrade, as set forth in the Cost and Usage Agreement Between Southwest Power Pool, Inc. and Associated Electric Cooperative, Inc. Such revenue requirements are posted in the RRR File on the SPP website.

3. A Transmission Owner's revenue requirement referenced or stated in this Attachment H shall not be changed absent a filing with the Commission, accompanied by all necessary cost support, unless such Transmission Owner utilizes Commission-approved formula rate processes contained in this Tariff to determine its revenue requirements.
4. A new or amended revenue requirement referenced or stated in this Attachment H shall not be filed with the Commission by the Transmission Provider unless such revenue requirements have been provided by or for a Transmission Owner. Such revenue requirements shall have been accepted or approved by the applicable regulatory or governing authority except in the event of a simultaneous filing with the Commission by the Transmission Owner and Transmission Provider.
5. If a Transmission Owner has a Commission-approved formula rate, the successful completion of its approved annual formula rate update procedures shall constitute regulatory acceptance sufficient to authorize the Transmission Provider to update that Transmission Owner's revenue requirements posted on the SPP website. Such update by the Transmission Provider shall not require a filing with the Commission, provided that the Transmission Owner posts the populated formula rate for public review and comment

as required under the applicable protocols and/or procedures contained in this Attachment H. The Transmission Provider shall follow any special procedures related to updating a Transmission Owner's revenue requirements as outlined in Section II of this Attachment.

6. The Transmission Provider shall allocate the accepted or approved revenue requirement associated with a Base Plan Upgrade, in accordance with Attachment J to this Tariff, to the Base Plan Region-wide ATRRs in Section I, Table 2-A and Table 2-B above and to the appropriate Base Plan Zonal ATRR in Column (4) or (5) in Section I, Table 1.

7. For each Transmission Owner not using a formula rate, the amount of (i) Schedule 7 and 8 revenue received under this Tariff and (ii) revenue distributed to the Transmission Owner under Section IV of Attachment AU and allocated in proportion to Schedule 7 and 8 revenues under Section V of Attachment AU, that is credited in the determination of the Transmission Owner's Commission approved Zonal Annual Transmission Revenue Requirement is specified in Column (3) of Table 3. For each Transmission Owner not using a formula rate, the amount of (i) Point-To-Point Transmission Service Schedule 11 revenue received under this Tariff and (ii) revenue distributed to the Transmission Owner under Section IV of Attachment AU and allocated in proportion to Point-To-Point Transmission Service Schedule 11 revenue under Section V of Attachment AU, that is credited in the determination of the Transmission Owner's Commission approved annual transmission revenue requirement for upgrades eligible for cost recovery under Schedule 11 is specified in Column (4) of Table 3. For a Transmission Owner using a formula rate that does not annually update the amount of point-to-point revenues received under this Tariff and revenues distributed and allocated under Attachment AU, Column (3) and Column (4) of Table 3 shall reflect any amount of such revenue embedded in its formula rate. For a Transmission Owner using a formula rate and where Schedule 7 and 8 revenues and revenues distributed and allocated under Attachment AU are credited and annually updated to adjust the Transmission Owner's Commission approved Zonal Annual Transmission Revenue Requirement, the entry in Column (3) of Table 3 shall be Not Applicable (N/A). For a Transmission Owner using a formula rate and where Point-To-Point Transmission Service Schedule 11 revenue received under this Tariff and revenue distributed and allocated under Attachment AU are credited and annually updated to adjust the Transmission Owner's Commission approved annual revenue

requirement for upgrades eligible for cost recovery under Schedule 11, the entry in Column (4) of Table 3 shall be Not Applicable (N/A).

**SECTION II: Transmission Owner-Specific Requirements**

**1. Southwestern Public Service Company**

For Southwestern Public Service Company ("SPS"), the Existing Zonal ATRR for Zone 11 in Column (3), of Section I, Table 1 of this Attachment H shall be calculated using: (1) the formula rate as specified in Attachment O – SPS of the Xcel Energy Operating Companies Joint Open Access Transmission Tariff ("Xcel Energy OATT"), (2) will be equal to the Current Year Revenue Requirement with True Up as specified on line 6, page 1 of Attachment O – SPS of the Xcel Energy OATT, (3) and subject to the Implementation Procedures in Appendix 1 of Attachment O – SPS of the Xcel Energy OATT. The results of the formula calculation shall be posted on the SPP website and in

an accessible location on SPS's OASIS website by October 1 of each calendar year and shall be effective on January 1 of the following year. The Existing Zonal ATRR for Zone 11, in Column (3), Section I, Table 1 of this Attachment H shall not be subject to adjustment pursuant to section 34.1 for the previous calendar year's total firm Point-to-Point transmission revenue allocated to SPS under Attachment L when determining the monthly zonal Demand Charge for Zone 11.

**2. American Electric Power**

The American Electric Power ATRR for purposes of the Network Integrated Transmission Service shall be (i) calculated using the formula rate set forth in Addendum 1 to this Attachment H, (ii) posted on the SPP website by October 31 of each calendar year, and (iii) effective on January 1 of the following calendar year.

In accordance with Section VIII of Attachment J, commencing April 1, 2018, the American Electric Power ATRR shall include $3,264,402.55, which consists of $3,068,489.38 associated with the canceled Multi - Shipe Road - East Rogers - Kings River 345 kV project (Network Upgrades 10656, 10659, and 10660) and $195,913.17 associated with the canceled Line - Georgia Pacific - Keatchie 138 kV Ckt 1 project (Network Upgrade 10616). This amount, which shall be recovered over the following twelve-month period in equal monthly installments with interest for the twelve-month recovery period calculated at the interest rate set forth in the Commission's regulations (18 C.F.R. § 35.19a(a)(2)(iii)), shall be allocated pursuant to Attachment J and recovered pursuant to Schedule 11. Upon full recovery following the end of the twelve-month period, the American Electric Power ATRR shall no longer include the $3,264,402.55 associated with these canceled projects. The $3,264,402.55 shall be reflected in the RRR File until it is fully recovered, at which time it will be replaced with $0 in the RRR File and SPP and AEP shall make a joint informational filing notifying the Commission of the final total amount that AEP has recovered, including the costs incurred associated with the canceled Multi - Shipe Road - East Rogers - Kings River 345 kV project (Network Upgrades 10656, 10659, and 10660) and the canceled Line - Georgia Pacific - Keatchie 138 kV Ckt 1 project (Network Upgrade 10616), plus all interest recovered. In the event

that property, the costs of which are included in the American Electric Power ATRR pursuant to this paragraph, is sold or otherwise disposed of during the twelve-month recovery period or thereafter, the revenues associated with such sale or disposition shall be credited against the American Electric Power ATRR. Such a credit shall be reflected in the RRR File and SPP and AEP shall make a joint informational filing notifying the Commission of the sale or distribution of the property and the amount that the American Electric Power ATRR will be credited due to such sale or disposition.

In accordance with Section VIII of Attachment J, commencing March 1, 2019, the American Electric Power ATRR shall include $414,465, which consists of the costs associated with the canceled Line – Chapel Hill REC – Welsh Reserve 138 kV Ckt 1 (Network Upgrade 50697) project and Line – Welsh Reserve - Wilkes 138 kV Ckt 1 (Network Upgrade 11423) project. This amount, which shall be recovered over the following twelve-month period in equal monthly installments, shall be allocated pursuant to Attachment J and recovered pursuant to Schedule 11. Upon full recovery following the end of the twelve-month period, the American Electric Power ATRR shall no longer include the $414,465 associated with these canceled projects. The $414,465 shall be reflected in the RRR File until it is fully recovered, at which time it will be replaced with $0 in the RRR File and SPP and AEP shall make a joint informational filing notifying the Commission of the final total amount that AEP has recovered, including the costs incurred associated with the canceled Line – Chapel Hill REC – Welsh Reserve 138 kV Ckt 1 (Network Upgrade 50697) project and Line – Welsh Reserve - Wilkes 138 kV Ckt 1 (Network Upgrade 11423) project, plus all interest recovered. In the event that property, the costs of which are included in the American Electric Power ATRR pursuant to this paragraph, is sold or otherwise disposed of during the twelve-month recovery period or thereafter, the revenues associated with such sale or disposition shall be credited against the American Electric Power ATRR. Such a credit shall be reflected in the RRR File and SPP and AEP shall make a joint informational filing notifying the Commission of the sale or distribution of the property and the amount that the American Electric Power ATRR will be credited due to such sale or disposition.

### *3.* Sunflower Electric Power Corporation

No changes to the ratios used to establish rates pursuant to Addendum 20 of this Attachment H will take effect unless accepted for approval by the FERC pursuant to the Federal Power Act.

### *4.* Southwestern Power Administration

The NITS ATRR component shown in 10a(i) of Column (3) in Table 1 of Attachment H associated with the Southwestern Power Administration Zonal ATRR stated in 10a of Column (3) of Table 1 of Attachment H shall be calculated as follows:

A. Southwestern Power Administration shall determine the ratio of: (i) the capacity on Southwestern Power Administration's transmission system utilized for Network Integration Transmission Service which shall be based on Southwestern Power Administration's Power Repayment Study filed before the Commission and employed in the Commission's final confirmation of Southwestern Power Administration's Zonal ATRR to (ii) the total capacity on the transmission system of Southwestern Power Administration available for Network Integration Transmission Service which is as stated in Section 2.3.3 of Southwestern Power Administration's Rate Schedule NFTS-13A and is 872,000 kilowatts.

B. Southwestern Power Administration shall apply this ratio to Southwestern Power Administration's Zonal ATRR stated in 10a of Column (3) of Table 1 of this Attachment H.

Southwestern Power Administration shall provide the Transmission Provider with supporting documentation when the calculation of the NITS ATRR is revised pursuant to this section, which shall be posted on the SPP website. Southwestern Power Administration will provide electronic notice of the revised NITS ATRR to all interested parties through the Formula Rate Posting Information Notification List. As used in this section "Formula Rate Posting Information Notification List" means the email exploder maintained by the Transmission Provider of interested parties, provided that such interested parties request to be added to the Formula Rate Posting Information

Notification List through the "Exploder List" link on the SPP website. As of April 2017, the Exploder List was titled "Formula Rate Posting Information Notification" and could be accessed at http://www.spp.org/stakeholder-center/exploder-lists/.

## SECTION III: Network Customer Transmission Credits for Transmission Facilities under Section 30.9

### A. General Terms of Applicability

In accordance with Section 30.9 of this Tariff, Network Customers are eligible to receive Network Customer Transmission Credits for Network Customer's transmission facilities if such transmission facilities are integrated into the operations of the Transmission System in such a manner that the transmission facilities, if owned by a Transmission Owner, would be included in Transmission Owner's Annual Transmission Revenue Requirement under Section I. of this Attachment H. This provision does not apply to Network Customer transmission facilities that are otherwise reflected in the rates for service under this Tariff. The revenue requirements associated with such Network Customer Transmission Credits, methods of calculation, and application of Network Customer Transmission Credits to Network Customer's transmission service charges are specified in Table 4 below.

### B. Revenue Requirements for Network Customer Transmission Credits

The following Network Customers have been determined to be eligible to receive Network Customer Transmission Credits pursuant to Section 30.9 of this Tariff for SPP's use of certain Network Customer-owned transmission facilities.

Table 4

| Network Customer | Revenue requirements for Network Customers eligible for Network Customer Transmission Credits | Application of Network Customer Transmission Credits |
|---|---|---|
| Montana-Dakota Utilities ("MDU") | See *Joint Offer of Partial Settlement* in Docket Nos. ER14-2850-006 and ER14-2851-006 (consolidated) accepted by the Commission | (a) MDU shall receive Network Customer Transmission Credits applied against MDU's transmission charges for transmission service taken in pricing Zone 19 under |

| | | |
|---|---|---|
| | on May 19, 2016, as amended in Docket No. ER21-169-000.<br><br>Revenue requirements for Network Customer Transmission Credits for MDU shall be recovered from Transmission Customers in the pricing Zone 19. | Schedule 9 and, if any Network Customer Transmission Credits remain thereafter, to its Schedule 11 monthly Base Plan Zonal Charge.<br><br>(b) The Transmission Provider shall apply MDU Network Customer Transmission Credits in the following manner:<br><br>Schedule 9 - MDU shall be responsible for its monthly demand charge less any Network Customer Transmission Credits, and for all other applicable charges under this Tariff.<br><br>Schedule 11 - MDU shall be responsible for all its Schedule 11 Base Plan Zonal Charges less any remaining Network Customer Transmission Credits, if any. |
| Otter Tail Power Company ("OTP") | See Tariff revision filed in Docket No. ER19-457-000 and Network Integration Transmission Service Agreement filed in Docket No. ER19-450-000.<br><br>Revenue requirements for Network Customer Transmission Credits for OTP shall be recovered from Transmission Customers in pricing Zone 19. | (a) OTP shall receive Network Customer Transmission Credits applied against OTP's transmission charges for transmission service taken in pricing Zone 19 under Schedule 9.<br><br>(b) The Transmission Provider shall apply OTP Network Customer Transmission Credits in the following manner:<br><br>Schedule 9 - OTP shall be responsible for its monthly demand charge under this schedule less one-twelfth of the annual amount of any Network Customer Transmission Credits. The amount of credit applied in each month shall not exceed the Schedule 9 demand charge applicable to that operating month ("Demand Charge Credit Limit"). The Demand Charge Credit Limit shall not include any billing correction of demand |

| | | |
|---|---|---|
| | | charges for other operating months.<br><br>OTP shall be responsible for all other applicable charges under this Tariff. |

## Addendum 1 To Attachment H

### Monthly Demand Charge Calculation For Zone 1
### Network Integration Transmission Service

This Addendum to Attachment H sets forth the component of the monthly Demand Charge for AEP's revenue requirement, which is applicable in Zone 1 for Network Customers taking Network Integration Transmission Service ("NITS") under Schedule 9 to this Tariff.

### Charges for Compensation to AEP

The monthly NITS charge to Network Customers for compensation to AEP shall be determined by multiplying the Network Customer's monthly Network Load, determined in accordance with the provisions of Section 34.4, expressed in MW, by the rate for NITS then in effect pursuant to the Formula Rate as set out in this Addendum 1 to Attachment H. The Network Load used in the divisor of the calculation of the rate for NITS shall be the sum of the twelve highest monthly AEP Zone Network Loads, and shall include all the load connected to the AEP transmission system within the AEP zonal boundary, e.g., load taking Network Service and any other zonal load served under concurrent exchange grandfathered agreements or network and long term firm point-to-point service grandfathered agreements. The cost-of-service included in the numerator of the NITS Rate (as that term is defined in Section I.1 below) calculation will include credits for revenues received from other transmission customers, and any direct assignment charges paid by customers for transmission facilities associated with service to load that is included in the divisor, unless the cost of the direct assignment facilities is excluded from the cost of service.

**OKLAHOMA GAS AND ELECTRIC COMPANY**

**Notes**

General Notes: a) References to data from Form 1 are indicated as: page#.line#.col.#
b) If transmission owner ("TO") functionalizes its costs to transmission on its books, those costs are shown above and on any supporting workpapers rather than using the allocations above.

| Note Letter | |
|---|---|
| A | The revenues credited shall include a) amounts received directly from the SPP for service under this tariff reflecting the TO's integrated transmission facilities and b) amounts from customers taking service under grandfathered agreements. Revenues associated with FERC annual charges, gross receipts taxes, ancillary services or facilities excluded from the definition of transmission facilities under this tariff shall not be included as revenue credits. Revenues from coincident peak loads included in the DIVISOR are also not included as revenue credits unless this revenue is offset by a corresponding expense. See Worksheet A for details. |
| B | The annual and monthly net plant carrying charges on page 2 are to be used to compute the revenue requirement for directly assigned transmission facilities, Base Plan Upgrades, Transmission Service Upgrades, Sponsored, Economic Portfolio Upgrades and Generator Interconnection Facilities, etc. whose revenue requirement is calculated in Worksheet G and recovered pursuant to Attachments J and Z, or successor attachments, of the SPP OATT. |
| C | This additional revenue requirement is determined using a net plant carrying charge (fixed carrying charge or FCR) approach. Worksheet F shows the calculation of the additional revenue requirements for each project receiving incentive rate treatment, as accepted by FERC. These individual additional revenue requirements shall be summed, for the relevant year, and included here. When calculating the Baseline ATRR, the "Relevant Year" is the year being trued-up. When calculating the Projected ATRR, the "Relevant Year" is the year being projected. |
| D | Reflects the transmission related portion of balances in Accounts 281, 282, 283, 190 and 255 as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and completely excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note M. Transmission allocations shall be shown on Worksheet C, including amounts excluded through direct assignment to incentive plant, as shown on separate workpapers. |
| E | Reserved for future use. |
| F | Identified as being only transmission related or functionally booked to transmission. |
| G | Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission on line 90. Prepayments are limited to electric related items. |
| H | Reserved for future use |
| I | Only include transmission costs paid to others by the TO for which the transmission customer under the tariff receives a benefit (such as the payment of Base Plan Charges allocated to the TO's zone and not otherwise recovered by SPP from customers). Charges related to Base Plan Upgrades under Attachment J, Future Roll-Ins under Attachment Z and replacement of Existing Facilities are to be included. Direct Assignment Facilities, Economic Upgrades, Requested Upgrades and generator related to Network Upgrades (as defined in Attachment J) are to be excluded. |

J General Plant and Administrative and General expenses will be functionalized based on the indicated allocator on each line.

K Includes all Regulatory Commission expense itemized in FERC Form 1 at 351.h. Show in Worksheet D how these expense items are allocated to transmission. FERC Assessment Fees and Annual Charges shall not be allocated to transmission. Account 930.1 shall Include only safety-related advertising cost booked to the account.

L Includes only FICA, unemployment, highway, property and other assessments charged in the relevant year. When calculating the Baseline ATRR, the "Relevant Year" is the year being trued-up. When calculating the Projected ATRR, the "Relevant Year" is the year being projected. Gross receipts tax and taxes related to income are excluded.

M The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) (ln 112) multiplied by (1/1-T) . If the applicable tax rates are zero enter 0.

FIT = 0.00%

Inputs Required:

SIT= 0.00% (State Income Tax Rate or Composite SIT - Worksheet J)

p = 0.00% (percent of federal income tax deductible for state purposes)

N Removes the dollars of plant booked to transmission plant that is excluded from the Tariff because it does not meet the Tariff's definition of Transmission Facilities or is otherwise not eligible to be recovered under this Tariff.

O Removes the dollars of plant booked to transmission (e.g. step-up transformers) that are included in the development of OATT ancillary services rates and not already removed in Note N above.

P Removes the dollars of expense booked to transmission accounts included in the development of OATT ancillary services rates, including all of Account No. 561.

Q Long Term Debt cost rate calculated in Section V of Worksheet K. Preferred Stock cost rate = preferred dividends (ln 131) / preferred outstanding (ln 138). Common Stock cost rate (ROE) = 10.50%. It includes an additional 50 basis points for the TO remaining a member of the SPP RTO. This rate shall not change until a new rate is accepted by FERC in a subsequent filing under the FPA, including Sections 205 and 206. The percentage of equity used in determining the weighted cost of equity for OG&E for purposes of the Formula Rate shall not exceed 56% ("Equity Cap") as accepted by FERC in Docket No. ER08-281 regardless of OG&E's actual percentage of equity. To the extent OG&E's actual percentage of equity exceeds the Equity Cap, such amount in excess of the Equity Cap shall be treated as Long-Term Debt for purposes of the Formula Rate. The Equity Cap shall not change until a new Equity Cap is accepted by FERC in a subsequent filing under the FPA, including Sections 205 and 206. Include in the interest on Debt from Associated Companies only the interest on Long-Term Debt.

R OG&E must make the appropriate filing at FERC before inputting or changing amounts on lines 60 & 94 (abandoned plant).

S The Formula Rate will functionalize Material and Supplies for Construction on the basis of a single-year usage ratio in accordance with the most recent FERC Form 1, and will true-up these costs based on the trued-up year's Form 1. M&S for Construction will utilize 13 month average balances as reflected in Worksheet K, Section II and exclude any M&S booked in Account 107.

T PBOP base amount, initially set at $12,400,000, shall not be changed absent a separate filing made with the FERC.

U Transmission Service Study and Generation Interconnection Study costs shall be recorded in FERC Accounts 561.6 and 561.7, respectively. Costs of studies performed by SPP on behalf of OG&E, costs of studies performed by OG&E at SPP's request, reimbursement of study costs from SPP for studies performed by OG&E at SPP's request and studies for OG&E's retail load shall be recorded in FERC Accounts 561.6 & 561.7. FERC Accounts 561.6 and 561.7 are excluded from the Formula Rate.

V Accumulated Amortization for Intangible Plant shall be reflected as a Rate Base Adjustment under "Accumulated Depreciation".

W OG&E may only include the amortization of transmission-related extraordinary property losses if; (1) OG&E makes a filing with the Oklahoma Corporation

Commission requesting approval for the new amount to be recovered and the amortization period and (2) OG&E makes a single issue FPA Section 205 filing that requests the same recovery treatment from the FERC. OG&E shall be obligated to make such a single issue FPA Section 205 filing whenever it requests amortized extraordinary property loss costs recovery from the Oklahoma Corporation Commission.

X SPP OATT Related Upgrades include Base Plan Upgrades, Sponsored, Economic Portfolio Upgrades, Transmission Service Upgrades and Generator Interconnection Facilities, etc. whose individual Revenue Requirements are calculated and summarized in Worksheet G. Also included are the individual Revenue Requirements of facilities receiving Construction Work in Progress and Abandoned Plant incentives, as calculated and summarized in Worksheet P. The sum of the individual Revenue Requirements is credited to zonal network customers on line 17 above.

Y Exclude annualized amortization amounts booked back into O&M accounts that costs would have been booked had not a Regulatory Asset and amortization period been approved by the Oklahoma Corporation Commission and the FERC. This amount should equal amount reflected on line 93.

Z OG&E may only recover CWIP on projects that the FERC has specifically authorized the incentive.

AA Includes the amortization of any excess/deficient Accumulated Deferred Income Taxes ("ADIT") resulting from changes to income tax laws, income tax rates (including changes in apportionment) and other actions taken by a taxing authority. Excess / deficient ADIT will reduce or increase tax expense by the amount of the excess or deficient multiplied by ln 111.

**II. Notes**

1 These are the dates, hour ending and loads at the time of the TO's transmission peak, as reported in FERC Form 1, page 400. Peak Load for Point-to-Point services sold under the SPP Tariff are not reflected in the totals above. Revenues from Point-to-Point services are shared according to Attachment L of the SPP OATT and revenues received provide revenue credits to network customers.

2 "GFA PTP Scheduled Load" is the firm load in kW scheduled by Grandfathered Agreements' (GFA) customers taking firm point-to-point (PTP) service at the time of TO's monthly transmission peak load. Details are as follows:

NOTE:
1. A worksheet will be provided to support the average of beginning and ending balances for items in ADIT Accounts 281, 282, 283, 190, 255, 254 & 182.3.
2. When calculating the Baseline ATRR, the "Relevant Year" is the year being trued-up. When calculating the Projected ATRR, the "Relevant Year" is the year of the most recent FERC Form 1.

| 51 | **Total (sum lns 47 to 50)** | - | - | - | - |

Note 1: Worksheet C.3 presents total company amortization for excess / deficient ADIT amounts. This worksheet does not attempt to present jurisdictional balances.
Note 2: The amortization of Tax Cuts and Jobs Act ("TCJA") related Excess and Deficient Protected ADIT balances starts January 1, 2018 over the remaining life of OG&E's assets consistent the "Average Rate Assumption Method" ("ARAM").

Note 3: This amortization of TCJA-related Excess and Deficient Unprotected ADIT balances starts January 1, 2019 using a straight-line amortization period of five (5) years. Unprotected amortization is not generally booked or
or tracked by item. Excess unprotected amortization primarily relates to the following deferred tax items: Prepaid Pension, Regulatory Assets & Liabilities, Bond Redemptions, Oklahoma Tax Credits carryovers
& Oklahoma NOL carryovers. Deficient unprotected amortization primarily relates to the following deferred tax items: ARO Liability, Post-Retirement Benefits, and Accrued Employee Benefits. This page 2 of Worksheet C.3
(i) will be used to calculate rates for service provided in the 2019 Rate Year and thereafter, and (ii) will not be used to calculate rates for service provided in the 2018 Rate Year.
Note 4: The amortization of TCJA-related Excess and Deficient Protected ADIT balances starts January 1, 2018.
Note 5: The amortization of TCJA-related Excess and Deficient Unprotected ADIT balances starts January 1, 2019.

# ATTACHMENT H - ADDENDUM 2-B
# OG&E FORMULA RATE IMPLEMENTATION PROTOCOLS

## I. Annual Update and True-Up Adjustments

1.1 The formula rate template contained in Attachment H - Addendum 2-A and these Formula Rate Implementation Protocols ("Protocols") together comprise the filed rate ("Formula Rate") of Oklahoma Gas and Electric Company ("OG&E") for transmission service under the Open Access Transmission Tariff ("OATT") of the Southwest Power Pool, Inc. ("SPP"). OG&E shall follow the instructions specified in the Formula Rate to calculate its Annual Transmission Revenue Requirements ("ATRR"), rates for its Point-to-Point transmission service, and the ATRR associated with each of OG&E's Base Plan and Balanced Portfolio Upgrades.

1.2 The Formula Rate shall initially be effective for service on and after July 1, 2008, through December 31, 2008, and shall be applicable thereafter for services in subsequent years on and after January 1 of each calendar year through December 31 of that calendar year ("Rate Year"). The purpose of these protocols is to establish a set of procedures that may be used by Interested Parties (as defined in Section 1.3(a)(4) herein) to review and challenge Annual Updates and True-Up Adjustments, as defined herein. Provided, however, (i) nothing herein shall limit the rights of OG&E or any Interested Party to initiate a proceeding at the Federal Energy Regulatory Commission ("Commission") at any time with respect to the Formula Rate consistent with the Party's rights under the Federal Power Act ("FPA") and the Commission's regulations and (ii) the provisions of these Protocols applicable to review and challenge of Annual Updates and True-Up Adjustments shall not apply to proceedings other than (a) Formal Challenges initiated in accordance with the procedures set forth herein and/or (b) proceedings initiated *sua sponte* by FERC challenging a True-Up Adjustment, and shall not be relied upon to alter any Party's rights or obligations under the FPA and the Commission's regulations in proceedings other than such Formal Challenges and/or proceedings initiated *sua sponte* by FERC challenging a True-Up Adjustment. The term "Party" or "Parties" is defined to include OG&E and/or one or more Interested Parties.

1.3 Posting of Annual Update and Related Procedures

(a) On or before September 1 of each calendar year (unless September 1 falls on a weekend or a holiday recognized by the Commission, in which case the date shall be the next business day), OG&E:

(1) shall recalculate the ATRR by (i) removing the 13-month average net plant balances and the 13-month average Construction Work in Progress ("CWIP") balances from the most recent Baseline ATRR and replacing them with projected 13-month average net plant and CWIP balances for the following Rate Year, and (ii) calculating the prorated accumulated deferred income taxes ("ADIT") for any additional plant projected to be in service during the Rate Year (the "Proration Adjustment") (the "Projected ATRR"). (The "OG&E ZONAL REVENUE

REQUIREMENT for SPP OATT Attachment H, Sec. 1, Col. 3" is the Projected ATRR, adjusted to take account of any related True-Up Adjustment(s).) OG&E shall also calculate the rates for its Point-to-Point transmission service, and shall calculate the ATRR associated with each of OG&E's Base Plan and Balanced Portfolio Upgrades, for the new Rate Year in accordance with the Formula Rate. (The calculations described in this Section 1.3(a)(1) are collectively referred to as the "Annual Update.");

(2) shall provide such Annual Update and supporting information to SPP, for posting on the publicly accessible portion of the SPP website (the date of such posting to be the "Posting Date"). For purposes of these Protocols, "supporting information" shall include, at minimum, a data-populated Formula Rate template in a fully-functioning Excel file (and/or as applicable, other native format) showing all calculations, any supporting calculations and workpapers that demonstrate or explain information not otherwise set out in OG&E's FERC Form No. 1 or the Formula Rate template, a Portable Document Format version of the data-populated Formula Rate template described above, and a side-by-side comparison of the Formula Rate template components (by line) as compared to the most recent Baseline ATRR (as defined in Section 1.4(a));

(3) shall provide SPP with the ATRR associated with each of OG&E's Base Plan and Balanced Portfolio Upgrades such that SPP can calculate Base Plan Zonal ATRRs and the Base Plan Region-wide ATRR;

(4) shall provide the Annual Update and supporting information identified in Section 1.3(a)(2) above, and detailed information concerning the projected 13-month average net plant, CWIP balances (including project-specific information for planned additions) and Proration Adjustment, upon written request, including a standing request for all future Annual Updates and supporting information, to (i) any entity that is or may become a customer taking Network Integration Transmission Service and/or Point-to-Point Transmission Service on the OG&E facilities operated by SPP; (ii) any entity served under the SPP OATT; (iii) any affected state and federal regulatory authorities; and (iv) FERC staff (collectively, "Interested Parties");

(5) shall notify SPP transmission customers taking Network Integration Transmission Service and/or Point-to-Point Transmission Service on the OG&E facilities operated by SPP, affected regulatory commissions and other parties that have made a request in accordance with Section 1.3(a)(4), of the Annual Update posting via email and / or United States mail to the most recent address provided to OG&E;

(b) After the Posting Date and before October 1 of each calendar year, OG&E shall convene a meeting ("Customer Meeting") to afford Interested Parties an opportunity to discuss and become better informed regarding the Annual Update. OG&E will provide at least fifteen days' notice of the Customer Meeting via a notice included with the Annual Update and posted on the SPP website; and

(c) After the Customer Meeting and before November 1 for each calendar year, OG&E shall provide timely notice of any errors found in the review process, any updates to the projections of 13-month average net plant and CWIP balances, resolutions of Preliminary Challenges and/or proceedings provided for in Section 3.6, and/or any corrections to that year's True-Up Adjustment that are agreed to by OG&E and an Interested Party, and Interested Parties may object in writing by November 8 to any such proposed corrections or updates. Notice shall be accomplished by providing such information to SPP for posting on the publicly accessible portion of the SPP website and by providing e-mail notice of such posting to any Interested Party that has submitted a request for information pursuant to Section 2.1. No later than November 15 of each calendar year, OG&E shall modify the Annual Update to reflect uncontested corrections and updates, and shall cause a revised Annual Update to be posted on the SPP website no later than December 1. At that time, OG&E shall also provide SPP with any updated ATRR associated with each of OG&E's Base Plan Upgrades such that SPP can calculate Base Plan Zonal ATRRs and the Base Plan Region-wide ATRR.

1.4 On June 1 of each calendar year (unless June 1 falls on a weekend or a holiday recognized by the FERC, in which case the date shall be the next business day) (the "Publication Date"), OG&E shall, in accordance with the Formula Rate, calculate the Baseline ATRR for the Rate Year that has most recently concluded, reconcile the Projected ATRR with the Baseline ATRR for the corresponding Rate Year and calculate the amount of any over- or under-recovery (all of which, plus any corrections pursuant to Section 1.10 or any changes to account for the resolution of any Preliminary Challenge, Formal Challenge, or a proceeding initiated sua sponte by FERC challenging a True-Up Adjustment, to the extent such changes have not been reflected in a prior Annual Update, shall be considered the "True-Up Adjustment"). On the Publication Date, OG&E shall submit the True-Up Adjustment to FERC for informational purposes only. The informational filing shall not require any action by the Commission.[1] On or before the Publication Date, OG&E shall follow the procedures set forth in Sections 1.3(a)(2)-(5) for disseminating the True-Up Adjustment and supporting information (as defined in Section 1.3(a)(2)). The True-Up Adjustment:

---

[1] The transmittal letter accompanying the informational filing shall inform the Commission that the True-Up Adjustment is not intended to be subject to the Commission's notice requirements and it is not intended for the Commission to take action accepting the informational filing, and shall inform the Commission regarding the procedures contained in these Protocols for review and challenge of the True-Up Adjustment. If the Commission issues a notice of or an order accepting the informational filing, OG&E shall advise the Commission of the challenge process in these Protocols and shall work with the Settling Parties to seek rescission of such actions. No Commission action on the informational filing shall affect any rights under the Formula Rate or these Protocols.

(a) shall, to the extent specified in the Formula Rate, be based upon data properly recorded in the appropriate accounts, consistent with FERC accounting policies and accounting practices, in (i) OG&E's FERC Form No. 1 for the most recent calendar year (i.e., the most recently completed Rate Year), and (ii) the books and records of OG&E.[2] (The ATRR determined using these data shall be termed the "Baseline ATRR".);

(b) shall identify and provide an explanation of (i) any changes in OG&E accounting policies, practices or procedures (including changes resulting from revisions to FERC's Uniform System of Accounts and/or Form No. 1 reporting requirements) from those in effect during the calendar year upon which the most recent Baseline ATRR was based and that have an impact on the Formula Rate or the calculations under the Formula Rate ("Accounting Changes"), and (ii) any known changes in the SPP OATT from the provisions of the SPP OATT in effect during the calendar year upon which the most recent Baseline ATRR was based and that have an impact on the Formula Rate or the calculations under the Formula Rate ("Tariff Changes"). To the extent Interested Parties, during the review process provided for by these Protocols, identify additional changes in OG&E accounting policies, practices or procedures (including changes resulting from revisions to FERC's Uniform System of Accounts and/or Form No. 1 reporting requirements) or in the SPP OATT that depart from those in effect during the calendar year upon which the most recent Baseline ATRR was based and that have an impact on the Formula Rate or the calculations under the Formula Rate, those additional changes shall also be considered Accounting Changes or Tariff Changes, as applicable; and;

(c) shall,

(1) for the True-Up Adjustment to be filed in June of 2009, which shall apply to the rate period commencing July 1, 2008, and ending December 31, 2008 ("Transition Period"), be computed as one-half (1/2) of the difference produced by subtracting the Baseline ATRR for calendar year 2008 from the Projected ATRR for calendar year 2008.[3] The amount of any under- or over-recovery shall

---

2 It is the intent of the Formula Rate, including the supporting explanations and allocations described therein, that each input to the Formula Rate will be either taken directly from the FERC Form No. 1 or reconcilable to the FERC Form No. 1 by the application of clearly identified and supported information. Where the reconciliation is provided through a worksheet included in the filed Formula Rate template, the inputs to the worksheet must meet this transparency standard, and doing so will satisfy this transparency requirement for the amounts that are output from the worksheet and input to the main body of the Formula Rate.

3 The Projected ATRR for calendar year 2008 is the ATRR that was projected using the formula filed by OG&E, as modified by OG&E's compliance filing, and which was incorporated into Attachment H, Section I.1, of the SPP OATT by SPP's filing on October 17, 2008, in Docket No. ER09-89-000, *et al*. The Projected ATRR for calendar year 2008 was $94,758,543.

be recovered or refunded, as appropriate, in accordance with Worksheet L of the Formula Rate; and

(2) beginning with the True-Up Adjustment to be filed in June of 2010, compare the Projected ATRR for the most recently completed Rate Year and the Baseline ATRR for that Rate Year ("most recent Baseline ATRR") to determine the amount to be refunded or surcharged during the subsequent Rate Year in order to true-up the Projected ATRR calculated in the prior year's Annual Update to the most recent Baseline ATRR. The amount of any under- or over-recovery shall be recovered or refunded, as appropriate, in accordance with Worksheet L of the Formula Rate.

1.5 Interested Parties may review and challenge the True-Up Adjustment with respect to, among other grounds enumerated in these Protocols, the prudence of any costs and expenditures included for recovery in the most recent Baseline ATRR, provided, however, that the initial burden to raise a serious doubt as to the prudence of any cost or expenditure shall be upon the Interested Party raising the challenge.

1.6 Interest on any over-recovery of the net revenue requirement shall be determined in accordance with Worksheet L. Interest on any under-recovery of the net revenue requirement shall be determined using the interest rate equal to OG&E's actual short-term debt costs capped at the applicable FERC refund interest rate as set forth in Worksheet L.

1.7 After posting of the True-Up Adjustment, a Network Customer in the OG&E zone may elect to prepay amounts calculated to be owed in accordance with Part I of Formula Rate Worksheet L and limit interest charges that would otherwise apply pursuant to Section 1.6. In the event of such election, such Prepayment shall be made on or before June 30 of the year in which the True-Up Adjustment is computed, and such Prepayment amount shall be subject to a Prepayment Adjustment. The Prepayment and the Prepayment Adjustment shall be calculated pursuant to Part IV of the Formula Rate Worksheet L. Such Prepayment Adjustment shall be reflected as a charge or credit in the first monthly billing for transmission services subsequent to the determination of the Network Customer's 12 CP demand and the TO's Transmission Network Load for the applicable Rate Year.

1.8 Neither the Annual Update nor the True-Up Adjustment shall seek to modify the Formula Rate and neither the Annual Update nor the True-Up Adjustment shall be subject to challenge by a Party seeking to modify the Formula Rate (*i.e.*, all such modifications to the structure of the Formula Rate and the stated values specified in Section 1.9 herein will require, as applicable, an appropriate filing with the FERC pursuant to FPA Section 205 or Section 206).

1.9 A change to the Formula Rate inputs related to (i) the rate of return on equity ("ROE"), (ii) depreciation and/or amortizations, (iii) storm damage deferrals, (iv) extraordinary property losses or other deferred costs, and (v) costs of post-employment benefits other than pensions ("PBOP") may not be made absent an appropriate filing with the FERC pursuant to Federal Power Act Section 205 or Section 206: provided, however, that OG&E may make a limited Section 205 filing to revise its depreciation rates and/or amortizations, extraordinary property losses or other deferred costs, PBOP expenses, its recovery of storm damage deferrals, or to reflect nominal changes to the FERC Form 1 reporting requirements (*i.e.*, changes in account descriptions or line numbers that do not reflect changes in the nature or type of costs or expenses recorded therein), in which the sole issue for examination shall be whether the proposed change is just and reasonable and not unduly discriminatory or preferential.

1.10 If OG&E files any corrections to its FERC Form 1 that would affect the application of the Formula Rate, such corrections shall be accounted for in the True-Up Adjustment for the next effective Rate Year, and any resulting refunds or surcharges that are the result of such correction(s) shall be included, with interest pursuant to Worksheet L from the beginning of the Rate Year(s) affected by the correction, in that True-Up Adjustment. If OG&E makes corrections to its books and records or otherwise identifies an error that would alter input data entered in the Formula Rate that are not derived from the FERC Form 1 for the current or any prior Rate Year, such corrections shall be accounted for in the True-Up Adjustment for the next effective Rate Year, and any resulting refunds or surcharges that are the result of such correction(s) shall be included, with interest pursuant to Worksheet L from the beginning of the Rate Year(s) affected by the correction, in that True-Up Adjustment. Provided, however, that this provision shall not bar the recognition of corrections more promptly through resolution of challenges to any then-pending True-Up Adjustment pursuant to Sections 3.6 or where the Parties otherwise agree.

## II. Review Procedures

2.1 Each Annual True-Up Adjustment shall be subject to the following review procedures ("Review Procedures"):

(a) Each year, after the Publication Date and before July 1, OG&E will convene a meeting ("True-Up Meeting") to afford Interested Parties an opportunity to discuss and become better informed regarding the True-Up Adjustment. OG&E will provide at least fifteen days' notice of the True-Up Meeting via a notice included with the True-Up Adjustment and posted on the SPP website;

(b) Interested Parties will have one-hundred and thirty-five (135) days after the Publication Date to serve reasonable information requests on OG&E concerning the (i) the True-Up Adjustment for the relevant Rate Year, (ii) the Projected

ATRR for the Rate Year that is the subject of the True-Up Adjustment, and (iii) the Projected ATRR for the subsequent calendar year, which will issue on or about September 1 following the True-Up Adjustment. Such information requests shall be limited to what is necessary to determine if OG&E has properly calculated and reasonably applied the Formula Rate according to its terms, including the procedures in this Attachment H - Addendum 2-B (including the extent and effect of any Accounting Changes and Tariff Changes, and including corrections pursuant to Section 1.10). Such information request may include requests for information concerning whether costs were prudently incurred (as provided for in Section 1.5) and whether the relevant True-Up Adjustment or Projected ATRR satisfies the requirements set forth at Sections 1.3 and 1.4 of these Protocols.

Such information requests shall not solicit information that solely relates to inputs that are stated values (as identified in Section 1.9) or cost allocation methods that have been determined by any final order by the Commission with respect to the Formula Rate (including an order accepting a settlement), except that such information requests shall be permitted if they seek to determine if there has been a material change in circumstances or to confirm consistency with the applicable order (and associated settlement, if any). In addition, such information requests shall not solicit information related to True-Up Adjustments from prior years except to determine whether and how a prior year's approach on a given matter was the same or different from the current year's approach, or in connection with corrections pursuant to Section 1.10;

(c) OG&E shall make a good faith effort to respond to information requests issued pursuant to Section 2.1(b) within fifteen (15) business days of receipt of such requests. Information requests received after 5 p.m. CPT shall be considered received the next business day. OG&E's responses to information requests shall not be entitled to protection as privileged settlement communications; provided, however, that: (a) any communications between OG&E and any Interested Party in connection with efforts to negotiate a resolution of a Preliminary Challenge or Formal Challenge shall be entitled to such protection; (b) if OG&E's response to an information request contains proprietary or trade secret information or critical energy infrastructure information, OG&E and the Interested Party or Parties receiving such information shall enter into appropriate arrangements to protect the confidentiality of such information; and (c) nothing herein shall require OG&E to provide information that is protected by the attorney-client privilege, the attorney work product doctrine, or any other legally recognized privilege. Nothing in these Protocols shall alter or affect any Party's right to offer into evidence or otherwise use information obtained pursuant to the Review Procedures provided for in these Protocols in any proceeding before the Commission or any other forum in

accordance with the Commission's Rules of Practice and Procedure or other applicable rules of evidence, nor shall these Protocols alter or affect any Party's right to oppose such use of information obtained pursuant to the Review Procedures provided for in these Protocols. The fact that information was obtained pursuant to the Review Procedures provided for in these Protocols shall not be grounds for opposing the use of such information in any proceeding before the Commission or any other forum;

(d) To the extent OG&E and any Interested Party are unable to resolve disputes related to information requests submitted in accordance with these Review Procedures, OG&E or any Interested Party may petition FERC to appoint an Administrative Law Judge as a discovery master. The discovery master shall have the authority to issue binding orders to resolve discovery disputes and to compel the production of documents or other information or materials in accordance with the Review Procedures and FERC's Rules of Practice and Procedure;

(e) Any Interested Party shall have until the later of one-hundred and eighty (180) days after the Publication Date or fifteen (15) days after OG&E's last response to reasonable information requests submitted pursuant to Section 2.1(b) above ("Review Period") to review the True-Up Adjustment and to notify OG&E in writing of any specific challenges to the True-Up Adjustment, including any corrections pursuant to Section 1.10 and any Accounting Changes or Tariff Changes ("Preliminary Challenges"). Preliminary Challenges shall include supporting documentation (or references to documentation provided in discovery). Other challenges, including challenges to the Formula Rate itself shall not be considered "Preliminary Challenges" for purposes of these Review Procedures; and,

(f) OG&E shall provide a written response to any Preliminary Challenge within fifteen (15) days of receipt, and such response shall include supporting documentation (or references to documentation provided in discovery).

## III. Resolution of Challenges

For each True-Up Adjustment:

3.1 If OG&E and any Interested Party(ies) have not resolved all Preliminary Challenges within forty-five (45) days of the date of written notice of a Preliminary Challenge provided for in Section 2.1(e), senior management of the interested party(ies) and OG&E shall negotiate in good faith to attempt to resolve the Preliminary Challenge. If such negotiations fail to resolve all Preliminary Challenges within seventy-five (75) days of the date of written notice of a Preliminary Challenge (the time period commencing on the date of written notice of a Preliminary Challenge and ending 75 days thereafter is the ("Resolution Period"), the Interested Party(ies) may file a complaint at the FERC pursuant to 18 C.F.R. § 385.206 challenging the True-Up Adjustment (including any corrections or Accounting Changes or Tariff Changes), with regard to such Preliminary Challenge(s) ("Formal Challenge"). Notwithstanding the foregoing, upon written agreement of OG&E, a Formal Challenge may be brought at any time.

3.2 If OG&E and an Interested Party agree upon a resolution to a Preliminary Challenge to a True-Up Adjustment by November 1, and such resolution is not objected to by any Interested Party, OG&E shall recalculate the True-Up Adjustment to reflect such resolution, which shall be reflected in the Annual Update for the following Rate Year as provided in Section 1.3(c).

3.3 In the event that an Interested Party has filed a Preliminary Challenge, such party may file a Formal Challenge within thirty (30) days after the end of the Resolution Period, unless OG&E and the party agree in writing to extend such time to permit further negotiations. The contents of such Formal Challenge need not be limited to issues that were the subject of Preliminary Challenge(s) submitted by the Interested Party with respect to the current True-Up Adjustment. In the event that an Interested Party did not file a Preliminary Challenge, such party may file a Formal Challenge within two hundred eighty-five days after the Publication Date. A copy of any Formal Challenge shall be served on OG&E by electronic service on the date of such filing. A party may not, thereafter, file a Formal Challenge as to the disputed Preliminary Challenge(s) for the then effective Rate Year. Failure to pursue a Preliminary Challenge or lodge a Formal Challenge regarding a Preliminary Challenge(s) as to a given True-Up Adjustment shall not bar the pursuit of any Preliminary Challenge or the lodging of a Formal Challenge as to such Preliminary Challenge(s) with regard to a subsequent True-Up Adjustment.

3.4 Any response by OG&E to a Formal Challenge must be submitted to the FERC within thirty (30) days of the date of the filing of the Formal Challenge, and shall be served on the filing party(ies) by electronic service on the date of such filing.

3.5 In any Formal Challenge proceeding or proceeding initiated *sua sponte* by FERC challenging a True-Up Adjustment (including any corrections pursuant to Section 1.10 or any Accounting Changes or Tariff Changes contained therein), OG&E shall bear the burden of proving that it has reasonably adopted and applied any Accounting Changes or Tariff Changes; and that it has properly calculated and reasonably applied the Formula Rate pursuant to the Formula Rate and these Protocols, including compliance with the specific requirements set forth in Sections 1.4 and 1.5 of these Protocols, provided, however, that challenges to the prudency of costs shall be subject to Section 1.5 of these Protocols.

3.6 With regard to any changes, including to the data inputs (including but not limited to revisions to OG&E's FERC Form 1), resulting from the resolution of Preliminary Challenges, Formal Challenges initiated pursuant to Sections 3.1 or 3.3 above, or proceedings initiated *sua sponte* by FERC, where such resolution occurs on or after the Publication Date and before November 1, OG&E shall recalculate the then-pending True-Up Adjustment to take such changes into account, and which shall be reflected in the Annual Update for the following Rate Year. Where such resolution occurs on or after November 1 and before the subsequent Publication Date, OG&E shall incorporate any such changes into the next True-Up Adjustment. This reconciliation mechanism shall apply in lieu of mid-year adjustments to rates. However, in the event that the Formula Rate is replaced by a stated rate, actual refunds or surcharges (with interest pursuant to Worksheet L) shall be made no later than thirty (30) days after the effective date of the stated rate established by FERC.

3.7 Any refunds or surcharges attributable to changes resulting from the resolution of Preliminary Challenges, Formal Challenges initiated pursuant to Sections 3.1 or 3.3 above, or proceedings initiated *sua sponte* by FERC shall be calculated, with interest (pursuant to Worksheet L), from January 1 of the Rate Year that is the subject of the challenged True-Up Adjustment (except as to corrections applicable to a prior Rate Year which are governed by Section 1.10), and shall be reflected through the process provided in Section 3.6.

| 107 | Total of (a)-(b) | | | | | | 0 | |
| 108 | ACCOUNT 454 (RENT FROM ELECTRIC PROPERTY) | (Note Q) | | | | | 0 | |
| 109 | ACCOUNT 456 (OTHER ELECTRIC REVENUES) | | | | | | 0 | |
| 110 | a. Transmission charges for all transmission transactions | | | | | | 0 | |
| 111 | b. Transmission charges for all transmission transactions included in Divisor on page 1 | | | | | | 0 | |
| 112 | Total of (a)-(b) | | | | | | 0 | |
| Note | General Note: References to Results of Operations in this revenue requirement template indicate the Financial Statement Results of Operations (ROOs) Schedule where data is located. To the extent the references to ROOs data are missing, the entity will include a "Notes" | | | | | | | |

| Letter | |
|---|---|
| | section to provide this data. |
| A | Combines plant data for both the Western-Upper Great Plains Region (Western-UGP) and Western-Rocky Mountain Region (Western-RMR). |

| | |
|---|---|
| B | Does not apply to Western. For others, the balances in Accounts 190, 281, 282 and 283, as adjusted by any contra accounts identified as regulatory assets amounts in or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note K. Account 281 is not allocated. |
| C | Transmission related only. |
| D | Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at line 46 column 5. Prepayments are the electric related prepayments booked to Account No. 165 and reported in the Other Assets Section of the Balance Sheet. |
| E | For O&M Expense, Calculated from ROOs Schedule 11 as Total O&M less Purchase Power, Transmission Service Provided by Others (FERC 565), O&M Expense Fort Peck Powerhouse, Prior Year Adjustments, A&G Expense from ROOs Schedule 11, plus CME and Warehouse Interest from ROOs Schedule 5. Depreciation Expense from ROOs Schedule 4. |
| F | Totals of ROOs Schedule 11A Object Classes 1411, 1412, 1415, 1416, 1421, 1422, 1425, 1426, 1431, 1432, 1441, 1442. |
| G | Line 42 - EPRI Annual Membership Dues, all Regulatory Commission Expenses, and non-safety related advertising. Line 43 - Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting. |
| H | Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere. |
| I | Western is not subject to Federal or State Income Tax.<br>Inputs Required: FIT = 0.00%<br>SIT= 0.00% (State Income Tax Rate or Composite SIT)<br>p = 0.00% (percent of federal income tax deductible for state purposes) |
| J | Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Acct No. 561. Western does not include transmission expenses in ancillary service rates. |
| K | Removes transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until RUS 12 balances are adjusted to reflect application of seven-factor test). |
| L | Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down. |
| M | Percentage of Total Plant Allocators are developed separately for Western-UGP and Western-RMR to allocate O&M, A&G, and Depreciation Expenses between Transmission and Generation. |
| N | Western does not have Common Plant. |
| O | Debt cost rate = long-term interest (line 99) / long term debt (line 100). The Proprietary |

Capital Cost rate is implicit, a residual calculation after TIER is determined. TIER will be supported in the filing and no change in TIER may be made absent a filing with the ISO and the FERC, if the entity is under FERC's jurisdiction.

| | |
|---|---|
| P | Line 105 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456 and all other uses are to be included in the divisor. |
| Q | Includes income related only to transmission facilities, such as pole attachments, rentals and special use. |
| R | The revenues credited shall include only the amounts received directly reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, facilities not included in this template (e.g., direct assignment facilites and GSUs) which are not recovered under this Revenue Requirement Template. |

# Western Area Power Administration - Upper Great Plains Region

# Transmission and Ancillary Formula Rate Implementation Protocols

The transmission and ancillary formula rate templates ("Formula Rate Templates") of Western Area Power Administration - Upper Great Plains Region ("Western-UGP" or "WAPA-UGP") and these Transmission and Ancillary Formula Rate Implementation Protocols ("Protocols") together comprise the filed rates ("Formula Rates") of WAPA-UGP for transmission and ancillary revenue requirement determinations under the Southwest Power Pool, Inc. ("SPP") Open Access Transmission Tariff ("SPP Tariff"). WAPA-UGP must follow the instructions specified in the Formula Rates to calculate its Annual Transmission Revenue Requirement ("ATRR") and the Annual Revenue Requirement ("ARRs") for Ancillary Services offered under the SPP Tariff.

Recovery of costs associated with existing and new facilities shall be consistent with the Formula Rates and Attachment AI and Attachment J, respectively, of the SPP Tariff. The ATRR and ARRs shall be determined for January 1 to December 31 of a given calendar year. The Formula Rates shall become effective for recovery of WAPA-UGP's ATRR and ARRs upon the effective date authorized by the Federal Energy Regulatory Commission ("FERC"). The Deputy Secretary of Energy has the authority to confirm, approve and place such rates in effect on an interim basis. FERC has the exclusive authority to confirm, approve and place into effect on a final basis, and to remand or to disapprove rates developed by WAPA's Administrator. FERC's review is limited to (1) whether the rates are the lowest possible consistent with sound business principles; (2) whether the revenue levels generated are sufficient to recover the costs of producing and transmitting electric energy including repayment within the period permitted by law; and (3) the assumptions and projections used in developing the rates. FERC shall reject decisions of WAPA's Administrator only if it finds them to be arbitrary, capricious or in violation of the law.

The Formula Rates shall be applicable to service on and after January 1 of each calendar year through December 31 of the calendar year ("Rate Year"), subject to review, challenge and refunds or surcharges, to the extent provided herein. These Protocols specify the dates applicable to the activities described herein. Should any due date fall on a weekend or a holiday recognized by FERC, then the due date shall be no later than the next Business Day.

## Section I Definitions

For purposes of these Protocols, the following capitalized terms shall have the meanings set forth below.

A. "Accounting Change" means any change in the WAPA-UGP Federal Power System (the System) financial statements including the financial position, results of operations and cash flows of WAPA-UGP, an agency of the U.S. Department of Energy (DOE), and the hydroelectric power generating functions of the U.S. Department of the Interior (DOI), Bureau of Reclamation (Reclamation), the U.S. Department of Defense (DOD), Army Corps of Engineers (Corps),

(collectively referred to as the generating agencies). For the generating agencies, only the individual power systems for which WAPA-UGP markets and transmits hydroelectric power are

included in the combined financial statements and included here. WAPA, a Federal power marketing administration, markets and transmits hydroelectric power generated from these power systems, which are operated and maintained by the generating agencies. It also means any change in the accounting policies and practices from those in effect for the Calendar Year upon which the immediately preceding Annual Update was based and that could impact the ATRR and/or ARR calculations under the Formulas. Accounting Changes include any changes resulting from:

1. revisions to the System financial statements which are prepared following accounting principles generally accepted in the United States of America (U.S. GAAP). The combined financial statements also reflect FERC regulations, FERC's Uniform System of Accounts ("USoA") and DOE's accounting practices;

2. correction of errors and prior period adjustments that impact the ATRR and/or ARRs;

3. the implementation of new estimation methods or policies;

4. a change in WAPA-UGP's or the generating agencies' accounting policies and practices, which reflect specific legislation and executive directives issued by departments of the Federal government;

5. WAPA-UGP's or the generating agencies' own accounting changes (which constitute a change to the ATRR or ARR greater than or equal to $15,000) such as the addition or deletion of a subaccount not specified by FERC's USoA; or

6. a change in WAPA-UGP's or the generating agencies' cost allocation policies or practices from those policies and/or practices in effect in the Prior Rate Year, which change causes a result under the Formula Rate different than the result under the Formula Rate as calculated without such change.

B. "Annual Revenue Requirement" or "ARR" means the net revenue requirement for the Ancillary Services calculated in accordance with the Formula Rates posted on the WAPA-UGP Open Access Same-Time Information System ("OASIS") and SPP OASIS, subject to review pursuant to the provisions of these Protocols.

C. "Annual Transmission Revenue Requirement" or "ATRR" means the net revenue requirement for the Transmission Services calculated in accordance with the Formula Rate posted on the WAPA-UGP OASIS and SPP OASIS, subject to review pursuant to the provisions of these Protocols.

D. "Annual Meeting" means the meeting hosted by WAPA-UGP for exchanging information with Interested Parties regarding updates to the financial data in its Formula Rates.

E. "Annual Update" means WAPA-UGP's annual posting of its updates to the financial data in its Formula Rates, in a working Excel™ format. The Annual Update is submitted as described in these Protocols.

F. "Business Day" means from 9:00 AM to 5:00 PM Central Prevailing Time other than weekends and Federal Holidays.

G. "Calendar Year" means January 1 through December 31 of a given year.

H. "Current Rate Year" means the Rate Year for which the Annual Update is posted on the WAPA-UGP OASIS and SPP OASIS (*e.g.*, if the Initial Posting of the Annual Update is posted on or around September 1, 2020, and the Final Posting of the Annual Update is posted on or around December 15, 2020, the Current Rate Year is January 1, 2021 through December 31, 2021).

I. "Customer(s)" or "Transmission Customer(s)" means the customers taking NITS, service under Grandfathered Agreements, or PTP Transmission Service.

J. "FERC" or "Commission" means the Federal Energy Regulatory Commission.

K. "Final Posting" means the Annual Update information that WAPA-UGP posts to the WAPA-UGP OASIS and SPP posts to the SPP OASIS with changes agreed to during the informal review process.

L. "Formal Challenge" means a challenge by an Interested Party to an aspect of the Annual Update that is served on WAPA-UGP by electronic service.

M. "Formula Rate Template" means the WAPA-UGP transmission and ancillary formula rate templates set forth herein.

N. "Formula" means the Formula Rate Template set forth in Addendum 35 to Attachment H of the SPP Tariff.

O. "Formula Rate" has the meaning defined herein and means the WAPA-UGP Formula Rate Implementation Protocols together with the Formula Rate Templates.

P. "FPA" means the Federal Power Act.

Q. "Informal Challenge" means written notification by an Interested Party to WAPA-UGP, during the Review Period, of any specific challenge to the Annual Update.

R. "Information Request" means a written request submitted by an Interested Party to WAPA-UGP.

S. "Initial Posting" means the initial posting of WAPA-UGP's Annual Update to the WAPA-UGP OASIS.

T. "Interested Party" includes SPP Tariff Transmission Customers.

U. "NITS" means Network Integration Transmission Service as defined in the SPP Tariff.

V. "OASIS" means Open Access Same-Time Information System.

W. "OATT" or "SPP Tariff" means SPP's Open Access Transmission Tariff.

X. "Prior Rate Year" means the Rate Year two (2) years prior to the Current Rate Year (*e.g.*, if the Current Rate Year is January 1, 2021 through December 31, 2021, then the Prior Rate Year is January 1, 2019 through December 31, 2019).

Y. "PTP" means Point-to-Point Transmission Service as defined in the SPP Tariff.

Z. "Publication Date" means the date on which WAPA-UGP posts the Initial Posting to the WAPA-UGP OASIS, or the next Business Day following the actual posting date should that posting date fall on a weekend or a holiday recognized by FERC.

AA. "Rate Year" means January 1 of a given year through December 31 of the same Calendar year.

BB. "Review Period" means, unless otherwise extended in writing by WAPA-UGP, the period extending from the Publication Date through November 15, which includes a period for submission of Information Requests and a period for preparation of Informal Challenges.

CC. "SPP" means Southwest Power Pool, Inc. or its successor organization.

DD. "SPP Tariff" or "OATT" means SPP's Open Access Transmission Tariff.

EE. "USoA" means FERC's Uniform System of Accounts.

## Section II Annual Update

A. On or around September 1 of each calendar year (the Publication Date), WAPA-UGP shall:

1. For the Prior Rate Year and Current Rate Year, recalculate the ATRR utilized by SPP for zonal NITS service and the ARRs utilized by SPP for ancillary services for the applicable Rate Year in accordance with the applicable Formula Rate(s) and using the Formula Rate Templates. WAPA-UGP shall post its Annual Update to the "Rates" folder on the WAPA-UGP OASIS (the Initial Posting) and WAPA-UGP rates website[1]; and

2. Provide its Annual Update to SPP and request that SPP post such information to the SPP OASIS "Member Related Postings" under the "Western Area Power Administration UGP Information" link.

---

[1] WAPA-UGP will post the Annual Update at the following locations, respectively: http://www.oasis.oati.com/wapa/index.html, and https://www.wapa.gov/regions/UGP/rates/Pages/rates.aspx.

B. Concurrent with the Initial Posting, WAPA-UGP shall provide notification of the Annual Update to Interested Parties by serving such notice electronically upon the Service List.[2]

C. The Annual Update shall:

1. Include workable populated Formula Rate Templates with fully functional spreadsheets showing the calculation of the Annual Update and underlying work papers in native format with links and formulas intact, including sufficiently detailed work papers and supporting documentation for data;

2. Be based on the independently-audited books and records of WAPA-UGP and the generating agencies for the most recent fiscal year including combined financial statements accounted for under the provisions of the Financial Accounting Standards Board (FASB);

3. Provide sufficient information to enable Interested Parties to replicate the calculation of the formula results from the Formula Rates;

4. With respect to any change in accounting that affects the inputs to the Formula Rates or the resulting charges billed under the Formula Rates, WAPA-UGP shall identify:

   a. Any Accounting Changes, such as the initial implementation of an accounting standard or policy; the initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific direction; or the correction of errors and prior period adjustments that impact the ATRR and/or ARRs.

   b. Any items included in the Formula Rates at an amount other than a historic cost basis.

   c. Individual impact of any changes in Section II.C (4)(a) above on charges billed under the Formula Rates.

   d. Accounting Changes related to any reorganization or merger transaction.

5. Not seek to modify the Formula Rates.

---

[2] As used in these Protocols, "Service List" shall mean the list of email addresses maintained by SPP of Interested Parties, provided that such Interested Parties request to be added to the Service List through the "Exploder List" link on the SPP website. As of June 2017, the Exploder List was titled "Formula Rate Posting Information Notification" and could be accessed at http://www.spp.org/stakeholder-center/exploder-lists/.

6. With each Annual Update, WAPA-UGP will include a list of any new transmission facilities included in the Formula Rate Templates that were not included in the prior Annual Update. New transmission facilities include but are not limited to additional substations, breakers, other major substation equipment, and additional transmission line miles. The list will indicate the Zone 19 Attachment AI Guidance Document criteria that WAPA-UGP believes supports each facility's inclusion in WAPA-UGP's ATRR and/or ARRs. This provision in no way limits the rights of any Interested Party to challenge inclusion of new facilities.

## Section III Review of Annual Update

Within twenty (20) calendar days of the Publication Date of WAPA-UGP's Annual Update, and with at least seven (7) calendar days' notice, WAPA-UGP will host a meeting for Interested Parties to discuss the Annual Update ("Annual Meeting"). WAPA-UGP shall provide notice of this meeting concurrent with the posting of the Annual Update accessible on the WAPA-UGP OASIS and the SPP OASIS. The notice shall include the date, time and location of the Annual Meeting and shall be provided to Interested Parties through the Service List. The Annual Meeting shall also be available by telephone and/or web access with all meeting materials provided electronically from the WAPA-UGP OASIS and SPP OASIS.

A. Information Exchange

1. Interested Parties may begin submitting Information Requests immediately following the Publication Date of the Annual Update and will have until October 15 to serve reasonable Information Requests on WAPA-UGP for information and work papers supporting the Annual Update. Such Information Requests shall be limited to that which is necessary to determine:

   a. The extent or effect of an Accounting Change;

   b. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

   c. The proper application of the Formula Rates and procedures in these Protocols;

   d. The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

   e. The effect of any change to the underlying USoA or Formula Rate Templates; or

   f. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rates.

The information and document requests shall address the proper application of data in the Formula Rates, and not the Formula Rates themselves. WAPA-UGP

will not claim that responses to information and document requests pursuant the Protocols are subject to any settlement confidentiality provision; however, WAPA-UGP may require that Interested Parties execute a non-disclosure agreement to obtain access to material that WAPA-UGP deems commercially sensitive or that contains Critical Energy Infrastructure Information as that term is defined in 18 CFR § 388.113(c)(1).

2. WAPA-UGP shall make a good faith effort to respond to Information Requests pertaining to the Annual Update within fifteen (15) calendar days of receipt.

3. WAPA-UGP shall post on a publically accessible portion of the WAPA-UGP OASIS all Information Requests from Interested Parties and WAPA-UGP's response(s) to such requests, and a link to the posting will be electronically served on all Interested Parties via the Service List. WAPA-UGP will request that SPP also post the same information on the SPP OASIS. If responses to Information Requests contain information deemed by WAPA-UGP to be confidential, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement executed by the requesting party and WAPA-UGP.

4. If the deadline for Interested Parties falls on a weekend or holiday recognized by the FERC, the deadline will be extended to the next Business Day.

B. Informal Challenge Procedures

1. Interested Parties shall have until November 15 (or the first Business Day after November 15 if November 15 falls on a weekend or holiday) to notify WAPA-UGP in writing (which may be electronically) of any specific Informal Challenges. The Informal Challenge must specify the inputs, supporting explanations, allocations calculations, or other information to which the Interested Party objects and provide an appropriate explanation and documents to support its Informal Challenge. WAPA-UGP will make a good faith effort to respond to any Informal Challenge within twenty (20) calendar days of notification of such Informal Challenge. WAPA-UGP shall appoint senior representatives to work with the Interested Party to resolve the Informal Challenge.

2. WAPA-UGP will post on the WAPA-UGP OASIS all Informal Challenges from Interested Parties and WAPA-UGP's responses to the Informal Challenges, and a link to the posting will be electronically served on all Interested Parties via the Formula Rate Posting Information Notification List. WAPA-UGP will request that SPP also post the same information on the SPP OASIS. If responses to Informal Challenges contain information that is deemed by WAPA-UGP to be confidential, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement executed by the requesting party and WAPA-UGP.

3. Any changes or adjustments to the Annual Update resulting from the Information

Exchange and Informal Challenge procedures that are agreed to by WAPA-UGP and resolved prior to the end of the Review Period shall be reported in the Final Posting on the WAPA-UGP OASIS and SPP OASIS. Any changes or adjustments agreed to by

WAPA-UGP after this date will be reflected in the Annual Update for the following Rate Year.

C. Formal Challenges

1. An Interested Party shall have until January 15 (or the first Business Day after January 15 if January 15 falls on a weekend or holiday recognized by FERC) to file a Formal Challenge. A party may not pursue a Formal Challenge if that party did not submit an Informal Challenge on at least one issue. Having submitted an Informal Challenge on at least one issue, an Interested Party may pursue a Formal Challenge on other issues. WAPA-UGP will make a good faith effort to respond to any Formal Challenge within twenty (20) calendar days of notification of such Formal Challenge. WAPA-UGP, and, if appropriate, SPP, shall appoint senior representatives, including WAPA's Administrator, to work with the Interested Party to resolve the Formal Challenge.

2. A Formal Challenge shall:

a. Clearly identify the action or inaction which is alleged to violate the filed Formula Rates or Protocols;

b. Explain how the action or inaction violates the filed Formula Rates or Protocols;

c. Set forth the business, commercial, economic or other issues presented by the action or inaction as such relate to or affect the party filing the Formal Challenge, including:

i. The extent or effect of an Accounting Change;

ii. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

iii. The proper application of the Formula Rates and procedures in these Protocols;

iv. The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

v. The effect of any change to the underlying Uniform System of Accounts or Formula Rate Templates; or

vi. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rates.

d. Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or

inaction;

e. State whether the issues presented are pending in an existing proceeding in any forum in which the Interested Party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;

f. State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that belief;

g. Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the Interested Party, including, but not limited to, contracts and affidavits; and

h. State whether the filing party utilized the Informal Challenge procedures described in these Protocols with regard to any issue.

3. Formal Challenges shall be served upon WAPA-UGP in writing (which may be electronically) to the individual listed as the WAPA-UGP contact person in WAPA-UGP's Annual Update.

D. Modification of Formula Rate or Annual Update

1. No party shall seek to modify the Formula Rates under the Challenge procedures (either Formal or Informal) set forth in these Protocols, and the Annual Update shall not be subject to challenge for modifying the Formula Rates.

2. A change to applicable WAPA-UGP Formula Rate fixed inputs may not be made absent the appropriate filing with FERC.

3. If WAPA-UGP makes a correction to a Mistake in its financial information during the Current Rate Year that would affect the Formula Rate for the Current Rate Year, such corrections and any resulting refunds or surcharges shall be reflected in the Annual Update for the next effective Rate Year. For purposes of these Protocols, "Mistake" shall mean errors or omissions regarding the values inputted into the Formula Rate Template, such as arithmetic or computational errors. Mistakes shall not include matters involving exercise of judgment or substantive differences of opinion regarding the derivation of an input that is more properly the subject of the annual review process.

4. Any changes to the data inputs shall be incorporated into the Formula Rates and the charges produced by the Formula Rates in the Annual Update for the next effective Rate Year.

E. Final Posting

1. On or around December 15 of each year, WAPA-UGP shall post the Final Posting of its Annual Update to the WAPA-UGP OASIS and also request SPP to post the same information on the SPP OASIS.

2. This Final Posting must include the information that is reasonably necessary to determine:

    a. That input data under the Formula Rates is properly recorded in any underlying work papers;

    b. That WAPA-UGP has properly applied the updates to the financial data in the Formula Rates and these procedures;

    c. The accuracy of the data and the consistency with the Formula Rates of the ATRR and ARRs for the ancillary rates under review; and

    d. The extent of Accounting Changes that affect Formula Rates inputs.

3. The Final Posting must also describe all aspects of the Formula Rates or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures.

4. Contemporaneous with the making of such Final Posting on the WAPA-UGP OASIS, WAPA-UGP shall provide notice of the Final Posting to Interested Parties via the Service List and request that SPP also post the Final Posting on the SPP OASIS.

## Section IV Joint SPP Transmission Owners' Meeting

If the SPP Transmission Owners with transmission projects that utilize a regional cost-sharing methodology implement a process to coordinate and hold joint meetings, WAPA-UGP intends to participate in that process. Notice of joint informational meetings, including the time, date, and location, shall be posted on the SPP OASIS and distributed to Interested Parties via the Formula Rate Posting Information Notification List no less than seven (7) days prior to such meetings.

## Section V WAPA-UGP Example Schedule

| Line No. | Action | Begin | End | Calendar Days from Publication Date |
|---|---|---|---|---|
| 1 | Rate Year | Jan. 1, 2021 | Dec. 31, 2021 | |
| 2 | Publication Date | | Sept. 1, 2020 * | |
| 3 | Annual Meeting of Interested Parties | | Sept. 21, 2020 * | Within 20 |
| 4 | Information Request Due Date | Sept. 1, 2020 * | Oct. 15, 2020 | ~45 |
| 5 | Informal Challenges Due Date | | Nov. 15, 2020 | ~75 |
| 6 | Final Posting | | Dec. 15, 2020 * | ~105 |
| 7 | Formal Challenge Due Date | | Jan. 15, 2021 | |

* On or around

**Arkansas Electric Cooperative Corporation**
**Formula Rate Template**
**Utilizing RUS Form 12 Data**
For the 12 months ended 12/31/

**NOTES**

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#). References to data from RUS Form 12 are indicated as: #.x.y.z (page,section, line, column).

Note

A SPP transmission plant depreciation expense is calculated in on page 3 by multiplying the SPP gross transmission plant (page 2, line 2) by 2.75%.

B Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 8, column 5. Prepayments are the electric related prepayments booked to Account No. 165 and reported on Section B, line 25 in the RUS 12.

C Line 5 - EPRI Annual Membership Dues, all Regulatory Commission Expenses, and non-safety related advertising. Line 5a - Regulatory Commission Expenses directly related to transmission service, SPP filings, or transmission siting.

D Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere.

E Cost of long term debt is calculated by dividing the amount shown on page 4, line 17 by the amount shown on page 4, line 18, col. 3. The cost of proprietary capital (ROE) is fixed at 8.50% (which includes a 50-basis point adder for RTO participation) per Docket No. ER16-1546. This ROE is fixed and will not change absent a 205 or 206 filing with the FERC.

F Removes dollar amount of transmission expenses recovered in MISO, 50% of Account No. 561.

G Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC.

H Revenue requirement for facilities included on Worksheet K and recovered through SPP Schedule 11.

Note A: If a zero is reported above, please confirm here in writing that you have no transmission plant that should be excluded from ISO rates.

**Arkansas Electric Cooperative Corporation**
**Worksheet F: Wages and Salaries**
**Utilizing RUS Form 12 Data**
For the 12 months ended 12/31/

| Line No. | Description | Source | Amount |
|---|---|---|---|
| | (1) | (2) | (3) |
| | Production | | |
| 1 | Operating/Generation | Company Records | |
| 2 | Maintenance | Company Records | |
| 3 | System Control and Load Dispatching | Company Records | |
| 4 | Total Production | sum lines 1 thru 3 | $0 |
| | Transmission | | |
| 5 | Operations | Company Records | |
| 6 | Maintenance | Company Records | |
| 7 | Total Transmission | sum lines 5 thru 6 | $0 |
| 8 | Distribution | Company Records | |
| 9 | Other (Note A) | Company Records | |
| 10 | Subtotal (Excluding A&G) | sum lines 4, 7, 8 and 9 | $0 |
| 11 | A&G (Note B) | Company Records | |
| 12 | Total Wages & Salaries (Note C) | sum lines 10 thru 11 | $0 |

Note

A Other is to include salaries charged to administer customer accounts 901 - 916 as defined by the USofA.

B Not reported in Zonal ATRR.

C Amount shown must reconcile to the RUS Form 12 Part H, Section J, Line 4. If not, please provide an explanation below:

D The above amounts do not contain any capitalized wages.
The amounts shown on lines 1 through 10 do **not** contain any A&G related wages.

Note

A These rates are fixed per Docket No. ER16-1546 and will not change absent a 205 or 206 filing with the FERC.

**Arkansas Electric Cooperative Corporation**
**Formula Rate Protocols**

## Section I. Applicability

The following Annual Update, Information Exchange, and Challenge Procedures shall apply to Arkansas Electric Cooperative Corporation ("AECC"). The transmission formula rate template and protocols together comprise the filed rate.

## Section II. Annual Updates

A. Beginning July 1, 2016, the Annual Transmission Revenue Requirement derived under AECC's formula rate shall be applicable on and after June 1 of a given year through May 31 of the subsequent year (the "Rate Year").

B. On or before June 1, 2017, and on or before June 1 of each succeeding Rate Year, AECC shall recalculate its Annual Transmission Revenue Requirement, producing the Annual Update for the upcoming Rate Year, and shall provide such information to SPP and cause such information to be posted on the SPP Open Access Same-Time Information System ( "OASIS"). Within ten (10) days of such posting, SPP shall provide notice of such posting via an email exploder list. Interested Parties can subscribe to the SPP Formula Rate Posting Information Notification exploder list on the SPP website.

C. If the date for posting the Annual Update falls on a weekend or a holiday recognized by FERC, then the posting shall be due on the next business day. The date on which such posting occurs shall be that year's "Publication Date." Any delay in the Publication Date will result in an equivalent extension of time for the submission of Information Requests discussed in Section III of these protocols.

D. The Annual Update for the Rate Year shall:

1. Include a workable data-populated Formula Rate Template and underlying work papers in native format with all formulas and links intact;
2. Be based on AECC's Rural Utilities Service ("RUS") Form No. 12. It is the intent of the formula rate, including the supporting explanations and allocations described therein, that each input to the formula rate will be either taken directly from the RUS Form 12 or reconcilable to the RUS Form 12 by the application of clearly identified and supported information. If the RUS Form 12 is superseded, the successor form(s) shall be utilized and supplemented as necessary to provide equivalent information as that provided in the superseded form. If the referenced form(s) is (are) discontinued, equivalent information as that provided in the discontinued form(s) shall be utilized.
3. Provide the formula rate calculations and all inputs thereto, as well as supporting documentation and work papers for data that are used in the formula rate that are not otherwise available in the RUS Form 12;
4. Provide sufficient information to enable Interested Parties (as that term is defined in Section II.E of these protocols) to replicate the calculation of the formula results from the RUS Form 12;
5. Identify any changes in the formula references (page and line numbers) to the RUS Form 12;
6. Identify all material adjustments made to the RUS Form 12 data in determining formula inputs, including relevant footnotes to the RUS Form 12 and any adjustments not shown in an RUS Form 12;
7. Provide underlying data for formula rate inputs that provide greater granularity than is required for the RUS Form 12;

8. With respect to any change in accounting that affects inputs to the formula rate or the resulting charges billed under the formula rate ("Accounting Change"):

a. Identify any Accounting Changes, including

i. The initial implementation of an accounting standard or policy;

ii. the initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific accounting direction;

iii. correction of errors and prior period adjustments that impact the revenue requirement;

iv. the implementation of new estimation methods or policies that change prior estimates; and

v. changes to income tax elections;

b. Identify items included in the formula rate at an amount other than on a historic cost basis (e.g., fair value adjustments);

c. Identify any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs to the formula rate;

d. Provide, for each item identified pursuant to items II.D.8.a - II.D.8.c of these protocols, a narrative explanation of the individual impact of such changes on charges billed under the formula rate.

E. AECC shall hold an open meeting among Interested Parties ("Annual Meeting") between the Publication Date and September 1. No less than seven (7) days prior to

such Annual Meeting, AECC shall provide notice on the SPP OASIS of the time, date, and location of the Annual Meeting and SPP shall provide notice of such meeting to the Formula Rate Posting Information Notification email exploder list. AECC shall provide remote access for participation at the Annual Meeting. For purposes of these procedures, the term Interested Party includes, but is not limited to, customers under the Tariff, state utility regulatory commissions, consumer advocacy agencies, and state attorneys general. The Annual Meeting shall (i) permit AECC to explain and clarify its Annual Update and (ii) provide Interested Parties an opportunity to seek information and clarifications from AECC about the Annual Update.

F. Should AECC have transmission projects that utilize a regional cost sharing mechanism it shall participate in any joint informational meetings held to enable all interested parties to understand how AECC is implementing its formula rates for cost recovery of such projects. Notice of such joint informational meetings, including the time, date, and location, shall be posted on the SPP OASIS and distributed to the Formula Rate Posting Information Notification email exploder list no less than seven (7) days prior to such meetings.

**Section III. Information Exchange Procedures**

Each Annual Update shall be subject to the following information exchange procedures ("Information Exchange Procedures"):

A. Interested Parties shall have until December 1 following the Publication Date (unless such period is extended with the written consent of AECC or by FERC order) to serve reasonable information and document requests on AECC ("Information Exchange Period"). If December 1 falls on a weekend or a holiday recognized by FERC, the deadline for submitting all information and document requests shall be extended to the next business day. Such information and document requests shall be limited to what is necessary to determine:

(1) the extent or effect of an Accounting Change;

(2) whether the Annual Update fails to include data properly recorded in accordance with these protocols;

(3) the proper application of the formula rate and procedures in these protocols;

(4) the accuracy of data and consistency with the formula rate of the charges shown in the Annual Update;

(5) the prudence of actual costs and expenditures;

(6) the effect of any change to the underlying Uniform System of Accounts or the RUS Form 12; or

(7) any other information that may reasonably have substantive

effect on the calculation of the charge pursuant to the formula. The information and document requests shall not otherwise be directed to ascertaining whether the formula rate is just and reasonable.

B. AECC shall make a good faith effort to respond to information and document requests pertaining to the Annual Update within fifteen (15) business days of receipt of such requests. AECC shall respond to all information and document requests by no later than January 10 following the Publication Date, unless the Information Exchange Period is extended by AECC or FERC.

C. AECC will cause to be posted on the SPP OASIS all information requests from Interested Parties and AECC's response(s) to such requests; except, however, if responses to information and document requests include material deemed by AECC to be confidential information, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement to be executed by AECC and the requesting party.

D. AECC shall not claim that responses to information and document requests provided pursuant to these protocols are subject to any settlement privilege in any subsequent FERC proceeding addressing AECC's Annual Update.

**Section IV. Challenge Procedures**

A. Interested Parties shall have until January 31 following the Publication Date (unless such period is extended with the written consent of AECC or by FERC order) to review the inputs, supporting explanations, allocations, and calculations and to notify AECC in writing, which may be made electronically,

of any specific Informal Challenges. The period of time from the Publication Date until January 31 shall be referred to as the Review Period. If January 31 falls on a weekend or a holiday recognized by FERC, the deadline for submitting all Informal Challenges shall be extended to the next business day. Failure to pursue an issue through an Informal Challenge or to lodge a Formal Challenge regarding any issue as to a given Annual Update shall bar pursuit of such issue with respect to that Annual Update, but shall not bar pursuit of such issue or the lodging of a Formal Challenge as to such issue as it relates to a subsequent Annual Update.

B. A party submitting an Informal Challenge to AECC must specify the inputs, supporting explanations, allocations, calculations, or other information to which it objects, and provide an appropriate explanation and documents to support its challenge. AECC shall make a good faith effort to respond to any Informal Challenge within twenty (20) business days of notification of such challenge. AECC, and where applicable, the Transmission Provider, shall appoint a senior representative to work with the party that submitted the Informal Challenge (or its representative) toward a resolution of the challenge. If AECC disagrees with such challenge, AECC will provide the Interested Party(ies) with an explanation supporting the inputs, supporting explanations, allocations, calculations, or other information. No Informal Challenge may be submitted after January 31, and AECC must respond to all Informal Challenges by no later than February 28, unless the Review Period is extended by AECC or FERC.

C. Informal Challenges shall be subject to the resolution procedures and limitations in this Section IV. Formal Challenges shall be filed pursuant to these protocols and shall satisfy all of the following requirements.

(1) A Formal Challenge shall:

(a) Clearly identify the action or inaction which is alleged to violate the filed rate formula or protocols;

(b) Explain how the action or inaction violates the filed rate formula or protocols;

(c) Set forth the business, commercial, economic or other issues presented by the action or inaction as such relate to or affect the party filing the Formal Challenge, including:

(i) The extent or effect of an Accounting Change;

(ii) Whether the Annual Update fails to include data properly recorded in accordance with these protocols;

(iii) The proper application of the formula rate and procedures in these protocols;

(iv) The accuracy of data and consistency with the formula rate of the charges shown in the Annual Update;

(v) The prudence of actual costs and expenditures;

(vi) The effect of any change to the underlying Uniform System of Accounts or the RUS Form 12; or

(vii) Any other information that may reasonably have

substantive effect on the calculation of the charge pursuant to the formula.

(d) Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;

(e) State whether the issues presented are pending in an existing Commission proceeding or a proceeding in any other forum in which the filing party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;

(f) State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that relief;

(g) Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the filing party, including, but not limited to, contracts and affidavits; and

(h) State whether the filing party utilized the Informal Challenge procedures described in these protocols to dispute the action or inaction raised by the Formal Challenge, and, if not, describe why not.

(2) Service. Any person filing a Formal Challenge must serve a copy of the Formal Challenge on AECC. Service to AECC must be simultaneous with filing at the Commission. Simultaneous service

can be accomplished by electronic mail in accordance with § 385.2010(f)(3), facsimile, express delivery, or messenger. The party filing the Formal Challenge shall serve the individual listed as the contact person on AECC's Informational Filing required under Section VI of these protocols.

D. Informal and Formal Challenges shall be limited to all issues that may be necessary to determine: (1) the extent or effect of an Accounting Change; (2) whether the Annual Update fails to include data properly recorded in accordance with these protocols; (3) the proper application of the formula rate and procedures in these protocols; (4) the accuracy of data and consistency with the formula rate of the charges shown in the Annual Update; (5) the prudence of actual costs and expenditures; (6) the effect of any change to the underlying Uniform System of Accounts or the RUS Form 12; or (7) any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the formula.

E. AECC will cause to be posted all Informal Challenges from Interested Parties and AECC's response(s) to such Informal Challenges; except, however, if Informal Challenges or responses to Informal Challenges include material deemed by AECC to be confidential information, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement to be executed by AECC and the requesting party.

F. Any changes or adjustments to the Annual Update resulting from the Information Exchange and Informal Challenge processes that are agreed to by

AECC will be reported in the Informational Filing required pursuant to Section VI of these protocols and will be reflected in the Annual Update for the following Rate Year, as discussed in Section V of these protocols.

G. An Interested Party shall have until April 15 following the Review Period (unless such date is extended with the written consent of AECC to continue efforts to resolve the Informal Challenge) to make a Formal Challenge with FERC, which shall be served on AECC on the date of such filing as specified in Section IV.C(2) above. A Formal Challenge shall be filed in the same docket as AECC's Informational Filing discussed in Section VI of these protocols. AECC shall respond to the Formal Challenge by the deadline established by FERC. A party may not pursue a Formal Challenge if that party did not submit an Informal Challenge on any issue during the applicable Review Period.

H. In any proceeding initiated by FERC concerning the Annual Update or in response to a Formal Challenge, AECC shall bear the burden, consistent with section 205 of the Federal Power Act, of proving that it has correctly applied the terms of the formula rate consistent with these protocols, and that it followed the applicable requirements and procedures in these protocols, in that year's Annual Update. Nothing herein is intended to alter the burdens applied by FERC with respect to prudence challenges.

I. Except as specifically provided herein, nothing herein shall be deemed to limit in any way the right of AECC to file unilaterally, pursuant to Federal Power Act section 205 and the regulations thereunder, to change the formula rate or

any of its inputs (including, but not limited to, rate of return and transmission incentive rate treatment), or to replace the formula rate with a stated rate, or the right of any other party to request such changes pursuant to section 206 of the Federal Power Act and the regulations thereunder.

J. No party shall seek to modify the formula rate under the Challenge Procedures set forth in these protocols and the Annual Update shall not be subject to challenge by anyone for the purpose of modifying the formula rate. Any modifications to the formula rate will require, as applicable, a Federal Power Act section 205 or section 206 filing. The following formula rate inputs shall be stated values to be used in the formula rate until changed pursuant to a Federal Power Act section 205 or section 206 proceeding: (i) rate of return on equity; and (ii) depreciation and/or amortization rates.

K. Any Interested Party seeking changes to the application of the formula rate due to a change in the Uniform System of Accounts or the RUS Form 12, shall first raise the matter with AECC in accordance with this Section IV before pursuing a Formal Challenge.

**Section V. Changes to Annual Updates**

Any changes to the data inputs, including but not limited to revisions to AECC's RUS Form 12, or as the result of any FERC proceeding to consider the Annual Update, or as a result of the procedures set forth herein, shall be incorporated into the formula rate and the charges produced by the formula rate in the Annual Update for the next effective Rate Year. This reconciliation mechanism shall apply in lieu of mid-Rate Year adjustments.

Interest on any refund shall be calculated in accordance with 18 C.F.R. § 35.19a ("FERC's Interest Rate"), and interest on any surcharge shall be calculated using the lower of FERC's Interest Rate or AECC's short-term borrowing rate, if applicable.

**Section VI. Informational Filings**

A. By March 15 of each year, AECC shall submit to FERC an informational filing ("Informational Filing") of its Annual Update. This Informational Filing must include the information that is reasonably necessary to determine: (1) that input data under the formula rate are properly recorded in any underlying workpapers; (2) that AECC has properly applied the formula rate and these procedures; (3) the accuracy of data and the consistency with the formula rate of the Actual Transmission Revenue Requirement and rates under review; and (4) the extent of accounting changes that affect formula rate inputs. The Informational Filing must also describe any corrections or adjustments made during that period, and must describe all aspects of the formula rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures. Within five (5) days of such Informational Filing, SPP shall provide notice of the Informational Filing via the Formula Rate Posting Information Notification email exploder list and by posting the docket number assigned to each AECC's Informational Filing on the SPP OASIS.

B. Any challenges to the implementation of the AECC formula rate must be made through the Challenge Procedures described in Section IV of these protocols or in a separate complaint proceeding, and not in response to the Informational Filing.

Notes:

A. The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Worksheet with changes in future years.

Where appropriate, these changes will provide detail and linkage to updated Form 12 data requirements or other similar supporting documentation.

Additional line items or line deletions will not require FPA Section 205 or 206 filings. WFEC will

describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in WFEC's Implementation Protocols. WFEC may not change the columns or the formulas included in these Worksheets during the Annual Update.

52 Note:
A. The addition of new lines and the removal of outdated lines may be
53 necessary in order to accurately provide
information, and populate or remove data in the Worksheet with changes
54 in future years. Where appropriate, these
changes will provide detail and linkage to updated Form 12 data
55 requirements or other similar supporting
documentation. Additional line items or line deletions will not require FPA
56 Section 205 or 206 filings. WFEC will
describe such changes in the Annual Update, and the changes will be
57 subject to the review of Interested Parties under
the procedures set forth in WFEC's Implementation Protocols. WFEC
58 may not change the columns or the formulas
included in these Worksheets during
59 the Annual Update.

90 Notes:

A. Percentage recovery cannot be
91 added or changed absent approval from FERC

B. CWIP amounts should be
92 directly assigned to pricing zone on Summary

C. AFUDC ceases when CWIP is recovered in rate base.

93 No CWIP will be included in rate base absent FERC authorization.

Accounting procedures must be provided during
94 the annual update to ensure that there is no duplicate recovery of

95 CWIP and corresponding AFUDC

capitalized. Projects are transmission related only.

D. The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Worksheet with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 12 data requirements or other similar supporting documentation.

Additional line items will not require FPA Section 205 or 206 filings. WFEC will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in WFEC's Implementation Protocols. WFEC may not change the columns or the formulas included in these Worksheets during the Annual Update.

112 Note:

113 A. The addition of new lines and the removal of outdated lines may be

necessary in order to accurately
provide information, and populate or remove data in the Worksheet with changes in future years.
Where appropriate, these changes will provide detail and linkage to updated Form 12 data requirements or
other similar supporting documentation. Additional line items or line deletions will not require FPA Section
205 or 206 filings. WFEC will describe such changes in the Annual Update, and the changes will be
subject to the review of Interested Parties under the procedures set forth in WFEC's Implementation
Protocols. WFEC may not change the columns or the formulas included in these Worksheets during
the Annual Update.

| 4 | | **576.1-576.5 RTO/ISO Expense - Maintenance (sum lines 3a-3xx) (Note B)** | $0.00 | | $0.00 |

5 Notes
6 A. The total on line 2, column D must reconcile to the amounts shown on RUS12.
7 B. The total on line 4, column D must reconcile to the amounts shown on RUS12.
8 C. Amounts listed on lines 1a-1xx and 3a-3xx are only eligible for inclusion in SPP Zone 13 ATRR following a change in

accounting procedures to the RUS Form 12 or Uniform System of Accounts, which would classify amounts in these accounts as eligible for transmission rate recovery. To the extent that this occurs, WFEC may file a single-issue Section 205 filing with the Commission to seek recovery of these amounts in Zone 13 rates. WFEC may not include any costs absent authroization from FERC via a Section 205 or 206 filing.

D. The addition of new lines and the removal of outdated lines necessary to populate or remove data in the Worksheet with the changes in future years does not require a Federal Power Act section 205 or 206 filing. The addition or removal of columns and formulas contained with those columns cannot be changed absent a Federal Power Act section 205 or 206 filing.

# Western Farmers Electric Cooperative

# Transmission Formula Rate Implementation Protocols

## Section I. Introduction

1. WFEC's Formula Rate Template and these Protocols together comprise the filed rate for transmission service in Zone 13 of the SPP footprint. The Formula Rate will become effective for recovery of WFEC's ATRR upon the effective date authorized by FERC.

2. WFEC will follow the instructions specified in the Formula Rate to calculate its ATRR upon which the rates for NITS and PTP in SPP Zone 13 are based.

3. Recovery of costs associated with existing and new facilities will be consistent with Attachment AI and Attachment J, respectively, of the SPP Tariff, as well as with the Formula Rate.

4. Defined terms are set forth in section III below.

## Section II. Annual Update

1. The Formula Rate will be applicable to service on and after July 1 of each calendar year through June 30 of the following calendar year, subject to review, challenge and refunds or surcharges with interest, to the extent provided herein. The ATRR will be determined using the most recent historical calendar year financial and operating data.

2. On or before April 15 of each calendar year, WFEC will (a) calculate the ATRR for the Rate Year starting July 1 of that calendar year in accordance with the Formula Rate utilizing the most recent historical calendar year financial and operating data; (b) calculate, for illustrative purposes, the corresponding rates for NITS and PTP in SPP's Zone 13 for the Rate Year; and (c) provide its Annual Update to SPP and cause such information to be accessible on SPP's website and OASIS.

   If the date for posting the Annual Update falls on a weekend or a holiday, then the posting will be due on the next business day. If preparation and/or posting of the Annual Update is delayed past April 15 for reasons beyond WFEC's reasonable control, WFEC will post the Annual Update as soon thereafter as practical.

3. Concurrent with the Annual Update posting, WFEC will provide a notice of such posting to Interested Parties through the email Service List maintained by SPP.

4. The Annual Update will:

   (a) Include a workable populated Formula Rate Template with fully functional spreadsheets showing the calculation of the Annual Update with the most recent

historical calendar year financial and operating data along with the underlying work papers in native format with links and formulas intact, including sufficiently detailed work papers and supporting documentation for data;

(b) Be based on the independently audited books and records of WFEC for the most recent historical calendar year including its RUS Financial and Operating Report – Electric Power Supply (formerly known as the RUS Form No. 12);

(c) Include WFEC's completed RUS Financial and Operating Report – Electric Power Supply for the most recent calendar year;

(d) Provide sufficient information to enable Interested Parties to replicate the calculation of the results from the Formula Rate;

(e) Identify changes in accounting that affect the inputs to the Formula Rate or the resulting charges billed under the Formula Rate, including:

i. Any accounting changes, such as the initial implementation of an accounting standard or policy, the initial implementation of accounting practices for unusual or unconventional items where the RUS has not provided specific direction, or the correction of errors and prior period adjustments that impact the ATRR;

ii. Any items included in the Formula Rate at an amount other than a historical cost basis;

iii. Individual impact of any changes in section II.4(e)i above on charges billed under the Formula Rate; and

iv. Accounting changes related to any reorganization or merger transaction and the effect of those changes on inputs to the formula rate; and

(f) Not seek to modify the Formula Rate.

5. Any modification to the Formula Rate will require a filing under FPA Section 205 or FPA Section 206.

## Section III. Definitions

For purposes of these Protocols, the following capitalized terms will have the meanings set forth below. Capitalized terms not defined in these Protocols will have the meanings ascribed to them in the SPP Tariff.

(a) "Annual Transmission Revenue Requirement" or "ATRR" means the net revenue requirement for the Transmission Services for WFEC under the SPP Tariff (Zone 13) calculated, posted and filed in accordance with the Formula Rate.

(b) "Annual Meeting" means the meeting hosted by WFEC for the purpose of exchanging information with Interested Parties regarding the Annual Update.

(c) "Annual Update" means WFEC's annual posting of its Formula Rate, in a working Excel™ format, in accordance with these Protocols.

(d) "Business Day" means from 9:00 AM to 5:00 PM Central Prevailing Time other than weekends and federal holidays.

(e) "Critical Energy Infrastructure Information" or "CEII" has the meaning set forth in 18 C.F.R. § 388.113(c)(1).

(f) "Customers" means the customers taking NITS service, service under Grandfathered Agreements, or PTP service.

(g) "FERC" or "Commission" means the Federal Energy Regulatory Commission.

(h) "Final Posting" means the Annual Update information posted to the SPP website and OASIS with changes agreed to during the Review Period, as set forth in section IV.B.5 below.

(i) "Formal Challenge" means a challenge by an Interested Party to an aspect of the Annual Update that is filed with the Commission, and served on WFEC by electronic service on the date of such filing.

(j) "Formula Rate" means these Protocols together with the Formula Rate Template.

(k) "Formula Rate Template" means the WFEC transmission formula rate template incorporated in the SPP Tariff and accepted by FERC.

(l) "FPA" means Federal Power Act.

(m) "Grandfathered Agreement" means those agreements listed in Attachment W of the SPP Tariff to which WFEC is a party.

(n) "Informal Challenge" means written notification by an Interested Party to WFEC, during the Review Period, of any specific challenge to the Annual Update.

(o) "Information Request" means a written request submitted by an Interested Party to WFEC during the Review Period in accordance with these Protocols.

(p) "Informational Filing" means WFEC's annual filing with the Commission of the information specified in these Protocols.

(q) "Initial Posting" means the Annual Update data and information which WFEC posts, or causes to be posted, to the SPP website and OASIS in accordance with section II.2 of these Protocols.

(r) "Initial Posting Date" means the date on which the Initial Posting is actually made.

(s) "Interest" means interest calculated pursuant to 18 C.F.R. § 35.19a(a)(2)(iii), or successor regulation.

(t) "Interested Party" includes but is not limited to Customers under the SPP Tariff, state utility regulatory commissions, consumer advocacy agencies, and state attorneys general.

(u) "Mistake" means errors or omissions regarding the values inputted into the Formula Rate Template, such as arithmetic or computational errors, but excluding matters involving exercise of judgment or substantive differences of opinion regarding the derivation of an input that is more properly the subject of the Annual Update review process.

(v) "NITS" means Network Integration Transmission Service as defined in the SPP Tariff.

(w) "OASIS" means SPP's Open Access Same-Time Information System.

(x) "Protocols" means these Transmission Formula Rate Protocols, as they may be amended from time to time.

(y) "PTP" means Point-to-Point Transmission Service as defined in the SPP Tariff.

(z) "Rate Year" means July 1 of a given year through June 30 of the subsequent year.

(aa) "Review Period" means, unless otherwise extended in writing by WFEC, the period that begins on the Initial Posting Date and ends 60 days after the Initial Posting Date.

(bb) "RUS" means the Rural Utilities Service.

(cc) "Service List" means the email service list maintained by SPP for distribution of formula rate notices.

(dd) "SPP" means Southwest Power Pool, Inc.

(ee) "SPP Tariff" means SPP's Open Access Transmission Tariff.

(ff) "Stated Values" means inputs to the Formula Rate that are fixed and not subject to change in an Annual Update, including: (i) the base return on equity, (ii) any approved adders to the base return on equity, (iii) any return on equity incentives for SPP regional transmission projects, (iv) depreciation and amortization rates, and (v) the hypothetical equity ratio floor established in Docket No. ER16-1774-000.

(gg) "USoA" means the RUS Uniform System of Accounts.

(hh) "WFEC" means Western Farmers Electric Cooperative.

## Section IV. Review of Annual Update

## A. Annual Meeting

Within 20 calendar days of the Initial Posting Date, WFEC will host a meeting for Interested Parties to discuss the Annual Update. WFEC will provide notice of this meeting concurrently with the posting of the Annual Update accessible on SPP's OASIS. The notice will include the date, time and location of the Annual Meeting, and will be provided to Interested Parties through the email Service List maintained by SPP. The Annual Meeting will also be available by telephone and/or web access with all meeting materials provided electronically from the SPP OASIS.

## B. Information Exchange & Final Posting

1. During the Review Period, Interested Parties may submit to WFEC reasonable requests for information, data and work papers supporting the Annual Update that was posted on the Initial Posting Date that commenced such Review Period. Information Requests will be limited to that which is necessary to determine:

   (a) The extent or effect of an accounting change;

   (b) Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

   (c) The proper application of the Formula Rate and procedures in these Protocols;

   (d) The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

   (e) The effect of any change to the underlying USoA or Formula Rate Template; and

   (f) Any other information that may reasonably have a substantive effect on the calculation of the ATRR pursuant to the Formula Rate.

   Information Requests may not otherwise be directed to ascertain whether the Formula Rate is just and reasonable. WFEC will not claim that responses to Information Requests pursuant the Protocols are subject to any settlement confidentiality provision; however, WFEC may require that Interested Parties execute a non-disclosure agreement to obtain access to material that WFEC deems commercially sensitive or otherwise confidential or that WFEC asserts is CEII.

2. WFEC will make a good faith effort to respond to each Information Request within 7 Business Days of receipt of the Information Request.

3. WFEC will post, or cause to be posted, on a publicly accessible portion of the SPP OASIS all Information Requests from Interested Parties and WFEC's response(s) to such Information Requests, and a link to the website will be electronically served by WFEC on all Interested Parties via the email Service List maintained by SPP and provided to WFEC. If responses to Information Requests contain information deemed by WFEC to be commercially sensitive or otherwise confidential or CEII, such responses will not be publicly posted but will be made available by separate means to Interested Parties that have executed a non-disclosure agreement with WFEC.

4. Any changes or adjustments to the Annual Update resulting from the Information Request procedures that are agreed to by WFEC and resolved prior to the end of the Review Period will be reported in a revised and final posting of the Annual Update on the SPP OASIS.

5. Any changes or adjustments to the Annual Update resulting from the Information Request procedures that are agreed to by WFEC after the Review Period will be reported in the Informational Filing made with FERC and will be reflected in the Annual Update for the following Rate Year.

6. If the Review Period ends on a weekend or holiday, the Review Period will be extended to the next Business Day.

7. WFEC will post, or cause to be posted, the Final Posting on a publicly accessible portion of the SPP OASIS, and a link to the website will be electronically served by WFEC on all Interested Parties via the email Service List maintained by SPP. The Final Posting will be made within 15 days after the end of the Review Period (or the first Business Day thereafter if the 15th day falls on a weekend or holiday).

## C. Informal Challenge Procedures

1. Interested Parties will have until the conclusion of the Review Period to notify WFEC in writing (which may be electronically) of any Informal Challenges. The Informal Challenge must specify the inputs, supporting explanations, allocation calculations, or other information to which the Interested Party objects, and provide an appropriate explanation and documents to support the objection. WFEC will make a good faith effort to respond to any Informal Challenge within 20 calendar days of receipt of such Informal Challenge. WFEC, and if appropriate SPP, will appoint senior representatives to work with the Interested Party to resolve the Informal Challenge.

2. WFEC will post, or cause to be posted, on a publicly accessible portion of the SPP OASIS all Informal Challenges from Interested Parties and WFEC's responses to the Informal Challenges, and a link to the website will be electronically served by WFEC on all Interested Parties via the email Service List maintained by SPP. If responses to

Informal Challenges contain information deemed by WFEC to be commercially sensitive or otherwise confidential or CEII, such information will not be publicly posted but will be made available by separate means to Interested Parties that have executed a non-disclosure agreement with WFEC.

3. Any changes or adjustments to the Annual Update resulting from the Informal Challenge procedures that are agreed to by WFEC and resolved prior to the end of the Review Period will be reported in the Final Posting on the SPP OASIS. Any changes or adjustments to the Annual Update resulting from the Informal Challenge procedures that are agreed to by WFEC after the Review Period will be reported in the Informational Filing made with FERC and will be reflected in the Annual Update for the following Rate Year. An Interested Party that pursues or fails to pursue an Informal Challenge does not implicitly waive its rights to raise a Formal Challenge with FERC or file a complaint under FPA Section 206.

## D. Formal Challenges

1. A Formal Challenge will:

(a) Clearly identify the action or inaction which is alleged to violate the Formula Rate;

(b) Explain how the action or inaction violates the Formula Rate;

(c) Set forth the business, commercial, economic, or other issues presented by the action or inaction as they relate to or affect the Interested Party filing the Formal Challenge, including:

i. The extent or effect of an accounting change;

ii. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

iii. The proper application of the Formula Rate Template and the procedures in these Protocols;

iv. The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

v. The effect of any change to the underlying USoA or Formula Rate Template; and

vi. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate;

(d) Make a good faith effort to quantify the financial impact or burden (if any) created for the Interested Party filing the Formal Challenge as a result of the action or inaction;

(e) State whether the issues presented are pending in an existing proceeding in any forum in which the Interested Party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;

(f) State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that belief;

(g) Include all information and documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the Interested Party, including, but not limited to, contracts and affidavits; and

(h) State whether the Interested Party utilized the Informal Challenge procedures described in these Protocols with regard to any issue.

2. Formal Challenges will be filed with FERC, either in the FERC docket assigned to the Informational Filing or via Section 206 of the FPA, and must be served upon WFEC contemporaneously with the filing at FERC. Service can be accomplished by electronic mail in accordance with 18 C.F.R. § 385.2010(f)(3), by facsimile, express delivery or messenger to the individual listed as the contact person in WFEC's Informational Filing.

3. Any response by WFEC to a Formal Challenge must be submitted to the Commission within 30 days of the date of the filing of the Formal Challenge (unless the Commission prescribes or allows a different response date), and will be served on the filing party or parties and the Service List by electronic service on the date of such filing. If the last date for WFEC's response falls on a non-Business Day, then the deadline will be extended to the next Business Day.

4. In any Commission proceeding concerning a Formal Challenge (other than an FPA Section 206 complaint, investigation or other proceeding initiated by an Interested Party or the Commission), WFEC will bear the burden of demonstrating that it has properly applied the Formula Rate and that it has reasonably and accurately calculated the Annual Update.

## E. Modification of Formula Rate or Annual Update

1. Any modification to the Formula Rate will require a filing under FPA Section 205 or FPA Section 206. The procedures for the Annual Update, Informal Challenges, and Formal Challenges set forth in these Protocols may not be used to modify the Formula Rate.

2. The Stated Values in the Formula Rate may not be modified through the Annual Update, Informal Challenge, or Formal Challenge procedures. Modifications to the Stated Values require a filing with FERC pursuant to the FPA Section 205 or FPA Section 206.

3. If WFEC makes a correction to a Mistake during a Rate Year that would affect the ATRR for that Rate Year, such corrections and any resulting refunds or surcharges will be reflected in the Annual Update for the next Rate Year with Interest.

4. Any changes to the Formula Rate data inputs or to the Formula Rate that are the result of a Section 205 or Section 206 proceeding will be incorporated into the Formula Rate, and the charges produced by the Formula Rate, in the Annual Update for the next Rate Year.

5. Any refund required as a result of changes to the ATRR as provided in this section IV.E will include Interest calculated in accordance with 18 C.F.R. § 35.19a(a)(2).

## F. FERC Informational Filing

1. No later than 15 days after the Final Posting, WFEC will submit to FERC an informational filing of its Annual Update.

2. The Informational Filing must include the information that is reasonably necessary to determine:

   (a) That input data under the Formula Rate is properly recorded in any underlying work papers;

   (b) That WFEC has properly applied the Formula Rate Template and the procedures in these Protocols;

   (c) The accuracy of the data and the consistency with the Formula Rate of the ATRR and rates under review; and

   (d) The extent of accounting changes that affect Formula Rate inputs.

3. The Informational Filing must also describe all aspects of the Formula Rate or its inputs that are the subject of an ongoing dispute under the Informal Challenge or Formal Challenge procedures.

4. Unless otherwise directed by FERC, WFEC will submit all Informational Filings in the same docket assigned to WFEC's first Informational Filing.

5. Contemporaneously with the submission to FERC of the Informational Filing, WFEC will provide notification of the Informational Filing to Interested Parties via the email Service List maintained by SPP and by posting, or causing to be posted, the docket number assigned to the Informational Filing on SPP's OASIS.

# Section V. Joint SPP Transmission Owners' Meeting

As applicable, each year WFEC will exercise commercially reasonable efforts to coordinate with other SPP transmission owners using formula rates to establish revenue requirements for recovery of the costs of transmission projects that utilize the same regional cost sharing

mechanism and transmission owners that own inter-regional projects whose costs are allocated in part to SPP members, and hold a joint informational meeting to enable all Interested Parties to understand how those transmission owners are implementing their formula rates for recovering the costs of such projects. Notice of joint informational meetings, including the time, date, and location, will be posted on the SPP OASIS and distributed to Interested Parties by WFEC via the email Service List maintained by SPP no less than 7 calendar days prior to such meetings.

## Section VI. WFEC Example Schedule

**Example Schedule - Implementation Protocols**

| | Date | Days Since Initial Posting |
|---|---|---|
| Initial Posting (SPP Website and OASIS) | April 15 | - |
| Annual Meeting, Interested Parties | April 30 | 15 |
| Interested Parties Review Period ending | June 15 | 61 |
| Final Informal Challenges Due | June 30 | 61 |
| Final Posting (SPP Website and OASIS) | June 30 | 76 |
| Informational Filing With FERC | July 15 | |
| Rate Year | July 1 - June 30 | |

The foregoing schedule is for illustrative purposes only, and is not intended to modify the filing and other dates outlined in these Protocols.

Formula Rate Template for SPP Zone 19 Transmission
Attachment H (Utilizing EIA Form 412 - Nonlevelized)
12 Months Ended June 30, 2XXX

Notes:

A Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 8, column 5.
Prepayments are the electric related prepayments booked to Account No. 165.

B Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year.
Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template,
since they are recovered elsewhere.

C Include only the amount from Accounts 427, 428, 429 and 430.

D Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation and Acquisition Adjustment amounts unless authorized by FERC.

E Schedules 1a and 12-FERC charges should not be included in O&M recovered under this formula rate.

F If the utility has more employees assigned to A&G than to all other functions combined, set the W&S allocator equal to the amount of transmission plant

| | |
|---|---|
| | includable in ISO rates divided by the sum of the total gross production, transmission, and distribution plant. |
| G | The weighted average cost of capital is fixed and cannot be changed absent a 205 or 206 filing with FERC. The weighted average cost of capital includes the incentive adder of 50 basis points approved in Docket No. ER17-426. |

Notes:

A Gross Transmission Plant is that identified on page 2 line 2 of Attachment H and is inclusive of all CWIP.

B Net Transmission Plant is that identified on page 2 line 14 of Attachment H and is inclusive of all CWIP.

C Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1 and includes all CWIP This value includes subsequent capital investments required to maintain the facilities to their original capabilities. Plant values are from Schedule 1a- Line 2.

D Net Plant is derived from Schedule 1a- Line 6 and includes all CWIP

Notes:

A Only amounts included in the calculation of Vermillion's SPP Zone 19 revenue requirement should be included. The amounts credited shall only include amounts directly received from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this formula rate template.

B Includes income related only to transmission facilities, such as pole attachments, rentals and special use.

Notes:

A Removes transmission plant determined to be state-jurisdictional by Commission order according to the seven-factor test (until account balances are adjusted to reflect application of seven-factor test).

B Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

# PROTOCOLS
# FOR
# DENISON MUNICIPAL UTILITIES'
# HISTORIC COST BASED FORMULA RATE

## Section I. Applicability

The formula rate template ("Template") and these formula rate protocols ("Protocols") together comprise the filed rate ("Formula Rate") of Denison Municipal Utilities ("DMU") contained in the Southwest Power Pool, Inc. ("SPP") Open Access Transmission Tariff ("Tariff") for determining the transmission revenue requirement for DMU on an annual basis. DMU shall follow the instructions specified in the Formula Rate to calculate annually its Annual Transmission Revenue Requirement ("ATRR"), which is based on actual data from the prior year. The ATRR derived under the Formula Rate shall be applicable to services on and after June 1 of a given year through May 31 of the subsequent year (the "Rate Year").

## Section II. Annual Review Procedures[1]

A. **Posting and Content of Annual Update**: By May 1 each year, DMU shall post[2] a populated version of its Template with an ATRR for the upcoming Rate Year based on historic data from the previous year ("Annual Update"). DMU shall coordinate with SPP to notify Interested Parties[3] of the website address where such information is posted via the SPP "Formula Rate Posting Information Notification" email exploder list within one business day of the posting.[4] Each Annual Update shall:

1. Include a workable data-populated Template and underlying work papers in native format with all formulae intact;
2. Be based on and include DMU's audited financial statements for the prior fiscal year;
3. Provide the Formula Rate calculations and all inputs thereto, as well as supporting documentation and work papers for data that are used in the Template that are not otherwise available in audited financial statements, such that Interested Parties may replicate the calculation of the results;
4. With each Annual Update, DMU will include a list of any new facilities included since the prior Calendar Year's Annual Update. For example, an additional substation, breaker, other major substation equipment, or additional transmission line miles would constitute new facilities and be listed. The list will indicate the Attachment AI Guidance Document criteria for each facility supporting inclusion as well as the beginning-of-year and end-of-year balances associated with that facility. This provision in no way limits the rights of any party to challenge inclusion of new facilities;
5. Identify all material adjustments made to the audited financial statements data in determining formula inputs (including page and line numbers);
6. Identify any Accounting Changes,[5] including:
    i. The initial implementation of an accounting standard or policy;
    ii. The initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific accounting direction;
    iii. Correction of errors and prior period adjustments;

iv. The implementation of new estimation methods or policies that change prior estimates; and
v. Changes to income tax elections (if applicable);

7. Identify items included in the Template at an amount other than on a historic cost basis (e.g., fair value adjustments);
8. Identify any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs to the Template; and
9. Provide, for each item identified pursuant to items II.A.6-8 above, a narrative explanation of the individual impact of such changes on the Template.

B. **Annual Update Meeting**: By September 1 of each year, DMU shall hold an open meeting ("Annual Update Meeting") for Interested Parties. No less than seven calendar days prior to the Annual Update Meeting, DMU shall provide notice on the DMU Related Posting section of the SPP OASIS of the time, date, and location of the Annual Update Meeting. In addition, DMU shall coordinate with SPP to notify Interested Parties of the website address where such information is posted via the SPP "Formula Rate Posting Information Notification" email exploder list within one business day of the posting. DMU shall provide remote access for participation of Interested Parties at such meetings. The Annual Update Meeting shall (i) permit DMU to explain and clarify its Template and (ii) provide Interested Parties an opportunity to seek information and clarifications from DMU about the Template.

C. **Joint Informational Meetings For Regionally Cost Shared Projects:** If DMU constructs any transmission project that utilizes a regional cost sharing mechanism, it shall participate in a joint informational meeting with other transmission owners to establish revenue requirements for recovery of costs of projects subject to the same regional cost allocation. Notice of joint informational meetings shall be posted on the SPP website and distributed to Interested Parties via the SPP "Formula Rate Posting Information Notification" email exploder list no less than seven calendar days prior to such meeting.

D. **Information Exchange Procedures:** Once DMU has posted the Annual Update, Interested Parties may send reasonable information requests ("Information Requests") to DMU.

1. **Scope**: Information Requests shall not be directed to ascertaining whether the Formula Rate is just and reasonable and rather shall be limited to what is necessary to determine:
    i. The extent or effect of an accounting change;
    ii. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;
    iii. The proper application of the Formula Rate;
    iv. The accuracy of data and consistency with the Formula Rate of the calculations shown in the Annual Update;
    v. The prudence of actual costs and expenditures;

vi. The effect of any change to the underlying Uniform System of Accounts or the Template; or
vii. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

2. **Last day for Information Requests**: The last day for Interested Parties to submit Information Requests to DMU is September 10.
3. **Responses**: DMU shall make a good faith effort to respond to information requests within ten business days of receipt of such requests. DMU shall respond to all information requests received by September 10 by no later than September 20.
4. **Posting of Information Requests and Responses**: DMU will cause to be posted on the DMU Related Postings section of the SPP OASIS all information requests from Interested Parties regarding the Annual Update and DMU's response(s) to such requests; except, however, if they include material deemed by DMU to be confidential, commercially sensitive, or that contains Critical Energy Infrastructure Information as that term is defined in 18 CFR§ 388.113(c)(1) in which case such information will not be publicly posted but will be made available to requesting parties pursuant to a non-disclosure agreement to be executed by DMU and the requesting party. In addition, DMU shall coordinate with SPP to notify Interested Parties of the website address where such information is posted via the SPP "Formula Rate Posting Information Notification" email exploder list within one business day of the posting. DMU shall not claim that non-confidential responses to information requests provided pursuant to these Protocols are subject to any settlement privilege in any subsequent FERC proceeding addressing DMU's Annual Update.

E. **Challenge Procedures**

1. **Scope of Informal and Formal Challenges**: No party shall seek to modify the Formula Rate under the Challenge Procedures set forth in these Protocols and the Formula Rate shall not be subject to challenge by anyone for the purpose of modifying the Template. Any modifications to the Formula Rate will require, as applicable, a Federal Power Act section 205 or section 206 filing. Failure to pursue at least one issue through an Informal Challenge shall bar pursuit of any issue with respect to that Annual Update, but shall not bar pursuit of such issue or the lodging of a Formal Challenge as to such issue as it relates to a subsequent Annual Update. Any Interested Party that pursues at least one issue through an Informal Challenge may pursue other, new issues through Formal Challenges with respect to the same Annual Update. Regardless of whether an Interested Party pursues or fails to pursue Informal or Formal Challenges, an Interested Party may file a complaint under section 206 of the Federal Power Act at any time. Informal and Formal Challenges shall be limited to all issues that may be necessary to determine:
    i. The extent or effect of an accounting change;
    ii. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;
    iii. The proper application of the Formula Rate;

iv. The accuracy of data and consistency with the Formula Rate of the calculations shown in the Annual Update;
v. The prudence of actual costs and expenditures;
vi. The effect of any change to the underlying Uniform System of Accounts or the Template; or
vii. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

2. **Informal Challenges**: Interested Parties shall have until October 1 to notify DMU in writing (including electronically) of any specific Informal Challenges.
   i. **Specification**: A party submitting an Informal Challenge to DMU must specify the inputs, supporting explanations, allocations, calculations, or other information to which it objects, and provide an appropriate explanation and documents to support its challenge.
   ii. **Notice**: DMU shall share Informal Challenges via the "Formula Rate Posting Information Notification" exploder list and on the DMU Related Posting section of the SPP OASIS. However, if an Informal Challenge includes material deemed by DMU to be confidential information, DMU will provide written notice to all Interested Parties of such challenge, but the confidential information will not be publicly posted and will be made available to requesting parties pursuant to a confidentiality agreement to be executed by DMU and the requesting party.
   iii. **Response**: within fifteen calendar days of receiving an Informal Challenge, DMU shall post its response on the DMU Related Posting section of the SPP OASIS and serve it on Interested Parties via the "Formula Rate Posting Information Notification" email exploder list (unless it includes material deemed by DMU to be confidential, commercially sensitive, or that contains Critical Energy Infrastructure Information as that term is defined in 18 CFR§ 388.113(c)(1), in which case DMU will notify Interested Parties of the availability of the response, but such information will not be publicly posted and will be made available to requesting parties pursuant to a non-disclosure agreement to be executed by DMU and the requesting party). The response shall specify the extent to which DMU agrees or disagrees with the position raised in the Informal Challenge, and what, if any, modifications to the Annual Update will result. If DMU disagrees with the issue(s) raised in the Informal Challenge, it shall provide supporting documentation with its response.
   iv. **Negotiations**: DMU and party lodging the Informal Challenge shall make good faith efforts to resolve the Informal Challenge through negotiations and shall allow any Interested Party to participate in such negotiations. Any Interested Party that has filed an Informal Challenge to the Annual Update which has not been resolved by December 1 may then file with FERC a Formal Challenge to Annual Update, as noted below.
   v. **Modifications**: If agreed upon modifications to the Annual Update result in changes to the ATRR, such changes shall be incorporated pursuant to Section IV ("Changes to the ATRR") below.

3. **Formal Challenges:** An Interested Party shall have until December 1 to file a Formal Challenge with FERC. A party may not pursue a Formal Challenge if that party did not submit an Informal Challenge on at least one issue. Having submitted an Informal Challenge on at least one issue, an Interested Party may pursue a Formal Challenge on other issues.
    i. **Specification**: A Formal Challenge shall:
        1. Clearly identify the action or inaction which is alleged to violate the Formula Rate, explain the alleged violation, and make a good faith effort to quantify the financial impact or burden (if any) on the filing party as a result of the alleged violation;
        2. State whether the issues presented are pending in an existing FERC proceeding or a proceeding in any other forum in which the filing party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;
        3. State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that relief;
        4. Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the filing party, including, but not limited to, contracts and affidavits; and
        5. State whether the filing party utilized the Informal Challenge procedures above to dispute the alleged violation raised by the Formal Challenge, and, if not, describe why not.
    ii. **Service**. The party filing the Formal Challenge must serve a copy of it on DMU via email simultaneous with filing at FERC. Simultaneous service can be accomplished by electronic mail in accordance with 18 C.F.R. § 385.2010(f)(3). The party filing the Formal Challenge shall serve the individual listed as the contact person on DMU's Informational Filing.
    iii. **Response**: DMU shall respond to the Formal Challenge by the deadline established by FERC.
    iv. **Burden of Proof**: In any proceeding initiated by FERC concerning the Annual Update or in response to a Formal Challenge, DMU shall bear the burden, consistent with section 205 of the Federal Power Act, of proving that it has correctly applied the Formula Rate consistent with these Protocols, and that it followed the applicable requirements and procedures in these Protocols. Nothing herein is intended to alter the burdens applied by FERC with respect to prudence challenges.

---

[1] All the dates in this section II apply unless extended with the written consent of DMU or by Federal Energy Regulatory Commission ("FERC") order. In the event that a date falls on a weekend or holiday recognized by FERC, the deadline shall be extended to the next business day.

[2] Specifically, DMU shall cause an electronic version of the Annual Update to be posted on the SPP Open Access Same Time Information System ("OASIS").

[3] "Interested Party" includes, but is not limited to, Zone 19 customers under the SPP Open Access Transmission Tariff ("OATT"), state utility regulatory commissions, consumer advocacy agencies, and state attorneys general.

[4] Any delay in serving notice on the "Formula Rate Posting Information Notification" email exploder list shall result in an equal extension of all other deadlines under this section II.

[5] An "Accounting Change" is any change in accounting that materially affects inputs to the formula rate or the resulting charges billed under the formula rate.

**Section III. Informational Filings at FERC**

1. **Submission of Informational Filing**: By March 15 of each year, DMU shall submit to FERC an informational filing ("Informational Filing") summarizing the previous year's Annual Update process. DMU shall submit each year's Informational Filing in the same docket assigned to its initial informational filing (subject to the determination of the FERC's Secretary).
2. **Scope**: The transmittal letter accompanying the Informational Filing shall inform FERC that the Informational Filing is not intended to be subject to FERC's notice requirements and that it is not being submitted for the purpose of having FERC assign a docket number to the filing nor for the purpose of obtaining FERC acceptance, approval or other review of the filing.
3. **Notice**: DMU shall provide notification of each Informational Filing by causing it to be posted on the DMU Related Posting section of the SPP OASIS and coordinating with SPP to notify Interested Parties of the sub-docket number assigned to each Informational Filing and the website address where such information is posted via the SPP "Formula Rate Posting Information Notification" email exploder list within five calendar days of FERC assigning such a number.
4. **Content of Informational Filing:**
    a. The Informational Filing must include the information that is reasonably necessary to determine:
        i. That input data under the Formula Rate is properly recorded in any underlying work papers;.
        ii. That DMU has properly applied the Formula Rate;
        iii. The accuracy of the data and the consistency with the Formula Rate of the ATRR and rates under review; and,
        iv. The extent of accounting changes that affect Formula Rate inputs.
    b. Any changes or adjustments to the Annual Update resulting from the Information Exchange and Informal Challenge processes that are agreed to by DMU will be reported in the Informational Filing. The Informational Filing must also describe any corrections or adjustments made and must describe all aspects of the Formula Rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures.

**Section IV. Changes to the ATRR**

Any changes to the ATRR resulting from the outcome of a FERC proceeding or otherwise agreed to by DMU shall be incorporated into the Annual Update for the next Rate Year. This reconciliation mechanism shall apply in lieu of mid-Rate Year adjustments. Interest on any refund or surcharge shall be calculated in accordance with 18 C.F.R. §35.19a of FERC's regulations. Should such a reconciliation mechanism be applied, DMU will provide, in its Annual Update, supporting workpapers and calculations that sufficiently explain the mechanism. The base return on equity and the asset depreciation and amortization rates set forth in DMU's Formula Rate will remain fixed and may not be changed absent a filing pursuant to section 205

or section 206 of the Federal Power Act. If DMU corrects an Error[6] in its financial information during a Rate Year that would affect the ATRR for that Rate Year, such corrections and any resulting refunds or surcharges shall be reflected in the Annual Update for the next Rate Year with interest computed in accordance with section 7 of the SPP Tariff.

---

[6] Error shall mean errors or omissions regarding the values inputted into the Formula Rate template, such as arithmetic or computational errors. Error shall not include matters involving exercise of judgment or substantive differences of opinion regarding the derivation of an input.

## Summary Timeline of Annual Procedures for DMU's Historic Cost Based Formula Rate Under a June 1 – May 31 Rate Year

| | |
|---|---|
| **By May 1** | Post Annual Update; first day to submit Information Requests |
| **June 1** | Rate Year Begins |
| **By September 1** | Annual Update Meeting |
| **September 10** | Last day to submit Information Requests |
| **October 1** | Last day to submit Informal Challenges |
| **December 1** | Last day to file Formal Challenges |
| **By March 15** | Submit Informational Filing at FERC (summarizing previous year's Annual Update process) |

Formula Rate Template for SPP Zone 19 Transmission
Attachment H (Utilizing EIA Form 412 - Nonlevelized)
12 Months Ended December 31, 2XXX

Notes:

A Cash Working Capital assigned to transmission is one-eighth of O&M

| | |
|---|---|
| | allocated to transmission at page 3, line 9, column E. |
| | Prepayments are the electric related prepayments booked to Account No. 165. |
| B | Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere. |
| C | Include only the amount from Accounts 427, 428, 429 and 430. |
| D | Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation and Acquisition Adjustment amounts unless authorized by FERC. |
| E | Schedules 1a and 12-FERC charges should not be included in O&M recovered under this formula rate. |
| F | If the utility has more employees assigned to A&G than to all other functions combined, set the W&S allocator equal to the amount of transmission plant includable in ISO rates divided by the sum of the total gross production, transmission, and distribution plant. |
| G | The cost of proprietary capital is fixed and cannot be changed absent a 205 or 206 filing with FERC. The cost of long-term debt is calculated by dividing long-term interest (line 18, col C) by the amount of long-term debt (line 19, col C). The cost of proprietary capital includes the incentive adder of 50 basis points approved in Docket No. ER17-428. |
| H | Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements. |

Notes:

A Gross Transmission Plant is that identified on page 2 line 2 of Attachment H and is inclusive of all CWIP.

B Net Transmission Plant is that identified on page 2 line 14 of Attachment H and is inclusive of all CWIP.

C Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1 and includes all CWIP This value includes subsequent capital investments required to maintain the facilities to their original capabilities. Plant values are from Schedule 1a- Line 2.

D Net Plant is derived from Schedule 1a- Line 6 and includes all CWIP

# PROTOCOLS

# FOR THE HISTORIC COST BASED FORMULA RATE OF VERMILLION LIGHT & POWER

## Section I. Applicability

The formula rate template ("Template") and these formula rate protocols ("Protocols") together comprise the filed rate ("Formula Rate") of Vermillion Light & Power ("VLP") contained in the Southwest Power Pool, Inc. ("SPP") Open Access Transmission Tariff ("Tariff") for determining the transmission revenue requirement for VLP on an annual basis. VLP shall follow the instructions specified in the Formula Rate to calculate annually its Annual Transmission Revenue Requirement ("ATRR"), which is based on actual data from the prior year. The ATRR derived under the Formula Rate shall be applicable to services on and after June 1 of a given year through May 31 of the subsequent year (the "Rate Year").

## Section II. Annual Review Procedures[1]

A. **Posting and Content of Annual Update**: By May 1 each year, VLP shall post[2] a populated version of its Template with an ATRR for the upcoming Rate Year based on historic data from the previous year ("Annual Update"). VLP shall coordinate with SPP to notify Interested Parties[3] of the website address where such information is posted via the SPP "Formula Rate Posting Information Notification" email exploder list within one business day of the posting.[4] Each Annual Update shall:

1. Include a workable data-populated Template and underlying work papers in native format with all formulae intact;
2. Be based on and include VLP's audited financial statements for the prior fiscal year;
3. Provide the Formula Rate calculations and all inputs thereto, as well as supporting documentation and work papers for data that are used in the Template that are not otherwise available in audited financial statements, such that Interested Parties may replicate the calculation of the results;
4. With each Annual Update, VLP will include a list of any new facilities included since the prior Calendar Year's Annual Update. For example, an additional

substation, breaker, other major substation equipment, or additional transmission line miles would constitute new facilities and be listed. The list will indicate the Attachment AI Guidance Document criteria for each facility supporting inclusion as well as the beginning-of-year and end-of-year balances associated with that facility. This provision in no way limits the rights of any party to challenge inclusion of new facilities, including but not limited to the potential inclusion of any loop extension associated with the Northeast Substation;

5. Identify all material adjustments made to the audited financial statements data in determining formula inputs (including page and line numbers);
6. Identify any Accounting Changes,[5] including:
    i. The initial implementation of an accounting standard or policy;
    ii. The initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific accounting direction;
    iii. Correction of errors and prior period adjustments;
    iv. The implementation of new estimation methods or policies that change prior estimates; and
    v. Changes to income tax elections (if applicable);
7. Identify items included in the Template at an amount other than on a historic cost basis (e.g., fair value adjustments);
8. Identify any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs to the Template; and
9. Provide, for each item identified pursuant to items II.A.6-8 above, a narrative explanation of the individual impact of such changes on the Template.

B. **Annual Update Meeting**: By September 1 of each year, VLP shall hold an open meeting ("Annual Update Meeting") for Interested Parties. No less than seven calendar days prior to the Annual Update Meeting, VLP shall provide notice on the VLP Related Posting section of the SPP OASIS of the time, date, and location of the Annual Update Meeting. In addition, VLP shall coordinate with SPP to notify Interested Parties of the website

address where such information is posted via the SPP "Formula Rate Posting Information Notification" email exploder list within one business day of the posting. VLP shall provide remote access for participation of Interested Parties at such meetings. The Annual Update Meeting shall (i) permit VLP to explain and clarify its Template and (ii) provide Interested Parties an opportunity to seek information and clarifications from VLP about the Template.

C. **Joint Informational Meetings For Regionally Cost Shared Projects:** If VLP constructs any transmission project that utilizes a regional cost sharing mechanism, it shall participate in a joint informational meeting with other transmission owners to establish revenue requirements for recovery of costs of projects subject to the same regional cost allocation. Notice of joint informational meetings shall be posted on the SPP OASIS and distributed to Interested Parties via the SPP "Formula Rate Posting Information Notification" email exploder list no less than seven calendar days prior to such meeting.

D. **Information Exchange Procedures:** Once VLP has posted the Annual Update, Interested Parties may send reasonable information requests ("Information Requests") to VLP.

1. **Scope**: Information Requests shall not be directed to ascertaining whether the Formula Rate is just and reasonable and rather shall be limited to what is necessary to determine:
    i. The extent or effect of an accounting change;
    ii. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;
    iii. The proper application of the Formula Rate;
    iv. The accuracy of data and consistency with the Formula Rate of the calculations shown in the Annual Update;
    v. The prudence of actual costs and expenditures;
    vi. The effect of any change to the underlying Uniform System of Accounts or the Template; or

vii. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

2. **Last day for Information Requests**: The last day for Interested Parties to submit Information Requests to VLP is September 10.
3. **Responses**: VLP shall make a good faith effort to respond to information requests within ten business days of receipt of such requests. VLP shall respond to all information requests received by September 10 by no later than September 20.
4. **Posting of Information Requests and Responses**: VLP will cause to be posted on the VLP Related Postings section of the SPP OASIS all information requests from Interested Parties regarding the Annual Update and VLP's response(s) to such requests; except, however, if they include material deemed by VLP to be confidential, commercially sensitive, or that contains Critical Energy Infrastructure Information as that term is defined in 18 CFR§ 388.113(c)(1) in which case such information will not be publicly posted but will be made available to requesting parties pursuant to a non-disclosure agreement to be executed by VLP and the requesting party. In addition, VLP shall coordinate with SPP to notify Interested Parties of the website address where such information is posted via the SPP "Formula Rate Posting Information Notification" email exploder list within one business day of the posting. VLP shall not claim that non-confidential responses to information requests provided pursuant to these Protocols are subject to any settlement privilege in any subsequent FERC proceeding addressing VLP's Annual Update.

E. **Challenge Procedures**

1. **Scope of Informal and Formal Challenges**: No party shall seek to modify the Formula Rate under the Challenge Procedures set forth in these Protocols and the Formula Rate shall not be subject to challenge by anyone for the purpose of modifying the Template. Any modifications to the Formula Rate will require, as applicable, a Federal Power Act section 205 or section 206 filing. Failure to pursue at least one issue through an Informal Challenge shall bar pursuit of any issue with respect to that Annual Update, but shall not bar pursuit of such issue or

the lodging of a Formal Challenge as to such issue as it relates to a subsequent Annual Update. Any Interested Party that pursues at least one issue through an Informal Challenge may pursue other, new issues through Formal Challenges with respect to the same Annual Update. Regardless of whether an Interested Party pursues or fails to pursue Informal or Formal Challenges, an Interested Party may file a complaint under section 206 of the Federal Power Act at any time. Informal and Formal Challenges shall be limited to all issues that may be necessary to determine:

i. The extent or effect of an accounting change;
ii. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;
iii. The proper application of the Formula Rate;
iv. The accuracy of data and consistency with the Formula Rate of the calculations shown in the Annual Update;
v. The prudence of actual costs and expenditures;
vi. The effect of any change to the underlying Uniform System of Accounts or the Template; or
vii. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

2. **Informal Challenges**: Interested Parties shall have until October 1 to notify VLP in writing (including electronically) of any specific Informal Challenges.
    i. **Specification**: A party submitting an Informal Challenge to VLP must specify the inputs, supporting explanations, allocations, calculations, or other information to which it objects, and provide an appropriate explanation and documents to support its challenge.
    ii. **Notice**: VLP shall share Informal Challenges via the "Formula Rate Posting Information Notification" exploder list and on the VLP Related Posting section of the SPP OASIS. However, if an Informal Challenge includes material deemed by VLP to be confidential information, VLP will provide written notice to all Interested Parties of such challenge, but the confidential information will not be publicly posted and will be made

available to requesting parties pursuant to a confidentiality agreement to be executed by VLP and the requesting party.

iii. **Response**: within fifteen calendar days of receiving an Informal Challenge, VLP shall post its response on the VLP Related Posting section of the SPP OASIS and serve it on Interested Parties via the "Formula Rate Posting Information Notification" email exploder list (unless it includes material deemed by VLP to be confidential, commercially sensitive, or that contains Critical Energy Infrastructure Information as that term is defined in 18 CFR§ 388.113(c)(1), in which case VLP will notify Interested Parties of the availability of the response, but such information will not be publicly posted and will be made available to requesting parties pursuant to a non-disclosure agreement to be executed by VLP and the requesting party). The response shall specify the extent to which VLP agrees or disagrees with the position raised in the Informal Challenge, and what, if any, modifications to the Annual Update will result. If VLP disagrees with the issue(s) raised in the Informal Challenge, it shall provide supporting documentation with its response.

iv. **Negotiations**: VLP and party lodging the Informal Challenge shall make good faith efforts to resolve the Informal Challenge through negotiations and shall allow any Interested Party to participate in such negotiations. Any Interested Party that has filed an Informal Challenge to the Annual Update which has not been resolved by December 1 may then file with FERC a Formal Challenge to Annual Update, as noted below.

v. **Modifications**: If agreed upon modifications to the Annual Update result in changes to the ATRR, such changes shall be incorporated pursuant to Section IV ("Changes to the ATRR") below.

3. **Formal Challenges:** An Interested Party shall have until December 1 to file a Formal Challenge with FERC. A party may not pursue a Formal Challenge if that party did not submit an Informal Challenge on at least one issue. Having submitted an Informal Challenge on at least one issue, an Interested Party may pursue a Formal Challenge on other issues.

i. **Specification**: A Formal Challenge shall:
    1. Clearly identify the action or inaction which is alleged to violate the Formula Rate, explain the alleged violation, and make a good faith effort to quantify the financial impact or burden (if any) on the filing party as a result of the alleged violation;
    2. State whether the issues presented are pending in an existing FERC proceeding or a proceeding in any other forum in which the filing party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;
    3. State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that relief;
    4. Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the filing party, including, but not limited to, contracts and affidavits; and
    5. State whether the filing party utilized the Informal Challenge procedures above to dispute the alleged violation raised by the Formal Challenge, and, if not, describe why not.

ii. **Service**. The party filing the Formal Challenge must serve a copy of it on VLP via email simultaneous with filing at FERC. Simultaneous service can be accomplished by electronic mail in accordance with 18 C.F.R. § 385.2010(f)(3). The party filing the Formal Challenge shall serve the individual listed as the contact person on VLP's Informational Filing.

iii. **Response**: VLP shall respond to the Formal Challenge by the deadline established by FERC.

iv. **Burden of Proof**: In any proceeding initiated by FERC concerning the Annual Update or in response to a Formal Challenge, VLP shall bear the burden, consistent with section 205 of the Federal Power Act, of proving that it has correctly applied the Formula Rate consistent with these Protocols, and that it followed the applicable requirements and procedures in these Protocols. Nothing herein is intended to alter the burdens applied by FERC with respect to prudence challenges.

_____

1 All the dates in this section II apply unless extended with the written consent of VLP or by Federal Energy Regulatory Commission ("FERC") order. In the event that a date falls on a weekend or holiday recognized by FERC, the deadline shall be extended to the next business day.

2 Specifically, VLP shall cause an electronic version of the Annual Update to be posted on the SPP Open Access Same-Time Information System ("OASIS").

3 "Interested Party" includes, but is not limited to, Zone 19 customers under the SPP Open Access Transmission Tariff ("OATT"), state utility regulatory commissions, consumer advocacy agencies, and state attorneys general.

4 Any delay in serving notice on the "Formula Rate Posting Information Notification" email exploder list shall result in an equal extension of all other deadlines under this section II.

5 An "Accounting Change" is any change in accounting that materially affects inputs to the formula rate or the resulting charges billed under the formula rate.

**Section III. Informational Filings at FERC**

1. **Submission of Informational Filing**: By March 15 of each year, VLP shall submit to FERC an informational filing ("Informational Filing") summarizing the previous year's Annual Update process. VLP shall submit each year's Informational Filing in the same docket assigned to its initial informational filing (subject to the determination of the FERC's Secretary).
2. **Scope**: The transmittal letter accompanying the Informational Filing shall inform FERC that the Informational Filing is not intended to be subject to FERC's notice requirements and that it is not being submitted for the purpose of having FERC assign a docket number to the filing nor for the purpose of obtaining FERC acceptance, approval or other review of the filing.
3. **Notice**: VLP shall provide notification of each Informational Filing by causing it to be posted on the VLP Related Posting section of the SPP OASIS and coordinating with SPP to notify Interested Parties of the sub-docket number assigned to each Informational Filing and the website address where such information is posted via the SPP "Formula Rate Posting Information Notification" email exploder list within five calendar days of FERC assigning such a number.
4. **Content of Informational Filing:**

a. The Informational Filing must include the information that is reasonably necessary to determine:
    i. That input data under the Formula Rate is properly recorded in any underlying work papers;
    ii. That VLP has properly applied the Formula Rate;
    iii. The accuracy of the data and the consistency with the Formula Rate of the ATRR and rates under review; and,
    iv. The extent of accounting changes that affect Formula Rate inputs.
b. Any changes or adjustments to the Annual Update resulting from the Information Exchange and Informal Challenge processes that are agreed to by VLP will be reported in the Informational Filing. The Informational Filing must also describe any corrections or adjustments made and must describe all aspects of the Formula Rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures.

**Section IV. Changes to the ATRR**

Any changes to the ATRR resulting from the outcome of a FERC proceeding or otherwise agreed to by VLP shall be incorporated into the Annual Update for the next Rate Year. This reconciliation mechanism shall apply in lieu of mid-Rate Year adjustments. Interest on any refund or surcharge shall be calculated in accordance with 18 C.F.R. §35.19a of FERC's regulations. Should such a reconciliation mechanism be applied, VLP will provide, in its Annual Update, supporting workpapers and calculations that sufficiently explain the mechanism. The base return on equity and the asset depreciation and amortization rates set forth in VLP's Formula Rate will remain fixed and may not be changed absent a filing pursuant to section 205 or section 206 of the Federal Power Act. If VLP corrects an Error[6] in its financial information during a Rate Year that would affect the ATRR for that Rate Year, such corrections and any resulting refunds or surcharges shall be reflected in the Annual Update for the next Rate Year with interest computed in accordance with section 7 of the SPP Tariff.

_____

6 Error shall mean errors or omissions regarding the values inputted into the Formula Rate template, such as arithmetic or computational errors. Error shall not include matters involving exercise of judgment or substantive differences of opinion regarding the derivation of an input.

## Summary Timeline of Annual Procedures for VLP's Historic Cost Based Formula Rate Under a June 1 – May 31 Rate Year

| | |
|---|---|
| **By May 1** | Post Annual Update; first day to submit Information Requests |
| **June 1** | Rate Year Begins |
| **By September 1** | Annual Update Meeting |
| **September 10** | Last day to submit Information Requests |
| **October 1** | Last day to submit Informal Challenges |
| **December 1** | Last day to file Formal Challenges |
| **By March 15** | Submit Informational Filing at FERC (summarizing previous year's Annual Update process) |

| E | Page 3, Line 6 - EPRI Annual Membership Dues listed in Form 1 at 353.f, all Regulatory Commission Expenses itemized at 351.h, and non-safety related advertising included in Account 930.1 found at 323.191.b. Page 3, Line 7-Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting itemized at 351.h. | | | | | | | | | |
| F | Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere. | | | | | | | | | |
| G | The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes" and TEP = "the tax exempt ownership interest". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T) (page 3, line 26). Excess Deferred Income Taxes reduce income tax expense by the amount of the expense multiplied by (T/1-T). | | | | | | | | | |
| | Inputs Required: | FIT = | - | | | | | | | |
| | | SIT= | - | (State Income Tax Rate or Composite SIT) | | | | | | |
| | | p = | | (percent of federal income | | | | | | |

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | | - | tax deductible for state purposes) | | | | | | |
| | | | | | | | | | | |
| H | Removes transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until Form 1 balances are adjusted to reflect application of seven-factor test). | | | | | | | | | |
| I | Removes dollar amount of transmission plant to be included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down. | | | | | | | | | |
| J | Enter dollar amounts | | | | | | | | | |
| K | ROE will be supported in the original filing and no change in ROE may be made absent a filing with FERC. | | | | | | | | | |
| L | Page 4, Line 28 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1. | | | | | | | | | |
| M | Includes income related only to transmission facilities, such as pole attachments, rentals and special use. | | | | | | | | | |
| N | Company will not have any grandfathered agreements. Therefore, this line shall remain zero. | | | | | | | | | |
| O | The revenues credited on page 1 lines 2-6 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. Revenue Credits do not include revenues associated with FERC annual charges, gross receipts taxes, facilities not included in this template (e.g., direct assignment facilities and GSUs) the costs of which are not recovered under this Rate Formula Template. | | | | | | | | | |
| P | Reserved | | | | | | | | | |
| Q | Prior to obtaining long term debt, the cost of debt, will be 1.99%. If SCMCN obtains project financing, the long term debt rate will be determined using the methodology in Attachment 8 and Attachment 9 contains the internal rate of return methodology; the methodology will be applied to actual amounts for use in Attachment H. Once there is $100 million in rate base, SCMCN will use the its actual cost of long term debt determined in Attachment 5. The capital structure will be 60% equity and 40% debt during the construction period, after any asset is placed in service, it will be based on the actual capital structure. | | | | | | | | | |
| R | Calculate using 13 month average balance, except ADIT which is calculated based on the average of the beginning and the end of the year balances. | | | | | | | | | |
| S | Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant. Utility must receive FERC authorization before recovering the cost of abandoned plant. | | | | | | | | | |
| T | Recovery of Regulatory Assets is permitted only for pre-commercial and formation expenses as authorized by the Commission. Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal to the AFUDC rate will be applied to the Regulatory Asset prior to the rate year when costs are first recovered. | | | | | | | | | |
| U | Excludes Asset Retirement Obligation balances | | | | | | | | | |
| V | Company shall be allowed recovery of costs | | | | | | | | | |

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | related to interest rate locks. Absent a Section 205 filing, Company shall not include in the Formula Rate, the gains, losses, or costs related to other hedges. | | | | | | | | | |
| W | The Tax Effect of Permanent Differences captures the differences in the income taxes due under the Federal and State calculations and the income taxes calculated in Attachment H that are not the result of a timing difference | | | | | | | | | |
| X | Calculate using a simple average of beginning of year and end of year balances reconciling to FERC Form No. 1 by Page, Line and Column as shown in Column 2. | | | | | | | | | |
| | | | | | | | | | | |

| Note | | | | | | | | | | | | | | | | | | |
| Letter | | | | | | | | | | | | | | | | | | |
| A | | Gross Transmission Plant is that identified on page 2 line 2 of Attachment H | | | | | | | | | | | | | | | | |
| B | | Inclusive of any CWIP or unamortized abandoned plant included in rate base when authorized by FERC order less any prefunded AFUDC, if applicable. | | | | | | | | | | | | | | | | |
| C | | Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1. This value includes subsequent capital investments required to maintain the facilities to their original capabilities. | | | | | | | | | | | | | | | | |
| | | Gross plant does not include Unamortized Abando | | | | | | | | | | | | | | | | |

| | | | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | ned Plant. | | | | | | | | | | | | | | |
| D | | Project Net Plant is the Project Gross Plant Identified in Column 3 less the associated Accumulated Depreciation. Net Plant includes CWIP and Unamortized Abandoned Plant and excludes any regulatory asset, which are to entered as a separate line item. | | | | | | | | | | | | | | |
| E | | Project Depreciation Expense is the actual value booked for the project and included in the Depreciation Expense in Attachment H, page 3, line 16. Project Depreciation Expense includes the amortization of Abandoned Plant | | | | | | | | | | | | | | |
| F | | True-Up Adjustment is calculated on the Project True-up Schedule for the Rate Year | | | | | | | | | | | | | | |
| G | | The Net Rev Req is the value to be used in the SPP's rate calculation under the applicable Schedule under the SPP OATT for each project. | | | | | | | | | | | | | | |
| H | | The Total General, Intangible and Common Depreciation Expense excludes any depreciation expense directly associated with a project and thereby included in page 2 column 9. | | | | | | | | | | | | | | |
| I | | The Unamortized Abandoned Plant balance is included in Net Plant, and Amortization of Abandoned Plant is included in Depreciation/Amortization Expense. | | | | | | | | | | | | | | |
| J | | The discount is the reduction in revenue, if any, that the company agreed to, for instance, to be selected to build facilities as the result of a competitive process and equals the amount by which the annual revenue requirement is reduced from the ceiling rate | | | | | | | | | | | | | | |
| K | | Requires approval by FERC of incentive return applicable to the specified project(s) | | | | | | | | | | | | | | |
| M | | All facilities other than those being recovered under Schedules 7, 8, 9 are to be | | | | | | | | | | | | | | |

| | | | | | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | included in Attachment 1. | | | | | | | | | | | | | | | |
| N | | Facilities that provide Wholesale Distribution Service are not to be listed as projects on lines 15, the revenue requirements associated with these facilities are calculated on Attachment 11 | | | | | | | | | | | | | | | |
| O | | When an updated projected net revenue requirement is posted due to an asset acquisition as provided for in the Protocols, the difference between the updated net revenue requirement in Col (16) and the revenues collected to date will be recovered | | | | | | | | | | | | | | | |
| | | over the remaining months of the Rate Year. | | | | | | | | | | | | | | | |

| | | | | | | | | | | |

| | Notes: | | | | | | | | | |
| | 1) From Attachment 1, line 15, col. 14 for the projection for the Rate Year. | | | | | | | | | |
| | 2) From Attachment 1, line 15, col. 14 for that project based on the actual costs for the Rate Year. | | | | | | | | | |
| | 3) The "Revenue Received" on line 2, Col. (E), is the total amount of revenue distributed to company in the year as shown on pages 328-330 of the Form No 1. The Revenue Received is input on line 2, Col. E excludes any True-Up revenues. | | | | | | | | | |
| | Column E, lines 3 are the dollar amounts of Revenue Received reflecting the % in Column D. This assigns to each project a percentage of the revenue received based on the percentage of the Projected Net Revenue Requirement in Column C. | | | | | | | | | |
| | 4) Interest from Attachment 6. | | | | | | | | | |
| | 5) Prior Period Adjustment from line 5 is pro rata to each project, unless the error was project specific. | | | | | | | | | |
| | | | | | | | | | | |
| | | | | | | | | | | |
| | | | | | | | | | | |

| | | | | | | | | | | |
| | | | | | | | | | | |
| | | | | | | | | | | |

| | | | | |
|---|---|---|---|---|
| Notes: | A | For each project or Attachment H, the utility will populate the formula rate with the inputs for the True-Up Year. The revenue requirements, based on actual operating results for the True-Up Year, associated with the projects and Attachment H will then be entered in Col. (F) above. Column (E) above contains the actual revenues received associated with Attachment H and any Projects paid by SPP to the utility during the True-Up Year. Then in Col. (G), Col. (E) is subtracted from Col. (F) to calculate the True-up Adjustment. The Prior Period Adjustment from Line 5 below is input in Col. (H). Column (I) is the applicable interest rate from Attachment 6. Column (I) adds the interest on the sum of Col.(G) and (H). Col. (J) is the sum of Col. (G), (H), and (I). | | |
| | B | Prior Period Adjustment is the amount of an adjustment to correct an error in a prior period. The FERC Refund interest rate specified in CFR 35.19(a) for the period up to the date the projected rates that are subject to True Up here went into effect. | | |

| | | | | | | | | | | |
| Notes: | | | | | | | | | | |
| A | Recovery of regulatory asset is limited to any regulatory assets authorized by FERC. | | | | | | | | | |
| B | Recovery of abandoned plant is limited to any abandoned plant recovery authorized by FERC. | | | | | | | | | |
| C | Includes only CWIP authorized by the Commission for inclusion in rate base. The annual report filed pursuant to Section 7 of the Protocols will include for each project under construction (i) the CWIP balance eligible for inclusion in rate base; (ii) the CWIP balance ineligible for inclusion in rate base; and | | | | | | | | | |
| | (iii) a demonstration that AFUDC is only applied to the CWIP balance that is not included in rate base. The annual report will reconcile the project-specific CWIP balances to the total Account 107 CWIP balance reported on p. 216.b of the FERC Form 1. | | | | | | | | | |
| D | ADIT and Accumulated Deferred Income Tax Credits are computed using the average of the beginning of the year and the end of the year balances. | | | | | | | | | |
| E | Recovery of a Regulatory Asset is permitted only for pre-commercial and formation expenses, and is subject to FERC approval before the amortization of the Regulatory Asset can be included in rates. Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal to the AFUDC rate will be applied to the Regulatory Asset prior to the rate year when costs are first recovered. | | | | | | | | | |
| F | Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant. | | | | | | | | | |
| G | The Formula Rate shall include a credit to rate base for all unfunded reserves (funds collected from customers that (1) have not been set aside in a trust, escrow or restricted account; (2) whose balance are collected from customers through cost accruals to accounts that are recovered under the Formula Rate; and (3) exclude the portion of any balance offset by a balance sheet account). Each unfunded reserve will be included on lines 30 above. The allocator in Col. (g) will be the same allocator used in the formula for the cost accruals to the account that is recovered under the Formula Rate. Since | | | | | | | | | |

| | | | | | | |
|---|---|---|---|---|---|---|
| | reserves can be created by an offsetting balance sheet account, rather than through cost accruals, the amount to be deducted from rate base should exclude the portion offset by another balance sheet account. | | | | | |
| H | Calculate using 13 month average balance, except ADIT which is calculated based on the average of the beginning of the year and the end of the year balances | | | | | |

| Notes | | | | | | | | | |
| | 1 The IRR is the input to Debt Cost shown on Attachment H, Page 4, Line 20 during the construction period, after obtaining project financing, in accordance with Note Q of | | | | | | | | |

| | |
|---|---|
| | Attachment H. |
| | 2. The IRR is a discount rate that makes the net present value of a series of cash flows equal to zero. The IRR equation is shown on line 6. |
| | N is the last quarter the loan would be outstanding |
| | t is each quarter |
| | Ct is the cash flow (Table 5, Col. I in each quarter) |
| | Alternatively the equation can be written as 0 = C0 + C1/(1+IRR) + C2/(1+IRR)2 + C3/(1+IRR)3 + . . . +Cn/(1+IRR)n and solved for IRR |
| | The Excel ™ formula on line 2 is : (round(XIRR(first quarter of loan Col A of Table 5:last quarter of loan Col A of Table 5, first quarter of loan Col I of Table 5: last quarter of loan Col I of Table 5, 8%),4) |
| | The 8% in the above formula is a seed number to ensure the formula produces a positive number. |
| | 3. Line 1 reflects the loan amount, the maximum amount that can be drawn on |
| | 4. Lines 11-21a include the fees associated with the loan. They are estimated based on current bank condition and are updated with the actual fees |
| | once the actual fees are known. |
| | 5. The estimate of the average 3 month Libor forward rate for the year on line 23 is that published by Bloomberg Finance L.P. during August of the prior year and is trued-up to actual |
| | average 3 month Libor rate for the year under the loan. |
| | 6. Table 5, Col. C reflect the capital expenditures in each quarter |
| | 7. Table 5, Col. D reflect the amount of the loan that is drawn down in the quarter |
| | 8. Table 5, Col. E is the amount of principle drawn down |
| | 9. Table 5, Col F calculates the interest on the |

| | | | | | | | | |
|---|---|---|---|---|---|---|---|---|
| | principle drawn down to date based on the applicable interest on line 25 | | | | | | | |
| | 10. Table 5, Col. G is the total origination fees in line 16 and is input in the first quarter that a portion of the loan in drawn | | | | | | | |
| | 11. Table 5, Col. H is calculated as follows: | | | | | | | |
| | | A x (line 21, Col. (b)/4) + sum of line 17, Col. (c) through line 21x, Col. (c) | | | | | | |
| | Where A = | Loan amount in line 1 less the amount drawn down (Table 5, Col. (E)) in the prior quarter | | | | | | |
| | 12. The inputs shall be estimated based on the current market conditions and is subject to true up for all inputs , e.g., fees, interest rates, spread, and Table 3 once the | | | | | | | |
| | amounts are known | | | | | | | |
| | 13. Prior to obtaining long term debt, the cost of debt, will be 1.99%. If SCMCN obtains project financing, the long term debt rate will be determined using the methodology in Attachment 8 and Attachment 9 contains the internal rate of return methodology; the methodology will be applied to actual amounts for use in Attachment H. Once there is $100 million in rate base, SCMCN will use the its actual cost of long term debt determined in Attachment 5. The capital structure will be 60% equity and 40% debt during the construction period, after any asset is placed in service, it will be based on the actual capital structure. | | | | | | | |

| 16 | | Annual Totals | | | | | | | | | | - | | | | |
| Note | | | | | | | | | | | | | | | | |
| Letter | | | | | | | | | | | | | | | | |
| A | | Gross Transmission Plant is that identified on page 2 line 2 of Attachment H | | | | | | | | | | | | | | |
| B | | Inclusive of any CWIP or unamortized abandoned plant included in rate base when authorized by FERC order less any prefunded AFUDC, if applicable. | | | | | | | | | | | | | | |
| C | | Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1. This value includes subsequent capital | | | | | | | | | | | | | | |

| | | |
|---|---|---|
| | | investments required to maintain the facilities to their original capabilities. |
| | | Gross plant does not include Unamortized Abandoned Plant. |
| D | | Project Net Plant is the Project Gross Plant Identified in Column 3 less the associated Accumulated Depreciation. Net Plant includes CWIP and Unamortized Abandoned Plant and excludes any regulatory asset, which are to entered as a separate line item. |
| E | | Project Depreciation Expense is the actual value booked for the project and included in the Depreciation Expense in Attachment H, page 3, line 16. Project Depreciation Expense includes the amortization of Abandoned Plant |
| F | | The Total General, Intangible and Common Depreciation Expense excludes any depreciation expense directly associated with a project and thereby included in page 2 column 9. |
| G | | The Unamortized Abandoned Plant balance is included in Net Plant, and Amortization of Abandoned Plant is included in Depreciation/Amortization Expense. |
| H | | The Use % is the customers NCP load divided by all of the NCP loads on the facilities |

| A | The Formula Rate shall include a credit to rate base for all unfunded reserves (funds collected from customers that (1) have not been set aside in a trust, escrow or restricted account; (2) whose balance are collected from customers through cost accruals to accounts that are recovered under the Formula Rate; and (3) exclude the portion of any balance offset by a balance sheet account). Each unfunded reserve will be included on lines 30 above. The allocator in Col. (g) will be the same allocator used in the formula for the cost accruals to the account that is recovered under the Formula Rate. Since reserves can be created by an offsetting balance sheet account, rather than through cost accruals, the amount to be deducted from rate base should exclude the portion offset by another balance sheet account. | | | | | | | | | | | | | |

## South Central MCN LLC (SCMCN)

## ANNUAL TRUE-UP, INFORMATION EXCHANGE, AND CHALLENGE PROCEDURES

### Section I. Applicability

The following procedures shall apply to SCMCN's calculation of its actual net revenue requirement, True-Up Adjustment, and projected net revenue requirement. The project-specific annual revenue requirements determined under the SCMCN formula are "up to" rates, i.e., ceiling rates, and permit SCMCN to discount the revenue requirement to the extent necessary to reflect the result of any cost commitment to SPP. In the Formula Rate Template, the effect of any such discount is removed from the projected revenue requirement and the actual revenue requirement, which ensures that customers receive the benefits of any discount.

### Section II. Annual True-Up and Projected Net Revenue Requirement

A. Beginning on or before June 1, of the year following FERC's acceptance of these protocols in the SPP Tariff, and on or before each subsequent June 1, SCMCN shall determine the Annual True-Up under this Attachment H - SCMCN and Section VII of these protocols, to derive a True-Up Adjustment to be included in SCMCN's projected net revenue requirement for the subsequent calendar year (the "Rate Year").

B. On or before June 1, of the year following FERC's acceptance of these protocols in the SPP Tariff, and on or before each subsequent June 1, SCMCN shall provide the Annual True-Up, actual net revenue requirement, and True-Up Adjustment to SPP and cause such information to be posted on the SPP website. Within ten (10) days of such posting, SCMCN shall provide notice of such posting via the email exploder list. Interested Parties shall contact SCMCN at the following email address to be placed on the exploder list: regulatory@gridliance.com.

C. On or before October 1, of the year following FERC's acceptance of these protocols in the SPP Tariff, and on or before each subsequent October 1, SCMCN shall provide the projected net revenue requirement to SPP and cause such information to be posted on the

SPP website. Within ten (10) days of posting of the projected net revenue requirement, SCMCN shall provide notice of such posting to the email exploder list.

D. If the date for posting the Annual True-Up or the projected net revenue requirement falls on a weekend or a holiday recognized by FERC, then the posting shall be due on the next business day. The date on which posting of the Annual True-Up occurs shall be that year's "Publication Date." Any delay in the Publication Date or in the posting of the projected net revenue requirement will result in an equivalent extension of time for the submission of Information Requests discussed in Section III of these protocols.

E. The Annual True-Up shall:

1. Include a workable populated Formula Rate Template and underlying workpapers in native format with fully functional spreadsheets showing the calculation of the net revenue requirement;

2. Be based on SCMCN's FERC Form No. 1 reports for the prior calendar year;

3. Provide the formula rate calculations and all inputs thereto, as well as supporting documentation and workpapers for data that are used in the Annual True-Up that are not otherwise available in the FERC Form No. 1 reports; [1]

---

1 It is the intent of the formula rate, including the supporting explanations and allocations described therein, that each input to the formula rate will be either taken directly from FERC Form No. 1 or reconcilable to FERC Form No. 1 by the application of clearly identified and supported information. If the referenced form is superseded, the successor form(s) shall be utilized and supplemented as necessary to provide equivalent information as that provided in the superseded form. If the referenced form(s) is (are) discontinued, equivalent information as that provided in the discontinued form(s) shall be utilized.

4. Provide sufficient information to enable Interested Parties (as that term is defined in Section II.G of these protocols) to replicate the calculation of the Annual True-Up results from the FERC Form No. 1 reports;

5. Identify any changes in the formula references (page and line numbers) to the FERC Form No. 1 reports;

6. Identify all material adjustments made to the FERC Form No. 1 report data in determining formula inputs, including relevant footnotes to the FERC Form No. 1 reports and any adjustments not shown in the FERC Form No. 1 reports;

7. Provide underlying data for formula rate inputs that provide greater granularity than is required for the FERC Form No. 1 reports;

8. With respect to any change in accounting that affects inputs to the formula rate or the resulting charges billed under the formula rate ("Accounting Change"):

    a. Identify any Accounting Changes, including:

        i. the initial implementation of an accounting standard or policy;

        ii. the initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific accounting direction;

        iii. correction of errors and prior period adjustments that impact the True-Up Adjustment calculation;

        iv. the implementation of new estimation methods or policies that change prior estimates; and

        v. changes to income tax elections;

    b. Identify items included in the Annual True-Up at an amount other than on a historic cost basis (e.g., fair value adjustments);

c. Identify any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs to the Annual True-Up;

d. Provide, for each item identified pursuant to items II.E.8.a - II.E.8.c of these protocols, a narrative explanation of the individual impact of such changes on the True-Up Adjustment.

F. The projected net revenue requirement shall:

1. Include a workable populated Formula Rate Template and underlying workpapers in native format with fully functional spreadsheets showing the calculation of the net revenue requirement;

2. Provide the formula rate calculations and all inputs thereto, as well as supporting documentation and workpapers for data that are used in the projected net revenue requirement;

3. Provide sufficient information to enable Interested Parties (as that term is defined in Section II.G of these protocols) to replicate the calculation of the projected net revenue requirement;

4. With respect to any change in accounting that affects inputs to the formula rate or the resulting charges billed under the formula rate ("Accounting Change"):

a. Identify any Accounting Changes, including:

i. the initial implementation of an accounting standard or policy;

ii. the initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific accounting direction;

iii. correction of errors and prior period adjustments that impact the projected net revenue requirement calculation;

iv. the implementation of new estimation methods or policies that change prior estimates; and

v. changes to income tax elections;

b. Identify items included in the projected net revenue requirement at an amount other than on a historic cost basis (e.g., fair value adjustments);

c. Identify any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs to the projected net revenue requirement;

d. Provide, for each item identified pursuant to items II.F.4.a - II.F.4.c of these protocols, a narrative explanation of the individual impact of such changes on the projected net revenue requirement.

G. SCMCN shall hold an open meeting among Interested Parties ("Annual True-Up Meeting") with remote access between the Publication Date and September 1. No less than seven (7) days prior to such Annual True-Up Meeting, SCMCN shall cause notice to be provided on SPP's internet website of the time, date, and location of the Annual True-Up Meeting and SCMCN shall provide notice of such meeting to the email exploder list. For purposes of these procedures, the term Interested Party includes, but is not limited to, customers under the Tariff, state utility regulatory commissions, consumer advocacy agencies, and state attorneys general. The Annual True-Up Meeting shall (i) permit SCMCN to explain and clarify its Annual True-Up and True-Up Adjustment and (ii) provide Interested Parties an opportunity to seek information and clarifications from SCMCN about the Annual True-Up and True-Up Adjustment.

H. SCMCN shall hold an open meeting among Interested Parties ("Annual Projected Rate Meeting") with remote access between the date that the projected net revenue requirement is posted to the SPP website (as described in Section II.C of these protocols) and October 31. No less than seven (7) days prior to such Annual Projected Rate Meeting, SCMCN shall cause notice to be provided on SPP's internet website of the time, date, and location of the Annual Projected Rate Meeting and SCMCN shall provide

notice of such meeting to the email exploder list. The Annual Projected Rate Meeting shall (i) permit SCMCN to explain and clarify their projected net revenue requirement and (ii) provide Interested Parties an opportunity to seek information and clarifications from SCMCN about the projected net revenue requirement.

I. Each year SCMCN shall endeavor to coordinate with other Transmission Owners in the SPP using formula rates to establish revenue requirements for recovery of the costs of transmission projects that utilize the same regional cost sharing mechanism and hold a joint informational meeting to enable all Interested Parties to understand how those transmission owners are implementing their formula rates for recovering the costs of such projects.

**Section III. Information Exchange Procedures**

Each Annual True-Up and projected net revenue requirement shall be subject to the following information exchange procedures ("Information Exchange Procedures"):

A. Interested Parties shall have until December 1 following the Publication Date (unless such period is extended with the written consent of SCMCN or by FERC order) to serve reasonable information and document requests on SCMCN ("Information Exchange Period"). If December 1 falls on a weekend or a holiday recognized by FERC, the deadline for submitting all information and document requests shall be extended to the next business day. Such information and document requests shall be limited to what is necessary to determine:

(1) the extent or effect of an Accounting Change;

(2) whether the Annual True-Up or projected net revenue requirement fails to include data properly recorded in accordance with these protocols;

(3) the proper application of the formula rate and procedures in these protocols;

(4) the accuracy of data and consistency with the formula rate of the calculations shown in the Annual True-Up or projected net revenue requirement;

(5) the prudence of actual costs and expenditures;

(6) the effect of any change to the underlying Uniform System of Accounts or the FERC Form No. 1 reports; or

(7) any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the formula.

The information and document requests shall not otherwise be directed to ascertaining whether the formula rate is just and reasonable.

B. SCMCN shall make a good faith effort to respond to information and document requests within fifteen (15) business days of receipt of such requests. SCMCN shall respond to all information and document requests by no later than January 10 following the Publication Date, unless the Information Exchange Period is extended by SCMCN or FERC.

C. SCMCN will cause to be posted on the SPP website all information requests from Interested Parties and SCMCN's response(s) to such requests; except, however, if responses to information and document requests include material deemed by SCMCN to be confidential information, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement to be executed by SCMCN and the requesting party.

D. SCMCN shall not claim that responses to information and document requests provided pursuant to these protocols are subject to any settlement privilege, in any subsequent FERC proceeding addressing SCMCN's Annual True-Up or projected net revenue requirement.

**Section IV. Challenge Procedures**

A. Interested Parties shall have until January 31 following the Publication Date (unless such period is extended with the written consent of SCMCN or by FERC order) to review the

inputs, supporting explanations, allocations and calculations and to notify SCMCN in writing, which may be made electronically, of any specific Informal Challenges to the Annual True-Up or projected net revenue requirement. The period of time from the Publication Date until January 31 shall be referred to as the Review Period. If January 31 falls on a weekend or a holiday recognized by FERC, the deadline for submitting all Informal Challenges shall be extended to the next business day. Failure to pursue an issue through an Informal Challenge or to lodge a Formal Challenge regarding any issue as to a given Annual True-Up or projected net revenue requirement shall bar pursuit of such issue with respect to that Annual True-Up or projected net revenue requirement, but shall not bar pursuit of such issue or the lodging of a Formal Challenge as to such issue as it relates to a subsequent Annual True-Up or projected net revenue requirement.

B. A party submitting an Informal Challenge to SCMCN must specify the inputs, supporting explanations, allocations, calculations, or other information to which it objects, and provide an appropriate explanation and documents to support its challenge. SCMCN shall make a good faith effort to respond to any Informal Challenge within twenty (20) business days of notification of such challenge. SCMCN, and where applicable, the Transmission Provider, shall appoint a senior representative to work with the party that submitted the Informal Challenge (or its representative) toward a resolution of the challenge. If SCMCN disagrees with such challenge, SCMCN will provide the Interested Party(ies) with an explanation supporting the inputs, supporting explanations, allocations, calculations, or other information. No Informal Challenge may be submitted after January 31, and SCMCN must respond to all Informal Challenges by no later than February 28, unless the Review Period is extended by SCMCN or FERC.

C. Informal Challenges shall be subject to the resolution procedures and limitations in this Section IV. Formal Challenges shall be filed pursuant to these protocols and shall satisfy all of the following requirements.

(1) A Formal Challenge shall:

(a) Clearly identify the action or inaction which is alleged to violate the filed rate formula or protocols;

(b) Explain how the action or inaction violates the filed rate formula or protocols;

(c) Set forth the business, commercial, economic or other issues presented by the action or inaction as such relate to or affect the party filing the Formal Challenge, including:

(i) the extent or effect of an Accounting Change;

(ii) whether the Annual True-Up projected net revenue requirement fails to include data properly recorded in accordance with these protocols;

(iii) the proper application of the formula rate and procedures in these protocols;

(iv) the accuracy of data and consistency with the formula rate of the charges shown in the Annual True-Up or projected net revenue requirement;

(v) the prudence of actual costs and expenditures;

(vi) the effect of any change to the underlying Uniform System of Accounts or FERC Form 1; or

(vii) any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the formula.

(d) Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;

(e) State whether the issues presented are pending in an existing Commission proceeding or a proceeding in any other forum in which the filing party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;

(f) State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that relief;

(g) Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the filing party, including, but not limited to, contracts and affidavits; and

(h) State whether the filing party utilized the Informal Challenge procedures described in these protocols to dispute the action or inaction raised by the Formal Challenge, and, if not, describe why not.

(2) Service. Any person filing a Formal Challenge must serve a copy of the Formal Challenge on SCMCN. Service to SCMCN must be simultaneous with filing at the Commission. Simultaneous service can be accomplished by electronic mail in accordance with § 385.2010(f)(3), facsimile, express delivery, or messenger. The party filing the Formal Challenge shall serve the individual listed as the contact person on SCMCN's Informational Filing required under Section VI of these protocols.

D. Informal and Formal Challenges shall be limited to all issues that may be necessary to determine: (1) the extent or effect of an Accounting Change; (2) whether the Annual True-Up or projected net revenue requirement fails to include data properly recorded in accordance with these protocols; (3) the proper application of the formula rate and procedures in these protocols; (4) the accuracy of data and consistency with the formula rate of the calculations shown in the Annual True-Up and projected net revenue requirement; (5) the prudence of actual costs and expenditures; (6) the effect of any change to the underlying Uniform System of Accounts or the FERC Form No. 1 reports; or (7) any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the formula.

E. SCMCN will cause to be posted on the SPP website all Informal Challenges from Interested Parties and SCMCN's response(s) to such Informal Challenges; except, however, if Informal Challenges or responses to Informal Challenges include material deemed by SCMCN to be confidential information, such information will not be publicly

posted but will be made available to requesting parties pursuant to a confidentiality agreement to be executed by SCMCN and the requesting party.

F. Any changes or adjustments to the True-Up Adjustment or projected net revenue requirement resulting from the Information Exchange and Informal Challenge processes that are agreed to by SCMCN will be reported in the Informational Filing required pursuant to Section VI of these protocols. Any such changes or adjustments agreed to by SCMCN on or before December 1 will be reflected in the projected net revenue requirement for the upcoming Rate Year. Any changes or adjustments agreed to by SCMCN after December 1 will be reflected in the following year's Annual True-Up, as discussed in Section V of these protocols.

G. An Interested Party shall have until April 15 following the Review Period (unless such date is extended with the written consent of SCMCN to continue efforts to resolve the Informal Challenge) to make a Formal Challenge with FERC, which shall be served on SCMCN on the date of such filing as specified in Section IV.C(2) above. A Formal Challenge shall be filed in the same docket as SCMCN's Informational Filing discussed in Section VI of these protocols. SCMCN shall respond to the Formal Challenge by the deadline established by FERC. A party may not pursue a Formal Challenge if that party did not submit an Informal Challenge on any issue during the applicable Review Period.

H. In any proceeding initiated by FERC concerning the Annual True-Up or projected net revenue requirement or in response to a Formal Challenge, SCMCN shall bear the burden, consistent with section 205 of the Federal Power Act, of proving that it has correctly applied the terms of the formula rate consistent with these protocols, and that it followed the applicable requirements and procedures in this Attachment H - SCMCN. Nothing herein is intended to alter the burdens applied by FERC with respect to prudence challenges.

I. Except as specifically provided herein, nothing herein shall be deemed to limit in any way the right of SCMCN to file unilaterally, pursuant to Federal Power Act section 205 and the regulations thereunder, to change the formula rate or any of its inputs (including, but not limited to, rate of return and transmission incentive rate treatment), or to replace

the formula rate with a stated rate, or the right of any other party to request such changes pursuant to section 206 of the Federal Power Act and the regulations thereunder.

J. No party shall seek to modify the formula rate under the Challenge Procedures set forth in these protocols and the Annual True-Up or projected net revenue requirement shall not be subject to challenge by anyone for the purpose of modifying the formula rate. Any modifications to the formula rate will require, as applicable, a Federal Power Act section 205 or section 206 filing. SCMCN may, at its discretion and at a time of its choosing, make a limited filing pursuant to Section 205 to modify stated values in the Formula Rate for (i) amortization and depreciation rates, (ii) Post-Employment Benefits Other Than Pensions rates, or (iii) the weighting of the ADIT balance in rate base to ensure SCMCN's compliance with the IRS regulations for normalization under IRS Section 1.167(l)-1(h)(6). The sole issue in any such limited Section 205 proceeding shall be whether such proposed change(s) is just and reasonable, and it shall not address other aspects of the Formula Rate.

K. Any Interested Party seeking changes to the application of the formula rate due to a change in the Uniform System of Accounts or FERC Form No. 1, shall first raise the matter with SCMCN in accordance with this Section IV before pursuing a Formal Challenge.

## Section V. Changes to True-Up Adjustment or Projected Net Revenue Requirement

Except as provided in Section IV.F of these protocols, any changes to the data inputs, including but not limited to revisions to SCMCN's FERC Form No. 1 reports, or as the result of any FERC proceeding to consider the Annual True-Up or projected net revenue requirement, or as a result of the procedures set forth herein, shall be incorporated into the formula rate and the charges produced by the formula rate in the projected net revenue requirement for the next Rate Year. This reconciliation mechanism shall apply in lieu of mid-Rate Year adjustments. Interest on any refund or surcharge shall be calculated in accordance with the procedures outlined in Section VII of these protocols.

## Section VI. Informational Filings

A. By March 15 of each year, SCMCN shall submit to FERC an informational filing ("Informational Filing") of their projected net revenue requirement for the Rate Year, including their Annual True-Up and True-Up Adjustment. This Informational Filing must:

(1) Include the information that is reasonably necessary to determine: (i) that input data under the formula rate are properly recorded in any underlying workpapers; (ii) that SCMCN has properly applied the formula rate and these procedures; (iii) the accuracy of data and the consistency with the formula rate of the Transmission Revenue Requirement under review; (iv) the extent of accounting changes that affect formula rate inputs; and (v) the reasonableness of projected costs.

(2) Include for the applicable Rate Year the following information related to affiliate cost allocation: (i) a detailed description of the methodologies used to allocate and directly assign costs between SCMCN and its affiliates by service category or function, including any changes to such cost allocation methodologies from the prior year, and the reasons and justification for those changes; and (ii) the magnitude of such costs that have been allocated or directly assigned between SCMCN and each affiliate by service category or function; and

(3) Describe any corrections or adjustments made during that period, and must describe all aspects of the formula rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures. Within five (5) days of such Informational Filing, SCMCN shall provide notice of the Informational Filing via the email exploder list and shall cause SPP to post the docket number assigned to SCMCN's Informational Filing on the SPP website.

B. Any challenges to the implementation of the Attachment H - SCMCN formula rate must be made through the Challenge Procedures described in Section IV of these protocols or in a separate complaint proceeding, and not in response to the Informational Filing.

**Section VII. Calculation of True-Up Adjustment**

The True-Up Adjustment is developed on Attachment 3 and will be determined in the following manner:

(1) Actual transmission revenues for the previous year will be compared to Net Revenue Requirement not including any prior year True-Up Adjustment calculated in accordance with SCMCN's Attachment H of this Tariff for the previous year using SCMCN's FERC Form No. 1 for that same year to determine any over or under recovery ("True-Up Adjustment"). SCMCN shall cause the True-Up Adjustment and related calculations to be posted to the SPP website no later than June 1 (or if that day falls on a weekend or a holiday recognized by FERC, then the posting shall be due on the next business day) following the issuance of the FERC Form No. 1 for the previous year, as set forth in Section II of these protocols.

(2) Interest on any over recovery of the net revenue requirement shall be determined on Attachment 9 of the formula rate. Interest on any under recovery of the net revenue requirement or any under recovery due to volume changes, shall be determined using the interest rate equal to SCMCN's actual short-term debt costs capped at the applicable FERC refund interest rate. The interest rate to be applied to the over or under recovery amounts will be determined using the average interest rate for the twenty-one (21) months preceding October of the current year. In either case, the interest payable shall be calculated by applying the average interest rate to the over or under recovery in the revenue requirement or volume changes for the twenty-four (24) month period. The interest amount will be included in the projected costs made available on October 1 in accordance with Section II.C above.

(3) The Net Revenue Requirement for transmission services for the following Year shall be the sum of the projected revenue requirement for the following year, plus or minus the True-Up Adjustment from the previous year, if any, including interest, as explained above.

(4) The SCMCN may accelerate the refund of any over recovery amounts by one year. The interest calculation will be adjusted to reflect the period the over recovery exists.

| 34 | | Return | Worksheet C, Line 7 | | | | | |
| 35 | | Revenue Requirement | Line 23 + Line 32 + Line 33 + Line 34 | | | | | |

Notes:

A These unrecovered plant expense are associated with the contribution in aid of construction paid by Mountrail-Williams to Basin Electric for the Wheelock Substation. No other amounts should be included on this line absent specific FERC approval. Should Basin Electric purchase the Wheelock Substation or be granted approval by FERC to include its costs in its ATRR, this line item will be populated with a zero. No other contributions in aid of construction (either paid by Mountrail-Williams or paid to Mountrail-Williams) will be included in Mountrail-Williams' Zone 19 ATRR absent specific Commission approval.

The sum of the total company

amounts for lines 4 through 9 must match the amount shown on the B Form 7, Part A, Line 4, Column B.

C To the extent that Mountrail-Williams has amounts included in Account 561, it will recover those amounts through Schedule 1 of the SPP Tariff and provide a workpaper demonstrating the derivation of the amount recovered under Schedule 1 of the SPP Tariff in its annual update. Total company Account 561 expenses, to the extent that they are incurred, will be allocated to Mountrail-Williams' Zone 19 Schedule 1 Revenue Requirement using the T-Tran Plant Allocator.

| 6 | Rate Base | Worksheet A, Line 45, Column J Line 5 * | | | |
| 7 | Return | Line 6 | | | |

8 Notes:

A. The cost of capital for Total Margins and Equities is fixed through January 1, 2021 and no Settling Party may submit a filing under section 205 or 206 of the Federal Power Act prior to that date to change the base ROE or Mountrail-Williams's entitlement to the 50-basis point adder for RTO participation, nor may any Settling Party support such a request by another entity. After that date, the cost of capital for Total Margins and Equities cannot be changed absent Commission approval through a Section 205 or

9 206 filing.

B. The ROE and capital structure shall remain in effect through December 31, 2025, absent Commission action under Federal Power Act Section 205 or 206. Mountrail-Williams may submit a Section 205 filing prior to December 31, 2025 in order to establish rates to be effective no later than January 1, 2026. All parties, including Mountrail-Williams, retain all of their rights with respect to such a filing. Absent such a filing, Mountrail-Williams's ROE shall apply to the equity component of Mountrail-Williams's actual

10 capital structure, effective January 1, 2026.

C. The cost of capital for Total Margins and Equities reflects a 50 basis point incentive

11 adder for RTO participation.

7 Notes:
A. Acquisition adjustments will not be used in the
5 calculation of ATRR absent Commission approval
8 through a 205 or 206 filing.
5 B. The addition of new lines and the removal of outdated
9 lines may be necessary in order to accurately provide
information, and populate or remove data in the
6 Worksheet with changes in future years. Where
0 appropriate, these
changes will provide detail and linkage to
6 updated Form 7 data requirements or other
1 similar supporting
documentation. Additional line items or line deletions
6 will not require FPA Section 205 or 206 filings. MWEC
2 will
describe such changes in the Annual Update, and
6 the changes will be subject to the review of Interested
3 Parties under
the procedures set forth in MWEC's Implementation
6 Protocols. MWEC may not change the columns or the
4 formulas
included in these
6 Worksheets during the
5 Annual Update.

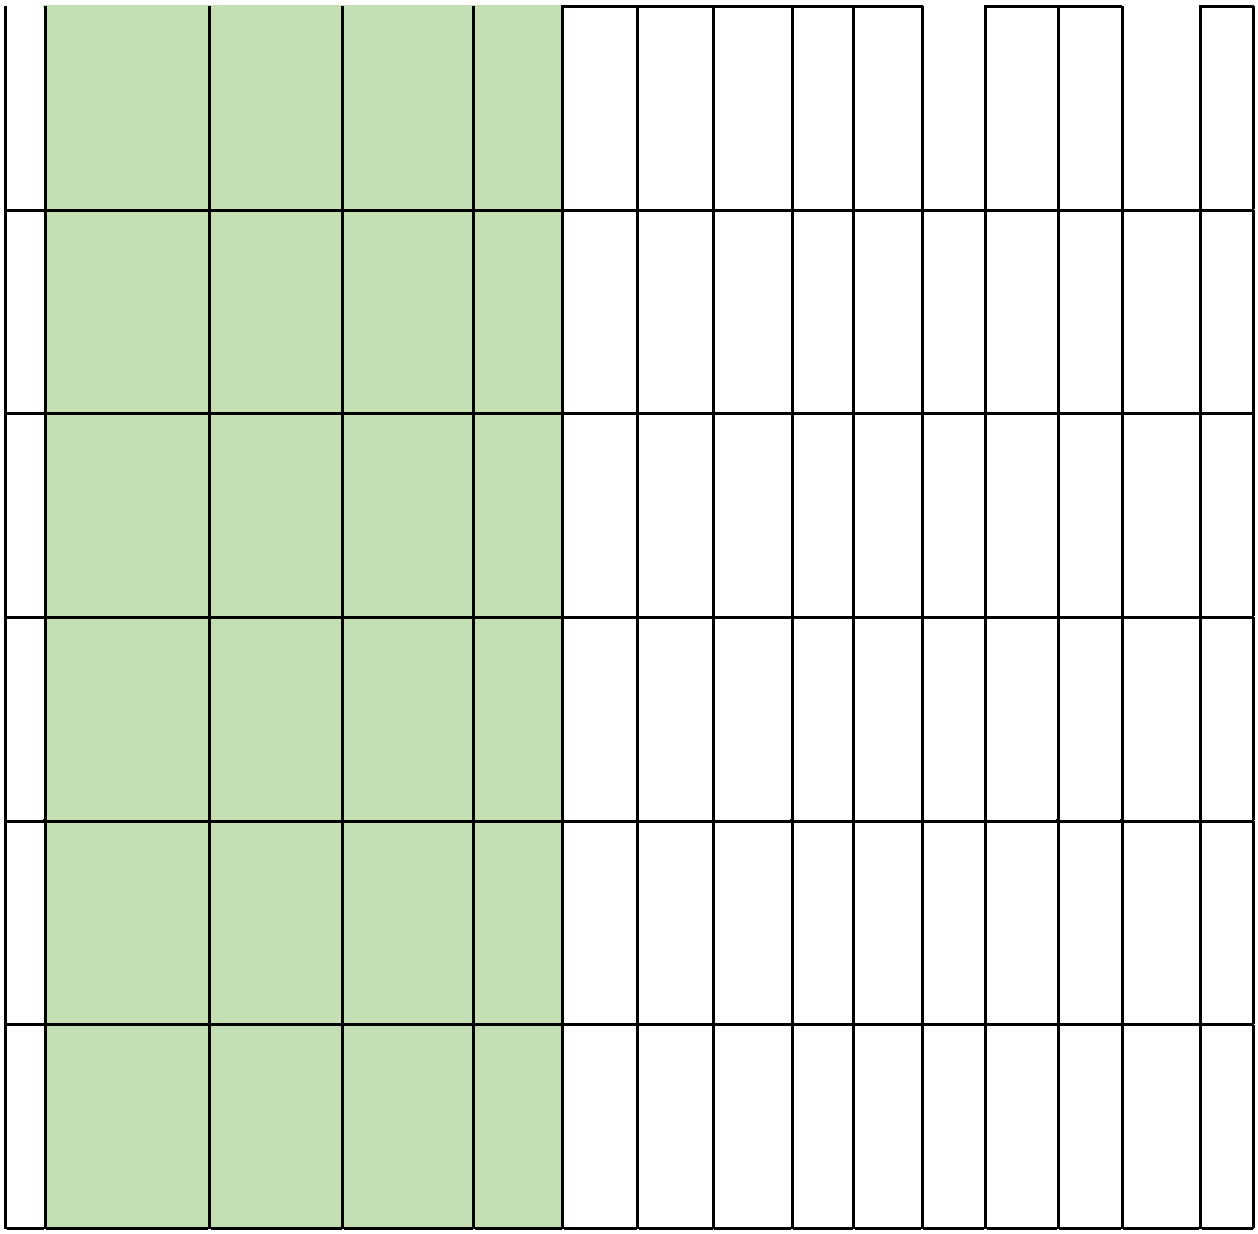
29 Notes

A. Project Gross Plant is the total capital investment for the

0 project calculated in the same



method as the gross plant value in line 1.

This value includes subsequent capital investments required to maintain the facilities to their original capabilities.

Gross Plant does not include CWIP, Unamortized Regulatory Asset or Unamortized Abandoned Plant.

B. Net Plant is the Gross Plant less the associated Accumulated Depreciation.

C. Depreciation Expense is the depreciation amount associated with the specified line or sub.

Depreciation Expense includes the amortization of Abandoned Plant and any FERC approved Regulatory Asset.

D. The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Worksheet with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 7 data requirements or other similar supporting documentation. Additional line items or line deletions will not require FPA Section 205 or 206 filings. MWEC will describe such changes in the Annual Update, and the changes will be subject to the

4 review of Interested Parties
0 under

the procedures set forth in MWEC's Implementation Protocols. MWEC may not change the columns or the formulas

included in these Workshee ts during the Annual Update.

19 Notes:

A. Percentage recovery cannot be added or changed 20 absent approval from FERC.

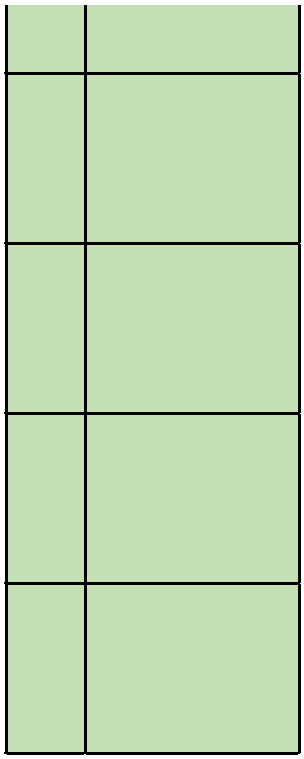
B. CWIP amounts should be directly assigned to pricing 21 zone on Summary.

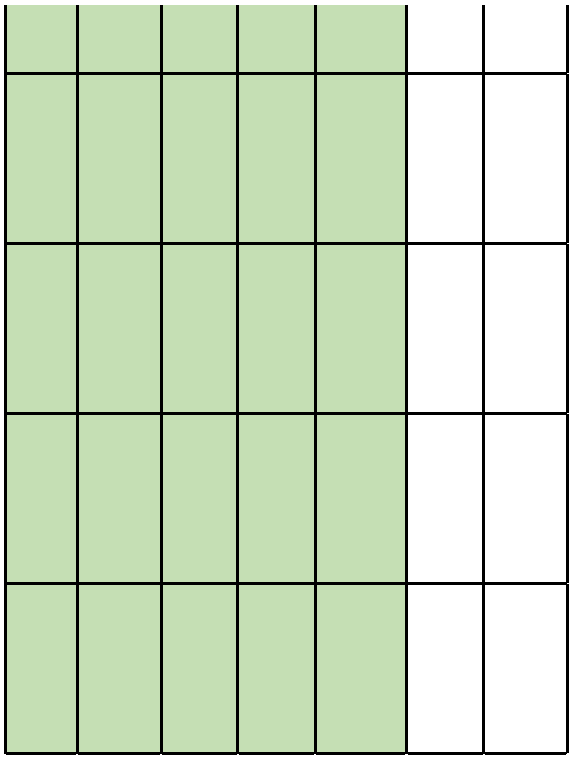
C. AFUDC ceases when CWIP is recovered in rate base. No CWIP will be included in rate 22 base absent FERC authorization.

Accounting procedures must be provided during the annual update to ensure that there is no duplicate recovery 23 of CWIP and corresponding AFUDC capitalized. Projects 24 are transmission related only.

D. The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and

25 populate or remove data in the Worksheet with





changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 7 data requirements or other similar supporting documentation.

Additional line items will not require FPA Section 205 or 206 filings. MWEC will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in MWEC's Implementation Protocols. MWEC may not change the columns or the formulas included in these Worksheet during the Annual Update.

C. Amounts listed on lines 1a-1xx and 3a-3xx are only eligible for inclusion in SPP Zone 19 ATRR following a change in accounting procedures to the Form 7 or Uniform System of Accounts, which would classify amounts in these accounts as eligible for transmission rate recovery. To the extent that this occurs, MWEC may file a single-issue Section 205 filing with the Commission to seek recovery of these amounts in Zone 19 rates. MWEC may not include any costs absent authroization from FERC via a Section 205 or 206 filing.

D. The addition of new lines and the removal of outdated lines necessary to populate or remove data in the Worksheet with the changes in future years does not require a Federal Power Act section 205 or 206 filing. The addition or removal of columns and formulas contained with those columns cannot be changed absent a Federal Power Act section 205 or 206 filing.

# Mountrail-Williams Electric Cooperative
# Transmission Formula Rate Implementation Protocols

The formula rate template ("Formula Rate Template") and these Formula Rate Implementation Protocols ("Protocols") together comprise the filed rate ("Formula Rate") of Mountrail-Williams Electric Cooperative ("Mountrail-Williams") for transmission revenue requirement determinations under the Southwest Power Pool, Inc. ("SPP") Open Access Transmission Tariff ("Tariff"). Mountrail-Williams shall follow annually the instructions specified in the Formula Rate to calculate its Annual Transmission Revenue Requirement ("ATRR"). Recovery of costs associated with existing facilities and new facilities shall be consistent with the Formula Rate and Attachment AI and Attachment J, respectively, of the Tariff.

The initial ATRR will be in effect for a partial year from the effective date of transfer of functional control of Mountrail-Williams's transmission facilities to SPP through December 31, 2017. The Formula Rate shall be recalculated each year with the resulting rates to become effective on and after January 1 of each year through December 31 of such year ("Rate Year"). The resulting rates implemented each January 1 will be subject to review and true-up as further provided in the Protocols. The Formula Rate shall become effective for recovery of MountrailWilliam's ATRR upon the effective date authorized by the Federal Energy Regulatory Commission ("FERC") under Section 205 of the Federal Power Act ("FPA").

## Section I Definitions

For purposes of these Protocols, the following capitalized terms shall have the meanings set forth below.

A. "Accounting Change" means any change in Mountrail-Williams's accounting policies and practices from those in effect for the Calendar Year upon which the immediately preceding Annual Update was based and that could impact the ATRR calculations under the Formula. Accounting Changes include any changes resulting from:

   1. Revisions to Rural Utilities Service's ("RUS") Uniform System of Accounts ("USoA");

   2. Revisions to the National Rural Utilities Cooperative Finance Corporation ("CFC") Form No. 7 data and the requirement to report certain values within it;

3. correction of errors and prior period adjustments that impact the ATRR;

4. the implementation of new estimation methods or policies;

5. changes to income tax elections;

6. changes in accounting practices or policies mandated by a state regulatory authority with jurisdiction over Mountrail-Williams that could impact the Formula Rate or calculations under the Formula;

7. implementation of accounting practices for unusual or unconventional items where the RUS has not provided specific accounting direction;

8. a change in Mountrail-Williams's accounting policies and practices (as such changes are defined by the Statement of Financial Accounting Board Standards No. 154 issued by the Financial Accounting Standards Board or its successor);

9. Mountrail-Williams's own accounting changes (which constitute a change to the ATRR greater than or equal to $15,000) such as the addition or deletion of a subaccount not specified by the RUS's USoA; or

10. a change in Mountrail-Williams's inter-corporate cost allocation policies or practices from those policies and/or practices in effect in the Prior Rate Year, which change causes a result under the Formula Rate different than the result under the Formula Rate as calculated without such change.

B. "Annual Transmission Revenue Requirement" or "ATRR" means the net revenue requirement for the Transmission Services calculated in accordance with the Formula Rate filed by Mountrail-Williams for informational purposes with FERC and posted on the SPP OASIS on or before the annual Publication Date, subject to review pursuant to the provisions of these Protocols.

C. "Annual Meeting" means the meeting hosted by Mountrail-Williams for the purpose of exchanging information with Interested Parties regarding the formula rate.

D. "Annual Update" means Mountrail-Williams's annual posting of its Formula Rate, in a working Excel™ format.

E. "Business Day" means from 9:00 AM to 5:00 PM Central Prevailing Time other than weekends and Federal Holidays.

F. "Calendar Year" means January 1 through December 31 of a given year.

G. "CFC" means National Rural Utilities Cooperative Finance Corporation.

H. "CFC Form" means the independently-audited CFC Form No.7 prepared by Mountrail-Williams's accounting staff.

I. "Current Calendar Year" means the Calendar Year in which the Annual Update is posted

(e.g., if the Annual Update is posted on July 1, 2018, the Current Calendar Year is 2018).

J. "Current Rate Year" means the Rate Year for which the Annual Update is posted on the SPP OASIS and which Mountrail-Williams has filed with FERC (e.g., if the Annual Update is posted on July 1, 2018 and the Informational Filing is submitted to FERC on December 15, 2018 , the Current Rate Year is January 1, 2019 through December 31, 2019).

K. "Customer(s)" or "Transmission Customer(s)" means the customers taking NITS service, service under Grandfathered Agreements, or PTP service.

L. "FERC" or "Commission" means the Federal Energy Regulatory Commission.

M. "Final Posting" means the annual update information posted to the SPP OASIS with changes agreed to during the informal review process.

N. "Formal Challenge" means a challenge by an Interested Party to an aspect of the Annual Update that is filed with FERC, and served on Mountrail-Williams by electronic service on the date of such filing.

O. "Formula Rate Template" means the Mountrail-Williams transmission formula rate template set forth herein.

P. "Formula" means the Formula Rate Template set forth in Addendum 37 to Attachment H of the SPP Tariff.

Q. "Formula Rate" means the Mountrail-Williams Implementation Protocols together with the Formula Rate Template.

R. "FPA" means Federal Power Act.

S. "Informal Challenge" means written notification by an Interested Party to Mountrail-Williams, during the Review Period, of any specific challenge to the Annual Update.

T. "Information Request" means a written request submitted by an Interested Party to Mountrail-Williams.

U. "Informational Filing" means Mountrail-Williams's annual filing at FERC with the information stipulated in these Protocols.

V. "Interest" means interest calculated pursuant to 18 C.F.R. § 35.19a (a) (2) (iii), or any successor regulation.

W. "Interested Party" includes but is not limited to, customers under the SPP Tariff, state

utility regulatory commissions, consumer advocacy agencies, and state attorneys general.

X. "Information Request Period" means a period of ninety (90) calendar days after each annual Publication Date (unless such period is extended with the written agreement of Mountrail-Williams) during which Interested Parties may serve reasonable information requests on Mountrail-Williams.

Y. "NITS" means Network Integration Transmission Service as defined in the SPP Tariff.

Z. "OASIS" means SPP's Open Access Same-Time Information System.

AA. "OATT" or "SPP Tariff" means SPP's Open Access Transmission Tariff.

BB. "Prior Calendar Year" means the year preceding the Current Calendar Year (*e.g.*, if the Annual Update is posted on July 1, 2018 and the Informational Filing is submitted on December 15, 2018, the Prior Calendar Year is 2017).

CC. "Prior Rate Year" means the Rate Year prior to the Current Rate Year (*e.g.*, if the Current Rate Year is January 1, 2018 through December 31, 2018, then the Prior Rate Year is January 1, 2017 through December 31, 2017).

DD. "PTP Rates" means the point-to-point rates derived from the Formula Rate.

EE. "Publication Date" means the date on which Mountrail-Williams posts the Annual Update to the SPP OASIS. The Publication Date for each year beginning in 2017 shall be no later than July 1, provided, however, that if July 1 should fall on a weekend or a holiday recognized by FERC, then the posting shall be due no later than the next Business Day, and the Publication Date shall correspond to the actual posting date.

FF. "Rate Year" means January 1 of a given Calendar Year through December 31 of the same Calendar Year.

GG. "Review Period" means, unless otherwise extended in writing by Mountrail-Williams, one-hundred and twenty (120) calendar days after the Publication Date.

HH. "RUS" means Rural Utilities Service.

II. "SPP" means Southwest Power Pool, Inc. or its successor organization.

JJ. "SPP Tariff" or "OATT" means SPP's Open Access Transmission Tariff.

KK. "Stated Values" means values that are fixed and not subject to change in an Annual Update. Stated values include: (i) the authorized return on equity ("ROE"); (ii) Depreciation and amortization rates; and (iii) and other similar fixed values. Stated Values may be changed only pursuant to FPA Section 205 or 206.

LL. "True-up Adjustment" means the calculated difference between the projected and actual ATRR for a Rate Year.

MM. "USoA" means RUS Uniform System of Accounts.

## Section II Annual Update

A. On or before July 1 of each calendar year, Mountrail-Williams shall:

1. Calculate the projected ATRR for the following Rate Year in accordance with the Formula Rate and using the Formula Rate Template;

2. Calculate the True-up Adjustment for the preceding Rate Year as described and defined in Section III below, if applicable, beginning in 2018;

3. Sum the projected ATRR for the following Rate Year and the True-up Adjustment for the Prior Rate Year, including interest, as explained in Section III below.

4. Provide its Annual Update to SPP and cause such information to be accessible on SPP's OASIS; and

5. If the date for posting the Annual Update falls on a weekend or a holiday recognized by FERC, then the posting shall be due on the next Business Day. The date on which such posting occurs shall be that year's Publication Date. Any delay in Publication Date shall result in an equivalent extension of time for the submission of Information Requests.

B. Concurrent with the Annual Update postings, Mountrail-Williams shall provide a notice concerning that posting to SPP to serve electronically upon the Service List.[1]

---

[1] As used in these Protocols, "Service List" shall mean the list of email addresses maintained by SPP of Interested Parties, provided that such Interested Parties request to be added to the Service List through the "Exploder List" link on the SPP OASIS. As of January 2016, the Exploder List was titled "Formula Rate Information Notification" and could be accessed at http://www.spp.org/stakeholder-center/exploder-lists/.

C. The Annual Update shall:

1. Include a workable populated Formula Rate Template with fully functional spreadsheets showing the calculation of the Annual Update and underlying work papers in native format with links and formulas intact, including sufficiently detailed work papers and supporting documentation for data;

2. Be based on the independently-audited books and records of Mountrail-Williams for the most recent fiscal year including its CFC Form No. 7 or successor reports;

3. Provide sufficient information to enable Interested Parties to replicate the calculation of the formula results from the Formula Rate;

4. Identify any change in accounting that affects the inputs to the Formula Rate or the resulting charges billed under the Formula Rate, including:

   a. Any Accounting Changes, such as the initial implementation of an accounting standard or policy; the initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific direction; or the correction of errors and prior period adjustments that impact the ATRR.

   b. Any items included in the Formula Rate at an amount other than a historic cost basis.

   c. Individual impact of any Accounting Changes in Section II.C.4.a above on charges billed under the Formula Rate.

   d. Any Accounting Changes related to a reorganization or merger transaction;

5. Not seek to modify the Formula Rate; and

6. With each Annual Update, Mountrail-Williams will include a list of any new transmission facilities included in the Formula Rate Template that were not included in the prior Annual Update. New transmission facilities include but are not limited to additional substations, breakers, other major substation equipment, and additional transmission line miles. The list will indicate the Zone 19 Attachment AI Guidance Document criteria that Mountrail-Williams believes supports each facility's inclusion in Mountrail-Williams's annual transmission revenue requirement as well as the beginning-of-year and end-of-year balances

associated with that facility. This provision in no way limits the rights of any party to challenge inclusion of new facilities.

## Section III Annual True-Up Adjustment

A. Mountrail-Williams will calculate the amount of under- or over-collection of its actual ATRR during the preceding Rate Year ("True-up Adjustment"). The True-up Adjustment shall be the sum of components 1 and 2, determined in the following manner:

1. *Difference between the projected ATRR and the actual ATRR*: Mountrail-Williams's actual revenues collected during the previous Rate Year[2] will be compared to Mountrail-Williams's actual ATRR for the previous Rate Year calculated in accordance with Mountrail-Williams's Formula Rate and based upon (i) Mountrail-Williams's CFC Form No. 7 for that same Rate Year, (ii) any Commission orders specifically applicable to Mountrail-Williams's calculation of its ATRR, (iii) the books and records of Mountrail-Williams (which shall be maintained consistent with the USoA), (iv) RUS accounting policies and practices applicable to the calculation of annual revenue requirements under formula rates, and (v) any aspects of the Tariff or SPP Governing Documents that apply to the calculation of annual revenue requirements under individual transmission owner formula rates,[3] to determine any over- or under-recovery ("True-up Adjustment"). Mountrail-Williams will include a variance analysis of, at minimum, actual revenue requirement components of rate base, operating and maintenance expenses, depreciation expense, taxes, return on rate base, and revenue credits as compared to the corresponding components in the projected ATRR that was calculated for the previous Rate Year with an explanation of material changes; and

2. *Interest*: Interest on any over-or under-recovery shall be calculated in accordance with 18 C.F.R. § 35.19a, and shall be accrued from the date on which the over- or under-recovery occurs to the date on which the refunds or surcharges are applied;

B. Mountrail-Williams will reflect the True-up Adjustment as a line item in its Formula Rate Template included with the Annual Update.

C. An affidavit from the Manager of Finance and Accounting of Mountrail-Williams (or a similar successor position, if applicable) attesting to the accuracy of the cost and revenue data will also be provided.

---

[2] Because the initial year of this rate schedule is a partial year, the actual revenues collected and the Net Revenue Requirement will be converted to monthly amounts. The difference between the monthly actual revenues collected and the monthly Net Revenue Requirement will be multiplied by the number of months the Formula Rate was in effect to calculate the True-up Adjustment.

[3] SPP Governing Documents include the Tariff, Bylaws, Criteria, and Membership Agreements.

## Section IV Review of Annual Update

Within twenty (20) calendar days of the Publication Date of Mountrail-Williams's Annual Update and with at least ten (10) calendar days' notice, Mountrail-Williams will host a meeting for Interested Parties to discuss the Annual Update ("Annual Meeting"). Mountrail-Williams shall provide notice of this meeting concurrent with the posting of the Formula Rate Update accessible on SPP's OASIS. The notice shall include the date, time and location of the Annual Meeting and also shall be provided to Interested Parties via the Service List. The Annual Meeting shall also be available by telephone and/or web access with all meeting materials provided electronically from the OASIS.

A. Information Exchange

1. Interested Parties may begin submitting information requests immediately following the Publication Date of the Annual Rate Update and will have until ninety (90) calendar days after the date of the Publication Date to serve reasonable information requests on Mountrail-Williams for information and work papers supporting the Annual Rate Update. Such information requests shall be limited to those that are necessary to determine:

    a. The extent or effect of an accounting change;

    b. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

    c. The proper application of the Formula Rate and procedures in these Protocols;

    d. The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

    e. The effect of any change to the underlying USoA or Formula Rate Template; or

    f. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

The Information Requests shall not otherwise be directed to ascertain whether the Formula Rate is just and reasonable. Mountrail-Williams will not claim that responses to information and document request pursuant to the Protocols are subject to any settlement confidentiality provision however, Mountrail-Williams may require that Interested Parties execute a non-disclosure agreement to obtain access to material that Mountrail-Williams deems commercially

sensitive or that contains Critical Energy Infrastructure Information as that term is defined in 18 C.F.R. § 388.113(c)(1).

2. Mountrail-Williams shall make a good faith effort to respond to information requests pertaining to the Annual Update within ten (10) Business Days of receipt.

3. Mountrail-Williams shall request that SPP post on a publicly accessible portion of the SPP OASIS all information requests from Interested Parties and Mountrail-Williams' response(s) to such requests. If responses to information requests contain information deemed by Mountrail-Williams to be confidential, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement executed by the requesting party and Mountrail-Williams.

4. If the deadline for Interested Parties to submit Information Requests falls on a weekend or holiday recognized by FERC, the deadline will be extended to the next Business Day.

B. Informal Challenge Procedures

1. Interested Parties shall have until November 1 (or the first Business Day after November 1 if November 1 falls on a weekend or holiday recognized by FERC) to notify Mountrail-Williams in writing (which may be electronically) of any specific Informal Challenges. The Informal Challenge must specify the inputs, supporting explanations, allocations calculations, or other information to which the Interested Party objects and provide an appropriate explanation and documents to support its Informal Challenge. Mountrail-Williams will make a good faith effort to respond to any Informal Challenge within twenty (20) calendar days of notification of such Informal Challenge. Mountrail-Williams, and if appropriate SPP, shall appoint representatives to work with the Interested Party to resolve the Informal Challenge.

2. Mountrail-Williams will request that SPP post on a publicly accessible portion of the SPP OASIS all Informal Challenges from Interested Parties and Mountrail-Williams's responses to the Informal Challenges. If responses to Informal Challenges contain information deemed by Mountrail-Williams to be confidential, such information will not be publicly posted but will be made available to Interested Parties pursuant to a confidentiality agreement executed by the requesting Interested Party and Mountrail-Williams.

3. Mountrail-Williams will request that SPP post on the SPP OASIS, the final True-up Adjustment no later than November 30 of each year.

4. Any changes or adjustments to the Annual Update resulting from the Information

Exchange and Informal Challenge procedures that are agreed to by Mountrail-Williams and resolved prior to the end of the Review Period shall be reported in the Final Posting. Any changes or adjustments agreed to by Mountrail-Williams after this date will be reported in the Informational Filing made with FERC and will be reflected in the Annual Rate Update for the following Rate Year.

C. Formal Challenges

1. Interested Parties shall have until January 15 (or the first Business Day after January 15 if January 15 falls on a weekend or holiday recognized by FERC) to file a Formal Challenge. A party may not pursue a Formal Challenge if that party did not submit an Informal Challenge on at least one issue. Having submitted an Informal Challenge on at least one issue, an Interested Party may pursue a Formal Challenge on other issues. Regardless of whether an Interested Party pursues or fails to pursue Informal or Formal Challenges, an Interested Party may file a complaint under section 206 of the Federal Power Act at any time.

2. A Formal Challenge shall:

a. Clearly identify the action or inaction which is alleged to violate the filed Formula Rate or Protocols;

b. Explain how the action or inaction violates the filed Formula Rate or Protocols;

c. Set forth the business, commercial, economic or other issues presented by the action or inaction as such relate to or affect the party filing the Formal Challenge, including:

i. The extent or effect of an accounting change;

ii. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

iii. The proper application of the Formula Rate and procedures in these Protocols;

iv. The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

v. The effect of any change to the underlying Uniform System of Accounts or Formula Rate template; or

vi. Any other information that may reasonably have a substantive

effect on the calculation of the charges pursuant to the Formula Rate.

d. Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;

e. State whether the issues presented are pending in an existing proceeding in any forum in which the Interested Party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;

f. State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that belief;

g. Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the Interested Party, including, but not limited to, contracts and affidavits; and

h. State whether the filing party utilized the Informal Challenge procedures described in these Protocols with regard to any issue.

3. Formal Challenges shall be filed with FERC, either in the FERC Docket assigned to the Informational Filing or via Section 206 of the FPA, and shall be served upon Mountrail-Williams contemporaneously with the filing at FERC. Service can be accomplished by electronic mail in accordance with 18 C.F.R. § 385.2010(f)(3), by facsimile, express delivery or messenger to the individual listed as the contact person in Mountrail-Williams's Informational Filing.

4. Mountrail-Williams will provide a response to the Formal Challenge within thirty (30) calendar days.

5. In any proceeding initiated by FERC concerning the Annual Update or in response to a Formal Challenge, Mountrail-Williams shall bear the burden, consistent with section 205 of the FPA, of proving that it has correctly applied the terms of the Formula Rate consistent with these Protocols, and that it followed the applicable requirements and procedures in these Protocols in that year's Annual Update. Nothing herein is intended to alter the burdens applied by FERC with respect to prudence challenges.

D. Modification of Formula Rate or Annual Update

1. No party shall seek to modify the Formula Rate under the Challenge procedures (either Formal or Informal) set forth in these Protocols and the Annual Update shall not be subject to challenge for the purpose of modifying the Formula Rate.

Modifications to the Formula Rate may be made only pursuant to Federal Power Act section 205 or section 206.

2. A change to the Formula Rate's fixed inputs related to ROE, depreciation rates, capital structure, amortization periods, and any ROE incentives for SPP regional projects may not be made absent the appropriate filing with FERC pursuant to the FPA Sections 205 or 206, provided, however, that Mountrail-Williams may make a limited Section 205 filing to change depreciation rates, amortization periods, Post-Employment Benefits other than Pensions recovery, and/or ROE incentives for SPP regional projects, in which the sole issue for examination shall be whether the proposed changes(s) are just and reasonable, and not unduly discriminatory.

3. If Mountrail-Williams makes a correction to a Mistake in its financial information during a Rate Year that would affect the Formula Rate for that Rate Year, such corrections and any resulting refunds or surcharges shall be reflected in the Annual Update for the next effective Rate Year with interest computed in accordance with the SPP Tariff. For purposes of these Protocols, "Mistake" shall mean errors or omissions regarding the values inputted into the Formula Rate template, such as arithmetic or computational errors. Mistakes shall not include matters involving exercise of judgment or substantive differences of opinion regarding the derivation of an input that is more properly the subject of the annual review process.

4. Any changes to the data inputs or as the result of a FERC proceeding shall be incorporated into the Formula Rate and the charges produced by the Formula Rate in the Annual Update for the next effective Rate Year. Any interest on any refund shall be calculated in accordance with the SPP Tariff.

E. FERC Informational Filing

1. By December 15 of each year, Mountrail-Williams shall submit to FERC an informational filing ("Informational Filing") of its Annual Update.

2. This Informational Filing must include the information that is reasonably necessary to determine:

a. That input data under the Formula Rate is properly recorded in any underlying work papers;

b. That Mountrail-Williams has properly applied the Formula Rate and these procedures;

c. The accuracy of the data and the consistency with the Formula Rate of the ATRR and rates under review; and

d. The extent of accounting changes that affect Formula Rate inputs.

3. The Informational Filing must also describe all aspects of the Formula Rate or its

inputs that are subject of an ongoing dispute under the Informal or Formal Challenge procedures.

4. Contemporaneous with the making of such Informational Filing, Mountrail-Williams shall request that SPP provide notice of the Informational Filing to Interested Parties via the Service List and by posting the docket number assigned to the Informational filing on SPP's OASIS.

## Section V Joint SPP Transmission Owners' Meeting

If the SPP Transmission Owners with transmission projects that utilize a regional cost-sharing methodology implement a process to coordinate and hold joint meetings, Mountrail-Williams intends to participate in that process. Notice of joint informational meetings, including the time, date, and location, shall be posted on the SPP OASIS and distributed to Interested Parties via the Service List maintained by SPP no less than seven (7) calendar days prior to such meetings.

## Section VI Mountrail-Williams Example Schedule (Nominal Last Dates)

| Action | Date |
|---|---|
| Rate Year | January 1 - December 31 |
| Publication Date | July 1 |
| Annual Meeting of Interested Parties | July 11 - July 24 |
| Information Request Due Date | October 1 |
| Informal Challenges Due Date | November 1 |
| Final Posting | November 30 |
| Informational Filing | December 15 |
| Formal Challenge Due Date | January 15 |

| | | | |
|---|---|---|---|
| 7 | Return | Line 5 * Line 6 | #DIV/0! |

8 Notes:

A. Mor-Gran-Sou shall apply its base ROE and the 50-basis point adder to its actual capital structure except that for any four Rate Years, Mor-Gran-Sou, at its own discretion, may elect to
9 apply its base ROE plus any applicable adders to a hypothetical capital structure with an equity component of 35.24 percent and a debt component of 64.76 percent (“Capital Structure Option”). The four Rates Years may be consecutive or non-consecutive.

B. The base ROE of 9.6% and the incentive adder of 0.5% are fixed. The ROE shall remain in effect
10 absent Commission action under Federal Power Act Section 205 or 206.

C. The cost of capital for Total Margins and Equities reflects a 50
11 basis point incentive adder for RTO participation.

Notes:
A. Acquisition adjustments will not be used in the calculation of ATRR absent Commission approval through a 205 or 206 filing.
B. The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Worksheet with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 7 data requirements or other similar supporting documentation. Additional line items or line deletions will not require FPA Section 205 or 206 filings. Mor-Gran-Sou will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in Mor-Gran-Sou's Implementation Protocols. Mor-Gran-Sou may not change the columns or the formulas included in these Worksheets during the Annual Update.

18 Note:
A. The addition of new lines and the removal of outdated
19 lines may be necessary in order to accurately provide
information, and populate or remove data in the
Worksheet with changes in future years. Where
20 appropriate, these
changes will provide detail and linkage to
updated Form 7 data requirements or other similar
21 supporting
documentation. Additional line items or line deletions
will not require FPA Section 205 or 206 filings. Mor-Gran-
22 Sou will
describe such changes in the Annual Update, and the
changes will be subject to the review of Interested Parties
23 under
the procedures set forth in Mor-Gran-Sou's Implementation
Protocols. Mor-Gran-Sou may not change the columns or the
24 formulas
included in these Worksheets
25 during the Annual Update.
B. The total amount shown for Column D must match the
amount shown in Mor-Gran-Sou's RUS Form No. 7 for Other
26 Revenues.

| 9 | | | | | | | | | | |

10 Note:
A. The addition of new lines and the removal of outdated lines may
11 be necessary in order to accurately provide
information, and populate or remove data in the Worksheet with
12 changes in future years. Where appropriate, these
changes will provide detail and linkage to updated Form 7 data
13 requirements or other similar supporting
documentation. Additional line items or line deletions will not require FPA
14 Section 205 or 206 filings. Mor-Gran-Sou will
15 describe such changes in the Annual Update, and the changes will be

subject to the review of Interested Parties under the procedures set forth in Mor-Gran-Sou's Implementation Protocols. Mor-Gran-Sou may not change the columns or the formulas included in these Worksheets during the Annual Update.

Work sheet L

## Mor-Gran-Sou Electric Cooperative, Inc

## RTO / ISO Expenses (A575-576)

| A | B | C | D | E | F |
|---|---|---|---|---|---|
| Line | Account No. | Description | Annual Expense Amount | % Included in SPP | SPP Amount |
| | **575.1-575.8 RTO/ISO Expense - Operation** | | | | |
| 1a | | | $0.00 | 100% | $0.00 |
| 1b | | | $0.00 | 100% | $0.00 |
| … | | | $0.00 | 100% | $0.00 |
| 2 | **Total 575.1-575.8 RTO/ISO Expense - Operation (sum lines 1a-1xx) (Note A)** | | $0.00 | | $0.00 |
| | **576.1-576.5 RTO/ISO Expense - Maintenance** | | | | |
| 3a | | | $0.00 | 100% | $0.00 |
| 3b | | | $0.00 | 100% | $0.00 |
| … | | | $0.00 | 100% | $0.00 |
| 4 | **576.1-576.5 RTO/ISO Expense - Maintenance (sum lines 3a-3xx) (Note B)** | | $0.00 | | $0.00 |
| 5 | Notes | | | | |
| 6 | A. The total on line 2, column D must reconcile to the amounts shown on Form 7. | | | | |
| 7 | B. The total on line 4, column D must reconcile to the amounts shown on Form 7. | | | | |

C. Amounts listed on lines 1a-1xx and 3a-3xx are only eligible for inclusion in SPP Zone 19 ATRR following a change in accounting procedures to the Form 7 or Uniform System of Accounts, which would classify amounts in these accounts as eligible for transmission rate recovery. To the extent that this occurs, Mor-Gran-Sou may file a single-issue Section 205 filing with the Commission to seek recovery of these amounts in Zone 19 rates. Mor-Gran-Sou may not include any costs absent authorization from FERC via a Section 205 or 206 filing.

D. The addition of new lines and the removal of outdated lines necessary to populate or remove data in the Worksheet with the changes in future years does not require a Federal Power Act section 205 or 206 filing. The addition or removal of columns and formulas contained with those columns cannot be changed absent a Federal Power Act section 205 or 206 filing.

Note
20 s:
A. Percentage of "Recovery Approved" cannot be
21 added or changed absent approval from FERC.
B. AFUDC ceases when CWIP is recovered in rate base corresponding to the amount of CWIP included
22 in Rate Base. No CWIP will be included in rate base absent FERC authorization.
Accounting procedures must be provided during the annual update
23 to ensure that there is no duplicate recovery of
CWIP and corresponding AFUDC capitalized.
24 Projects are transmission related only.
C. The addition of new lines and the removal of outdated lines may be necessary in order to
25 accurately provide information, and populate or remove data in the Worksheet with
changes in future years. Where appropriate, these changes will provide detail and linkage to
26 updated Form 7 data requirements or other similar supporting documentation.
Additional line items will not require FPA Section 205 or 206 filings.
27 Mor-Gran-Sou will describe such changes in the Annual
Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in
28 Mor-Gran-Sou's Implementation Protocols. Mor-Gran-Sou may not change the columns
or the formulas included in these Worksheet
29 during the Annual Update.

29 Notes:

30 A. Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1.

31 This value includes subsequent capital investments required to maintain the facilities to their original capabilities.

32 Gross Plant does not include CWIP, Unamortized Regulatory Asset or Unamortized Abandoned Plant.

33 B. Net Plant is the Gross Plant less the associated Accumulated

Depreciation.
C. Depreciation Expense is the depreciation amount associated with the specified line or sub. Depreciation Expense includes the amortization of Abandoned Plant and any FERC approved Regulatory Asset.
D. The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Worksheet with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 7 data requirements or other similar supporting documentation.
Additional line items or line deletions will not

require FPA Section 205 or 206 filings. Mor-Gran-Sou will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in Mor-Gran-Sou's Implementation Protocols. Mor-Gran-Sou may not change the columns or the formulas included in these Worksheets during the Annual Update.

36 Note:
A. The addition of new lines and the removal of outdated
37 lines may be necessary in order to accurately
provide information, and populate or remove data in
38 the Worksheet with changes in future years.
Annual changes may also include the addition of additional line
39 voltages in the "Calculation of Ratioed Miles" section.
Where appropriate, these changes will provide detail and
40 linkage to updated Form 7 data requirements or
other similar supporting documentation. Additional line items or
41 line deletions will not require FPA Section
205 or 206 filings. Mor-Gran-Sou will describe such changes in
42 the Annual Update, and the changes will be
43 subject to the review of Interested Parties under the procedures

set forth in Mor-Gran-Sou's Implementation
Protocols. Mor-Gran-Sou may not change the columns or the
44 formulas included in these Worksheets during
45 the Annual Update.

# Mor-Gran-Sou Electric Cooperative, Inc. Transmission Formula Rate Implementation Protocols

The transmission formula rate template ("Formula Rate Template") of Mor-Gran-Sou Electric Cooperative, Inc. ("Mor-Gran-Sou") and these Transmission Formula Rate Implementation Protocols ("Protocols") together comprise the filed rate ("Formula Rate") of Mor-Gran-Sou for transmission revenue requirement determinations under the Southwest Power Pool, Inc. ("SPP") Open Access Transmission Tariff ("SPP Tariff"). Mor-Gran-Sou must follow the instructions specified in the Formula Rate to calculate its Annual Transmission Revenue Requirement ("ATRR") and the rates for Network Integration Transmission Service ("NITS") and Point-to-Point ("PTP") Transmission Service in Zone 19.

Recovery of costs associated with existing and new facilities shall be consistent with the Formula Rate and Attachment AI and Attachment J, respectively, of the SPP Tariff. The ATRR shall be determined for January 1 to December 31 of a given calendar year. The Formula Rate shall become effective for recovery of Mor-Gran-Sou's ATRR upon the effective date authorized by the Federal Energy Regulatory Commission ("FERC") under section 205 of the Federal Power Act ("FPA").

The Formula Rate shall be applicable to service on and after January 1 of each calendar year through December 31 of the calendar year ("Rate Year"), subject to review, challenge and refunds or surcharges with interest, to the extent provided herein. These Protocols specify the dates applicable to the activities described herein. Should any due date fall on a weekend or a holiday recognized by FERC, then the due date shall be no later than the next Business Day.

## Section I Definitions

For purposes of these Protocols, the following capitalized terms shall have the meanings set forth below.

A. "Accounting Change" means any change in Mor-Gran-Sou's accounting policies and practices from those in effect for the Calendar Year upon which the immediately preceding Annual Update was based and that could impact the ATRR calculations under the Formula. Accounting Changes include any changes resulting from:

1. revisions to Rural Utilities Service's ("RUS") Uniform System of Accounts ("USoA");

2. revisions to the RUS Financial and Operating Report - Electric Distribution ("Form No. 7") data and the requirement to report certain values within it;

3. correction of errors and prior period adjustments that impact the ATRR;

4. the implementation of new estimation methods or policies;

5. changes to income tax elections;

6. changes in accounting practices or policies mandated by a state regulatory authority with jurisdiction over Mor-Gran-Sou that could impact the Formula Rate or calculations under the Formula;

7. implementation of accounting practices for unusual or unconventional items where RUS has not provided specific accounting direction;

8. a change in Mor-Gran-Sou's accounting policies and practices (as such changes are defined by the Statement of Financial Accounting Board Standards No. 154 issued by the Financial Accounting Standards Board or its successor);

9. Mor-Gran-Sou's own accounting changes (which constitute a change to the ATRR greater than or equal to $15,000) such as the addition or deletion of a subaccount not specified by FERC's USoA; or

10. a change in Mor-Gran-Sou's inter-corporate cost allocation policies or practices from those policies and/or practices in effect in the Prior Rate Year, which change causes a result under the Formula Rate different than the result under the Formula Rate as calculated without such change.

B. "Annual Transmission Revenue Requirement" or "ATRR" means the net revenue requirement for the Transmission Services calculated in accordance with the Formula Rate filed by Mor-Gran-Sou for informational purposes with FERC and posted on the SPP Open Access Same-Time Information System ("OASIS") on or before the annual Publication Date, subject to review pursuant to the provisions of these Protocols.

C. "Annual Meeting" means the meeting hosted by Mor-Gran-Sou for exchanging information with Interested Parties regarding the Formula Rate.

D. "Annual Update" means Mor-Gran-Sou's annual filing of its Formula Rate, in a working Excel™ format. The Annual Update is submitted as described in these Protocols.

E. "Business Day" means from 9:00 AM to 5:00 PM Central Prevailing Time other than weekends and Federal Holidays.

F. "Calendar Year" means January 1 through December 31 of a given year.

G. "Current Rate Year" means the Rate Year for which the Annual Update is posted on the SPP OASIS and which Mor-Gran-Sou has filed with FERC (*e.g.*, if the Annual Update is posted on June 30, 2019, and the Informational Filing is submitted to FERC on December 15, 2019, the Current Rate Year is January 1, 2020 through December 31, 2020).

H. "Customer(s)" or "Transmission Customer(s)" means the customers taking NITS, service under Grandfathered Agreements, or PTP Transmission Service.

I. "FERC" or "Commission" means the Federal Energy Regulatory Commission.

J. "Final Posting" means the Annual Update information that SPP posts to the SPP OASIS with changes agreed to during the informal review process.

K. "Form No. 7" means the RUS Financial and Operating Report - Electric Distribution, formerly RUS Form No. 7.

L. "Formal Challenge" means a challenge by an Interested Party to an aspect of the Annual Update that is filed with FERC, and served on Mor-Gran-Sou by electronic service on the date of such filing.

M. "Formula Rate Template" means the Mor-Gran-Sou transmission formula rate template set forth herein.

N. "Formula" means the Formula Rate Template set forth in Addendum 45 to Attachment H of the SPP Tariff.

O. "Formula Rate" has the meaning defined herein and means the Mor-Gran-Sou Implementation Protocols together with the Formula Rate Template.

P. "FPA" means the Federal Power Act.

Q. "Informal Challenge" means written notification by an Interested Party to Mor-Gran-Sou, during the Review Period, of any specific challenge to the Annual Update.

R. "Information Request" means a written request submitted by an Interested Party to Mor-Gran-Sou.

S. "Informational Filing" means Mor-Gran-Sou's annual filing at the Commission with the information stipulated in these Protocols.

T. "Initial Posting" means the date on which SPP posts Mor-Gran-Sou's Annual Update to the SPP OASIS.

U. "Interest" means interest calculated pursuant to 18 C.F.R. § 35.19a (a) (2) (iii), or successor regulation.

V. "Interested Party" includes (i) SPP Tariff Transmission Customers; (ii) any state regulatory agency with rate jurisdiction over a public utility located within the SPP footprint; and (iii) any consumer advocate agency authorized by state law to review and contest the rates for any such public utility.

W. "NITS" means Network Integration Transmission Service as defined in the SPP Tariff.

X. "OASIS" means Open Access Same-Time Information System.

Y. "OATT" or "SPP Tariff "means SPP's Open Access Transmission Tariff.

Z. "Prior Rate Year" means the Rate Year prior to the Current Rate Year (*e.g.*, if the Current Rate Year is January 1, 2019 through December 31, 2019, then the Prior Rate Year is January 1, 2018 through December 31, 2018).

AA. "PTP Rates" means the point-to-point rates derived from the Formula Rate.

BB. "Publication Date" means the date on which Mor-Gran-Sou posts the Annual Update to the SPP OASIS. The Publication Date for each year beginning in 2019 shall be no later than June 30, provided, however, that if June 30 should fall on a weekend or a holiday recognized by FERC, then the posting shall be due no later than the next Business Day, and the Publication Date shall correspond to the actual posting date.

CC. "Rate Year" means January 1 of a given year through December 31 of the same Calendar year.

DD. "Review Period" means, unless otherwise extended in writing by Mor-Gran-Sou, the period extending from the Publication Date through October 28, which includes a period for submission of Information Requests and a period for preparation of Informal Challenges.

EE. "RUS" means Rural Utilities Service.

FF. "SPP" means Southwest Power Pool, Inc. or its successor organization.

GG. "SPP Tariff" or "OATT" means SPP's Open Access Transmission Tariff.

HH. "Stated Values" means values that are fixed and not subject to change in an Annual Update. Stated values include: (i) the authorized return on equity ("ROE"); (ii) depreciation and amortization rates; and (iii) other similar fixed values. Stated Values may be changed only pursuant to FPA section 205 or 206.

II. "USoA" means FERC's Uniform System of Accounts.

## Section II Annual Update

A. On or before June 30 of each calendar year (the Publication Date), Mor-Gran-Sou shall:

1. Recalculate the ATRR and the rates for zonal NITS service for the new Rate Year in accordance with the Formula Rate and using the Formula Rate Template; and

2. Provide its Annual Update to SPP and request that SPP post such information to the SPP OASIS (the Initial Posting); and

3. If the date for posting the Annual Update falls on a weekend or a holiday recognized by FERC, then the Initial Posting shall be due on the next Business Day. The date on which the Initial Posting occurs shall be that year's Publication

Date. Any delay in the Publication Date shall result in an equivalent extension of time for the submission of Information Requests.

B. Concurrent with the Initial Posting, Mor-Gran-Sou shall provide the Annual Update to SPP to serve electronically upon the Service List.[i]

C. The Annual Update shall:

1. Include a workable populated Formula Rate Template with fully functional spreadsheets showing the calculation of the Annual Update and underlying work papers in native format with links and formulas intact, including sufficiently detailed work papers and supporting documentation for data;

2. Be based on the independently-audited books and records of Mor-Gran-Sou for the most recent fiscal year including its certified Form No. 7 or successor reports, including the Financial and Operating Report Electric Power Supply (Op. Report – Power Supply), (January 1 through December 31);

3. Provide sufficient information to enable Interested Parties to replicate the calculation of the formula results from the Formula Rate;

4. With respect to any change in accounting that affects the inputs to the Formula Rate or the resulting charges billed under the Formula Rate, Mor-Gran-Sou shall identify:

   a. Any Accounting Changes, such as the initial implementation of an accounting standard or policy; the initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific direction; or the correction of errors and prior period adjustments that impact the ATRR.

   b. Any items included in the Formula Rate at an amount other than a historic cost basis.

   c. Individual impact of any changes in Section I.C (4)(a) above on charges billed under the Formula Rate.

   d. Accounting Changes related to any reorganization or merger transaction.

5. Not seek to modify the Formula Rate.

6. With each Annual Update, Mor-Gran-Sou will include a list of any new transmission facilities included in the Formula Rate Template that were not included in the prior Annual Update. New transmission facilities include but are not limited to additional substations, breakers, other major substation equipment, and additional transmission line miles. The list will indicate the Zone 19 Attachment AI Guidance Document criteria that Mor-Gran-Sou believes supports each facility's inclusion in Mor-Gran-Sou's ATRR as well as the beginning-of-year and end-of-year balances associated with that facility. This provision in no way limits the rights of any Interested Party to challenge inclusion of new facilities.

## Section III Review of Annual Update

Within twenty (20) calendar days of the posting of Mor-Gran-Sou's Annual Update, and with at least seven (7) calendar days' notice, Mor-Gran-Sou will host a meeting for Interested Parties to discuss the Annual Update ("Annual Meeting"). Mor-Gran-Sou shall provide notice of this meeting concurrent with the posting of the Annual Update accessible on the SPP OASIS. The notice shall include the date, time and location of the Annual Meeting and shall be provided to Interested Parties through the Service List. The Annual Meeting shall also be available by telephone and/or web access with all meeting materials provided electronically from the SPP OASIS.

A. Information Exchange

1. Interested Parties may begin submitting Information Requests immediately following the Publication Date of the Annual Update and will have until September 28 to serve reasonable Information Requests on Mor-Gran-Sou for information and work papers supporting the Annual Update. Such Information Requests shall be limited to that which is necessary to determine:

   a. The extent or effect of an Accounting Change;

   b. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

c. The proper application of the Formula Rate and procedures in these Protocols;

d. The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

e. The effect of any change to the underlying USoA or Formula Rate Template; or

f. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

The information and document requests shall not otherwise be directed to ascertain whether the Formula Rate is just and reasonable. Mor-Gran-Sou will not claim that responses to information and document requests pursuant the Protocols are subject to any settlement confidentiality provision; however, Mor-Gran-Sou may require that Interested Parties execute a non-disclosure agreement to obtain access to material that Mor-Gran-Sou deems commercially sensitive or that contains Critical Energy Infrastructure Information as that term is defined in 18 CFR § 388.113(c)(1).

2. Mor-Gran-Sou shall make a good faith effort to respond to Information Requests pertaining to the Annual Update within fifteen (15) Business Days of receipt.

3. Mor-Gran-Sou shall request that SPP post on a publically accessible portion of the SPP OASIS all Information Requests from Interested Parties and Mor-Gran-Sou's response(s) to such requests, and a link to the posting will be electronically served on all Interested Parties via the Service List. If responses to Information Requests contain information deemed by Mor-Gran-Sou to be confidential, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement executed by the requesting party and Mor-Gran-Sou.

4. If the deadline for Interested Parties falls on a weekend or holiday recognized by the FERC, the deadline will be extended to the next Business Day.

B. Informal Challenge Procedures

1. Interested Parties shall have until October 28 (or the first Business Day after October 28 if October 28 falls on a weekend or holiday) to notify Mor-Gran-Sou in writing (which may be electronically) of any specific Informal Challenges. The Informal Challenge must specify the inputs, supporting explanations, allocations calculations, or other information to which the Interested Party objects and provide an appropriate explanation and documents to support its Informal Challenge. Mor-Gran-Sou will make a good faith effort to respond to any Informal Challenge within twenty (20) calendar days of notification of such Informal Challenge. Mor-Gran-Sou, and, if appropriate, SPP, shall appoint senior representatives to work with the Interested Party to resolve the Informal Challenge.

2. Mor-Gran-Sou will request that SPP post on the SPP OASIS all Informal Challenges from Interested Parties and Mor-Gran-Sou's responses to the Informal Challenges, and a link to the posting will be electronically served on all Interested Parties via the Formula Rate Posting Information Notification List. If responses to Informal Challenges contain information are deemed by Mor-Gran-Sou to be confidential, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement executed by the requesting party and Mor-Gran-Sou.

3. Any changes or adjustments to the Annual Update resulting from the Information Exchange and Informal Challenge procedures that are agreed to by Mor-Gran-Sou and resolved prior to the end of the Review Period shall be reported in the Final Posting on the SPP OASIS. Any changes or adjustments agreed to by Mor-Gran-Sou after this date will be reported in the Informational Filing made with FERC and will be reflected in the Annual Update for the following Rate Year.

C. Formal Challenges.

1. An Interested Party shall have until January 15 (or the first Business Day after January 15 if January 15 falls on a weekend or holiday recognized by FERC) to file a Formal Challenge. A party may not pursue a Formal Challenge if that party did not submit an Informal Challenge on at least one issue. Having submitted an Informal Challenge on at least one issue, an Interested Party may pursue a Formal Challenge on other issues. Regardless of whether an Interested Party pursues or fails to pursue Informal or Formal Challenges, an Interested Party may file a complaint under section 206 of the FPA at any time.

2. A Formal Challenge shall:

a. Clearly identify the action or inaction which is alleged to violate the filed Formula Rate or Protocols;

b. Explain how the action or inaction violates the filed Formula Rate or Protocols;

c. Set forth the business, commercial, economic or other issues presented by the action or inaction as such relate to or affect the party filing the Formal Challenge, including:

i. The extent or effect of an Accounting Change;

ii. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

iii. The proper application of the Formula Rate and procedures in these Protocols;

iv. The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

v. The effect of any change to the underlying Uniform System of Accounts or Formula Rate Template; or

vi. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

d. Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;

e. State whether the issues presented are pending in an existing proceeding in any forum in which the Interested Party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;

f. State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that belief;

g. Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the Interested Party, including, but not limited to, contracts and affidavits; and

h. State whether the filing party utilized the Informal Challenge procedures described in these Protocols with regard to any issue.

3. Formal Challenges shall be filed with FERC, either in the FERC Docket assigned to the Informational Filing or via section 206 of the FPA, and shall be served upon Mor-Gran-Sou contemporaneously with the filing at FERC. Service can be accomplished by electronic mail in accordance with 18 C.F.R. § 385.2010(f) (3), or by facsimile, express delivery or messenger to the individual listed as the contact person in Mor-Gran-Sou's Informational Filing.

4. In any proceeding initiated by FERC concerning the Annual Update or in response to a Formal Challenge, Mor-Gran-Sou shall bear the burden, consistent with section 205 of the FPA, of proving that it has correctly applied the Formula Rate consistent with these Protocols. Nothing herein is intended to alter the burdens applied by FERC with respect to prudence challenges.

D. Modification of Formula Rate or Annual Update

1. No party shall seek to modify the Formula Rate under the Challenge procedures (either Formal or Informal) set forth in these Protocols and the Annual Update shall not be subject to challenge for modifying the Formula Rate. Modifications to the Formula Rate may be made only pursuant to Federal Power Act section 205 or section 206.

2. A change to the Formula Rate fixed inputs related to ROE, depreciation rates, capital structure, amortization periods, or any ROE incentives for SPP regional projects may not be made absent the appropriate filing with FERC pursuant to the FPA, sections 205 or 206, provided, however, that Mor-Gran-Sou may make a limited section 205 filing to change depreciation rates, amortization periods, Post-Employment Benefits other than Pensions recovery, and/or ROE incentives for SPP regional projects, in which the sole issue for examination shall be whether the proposed changes(s) are just and reasonable, and not unduly discriminatory. Any modification to the Formula Rate will require a filing under section 205 or 206 of the FPA.

3. If Mor-Gran-Sou makes a correction to a Mistake in its financial information during the Current Rate Year that would affect the Formula Rate for the Current Rate Year, such corrections and any resulting refunds or surcharges shall be reflected in the Annual Update for the next effective Rate Year with interest computed in accordance with 18 C.F.R. § 35.19a. For purposes of these Protocols, "Mistake" shall mean errors or omissions regarding the values inputted into the Formula Rate Template, such as arithmetic or computational errors. Mistakes shall not include matters involving exercise of judgment or substantive differences of opinion regarding the derivation of an input that is more properly the subject of the annual review process.

4. Any changes to the data inputs or as the result of a FERC proceeding shall be incorporated into the Formula Rate and the charges produced by the Formula Rate in the Annual Update for the next effective Rate Year. Any interest on any refund shall be calculated in accordance with 18 C.F.R. § 35.19a.

E. Informational Filing

1. By December 15 of each year, Mor-Gran-Sou shall submit to FERC an informational filing ("Informational Filing") of its Annual Update under a separate docket number.

2. This Informational Filing must include the information that is reasonably necessary to determine:

   a. That input data under the Formula Rate is properly recorded in any underlying work papers;

   b. That Mor-Gran-Sou has properly applied the Formula Rate and these procedures;

   c. The accuracy of the data and the consistency with the Formula Rate of the ATRR and rates under review; and

   d. The extent of Accounting Changes that affect Formula Rate inputs.

3. The Informational Filing must also describe all aspects of the Formula Rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures.

4. Contemporaneous with the making of such Informational Filing, Mor-Gran-Sou shall provide notice of the Informational Filing to Interested Parties via the Service List and request that SPP post the notice and the docket number assigned to the Informational filing on the SPP OASIS.

## Section IV Joint SPP Transmission Owners' Meeting

If the SPP Transmission Owners with transmission projects that utilize a regional cost-sharing methodology implement a process to coordinate and hold joint meetings, Mor-Gran-Sou intends to participate in that process. Notice of joint informational meetings, including the time, date, and location, shall be posted on the SPP OASIS and distributed to Interested Parties via the Formula Rate Posting Information Notification List no less than seven (7) days prior to such meetings.

## Section V Mor-Gran-Sou Example Schedule

| Line No. | Action | Begin | End | Calendar Days from Publication Date |
|---|---|---|---|---|
| 1 | Rate Year | January 1, 2020 | December 31, 2020 | |
| 2 | Publication Date | | July 1, 2019 | |
| 3 | Annual Meeting of Interested Parties | | July 22, 2019 | 7-20 |
| 4 | Information Request Due Date | July 1, 2019 | September 30, 2019 | 90 |
| 5 | Informal Challenges Due Date | | October 30, 2019 | 120 |
| 6 | Final Posting | | December 1, 2019 | |
| 7 | Informational Filing | | December 15, 2019 | |
| 8 | Formal Challenge Due Date | | January 15, 2020 | |

[i] As used in these Protocols, "Service List" shall mean the list of email addresses maintained by SPP of Interested Parties, provided that such Interested Parties request to be added to the Service List through the "Exploder List" link on the SPP website. As of June 2017, the Exploder List was titled "Formula Rate Posting Information Notification" and could be accessed at http://www.spp.org/stakeholder-center/exploder-lists/.

**Kansas City Board of Public Utilities**
**Transmission Formula Rate Implementation Protocols**

## I. ANNUAL UPDATE

1. The transmission formula rate template of Kansas City Board of Public Utilities ("BPU") and these Transmission Formula Rate Implementation Protocols ("Protocols") together comprise the filed rate ("Formula Rate") of BPU for transmission service in the BPU zone of the Southwest Power Pool, Inc. ("SPP") footprint. BPU must follow the instructions specified in the Formula Rate to calculate its Annual Transmission Revenue Requirements ("ATRR") and the rates for Network Integration Transmission Service ("NITS") and Point-to-Point ("PTP") Transmission Service, as well as rates for Scheduling, System Control and Dispatch Service ("Schedule 1 Service") in the BPU zone of the SPP footprint.

2. The Formula Rate shall be applicable to service on and after January 1 of each calendar year through December 31 of the following calendar year ("Rate Year"), subject to review, challenge, and refunds or surcharges with interest, to the extent provided herein.

3. On or before August 15th of each calendar year, BPU shall:

(a) Recalculate the ATRR and the rates for zonal NITS, zonal PTP and Schedule 1 service for the new Rate Year in accordance with the Formula Rate ("Annual Update"); and

(b) Provide its Annual Update to SPP and cause such information to be accessible on SPP's website; and

(c) Post its Annual Update to the BPU website; and

(d) If the date for posting the Annual Update falls on a weekend or a holiday recognized by FERC, then the posting shall be due on the next business day. The date on which such posting occurs shall be that year's "Posting Date." Any delay in the Posting Date shall result in an equivalent extension of time for the submission of Information Requests discussed in Section III of these Protocols.

4. Concurrent with the Annual Update postings, BPU shall provide a notice of such posting via an email distribution list to all Interested Parties.

(a) Interested Parties shall include:

i. Customers under the SPP Tariff;

ii. the Kansas Corporation Commission; and

iii. any person or entity who communicates to BPU an interest in participating in the Annual Update process.

5. The Annual Update shall:

(a) Include a workable populated rate formula template with fully functional spreadsheets showing the calculation of the Annual Update and underlying workpapers in native format with links and formulas intact, including sufficiently detailed workpapers and supporting documentation for data;

(b) Be based on the independently-audited books and records of BPU for the most recent calendar year January 1 through December 31;

(c) Provide sufficient information to enable Interested Parties to replicate the calculation of the formula results from the Formula Rate;

(d) With respect to any change in accounting that affects the inputs to the Formula Rate or the resulting charges billed under the Formula Rate, BPU shall identify:

i. Any accounting changes, such as the initial implementation of an accounting standard or policy; the initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific direction; or the correction of errors and prior period adjustments that impact the ATRR.

ii. Any items included in the Formula Rate at an amount other than a historic cost basis.

iii. The individual impact of any changes in i. or ii. above on charges billed under the Formula Rate.

(e) Not seek to modify the Formula Rate.

## II. REVIEW OF ANNUAL UPDATE

Within twenty (20) but not less than 10 days after the posting of BPU's Annual Update, BPU will host a Meeting for Interested Parties to discuss the Annual Update ("Annual Meeting"). BPU shall provide notice of this meeting concurrent with the posting of the Formula Rate Update accessible on SPP's website and BPU's website. The notice shall include the date, time, and location of the Annual Meeting and shall be provided via email distribution list of Interested Parties identified in Section I.4(a) above. The Annual Meeting shall also be available by telephone and web access with all meeting materials provided electronically.

## III. INFORMATION EXCHANGE

1. Interested Parties may begin submitting information requests immediately following the

Posting Date of the Annual Rate Update and will have until sixty (60) days of the date of the posting to serve reasonable information requests on BPU for information and work papers supporting the Annual Rate Update. Such information requests shall be limited to that what is necessary to determine:

(a) The extent or effect of an accounting change;

(b) Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

(c) The proper application of the Formula Rate and procedures in these Protocols;

(d) The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

(e) The effect of any change to the underlying Uniform System of Accounts or Formula Rate template; or

(f) Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

The information and document requests shall not otherwise be directed to ascertain whether the Formula Rate is just and reasonable.

2. BPU shall make a good faith effort to respond to information requests pertaining to the Annual Update within seven (7) business days.

3. BPU shall post on its website and cause to be accessible on SPP's website all information requests from Interested Parties and BPU's response(s) to such requests. If responses to information requests contain information deemed by BPU to be confidential, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement executed by the requesting party and BPU.

## IV. INFORMAL CHALLENGE PROCEDURES

1. Interested Parties shall have until November 1 (or the first Business Day after November 1 if November 1 falls on a weekend or holiday) to notify BPU in writing (which may be electronically) of any specific Informal Challenges. The Informal Challenge must specify the inputs, supporting explanations, allocations, calculations, or other information to which the Interested Party objects and provide an appropriate explanation and documents to support its

Informal Challenge. BPU will make a good faith effort to respond to any Informal Challenge within twenty (20) days of notification of such Informal Challenge. BPU, and, if appropriate, SPP, shall appoint representatives to work with the Interested Party to resolve the Informal Challenge.

2. BPU will post on its website and cause to be accessible on SPP's website all Informal Challenges from Interested Parties and BPU's response(s) to the Informal Challenges. If responses to information requests contain information deemed by BPU to be confidential, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement executed by the requesting party and BPU.

3. Any changes or adjustments to the Annual Update resulting from the Information Exchange and Informal Challenge procedures that are agreed to by BPU and resolved prior to the Informational Filing shall be reported in the Informational Filing made with FERC and will be reflected in the Annual Rate Update for the following Rate Year.

4. The notification for the Informal Challenges should contain sufficient information to present the issue in question, as well as sufficient contact information.

(a) Any written notification should be addressed to:
ECC Regulatory Affairs
Kansas City Board of Public Utilities
312 N 65$^{th}$ St.
Kansas City, KS 66102

(b) E-mail notifications can be made to:
RegulatoryAffairs@bpu.com

## V. FORMAL CHALLENGES

1. A Formal Challenge shall:

(a) Clearly identify the action or inaction which is alleged to violate the filed Formula Rate or Protocols;

(b) Explain how the action or inaction violates the filed Formula Rate or Protocols;

(c) Set forth the business, commercial, economic or other issues presented by the action or inaction as such relate to or affect the party filing the Formal Challenge, including:

i. The extent or effect of an accounting change;

ii. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

iii. The proper application of the Formula Rate and procedures in these Protocols;

iv. The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

v. The effect of any change to the underlying Uniform System of Accounts or Formula Rate template; or

vi. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

(d) Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;

(e) State whether the issues presented are pending in an existing proceeding in any forum in which the Interested Party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;

(f) State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that belief;

(g) Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the Interested Party, including, but not limited to, contracts and affidavits; and

(h) State whether the filing party utilized the Informal Challenge procedures described in these Protocols with regard to any issue.

2. Formal Challenges shall be filed with FERC, either in the FERC Docket assigned to the Informational Filing or via Section 206 of the Federal Power Act, and shall be served upon BPU contemporaneously with the filing at FERC. Service can be accomplished by electronic mail in accordance with § 385.2010(f)(3), by facsimile, express delivery or messenger to the individual listed as the contact person in BPU's Informational Filing.

3. The notification for the Formal Challenges should contain sufficient information to present the issue in question, as well as sufficient contact information.

(a) Any written notification should be addressed to:
ECC Regulatory Affairs

Kansas City Board of Public Utilities
312 N. 65th St.
Kansas City, KS 66102

(b) E-mail notifications can be made to:
RegulatoryAffairs@bpu.com

## VI. MODIFICATION OF FORMULA RATE OR ANNUAL UPDATE

1. No party shall seek to modify the Formula Rate under the Challenge procedures (either Formal or Informal) set forth in these Protocols and the Annual Update shall not be subject to challenge for the purpose of modifying the Formula Rate.

2. A change to the Formula Rate fixed inputs related to rate of return on equity ("ROE"), depreciation rates, capital structure, amortization periods, and any ROE incentives for SPP regional projects may not be made absent the appropriate filing with FERC pursuant to the Federal Power Act ("FPA"), Sections 205 or 206.

3. If BPU makes a correction to a Mistake in its financial information during a Rate Year that would affect the Formula Rate for that Rate Year, such corrections and any resulting refunds or surcharges shall be reflected in the Annual Update for the next effective Rate Year with interest computed in accordance with the SPP Tariff. For purposes of these Protocols, "Mistake" shall mean errors or omissions regarding the values inputted into the Formula Rate template, such as arithmetic or computational errors. Mistakes shall not include matters involving exercise of judgment or substantive differences of opinion regarding the derivation of an input that is more properly the subject of the annual review process.

4. Any changes to the data inputs or as the result of a FERC proceeding shall be incorporated into the Formula Rate and the charges produced by the Formula Rate in the Annual Update for the next effective Rate Year. Any interest on any refund shall be calculated in accordance with the SPP Tariff.

## VII. INFORMATIONAL FILING

1. By December 1 of each year, BPU shall submit to FERC an informational filing ("Informational Filing") of its Annual Update.

2. This Informational Filing must include the information that is reasonably necessary to determine:

(a) That input data under the Formula Rate is properly recorded in any underlying workpapers;

(b) That BPU has properly applied the Formula Rate and these procedures;

(c) The accuracy of the data and the consistency with the Formula Rate of the ATRR and rates under review; and

(d) The extent of accounting changes that affect Formula Rate inputs.

3. The Informational Filing must also describe all aspects of the Formula Rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures.

4. Contemporaneous with the making of such Informational Filing, BPU shall provide notice of the Informational Filing via the mail distribution list and by posting the docket number assigned to the Informational filing on BPU's website and accessible on SPP's website.

## VIII. JOINT SPP TRANSMISSION OWNERS' MEETING

If the SPP Transmission Owners with transmission projects that utilize a regional cost-sharing methodology implement a process to coordinate and hold joint meetings, BPU will participate in that process.

| 5 | Rate Base | Worksheet A, Line 50, Column | | | | | | | #DIV/0! |
| 6 | Return | Line 4 * Line 5 | | | | | | | #DIV/0! |

7 Notes:
8 A.) The capital structure listed in Column (E) is calculated based on total capitalization amounts listed in Column (D).
9 B.) Roughrider shall apply its base ROE and the 50-basis point adder to its actual capital structure except that for any four Rate Years, Roughrider, at its own discretion, may elect to apply its base ROE plus any applicable adders to a proxy capital structure with an equity component of 35.24 percent and a debt component of 64.76 percent ("Capital Structure Option"). The four Rates Years may be consecutive or non-consecutive.
10 C.) The Cost of Capital for Total Margins and Equities (ROE) is fixed and cannot be modified or deleted absent authorization from FERC via a Section 205 or 206 filing. The Cost of Capital for Total Margins and Equities reflects a 50 basis point incentive adder for RTO participation. The Cost of Capital for Long Term Debt is calculated by dividing the interest expense in Column (G) by the total amount of LTD in Column (D).
11 D.) Column (I) values for lines 2-3 equal Column (H) values multiplied by Column (F) values.

54 Notes:

55 A. Acquisition adjustments will not be used in the calculation of ATRR absent Commission approval through a 205 or 206 filing.

56 B. The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Worksheet with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 7 data requirements or other similar supporting documentation. Additional line items or line deletions will not require FPA Section 205 or 206 filings. Roughrider will

6 describe such changes in the Annual Update, and the changes will
0 be subject to the review of Interested Parties under
6 the procedures set forth in Roughrider's Implementation Protocols.
1 Roughrider may not change the columns or the formulas
6 included in these Worksheets during the
2 Annual Update.
6 C. Stated Values in Column F Lines 3-7 are fixed and cannot be
3 changed absent Commission approval through
6 a Section 205 or 206 filing.

## Roughrider Electric Cooperative, Inc

Worksheet L

## RTO / ISO Expenses (A575-576) Rate Year Data Ending 12/31/2XXX; FY Ending 12/31/2XXX

| A<br>Line | B<br>Account No. | C<br>Description | D<br>Annual Expense Amount | E<br>% Included in SPP | F<br>SPP Amount |
|---|---|---|---|---|---|
| | | **575.1-575.8 RTO/ISO Expense - Operation** | | | |
| 1a | | | $0.00 | 100% | $0.00 |
| 1b | | | $0.00 | 100% | $0.00 |
| … | | | $0.00 | 100% | $0.00 |
| 2 | | **Total 575.1-575.8 RTO/ISO Expense - Operation (sum lines 1a-1xx) (Note A)** | $0.00 | | $0.00 |
| | | **576.1-576.5 RTO/ISO Expense - Maintenance** | | | |
| 3a | | | $0.00 | 100% | $0.00 |
| 3b | | | $0.00 | 100% | $0.00 |
| … | | | $0.00 | 100% | $0.00 |
| 4 | | **576.1-576.5 RTO/ISO Expense - Maintenance (sum lines 3a-3xx) (Note B)** | $0.00 | | $0.00 |

5 Notes
6 A. The total on line 2, column D must reconcile to the amounts shown on Form 7.
7 B. The total on line 4, column D must

reconcile to the amounts shown on Form 7.

C. Amounts listed on lines 1a-1xx and 3a-3xx are only eligible for inclusion in SPP Zone 19 ATRR following a change in accounting procedures to the Form 7 or Uniform System of Accounts, which would classify amounts in these accounts as eligible for transmission rate recovery. To the extent that this occurs, Roughrider may file a single-issue Section 205 filing with the Commission to seek recovery of these amounts in Zone 19 rates. Roughrider may not include any costs absent authroization from FERC via a Section 205 or 206 filing.

D. The addition of new lines and the removal of outdated lines necessary to populate or remove data in the Worksheet with the changes in future years does not require a Federal Power Act section 205 or 206 filing. The addition or removal of columns and formulas contained with those columns cannot be changed absent a Federal Power Act section 205 or 206 filing.

19

20 Notes:

21 A. Percentage of "Recovery Approved" cannot be added or changed absent approval from FERC.

22 B. AFUDC ceases when CWIP is recovered in rate base corresponding to the amount of CWIP included in Rate Base. No CWIP will be included in rate base absent FERC authorization.

23 Accounting procedures must be provided during the annual update to ensure that there is no duplicate recovery of

24 CWIP and corresponding AFUDC capitalized. Projects are transmission related only.

25 C. The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Worksheet with

26 changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 7 data requirements or other similar supporting documentation.

27 Additional line items will not require FPA Section 205 or 206 filings. Roughrider will describe such changes in the Annual

28 Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in Roughrider's Implementation Protocols. Roughrider may not change the columns

29 or the formulas included in these Worksheet during the Annual Update.

29 Notes:

30 A. Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1.

31 This value includes subsequent capital investments required to maintain the facilities to their original capabilities.

32 Gross Plant does not include CWIP, Unamortized Regulatory Asset or Unamortized Abandoned Plant.

33 B. Net Plant is the Gross Plant less the associated Accumulated Depreciation.

34 C. Depreciation Expense is the depreciation amount associated with the specified line

or sub.

Depreciation Expense includes the amortization of Abandoned Plant and any FERC approved Regulatory Asset.

D. The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Worksheet with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 7 data requirements or other similar supporting documentation. Additional line items or line deletions will not require FPA Section 205 or 206 filings. Roughrider will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in Roughrider's Implementation Protocols. Roughrider may not change the columns or the formulas included in these Worksheets during the Annual Update.

| 97 | 205 or 206 filings. Roughrider will describe such changes in the Annual Update, and the changes will be | | | | | |
| 98 | subject to the review of Interested Parties under the procedures set forth in Roughrider's Implementation | | | | | |
| 99 | Protocols. Roughrider may not change the columns or the formulas included in these Worksheets during | | | | | |
| 100 | the Annual Update. | | | | | |

# Roughrider Electric Cooperative, Inc. Transmission Formula Rate Implementation Protocols

The transmission formula rate template ("Formula Rate Template") of Roughrider Electric Cooperative, Inc. ("Roughrider") and these Transmission Formula Rate Implementation Protocols ("Protocols") together comprise the filed rate ("Formula Rate") of Roughrider for transmission revenue requirement determinations under the Southwest Power Pool, Inc. ("SPP") Open Access Transmission Tariff ("SPP Tariff"). Roughrider must follow the instructions specified in the Formula Rate to calculate its Annual Transmission Revenue Requirement ("ATRR") and the rates for Network Integration Transmission Service ("NITS") and Point-to-Point ("PTP") Transmission Service in Zone 19.

Recovery of costs associated with existing and new facilities shall be consistent with the Formula Rate and Attachment AI and Attachment J, respectively, of the SPP Tariff. The ATRR shall be determined for January 1 to December 31 of a given calendar year. The Formula Rate shall become effective for recovery of Roughrider's ATRR upon the effective date authorized by the Federal Energy Regulatory Commission ("FERC") under section 205 of the Federal Power Act ("FPA").

The Formula Rate shall be applicable to service on and after January 1 of each calendar year through December 31 of the calendar year ("Rate Year"), subject to review, challenge and refunds or surcharges with interest, to the extent provided herein. These Protocols specify the dates applicable to the activities described herein. Should any due date fall on a weekend or a holiday recognized by FERC, then the due date shall be no later than the next Business Day.

## Section I Definitions

For purposes of these Protocols, the following capitalized terms shall have the meanings set forth below.

A. "Accounting Change" means any change in Roughrider's accounting policies and practices from those in effect for the Calendar Year upon which the immediately preceding Annual Update was based and that could impact the ATRR calculations under the Formula. Accounting Changes include any changes resulting from:

1. revisions to Rural Utilities Service's ("RUS") Uniform System of Accounts ("USoA");

2. revisions to the RUS Financial and Operating Report - Electric Distribution ("Form No. 7") data and the requirement to report certain values within it;

3. correction of errors and prior period adjustments that impact the ATRR;

4. the implementation of new estimation methods or policies;

5. changes to income tax elections;

6. changes in accounting practices or policies mandated by a state regulatory authority with jurisdiction over Roughrider that could impact the Formula Rate or calculations under the Formula;

7. implementation of accounting practices for unusual or unconventional items where RUS has not provided specific accounting direction;

8. a change in Roughrider's accounting policies and practices (as such changes are defined by the Statement of Financial Accounting Board Standards No. 154 issued by the Financial Accounting Standards Board or its successor);

9. Roughrider's own accounting changes (which constitute a change to the ATRR greater than or equal to $15,000) such as the addition or deletion of a subaccount not specified by FERC's USoA; or

10. a change in Roughrider's inter-corporate cost allocation policies or practices from those policies and/or practices in effect in the Prior Rate Year, which change causes a result under the Formula Rate different than the result under the Formula Rate as calculated without such change.

B. "Annual Transmission Revenue Requirement" or "ATRR" means the net revenue requirement for the Transmission Services calculated in accordance with the Formula Rate filed by Roughrider for informational purposes with FERC and posted on the SPP Open Access Same-Time Information System ("OASIS") on or before the annual Publication Date, subject to review pursuant to the provisions of these Protocols.

C. "Annual Meeting" means the meeting hosted by Roughrider for exchanging information with Interested Parties regarding the Formula Rate.

D. "Annual Update" means Roughrider's annual filing of its Formula Rate, in a working Excel™ format. The Annual Update is submitted as described in these Protocols.

E. "Business Day" means from 9:00 AM to 5:00 PM Central Prevailing Time other than weekends and Federal Holidays.

F. "Calendar Year" means January 1 through December 31 of a given year.

G. "Current Rate Year" means the Rate Year for which the Annual Update is posted on the SPP OASIS and which Roughrider has filed with FERC (*e.g.,* if the Annual Update is posted on June 30, 2020, and the Informational Filing is submitted to FERC on December 15, 2020, the Current Rate Year is January 1, 2021 through December 31, 2021).

H. "Customer(s)" or "Transmission Customer(s)" means the customers taking NITS, service under Grandfathered Agreements, or PTP Transmission Service.

I. "FERC" or "Commission" means the Federal Energy Regulatory Commission.

J. "Final Posting" means the Annual Update information that SPP posts to the SPP OASIS with changes agreed to during the informal review process.

K. "Form No. 7" means the RUS Financial and Operating Report - Electric Distribution, formerly RUS Form No. 7.

L. "Formal Challenge" means a challenge by an Interested Party to an aspect of the Annual Update that is filed with FERC and served on Roughrider by electronic service on the date of such filing.

M. "Formula Rate Template" means the Roughrider transmission formula rate template set forth herein.

N. "Formula" means the Formula Rate Template set forth in Addendum 45 to Attachment H of the SPP Tariff.

O. "Formula Rate" has the meaning defined herein and means the Roughrider Implementation Protocols together with the Formula Rate Template.

P. "FPA" means the Federal Power Act.

Q. "Informal Challenge" means written notification by an Interested Party to Roughrider, during the Review Period, of any specific challenge to the Annual Update.

R. "Information Request" means a written request submitted by an Interested Party to Roughrider.

S. "Informational Filing" means Roughrider's annual filing at the Commission with the information stipulated in these Protocols.

T. "Initial Posting" means the date on which SPP posts Roughrider's Annual Update to the SPP OASIS.

U. "Interest" means interest calculated pursuant to 18 C.F.R. § 35.19a (a) (2) (iii), or successor regulation.

V. "Interested Party" includes (i) SPP Tariff Transmission Customers; (ii) any state regulatory agency with rate jurisdiction over a public utility located within the SPP footprint; and (iii) any consumer advocate agency authorized by state law to review and contest the rates for any such public utility.

W. "NITS" means Network Integration Transmission Service as defined in the SPP Tariff.

X. "OASIS" means Open Access Same-Time Information System.

Y. "OATT" or "SPP Tariff" means SPP's Open Access Transmission Tariff.

Z. "Prior Rate Year" means the Rate Year prior to the Current Rate Year (*e.g.*, if the Current Rate Year is January 1, 2020 through December 31, 2020, then the Prior Rate Year is January 1, 2019 through December 31, 2019).

AA. "PTP Rates" means the point-to-point rates derived from the Formula Rate.

BB. "Publication Date" means the date on which Roughrider posts the Annual Update to the SPP OASIS. The Publication Date for each year beginning in 2020 shall be no later than June 30, provided, however, that if June 30 should fall on a weekend or a holiday recognized by FERC, then the posting shall be due no later than the next Business Day, and the Publication Date shall correspond to the actual posting date.

CC. "Rate Year" means January 1 of a given year through December 31 of the same Calendar year.

DD. "Review Period" means, unless otherwise extended in writing by Roughrider, the period extending from the Publication Date through October 28, which includes a period for submission of Information Requests and a period for preparation of Informal Challenges.

EE. "RUS" means Rural Utilities Service.

FF. "SPP" means Southwest Power Pool, Inc. or its successor organization.

GG. "SPP Tariff" or "OATT" means SPP's Open Access Transmission Tariff.

HH. "Stated Values" means values that are fixed and not subject to change in an Annual Update. Stated values include: (i) the authorized return on equity ("ROE"); (ii) depreciation and amortization rates; and (iii) other similar fixed values. Stated Values may be changed only pursuant to FPA section 205 or 206.

II. "USoA" means FERC's Uniform System of Accounts.

## Section II Annual Update

A. On or before June 30 of each calendar year (the Publication Date), Roughrider shall:

1. Recalculate the ATRR and the rates for zonal NITS service for the new Rate Year in accordance with the Formula Rate and using the Formula Rate Template; and

2. Provide its Annual Update to SPP and request that SPP post such information to the SPP OASIS (the Initial Posting); and

3. If the date for posting the Annual Update falls on a weekend or a holiday recognized by FERC, then the Initial Posting shall be due on the next Business Day. The date on which the Initial Posting occurs shall be that year's Publication

Date. Any delay in the Publication Date shall result in an equivalent extension of time for the submission of Information Requests.

B. Concurrent with the Initial Posting, Roughrider shall provide the Annual Update to SPP to serve electronically upon the Service List.[i]

C. The Annual Update shall:

1. Include a workable populated Formula Rate Template with fully functional spreadsheets showing the calculation of the Annual Update and underlying work papers in native format with links and formulas intact, including sufficiently detailed work papers and supporting documentation for data;

2. Be based on the independently-audited books and records of Roughrider for the most recent fiscal year including its certified Form No. 7 or successor reports, including the Financial and Operating Report Electric Power Supply (Op. Report - Power Supply), (January 1 through December 31);

3. Provide sufficient information to enable Interested Parties to replicate the calculation of the formula results from the Formula Rate;

4. With respect to any change in accounting that affects the inputs to the Formula Rate or the resulting charges billed under the Formula Rate, Roughrider shall identify:

   a. Any Accounting Changes, such as the initial implementation of an accounting standard or policy; the initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific direction; or the correction of errors and prior period adjustments that impact the ATRR.

   b. Any items included in the Formula Rate at an amount other than a historic cost basis.

   c. Individual impact of any changes in Section I.C (4)(a) above on charges billed under the Formula Rate.

   d. Accounting Changes related to any reorganization or merger transaction.

5. Not seek to modify the Formula Rate.

6. With each Annual Update, Roughrider will include a list of any new transmission facilities included in the Formula Rate Template that were not included in the prior Annual Update. New transmission facilities include but are not limited to additional substations, breakers, other major substation equipment, and additional transmission line miles. The list will indicate the Zone 19 Attachment AI

Guidance Document criteria that Roughrider believes supports each facility's inclusion in Roughrider's ATRR as well as the beginning-of-year and end-of-year balances associated with that facility. This provision in no way limits the rights of any Interested Party to challenge inclusion of new facilities.

## Section III Review of Annual Update

Within twenty (20) calendar days of the posting of Roughrider's Annual Update, and with at least seven (7) calendar days' notice, Roughrider will host a meeting for Interested Parties to discuss the Annual Update ("Annual Meeting"). Roughrider shall provide notice of this meeting concurrent with the posting of the Annual Update accessible on the SPP OASIS. The notice shall include the date, time and location of the Annual Meeting and shall be provided to Interested Parties through the Service List. The Annual Meeting shall also be available by telephone and/or web access with all meeting materials provided electronically from the SPP OASIS.

A. Information Exchange

1. Interested Parties may begin submitting Information Requests immediately following the Publication Date of the Annual Update and will have until September 28 to serve reasonable Information Requests on Roughrider for information and work papers supporting the Annual Update. Such Information Requests shall be limited to that which is necessary to determine:

    a. The extent or effect of an Accounting Change;

    b. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

    c. The proper application of the Formula Rate and procedures in these Protocols;

    d. The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

    e. The effect of any change to the underlying USoA or Formula Rate Template; or

    f. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

    The information and document requests shall not otherwise be directed to ascertain whether the Formula Rate is just and reasonable. Roughrider will not claim that responses to information and document requests pursuant the Protocols are subject to any settlement confidentiality provision; however, Roughrider may require that Interested Parties execute a non-disclosure agreement to obtain access to material that Roughrider deems commercially sensitive or that contains Critical

Energy Infrastructure Information as that term is defined in 18 CFR § 388.113(c)(1).

2. Roughrider shall make a good faith effort to respond to Information Requests pertaining to the Annual Update within fifteen (15) Business Days of receipt.

3. Roughrider shall request that SPP post on a publically accessible portion of the SPP OASIS all Information Requests from Interested Parties and Roughrider's response(s) to such requests, and a link to the posting will be electronically served on all Interested Parties via the Service List. If responses to Information Requests contain information deemed by Roughrider to be confidential, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement executed by the requesting party and Roughrider.

4. If the deadline for Interested Parties falls on a weekend or holiday recognized by the FERC, the deadline will be extended to the next Business Day.

B. Informal Challenge Procedures

1. Interested Parties shall have until October 28 (or the first Business Day after October 28 if October 28 falls on a weekend or holiday) to notify Roughrider in writing (which may be electronically) of any specific Informal Challenges. The Informal Challenge must specify the inputs, supporting explanations, allocations calculations, or other information to which the Interested Party objects and provide an appropriate explanation and documents to support its Informal Challenge. Roughrider will make a good faith effort to respond to any Informal Challenge within twenty (20) calendar days of notification of such Informal Challenge. Roughrider, and, if appropriate, SPP, shall appoint senior representatives to work with the Interested Party to resolve the Informal Challenge.

2. Roughrider will request that SPP post on the SPP OASIS all Informal Challenges from Interested Parties and Roughrider's responses to the Informal Challenges, and a link to the posting will be electronically served on all Interested Parties via the Formula Rate Posting Information Notification List. If responses to Informal Challenges contain information are deemed by Roughrider to be confidential, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement executed by the requesting party and Roughrider.

3. Any changes or adjustments to the Annual Update resulting from the Information Exchange and Informal Challenge procedures that are agreed to by Roughrider and resolved prior to the end of the Review Period shall be reported in the Final Posting on the SPP OASIS. Any changes or adjustments agreed to by Roughrider after this date will be reported in the Informational Filing made with FERC and

will be reflected in the Annual Update for the following Rate Year.

C. Formal Challenges

1. An Interested Party shall have until January 15 (or the first Business Day after January 15 if January 15 falls on a weekend or holiday recognized by FERC) to file a Formal Challenge. A party may not pursue a Formal Challenge if that party did not submit an Informal Challenge on at least one issue. Having submitted an Informal Challenge on at least one issue, an Interested Party may pursue a Formal Challenge on other issues. Regardless of whether an Interested Party pursues or fails to pursue Informal or Formal Challenges, an Interested Party may file a complaint under section 206 of the FPA at any time.

2. A Formal Challenge shall:

a. Clearly identify the action or inaction which is alleged to violate the filed Formula Rate or Protocols;

b. Explain how the action or inaction violates the filed Formula Rate or Protocols;

c. Set forth the business, commercial, economic or other issues presented by the action or inaction as such relate to or affect the party filing the Formal Challenge, including:

i. The extent or effect of an Accounting Change;

ii. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

iii. The proper application of the Formula Rate and procedures in these Protocols;

iv. The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

v. The effect of any change to the underlying Uniform System of Accounts or Formula Rate Template; or

vi. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

d. Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;

e. State whether the issues presented are pending in an existing proceeding in any forum in which the Interested Party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;

f. State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that belief;

g. Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the Interested Party, including, but not limited to, contracts and affidavits; and

h. State whether the filing party utilized the Informal Challenge procedures described in these Protocols with regard to any issue.

3. Formal Challenges shall be filed with FERC, either in the FERC Docket assigned to the Informational Filing or via section 206 of the FPA and shall be served upon Roughrider contemporaneously with the filing at FERC. Service can be accomplished by electronic mail in accordance with 18 C.F.R. § 385.2010(f) (3), or by facsimile, express delivery or messenger to the individual listed as the contact person in Roughrider's Informational Filing.

4. In any proceeding initiated by FERC concerning the Annual Update or in response to a Formal Challenge, Roughrider shall bear the burden, consistent with section 205 of the FPA, of proving that it has correctly applied the Formula Rate consistent with these Protocols. Nothing herein is intended to alter the burdens applied by FERC with respect to prudence challenges.

D. Modification of Formula Rate or Annual Update

1. No party shall seek to modify the Formula Rate under the Challenge procedures (either Formal or Informal) set forth in these Protocols, and the Annual Update shall not be subject to challenge for modifying the Formula Rate. Modifications to the Formula Rate may be made only pursuant to Federal Power Act section 205 or section 206.

2. A change to the Formula Rate fixed inputs related to ROE, depreciation rates, capital structure, amortization periods, or any ROE incentives for SPP regional projects may not be made absent the appropriate filing with FERC pursuant to the FPA, sections 205 or 206, provided, however, that Roughrider may make a limited section 205 filing to change depreciation rates, amortization periods, Post-Employment Benefits other than Pensions recovery, and/or ROE incentives for SPP regional projects, in which the sole issue for examination shall be whether the proposed changes(s) are just and reasonable, and not unduly discriminatory. Any modification to the Formula Rate will require a filing under section 205 or 206 of the FPA.

3. If Roughrider makes a correction to a Mistake in its financial information during the Current Rate Year that would affect the Formula Rate for the Current Rate Year, such corrections and any resulting refunds or surcharges shall be reflected in the Annual Update for the next effective Rate Year with interest computed in accordance with 18 C.F.R. § 35.19a. For purposes of these Protocols, "Mistake" shall mean errors or omissions regarding the values inputted into the Formula Rate Template, such as arithmetic or computational errors. Mistakes shall not include matters involving exercise of judgment or substantive differences of opinion regarding the derivation of an input that is more properly the subject of the annual review process.

4. Any changes to the data inputs or as the result of a FERC proceeding shall be incorporated into the Formula Rate and the charges produced by the Formula Rate in the Annual Update for the next effective Rate Year. Any interest on any refund shall be calculated in accordance with 18 C.F.R. § 35.19a.

E. Informational Filing

1. By December 15 of each year, Roughrider shall submit to FERC an informational filing ("Informational Filing") of its Annual Update under a separate docket number.

2. This Informational Filing must include the information that is reasonably necessary to determine:

   a. That input data under the Formula Rate is properly recorded in any underlying work papers;

   b. That Roughrider has properly applied the Formula Rate and these procedures;

   c. The accuracy of the data and the consistency with the Formula Rate of the ATRR and rates under review; and

   d. The extent of Accounting Changes that affect Formula Rate inputs.

3. The Informational Filing must also describe all aspects of the Formula Rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures.

4. Contemporaneous with the making of such Informational Filing, Roughrider shall provide notice of the Informational Filing to Interested Parties via the Service List and request that SPP post the notice and the docket number assigned to the Informational filing on the SPP OASIS.

## Section IV Joint SPP Transmission Owners' Meeting

If the SPP Transmission Owners with transmission projects that utilize a regional cost-sharing methodology implement a process to coordinate and hold joint meetings, Roughrider intends to participate in that process. Notice of joint informational meetings, including the time, date, and location, shall be posted on the SPP OASIS and distributed to Interested Parties via the Formula Rate Posting Information Notification List no less than seven (7) days prior to such meetings.

## Section V Roughrider Example Schedule

| Line No. | Action | Begin | End |
|---|---|---|---|
| 1 | Rate Year | January 1, 2021 | December 31, 2021 |
| 2 | Publication Date | | June 30, 2020 |
| 3 | Annual Meeting of Interested Parties | | July 20, 2020 |
| 4 | Information Request Due Date | June 30, 2020 | September 28, 2020 |
| 5 | Informal Challenges Due Date | | October 28, 2020 |
| 6 | Final Posting | | December 1, 2020 |
| 7 | Informational Filing | | December 15, 2020 |
| 8 | Formal Challenge Due Date | | January 15, 2021 |

---

i. As used in these Protocols, "Service List" shall mean the list of email addresses maintained by SPP of Interested Parties, provided that such Interested Parties request to be added to the Service List through the "Exploder List" link on the SPP website. As of June 2017, the Exploder List was titled "Formula Rate Posting Information Notification" and could be accessed at <http://www.spp.org/stakeholder-center/exploder-lists/>.

Formula Rate - Non-Levelized

Rate Formula Template Utilizing FERC Form 1 Data Transource SPP Entity Company Name Here

For the 12 months ended 12/31/____

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#)
References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

| Note Letter | |
|---|---|
| A | The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff. |
| B | The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income. Account 281 is not allocated. |
| C | Identified in Form 1 as being only transmission related. |
| D | Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 14, column 5 minus amortization of Regulatory Asset at page 3, line 11, column 5. Prepayments are the electric related prepayments booked to Account No. 165 and reported on pages 111, line 57 in the Form 1. |
| E | Page 3, Line 6 - EPRI Annual Membership Dues listed in Form 1 at 353.f, all Regulatory Commission Expenses itemized at 351.h, and non-safety related advertising included in Account 930.1. Page 3, Line 7-Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting itemized at 351.h. |
| F | Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere. |
| G | The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes" and TEP = "the tax exempt ownership interest". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T) (page 3, line 26). Excess Deferred Income Taxes reduce income tax expense by the amount of the expense multiplied by (T/1-T). |

Inputs Required:

| | | |
|---|---|---|
| FIT = | - | (Federal Income Tax Rate) |
| SIT= | - | (State Income Tax Rate or Composite SIT) |
| p = | - | (percent of federal income tax deductible for state purposes) |
| TEP = | - | (percent of the tax exempt ownership) |

| | |
|---|---|
| H | Removes transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test (until Form 1 balances are adjusted to reflect application of seven-factor test). |
| I | Removes dollar amount of transmission plant to be included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down. |
| J | Enter dollar amounts |
| K | ROE will be supported in the original filing and no change in ROE may be made absent a filing with FERC. |

L Page 4, Line 28 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1.

M Includes only income related to transmission facilities, such as pole attachments, rentals and special use.

N Company will not have any grandfathered agreements. Therefore, this line shall remain zero.

O The revenues credited on page 1 lines 2-6 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, or facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template.

P Account 456.1 entry shall be the annual total of the quarterly values reported at Form 1, page 300.22.b.

Q Prior to issuing any debt, the cost of debt on Attachment 8, Line 25 for the relevant year will be used. If Construction Financing (where an amount is borrowed but the funds are drawn down over the construction period) is obtained, the cost of debt is determined using the internal rate of return methodology shown on Attachment 8 until a project is placed in service, subject to true-up pursuant to Attachment 9, and the cost of debt is determined using the methodology in Attachment 5 after a project is placed in service. Attachment 8 contains a hypothetical example of the internal rate of return methodology; the methodology will be applied to actual amounts for use in Attachment H. If non-construction financing is obtained, the cost of debt is determined using the methodology in Attachment 5 and Attachments 8 and 9 are not used. The capital structure will be 60% equity and 40% debt during the construction period; after the construction period, the actual capital structure will be used.

R Calculate using 13 month average balance, except ADIT which is calculated based on the average of the beginning of the year and the end of the year balances

S Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant. Utility must submit a Section 205 filing to recover the cost of abandoned plant.

T Recovery of Regulatory Asset permitted only for pre-commercial and formation expenses as authorized by the Commission. Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal to the AFUDC rate will be applied to the Regulatory Asset prior to the rate year when costs are first recovered.

U Excludes Asset Retirement Obligation balances

V Company shall be allowed recovery of costs related to interest rate locks. Absent a Section 205 filing, Company shall not include in the Formula Rate, the gains, losses, or costs related to other hedges.

W The Tax Effect of Permanent Differences captures the differences in the income taxes due under the Federal and State calculations and the income taxes calculated in Attachment H that are not the result of a timing difference

X Calculate using a simple average of beginning of year and end of year balances reconciling to FERC Form No. 1 by Page, Line and Column as shown in Column 2.

| 16 | Annual Totals | - | | | - | |
| 17 | Rev. Req. Adj For Attachment H | | | | | |

| Note Letter | |
|---|---|
| A | Gross Transmission Plant is that identified on page 2 line 2 of Attachment H |
| B | Inclusive of any CWIP or unamortized abandoned plant included in rate base when authorized by FERC order less any prefunded AFUDC, if applicable. |
| C | Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1. This value includes subsequent capital investments required to maintain the facilities to their original capabilities. Gross plant does not include Unamortized Abandoned Plant. |
| D | Project Net Plant is the Project Gross Plant Identified in Column 3 less the associated Accumulated Depreciation. Net Plant includes CWIP and Unamortized Abandoned Plant and excludes the regulatory asset. |
| E | Project Depreciation Expense is the actual value booked for the project and included in the Depreciation Expense in Attachment H, page 3, line 16. Project Depreciation Expense includes the amortization of Abandoned Plant |
| F | True-Up Adjustment is calculated on the Project True-up Schedule (Attachment 3) for the preceding calendar year. |
| G | The Network Upgrade Charge is the value to be used in the SPP's rate calculation under the applicable Schedule under the SPP OATT for each project. |
| H | The Total General, Intangible and Common Depreciation Expense excludes any depreciation expense directly associated with a project and thereby included in page 2 column 9. |
| I | The Unamortized Abandoned Plant balance is included in Net Plant, and Amortization of Abandoned Plant is included in Depreciation/Amortization Expense. |
| J | The Competitive Bid Adjustment is the reduction in revenue, if any, that the company agreed to, for instance, to be selected to build facilities as the result of a competitive process and equals the amount by which the annual revenue requirement is reduced from the ceiling rate |
| K | Requires approval by FERC of incentive return applicable to the specified project(s) |
| M | All facilities other than those being recovered under Schedules 7, 8, 9 are to be included in Attachment 1. |

| 21 | Total Income Taxes (sum lines 17 - 20) | | | - | | | | - - |
| 22 | Return and Income Taxes with 100 basis point increase in ROE | | | | | | | - |
| 23 | Return (Attach. H, page 3 line 46 col 5) | | | | | | | - |

| | | |
|---|---|---|
| 24 | Income Tax (Attach. H, page 3 line 44 col 5) | - |
| 25 | Return and Income Taxes without 100 basis point increase in ROE | - |
| 26 | Incremental Return and Income Taxes for 100 basis point increase in ROE | - |
| 27 | Rate Base (line 1) | - |
| 28 | Incremental Return and Income Taxes for 100 basis point increase in ROE divided by Rate Base | - |

Notes:

A Line 5 includes a 100 basis point increase in ROE that is used only to determine the increase in return and income taxes associated with a 100 basis point increase in ROE. Any ROE actual incentive must be approved by the Commission. For example, if the Commission were to grant a 137 basis point ROE incentive, the increase in return and taxes for a 100 basis point increase in ROE would be multiplied by 1.37 on Attachment 1 column 12.

B The Tax Effect of Permanent Differences captures the differences in the income taxes due under the Federal and State calculations and the income taxes calculated in Attachment H that are not the result of a timing difference

| | | | - | - | - | - | - | - | - | - | - |
| | | | | | | | | | | | |
| 4 | Total Annual Revenue Requirements (Note A) | | - | - | - | - | - | - | | - | - |

| | | |
|---|---|---|
| | Monthly Interest Rate | - |
| | Interest Income (Expense) | - |

Notes:
1) From Attachment 1, line 15, col. 14 for that project.
2) From Attachment 1, line 15, col. 16, from the version of the template populated with actual calendar year data for the preceding calendar year.
3) The "revenue received" is the total amount of revenue distributed to company in the year as shown on pages 328-330 of the Form No 1. The Revenue Received is input on line 2, Col. E
Column F is equal to Column D. Column E is the dollar amount of Revenue Received reflecting the % in Column D. This assigns to each project a percentage of the revenue received based on the percentage of the Projected Revenue Requirement in Column C.
4) Interest Rate from Attachment 6, line 9.
5) Construction Loan True-Up from Attachment 9, col (h) and Prior Period Adjustment from Attachment 3, line 5.

**Prior Period Adjustment**

| | (a) Prior Period Adjustment (Note B) | (b) Amount In Dollars | (c) Interest Note B | (d) Total Col. (b) + Col. (c) |
|---|---|---|---|---|
| 5 | - | - | - | - |

Notes:
A For each project or Attachment H, the utility will populate the formula rate with the inputs for the True-Up Year. The revenue requirements, based on actual operating results for the True-Up Year, associated with the projects and Attachment H will then be entered in Col. (E) above. Column (E) above contains the actual revenues received associated with Attachment H and any Projects paid by SPP to the utility during the True-Up Year. Then in Col. (H), Col. (F) is subtracted from Col. (G) to calculate the True-up Adjustment. The Construction Loan True-up form Attachment 9 is input in Col. (I). Column (J) is the applicable interest rate from Attachment 6. Column (J) adds the interest on the sum of Col.(H) and (I). Col. (K) is the sum of Col. (H), (I) and (J).

| | |
|---|---|
| B | Prior Period Adjustment is the amount of an adjustment to correct an error in a prior period. The FERC Refund interest rate specified in CFR 35.19(a) for the period up to the date the projected rates that are subject to True Up here went into effect. |

| 30e | | … | | | | | | - |
| 30f | | | | | | | | |
| 31 | | Total | - | | | | | - |

Notes:

A Recovery of regulatory asset is limited to any regulatory assets authorized by FERC.

B Recovery of abandoned plant is limited to any abandoned plant recovery authorized by FERC.

C Includes only CWIP authorized by the Commission for inclusion in rate base. The annual report filed pursuant to Section 7 of the Protocols will include for each project under construction (i) the CWIP balance eligible for inclusion in rate base; (ii) the CWIP balance ineligible for inclusion in rate base; and (iii) a demonstration that AFUDC is only applied to the CWIP balance that is not included in rate base. The annual report will reconcile the project-specific CWIP balances to the total Account 107 CWIP balance reported on p. 216.b of the FERC Form 1.

D ADIT is computed using the average of the beginning of the year and the end of the year balances.

E Recovery of a Regulatory Asset is permitted only for pre-commercial and formation expenses, and is subject to FERC approval before the amortization of the Regulatory Asset can be included in rates. Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal to the AFUDC rate will be applied to the Regulatory Asset prior to the rate year when costs are first recovered.

F Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant.

G The Formula Rate shall include a credit to rate base for all unfunded reserves (funds collected from customers that (1) have not been set aside in a trust, escrow or restricted account; (2) whose balance are collected from customers through cost accruals to accounts that are recovered under the Formula Rate; and (3) exclude the portion of any balance offset by a balance sheet account (see Note I)). Each unfunded reserve will be included on lines 30 above. The allocator in Col. (g) will be the same allocator used in the formula for the cost accruals to the account that is recovered under the Formula Rate. Since reserves can be created by creating an offsetting balance sheet account, rather than through cost accruals, the amount to be deducted from rate base should exclude the portion offset by another balance sheet account.

H Calculate using 13 month average balance, except ADIT which is calculated based on the average of the beginning of the year and the end of the year balances

I Not all unfunded reserves are created only from contributions from customers. Many are created by creating an offsetting liability in whole or in part. Column (f) ensures only the portion of the unfunded reserve contributed by the customer (and not created by an off setting liability) is a reduction to rate base. The inputs in Column (f) are 1 - (the percentage of the unfunded reserve that was created by an off setting liability). The percentage shown in Column (f) is then equal to the percentage that customers have contributed to the unfunded reserve.

| 8 | PBOP Expense for current year | Line 6 times line 7 | - | - | - |
| 9 | Lines 2 to 6 cannot change absent approval or acceptance by FERC in a separate proceeding. | | | | |
| 10 | PBOP amount included in Company's O&M and A&G expenses in Form No. 1 | | | | - |

| Note Letter | |
|---|---|
| A | Amounts on lines 2-3 reflect data from the April 2013 actuarial report for AEP and the 2013 actuarial report for KCP&L. |
| B | Amount on line 5 for AEP is the total labor expense across all AEP affiliates including AEP Service Company and is taken from AEP PeopleSoft accounting records. Line 5 labor dollars for KCP&L is the labor booked to O&M and A&G and included in the Form No. 1 on page 354.28.b less labor dollars associated with the Wolf Creek Nuclear Facility. |
| C | The labor in line 7 is the total labor charged by an AEP affiliate or KCP&L affiliate to this Transource SPP Entity in the year. |

Attachment 8

Example Financing Costs for Long Term Debt using the Internal Rate of Return Methodology

Transource SPP Entity

Company Name Here

This Attachment 8 is to be utilized until an entire project is placed in service (i.e. until all the facilities comprising the entire project are placed in service).
In the determination of the projected net revenue requirement for the year in which the project is placed in service, the cost of debt will be calculated in accordance with Attachment 5.
Consistent with GAAP, the Origination Fees and Commitments Fees will be amortized using the standard Internal Rate of Return formula below.
Each year, the amounts withdrawn, the interest paid in the year, Origination Fees, Commitments Fees, and total loan amount will be updated on this attachment.

| | | |
|---|---|---|
| 1 | **Total Loan Amount** | **$ 200,000,000** |

| | | |
|---|---|---|
| 2 | **Internal Rate of Return (Note 1)** | **4.53%** |
| 3 | **Based on following Financial Formula (Note 2):** | |
| 4 | | |
| 5 | | $\sum_{t=1}^{N} C_t/(1+IRR)pwr(t)$ |
| 6 | **NPV = 0 =** | |

1 The IRR is the input to Debt Cost shown on Attachment H, Page 4, Line 20 during the construction period, after obtaining project financing, in accordance with Note Q of Attachment H.

2. The IRR is a discount rate that makes the net present value of a series of cash flows equal to zero. The IRR equation is shown on line 6.

N is the last quarter the loan would be outstanding

t is each quarter

Ct is the cash flow (Table 3, Col. I in each quarter)

Alternatively the equation can be written as 0 = C0 + C1/(1+IRR) + C2/(1+IRR)2 + C3/(1+IRR)3 + . . . +Cn/(1+IRR)n and solved for IRR

The Excel ™ formula on line 2 is : (round(XIRR(first quarter of loan Col A of Table 3:last quarter of loan Col A of Table 3, first quarter of loan Col I of Table 3:last quarter of loan Col I of Table 3, 8%),4)

The 8% in the above formula is a seed number to ensure the formula produces a positive number.

3. Line 1 reflects the loan amount, the maximum amount that can be drawn on

4. Lines 10 through 21a include the fees associated with the loan. They are estimated based on current bank condition and are updated with the actual fees

once the actual fees are known.

5. The estimate of the average 3 month LIBOR forward rate for the year on line 23 is that published by Bloomberg Finance L.P. during August of the prior year and is trued-up to actual

average 3 month LIBOR rate for the year.

6. Table 3, Col. C reflect the capital expenditures in each quarter

7. Table 3, Col. D reflect the amount of the loan that is drawn down in the quarter

8. Table 3, Col. E is the amount of principle drawn down

9. Table 5, Col F calculates the interest on the principle drawn down to date based on the applicable interest on line 25

10. Table 3, Col. G is the total origination fees in line 16 and is input in the first quarter that a portion of the loan in drawn

11. Table 3, Col. H is calculated as follows:

A x B + C

A. Loan amount in line 1 less the amount drawn down in the prior quarter

B. Annual dollar amount fees on lines 11 through 15a divided by 4 (divided by 4 to convert annual amounts to quarterly amounts)

C. Annual dollar amount fees divided by 1000 (applied in the quarters the payments are made)

12. The inputs shall be estimated based on the current market conditions and subject to true up for all inputs , e.g., fees, interest rates, spread, and Table 3 once the

amounts are known. Regardless of whether the credit spread was updated, Transource _____ will provide documentation to support the credit spread every year as long as Attachment 8 is used to determine the cost of debt.

13. Prior to issuing any debt, the cost of debt on Attachment 8, Line 25 for the relevant year will be used. If Construction Financing (where an amount is borrowed but the funds are drawn down over the construction period) is obtained, the cost of debt is determined using the internal rate of return methodology shown on Attachment 8 until a project is placed in service, subject to true-up pursuant to Attachment 9, and the cost of debt is determined using the methodology in Attachment 5 after a project is placed in service. Attachment 8 contains a hypothetical example of the internal rate of return methodology; the methodology will be applied to actual amounts for use in Attachment H. If non-construction financing is obtained, the cost of debt is determined using the methodology in Attachment 5 and Attachments 8 and 9 are not used.

Attachment 9
Hypothetical Example of Final
True-Up of Interest Rates and
Interest Calculations for the
Construction Loan

Transource SPP Entity

Company Name Here

For the period that the Interest rate calculated on Attachment 8, line 2, uses estimates that would not be trued up under Attachment 3, absent this attachment. Accordingly, this attachment calculates the difference in interest rates actually charged during the period that the cost of debt is calculated on Attachment 8, Line 2, and the final interest rate calculation after the loan in Attachment 8 is paid off. This attachment calculates a one time true up that is entered into Attachment 3 as a Construction Loan True-Up.

**SUMMARY**

# TRANSOURCE *PRO FORMA* FORMULA RATE IMPLEMENTATION PROTOCOLS

The formula rate template ("Template") and these Formula Rate Implementation Protocols ("Protocols") together comprise the filed *pro forma* rate ("Formula Rate") available for subsidiaries of Transource Energy, LLC operating in SPP ("Transource SPP Entities") for transmission revenue requirement determinations under the Southwest Power Pool, Inc. ("SPP") Open Access Transmission Tariff ("SPP Tariff"). Transource SPP Entity shall follow the instructions specified in the Formula Rate to calculate annually its net revenue requirement, as set forth at page 1, line 10 of the Template ("Net Revenue Requirement"). The project-specific net revenue requirements determined under the Formula Rate are "up to" rates, i.e., ceiling rates, and permit Transource SPP Entity to discount the revenue requirement for a future project to the extent necessary to reflect the result of any competitive bidding on such a project. The Net Revenue Requirement shall be determined for January 1 to December 31 of a given calendar year (the "Rate Year"). The Formula Rate shall become effective for recovery of Transource SPP Entity's Net Revenue Requirement upon the effective date for incorporation into the SPP Tariff through an appropriate filing with the Federal Energy Regulatory Commission ("FERC" or "Commission") under Section 205 of the Federal Power Act ("FPA"), 16 U.S.C. § 824d (2012).

## Section 1. Annual Projection

a. No later than September 30 preceding the first Rate Year, and each subsequent Rate Year, Transource SPP Entity shall determine its projected Net Revenue Requirement for the upcoming Rate Year in accordance with Transource SPP Entity's Formula Rate ("Annual Projection"). The Annual Projection shall include the True-up Adjustment described and defined in Section 2 below, if

applicable. Transource SPP Entity shall cause an electronic version of the Annual Projection to be posted in both a Portable Document Format ("PDF") and fully-functioning Excel file at a publicly accessible location on SPP's internet website and OASIS. Such posting shall include all inputs in sufficient detail to identify the components of Transource SPP Entity's projected Net Revenue Requirement, explanations of the bases for the projections and input data, and sufficient detail and explanation to enable Interested Persons (as that term is defined in footnote 1 of these Protocols) to replicate the calculation of the projected Net Revenue Requirement. With respect to any Accounting Change (as that term is defined in Section 3.e.iii), Transource SPP Entity shall (i) identify any Accounting Changes, including the initial implementation of an accounting standard or policy, the initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific accounting direction, correction of errors and prior period adjustments that impact the projected net revenue requirement calculation, the implementation of new estimation methods or policies that change prior estimates, and changes to income tax elections; (ii) identify items included in the projected net revenue requirement at an amount other than on a historic cost basis (e.g., fair value adjustments); (iii) identify any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs to the projected net revenue requirement; and (iv) provide, for each item identified pursuant to Section 1.a.i - iii of these Protocols, a narrative explanation of the individual impact of such changes on the projected Net Revenue

Requirement. If the date for making such posting of the Annual Projection should fall on a weekend or a holiday recognized by FERC, then the posting shall be made no later than the next business day. Within ten (10) days of such posting, SPP shall provide notice of such posting via an email exploder list ("SPP Exploder List"). Interested Persons can subscribe to the SPP Exploder List on the SPP website.

b. Together with the posting of the Annual Projection, Transource SPP Entity shall cause to be posted on the SPP internet website and OASIS, and distributed to the SPP Exploder List, the time, date and location for a stakeholder meeting with Interested Persons in order for Transource SPP Entity to explain its Annual Projection and to provide Interested Persons an opportunity to seek information and clarifications regarding the Annual Update ("Annual Projection Meeting"). The Annual Projection Meeting shall be held no less than twenty (20) business days and no more than thirty (30) business days after September 30.

c. To the extent Transource SPP Entity agrees to make changes in the Annual Projection for a given Rate Year, such revised Annual Projection shall be promptly posted at a publicly accessible location on SPP's internet website and OASIS, and e-mailed to the SPP Exploder List. Changes posted prior to November 30 of the preceding Rate Year, or the next business day if November 30 is not a business day (or such later date as can be accommodated under SPP's billing practices), shall be reflected in the Annual Projection for the Rate Year; changes posted after that date will be reflected, as appropriate, in the True-up Adjustment for the Rate Year.

d. The Annual Projection, including the True-Up Adjustment, for each Rate Year shall be subject to review, challenge, true-up and refunds or surcharges with interest, to the extent and in the manner provided in these Protocols.

**Section 2. <u>True-up Adjustment</u>**

Transource SPP Entity will calculate the amount of under- or over-collection of its actual Net Revenue Requirement during the preceding Rate Year ("True-up Adjustment") after the FERC Form No. 1 data for that Rate Year has been filed with the Commission. The True-up Adjustment shall be the sum of the True-Up Adjustment Over/Under Recovery as determined in 2(a) and the Interest on the True-Up Adjustment Over/Under Recovery as determined in 2(b):

a. Transource SPP Entity's projected Net Revenue Requirement collected during the previous Rate Year will be compared to Transource SPP Entity's actual Net Revenue Requirement for the previous Rate Year calculated in accordance with Transource SPP Entity's Formula Rate and based upon (i) Transource SPP Entity's FERC Form No. 1 for that same Rate Year, (ii) any FERC orders specifically applicable to Transource SPP Entity's calculation of its annual revenue requirement, (iii) the books and records of Transource SPP Entity (which shall be maintained consistent with the FERC Uniform System of Accounts ("USofA")), (iv) FERC accounting policies and practices applicable to the calculation of annual revenue requirements under formula rates, and (v) any aspects of the SPP OATT Governing Documents that apply to the calculation of annual revenue requirements under individual transmission owner formula rates, to determine any over- or under-recovery ("True-up Adjustment Over/Under Recovery"). Transource SPP Entity will include a variance analysis of, at

minimum, actual revenue requirement components of rate base, operating and maintenance expenses, depreciation expense, taxes, return on rate base, and revenue credits as compared to the corresponding components in the projected revenue requirement that was calculated for the prior Rate Year with an explanation of material changes.

b. Interest on any True-up Adjustment Over/Under Recovery of the actual Net Revenue Requirement shall be calculated in accordance with Attachment 6 of the Formula Rate.

**Section 3. <u>Annual Update</u>**

a. On or before June 30 following each Rate Year, Transource SPP Entity shall calculate its actual Net Revenue Requirement and the True-up Adjustment as described in Section 2 ("Annual Update") for such Rate Year and, together with such other information described in this Section 3, shall cause such Annual Update to be posted, in both a PDF and fully-functioning Excel format, at a publicly accessible location on SPP's internet website and OASIS and e-mailed to the SPP Exploder List.

b. If the date for making the Annual Update posting should fall on a weekend or a holiday recognized by the FERC, then the posting shall be due on the next business day.

c. The date on which the last of the events listed in Section 3(a) or 3(b) occurs shall be that year's "Publication Date."

d. Together with the posting of the Annual Update, Transource SPP Entity shall

cause to be posted on the SPP website and OASIS, and e-mailed to the SPP Exploder List, the time, date and location for a stakeholder meeting with Interested Persons in order for Transource SPP Entity to explain its Annual Update and to provide Interested Persons an opportunity to seek information and clarifications regarding the Annual Update ("Annual Update Meeting"). The Annual Update Meeting shall be held no less than twenty (20) business days and no more than thirty (30) business days after June 30.

e. The Annual Update posting for the Rate Year:

(i) Shall provide, via the Formula Rate worksheets, sufficiently detailed supporting documentation for data (and all adjustments thereto or allocations thereof) used in the Formula Rate that are not stated in the FERC Form No. 1;

(ii) Shall provide sufficient detail and sufficient explanation to enable Interested Parties to replicate the calculation of the Annual True-Up results from the FERC Form No. 1 and verify that each input to the Template is consistent with the requirements of the Formula Rate;

(iii) Shall, identify:

a. any change in accounting that affects inputs to the Template or the resulting charges billed under the Formula Rate ("Accounting Change"), including:

i. The initial implementation of an accounting standard or policy;

ii. the initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific accounting direction;

iii. correction of errors and prior period adjustments that impact the True-Up Adjustment calculation;

iv. the implementation of new estimation methods or policies that change prior estimates; and

v. changes to income tax elections;

b. any items included in the Annual True-Up at an amount other than on a historic cost basis (e.g., fair value adjustments);

c. any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs to the True-Up Adjustment;

d. for each item identified pursuant to items 3.e.iii.a - c of these protocols, the individual impact (in narrative format) of such changes on the True-Up Adjustment.

e. for the applicable Rate Year the following information related to affiliate cost allocation:

i. a detailed description of the methodologies used to allocate and directly assign costs between Transource SPP Entity and its affiliates by service category or function, including any changes to such cost allocation methodologies from the prior year, and the reasons and justifications for those

changes; and

ii. the magnitude of such costs that have been allocated or directly assigned between Transource SPP Entity and each affiliate by service category or function.

(iv) Shall be subject to review and challenge in accordance with the procedures set forth in Sections 4, 5, and 6 of these Protocols.

(v) Shall be subject to review and challenge in accordance with the procedures set forth in these Protocols with respect to the prudence of any costs and expenditures included for recovery in the Annual Update; provided, however, that nothing in these Protocols is intended to modify the Commission's applicable precedent with respect to the burden of going forward or burden of proof under formula rates in such prudence challenges; and

(vi) Shall not seek to modify the Formula Rate and shall not be subject to challenge by any Interested Person seeking to modify the Formula Rate (i.e., any modifications to the Formula Rate will require, as applicable, an FPA section 205 or section 206 filing or initiation of a section 206 investigation).

a. The following Formula Rate inputs shall be stated values to be used in the Formula Rate until changed pursuant to an FPA section 205 or section 206 proceeding: (i) rate of return on common equity ("ROE"); (ii) "Post-Employment Benefits other than Pensions" pursuant to Statement of Financial

Accounting Standards No. 106, Employers' Accounting for Postretirement Benefits Other Than Pensions ("PBOP") charges; and (iii) the depreciation and/or amortization rates as set forth in Attachment 10 to the Formula Rate template.

b. **Example - Timeline for 2017 Annual Update**:

On or before September 30, 2015, Transource SPP Entity will determine the projected Net Revenue Requirement for the 2016 Rate Year, which is expected to be the first year that costs are recovered from SPP customers under the Formula Rate. Transource SPP Entity will post the Annual Projection for the 2016 Rate Year in accordance with Section 1 above. Transource SPP Entity will not determine a True-up Adjustment or post an Annual Update on June 30, 2016 if no costs have been recovered under the Formula Rate during 2015. On or before September 30, 2016, Transource SPP Entity will post the Annual Projection for the 2017 Rate Year. On or before June 30, 2017, Transource SPP Entity will post its first Annual Update, consisting of the actual Net Revenue Requirement and True-up Adjustment for the 2016 Rate Year determined pursuant to Section 2 above. Such True-up Adjustment will be reflected in the Annual Projection of the Net Revenue Requirement for the 2018 Rate Year posted on or before September 30, 2017. The Annual Update posted June 30, 2017 will be subject to the customer review and challenge procedures described in Sections 4, 5, and 6 of these Protocols.

**Section 4. <u>Annual Review Procedures</u>**

Each Annual Update shall be subject to the following review procedures ("Annual Review Procedures"):

a. Interested Persons shall have up to the latest of one hundred fifty (150) calendar days after the Publication Date, thirty (30) calendar days after the receipt of all responses to timely submitted information requests (unless such period is extended with the written consent of Transource SPP Entity), or thirty (30) calendar days after resolution of a dispute that does not result in the production of additional information ("Review Period"), to review the calculations and to notify Transource SPP Entity in writing of any specific challenges to the Annual Update ("Preliminary Challenge"), including challenges related to Accounting Changes. Transource SPP Entity shall promptly cause to be posted all Preliminary Challenges at a publicly accessible location on SPP's internet website and OASIS and a link to the website will be e-mailed to the SPP Exploder List.

Transource SPP Entity shall respond in writing to a Preliminary Challenge within twenty (20) business days of receipt, and its response shall notify the challenging party of the extent to which Transource SPP Entity agrees or disagrees with the challenge. If Transource SPP Entity disagrees with the Preliminary Challenge, its response shall include supporting documentation. Transource SPP Entity shall promptly cause to be posted responses to all Preliminary Challenges at a publicly accessible location on SPP's internet website and OASIS and e-mailed to the SPP Exploder List.

b. Interested Persons shall have up to one hundred twenty (120) calendar days after each annual Publication Date (unless such period is extended with the written consent of Transource SPP Entity) to serve reasonable information requests on Transource SPP Entity. Information requests shall be limited to what is necessary to determine: (i) the extent, effect, or impact of an Accounting Change; (ii) whether the True-Up Adjustment fails to include data properly recorded in accordance with the Protocols; (iii) the proper application of the Template and procedures in the Protocols; (iv) the accuracy of data and consistency with the Formula Rate of the changes shown in the Annual Update; (v) the prudence of the actual costs and expenditures; (vi) the effect of any change to the underlying Uniform System of Accounts or applicable form; and (vii) any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the Formula Rate. Information requests shall not solicit information concerning costs or allocations where the costs or allocation methods have been determined to be appropriate by FERC in the context of prior Transource SPP Entity Annual Updates, except that such information requests shall be permitted if they (i) seek to determine if there has been a change in circumstances, (ii) are in connection with corrections pursuant to Section 6, or (iii) relate to costs or allocations that have not previously been challenged and adjudicated by FERC. Information requests received will be posted at a publicly accessible location on SPP's internet website and OASIS and a link to the website and OASIS will be e-mailed to the SPP Exploder List.

c. Transource SPP Entity shall make a good faith effort to respond to information

requests pertaining to the Annual Update within fifteen (15) business days of receipt of such requests.

To the extent Transource SPP Entity and any Interested Person(s) are unable to resolve disputes related to information requests submitted in accordance with these Annual Review Procedures, Transource SPP Entity or the Interested Person may petition the FERC to appoint an Administrative Law Judge as a discovery master to resolve the discovery dispute(s) in accordance with these Protocols and consistent with the FERC's discovery rules.

d. Preliminary Challenges, or Formal Challenges as described in Section 5 below, related to Accounting Changes shall be treated in the same manner under these Protocols as other challenges to the Annual Update. Failure to make a Preliminary Challenge with respect to an Accounting Change in an Annual Update shall not act as a bar with respect to a Formal Challenge with respect to that Annual Update, nor shall such failure bar a subsequent Preliminary Challenge related to a subsequent Annual Update to the extent such Accounting Change affects the subsequent Annual Update.

e. If a change made by Transource SPP Entity to its accounting policies, practices or procedures, or the application of the Formula Rate, is found by the FERC to be unjust, unreasonable, or unduly discriminatory or preferential, then the calculation of the charges to be assessed during the Rate Year then under review, and the charges to be assessed during any subsequent Rate Years, including any True-up Adjustments, shall not include such change, but shall include any

remedy that may be prescribed by FERC in the exercise of its discretion as of the effective date of such remedy, to ensure that the Formula Rate continues to operate in a manner that is just, reasonable, and not unduly discriminatory or preferential.

**Section 5. Resolution of Challenges**

a. Any Interested Person may, within ninety (90) calendar days after the end of the Review Period (unless such period is extended with the written consent of Transource SPP Entity to continue efforts to resolve an issue), file a challenge with the FERC ("Formal Challenge"). Such Formal Challenge shall be submitted in the same docket as the informational filing described in Section 7 and shall be served on Transource SPP Entity by electronic service on the date of such filing. Subject to any applicable confidentiality and Critical Energy Infrastructure Information restrictions, all information and correspondence produced by Transource SPP Entity pursuant to these Protocols may be included in any Formal Challenge or other FERC proceeding relating to the Formula Rate.

b. Failure to raise an issue in a Preliminary Challenge shall not bar an Interested Person from raising that issue in a Formal Challenge, provided the Interested Person submitted a Preliminary Challenge during the Review Period with respect to one or more other issues.

c. Any response by Transource SPP Entity to a Formal Challenge must be submitted to the FERC within thirty (30) calendar days of the date of the filing of the Formal Challenge, and shall be served on the filing party(ies) and the SPP

Exploder List on the date of such filing.

d. In any Formal Challenge proceeding concerning a given year's Annual Update (including corrections) or Accounting Change(s), Transource SPP Entity shall demonstrate the justness and reasonableness of the rate resulting from its application of the Formula Rate by demonstrating that it has reasonably and accurately calculated the Annual Update and/or reasonably adopted and applied the Accounting Change.

e. Except as specifically provided herein, nothing herein shall be deemed to limit in any way the right of Transource SPP Entity to file unilaterally, pursuant to section 205 of the FPA and the regulations thereunder, an application seeking changes to the Formula Rate or to any of the stated value inputs requiring a section 205 filing under these Protocols (including, but not limited to, ROE, depreciation and amortization rates, and PBOPs), or the right of any other party or the Commission to seek such changes pursuant to section 206 of the FPA and the regulations thereunder.

**Section 6. Changes to Annual Updates**

If Transource SPP Entity determines or concedes that corrections to the Annual Update are required, whether under Sections 4 or 5 of these Protocols, including but not limited to those requiring corrections to its FERC Form No. 1, or input data used for a Rate Year that would have affected the Annual Update for that Rate Year, Transource SPP Entity shall promptly notify the SPP Exploder List, and cause a correction to the Annual Update to be posted at a publicly accessible location on SPP's internet website and OASIS. Such corrections shall be

subject to review at the time they are made and shall be reflected in the next Annual Update, with interest. A corrected posting shall reset the deadlines under Sections 4 and 5 of the Protocols for Interested Person review and the revised dates shall run from the posting date(s) for each of the corrections. The scope of review shall be limited to the aspects of the Annual Update affected by the corrections. Interest on any over- or under-recovery due to corrections for preceding True-up Adjustments shall be calculated monthly on such over- or under-recovery from January 1 of the corrected Rate Year through December 31 of the Rate Year in which such over- or under-recovery is reflected ("Correction Period"). That is equivalent to two years interest applied to over- or under- collection. The applicable monthly interest rates for the Correction Period for an over-recovery shall be the annual interest rates for each month pursuant to 18 C.F.R. § 35.19a (2014) divided by twelve (12) for each month from the beginning of the Correction Period through December 31 of the Rate Year immediately preceding the Rate Year in which such over-recovery is reflected. The applicable monthly interest rates for the Correction Period for an under-recovery shall be the annual interest rate determined in accordance 18 C.F.R § 35.19a divided by twelve (12) for each month from the beginning of the Correction Period through December 31 of the Rate Year immediately preceding the Rate Year in which such under-recovery is reflected.

**Section 7. Informational Filing**

Transource SPP Entity shall submit to FERC an informational filing ("Informational Filing") of its projected Net Revenue Requirement for a Rate Year, including the True-Up Adjustment determined during the preceding Annual Update, by March 15 of the Rate Year. This Informational Filing must include the information that is reasonably necessary to determine: (1) that input data under the formula rate are properly recorded in any underlying

workpapers; (2) that Transource SPP Entity has properly applied the formula rate and these procedures; (3) the accuracy of data and the consistency with the formula rate of the Net Revenue Requirement and rates under review; (4) the extent of accounting changes that affect Formula Rate inputs; and (5) the reasonableness of projected costs. The Informational Filing must also describe any corrections or adjustments made during that period, and must describe all aspects of the Annual Update or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures. Additionally, the Informational Filing must include for the applicable Rate Year the following information related to affiliate cost allocation: (1) a detailed description of the methodologies used to allocate and directly assign costs between Transource SPP Entity and its affiliates by service category or function, including any changes to such cost allocation methodologies from the prior year, and the reasons and justification for those changes; and (2) the magnitude of such costs that have been allocated or directly assigned between Transource SPP Entity and each affiliate by service category or function. Any challenges to the implementation of the Template must be made through the annual review and challenge procedures described in Sections 4 and 5 of these protocols or in a separate complaint proceeding, and not in response to the Informational Filing.

**Section 8. Joint Informational Meeting**

Transmission Owners with transmission projects that are subject to regional cost sharing shall endeavor to hold a joint informational meeting to enable all interested parties to understand how those Transmission Owners are implementing their formula rates for cost recovery of such projects ("Joint Informational Meeting"). Notice of the Joint Informational Meeting, including the time, date, and location, shall be posted on the SPP website and OASIS and distributed to the SPP Exploder List no less than seven (7) days prior to such meeting.

Transource SPP Entity will participate in Joint Informational Meetings once it begins development of a project for which costs are to be regionally allocated.

**Section 9. Construction Work in Progress**

a. *Accounting.* Transource SPP Entity shall use the following accounting procedures to ensure that it does not recover an Allowance for Funds Used During Construction ("AFUDC") with respect to any amount of Construction Work In Progress ("CWIP") included in rate base.

(i) Transource SPP Entity shall assign each transmission project a unique Funding Project Number ("FPN") for internal cost tracking purposes.

(ii) Transource SPP Entity shall record actual construction costs to each FPN through work orders that are coded to correspond to the FPN for each project for which FERC has authorized all or part of the CWIP balance to be included in rate base ("CWIP Project".

(iii) Each project-specific FPN tracking account will be programmed to calculate and accrue AFUDC only on the balance of CWIP that is not eligible for inclusion in rate base.

(iv) For each project under construction, Transource SPP Entity shall prepare monthly work order summaries of costs incurred under the associated FPN. These summaries shall show monthly additions to CWIP in the FPN and, if less than 100% of the CWIP corresponding to the project FPN is eligible for inclusion in rate base, shall separately identify through FPN subaccounts (i) the component of the project CWIP balance included in rate base; and (ii) the component of the project CWIP balance

that is not included in rate base, including capitalized AFUDC. The summaries will also show any additions to plant in service. The summaries shall correspond to amounts recorded in FERC Account 107, CWIP, which account balance will be reported on Transource SPP Entity's FERC Form No. 1. Transource SPP Entity shall use these project-specific monthly summaries as data inputs into the annual CWIP report prepared under Section 7(b) and the Annual Update calculated pursuant to Section 3. Transource SPP Entity shall make such work order summaries available upon request under the review procedures of Section 4.

(v) When a project, or portion thereof, is placed into service, Transource SPP Entity shall deduct from total CWIP the accumulated balance of the FPN tracking account for that project, or portion thereof. The purpose of this control process is to ensure that expenditures are not double counted as both CWIP and as additions to plant.

(vi) For transmission projects for which the Commission has not authorized Transource SPP Entity to include any CWIP in rate base, Transource SPP Entity shall record AFUDC to be applied to the full CWIP balance of the FPN tracking account and capitalized when the project is placed into service.

b. *Annual Reporting.* For CWIP Projects, Transource SPP Entity shall file a report with the Commission at the time of Transource SPP Entity's Informational Filing that shall include the following information concerning each transmission

project under construction:

(i) a demonstration that each project for which CWIP is included in rate base was identified through SPP's regional planning process and awarded to Transource SPP Entity on the basis of a competitive bid;

(ii) the cost allocation methodology for each project under the SPP Tariff;

(iii) a tabulation of the monthly summaries described in Section 7(a)(iv) for each unique FPN tracking account, including thirteen (13) monthly balances illustrating the amount of CWIP included in rate base for the project, the amount of CWIP that is not included in rate base for the project, the amount of accumulated AFUDC associated with any CWIP not included in rate base, and any amounts recorded in related FERC accounts or subaccounts, such as regulatory liability;

(iv) the resulting effect of CWIP on the Net Revenue Requirement, including the percentage of any increase in the year-over-year Net Revenue Requirement that is attributable to CWIP, and the percentage of the total Net Revenue Requirement for the Rate Year that is attributable to CWIP;

(v) a statement of the current status of each project; and

(vi) the estimated in-service date for each project.

**Section 10. Competitive Bid Concessions**

For transmission development projects assigned to Transource SPP Entity as a result of the SPP competitive bidding process, Transource SPP Entity may, in its sole discretion, agree with SPP to apply a Competitive Bid Concession that will result in a lower Net Revenue Requirement on a project-specific basis than that which would otherwise be produced by the Transource SPP

Entity Addendum 48 to Attachment H formula rate. Any Competitive Bid Concession will appear as a zero or negative input to the formula, and will be determined on a project-specific basis using a workpaper that will be provided to Interested Parties as supporting documentation for each Transource SPP Entity Annual Update.

| 6 | Return | Line 5 * Line 6 | | | | | | | | |

7 Notes:

A.) The capital structure listed in Column (E) is calculated based on total capitalization amounts listed in Column (D).The capital structures listed in Column (F) and Column (G) are fixed and cannot be modified or deleted absent authorization from FERC via a Section 205 or 206 filing.

B.) In the case where the actual equity percentage (Column (E)) is greater, or equal, to 35.24% and less, or equal, to 68.86%, Column (H) should be populated with the actual equity level (Column (E)). In the case where L&O's actual equity level is below 35.24 percent, Column (H) should be populated with the capital structure listed in Column (F). In the case where L&O's actual equity level is above 68.86 percent, Column (H) should be populated with the capital structure listed in Column (G).

C.) The Cost of Capital for Total Margins and Equities (ROE) is fixed and cannot be modified or deleted absent authorization from FERC via a Section 205 or 206 filing. The Cost of Capital for Total Margins and Equities reflects a 50 basis point incentive adder for RTO participation. The Cost of Capital for Long Term Debt is calculated by dividing the interest expense in Column (I) by the total amount of LTD in Column (D).

A. Project Gross Plant is the total capital investment for the project calculated in the same
20 method as the gross plant
value in line 1.
This value includes subsequent capital investments required to maintain the facilities to
21 their original
capabilities.
Gross Plant does not include CWIP, Unamortized Regulatory Asset or
22 Unamortized
23 Abandoned Plant.
B. Net Plant is the Gross Plant less the associated
24 Accumulated
Depreciation.
C. Depreciation
25 Expense is the
depreciation amount

associated with the specified line or sub. Depreciation Expense includes the amortization of Abandoned Plant and any FERC approved Regulatory Asset.

D. The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Worksheet with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 12 data requirements or other similar supporting documentation. Additional line items will not require FPA Section 205 or 206 filings. L&O will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in L&O's Implementation Protocols. L&O may not change the columns or the formulas included in these Worksheets during the Annual Update.

| 6 | Total CWIP Not Included in Rate Base | | | | - | - | | |
| 7 | Total CWIP (Worksheet F, Line 65 Cols D and E) | | | | $ - | $ - | | |

8 Notes:

9 A. Percentage recovery cannot be added or changed absent approval from FERC

10 B. CWIP amounts should be directly assigned to pricing zone on Worksheet A.

11 C. AFUDC ceases when CWIP is recovered in rate base. Prior to recovering CWIP in rate base for any future project, L&O will file for and obtain Commission approval for inclusion of that project's CWIP in rate base. Accounting procedures must be provided during the annual update to ensure that there is no duplicate recovery of CWIP and corresponding AFUDC capitalized. Projects are transmission related only.

12 D. L&O may not change the columns or the formulas included in these Worksheets during the Annual Update.

38 Notes:

39 A. The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Workpaper with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 12 data requirements or other similar supporting documentation. Additional line items or line deletions will not require FPA Section 205 or 206 filings. L&O will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in L&O's Implementation Protocols. L&O may not change the columns or the formulas included in these Workpapers during the Annual Update.

## L&O Power Cooperative

## Transmission Formula Rate Implementation Protocols

The transmission formula rate template ("Formula Rate Template") of L&O Power Cooperative ("L&O") and these Transmission Formula Rate Implementation Protocols ("Protocols") together comprise the filed rate ("Formula Rate") of L&O for transmission

service in Zone 19 of the Southwest Power Pool, Inc. ("SPP") footprint. L&O must follow the instructions specified in the Formula Rate to calculate its Annual Transmission Revenue Requirements ("ATRR").

Recovery of costs associated with existing and new facilities shall be consistent with the Formula Rate and with Attachment AI and Attachment J, respectively, of the SPP Open Access Transmission Tariff ("SPP Tariff"). The ATRR shall be determined for January 1 to December 31 of a given calendar year. The Formula Rate shall become effective for recovery of L&O ATRR upon the effective date authorized by the Federal Energy Regulatory Commission ("FERC"). The Formula Rate shall be applicable to service on and after July 1 of each calendar year through June 30 of the following calendar year ("Rate Year"), subject to review, challenge and refunds or surcharges with interest, to the extent provided herein. These Protocols specify the dates applicable to the activities described herein. Should any due date fall on a weekend or a holiday recognized by FERC, then the due date shall be no later than the next Business Day.

## Section I Definitions

For purposes of these Protocols, the following capitalized terms shall have the meanings set forth below.

A. "Accounting Change" means any change in L&O's accounting policies and practices from those in effect for the Calendar Year upon which the immediately preceding Annual Update was based and that could impact the ATRR calculations under the Formula. Accounting Changes include any changes resulting from:

1. revisions to Rural Utilities Service's ("RUS") Uniform System of Accounts ("USoA");

2. revisions to RUS Financial and Operating Report - Electric Power Supply ("Form No. 12") data and the requirement to report certain values within it;

3. correction of errors and prior period adjustments that impact the ATRR;

4. the implementation of new estimation methods or policies;

5. changes to income tax elections;

6. changes in accounting practices or policies mandated by a state regulatory authority with jurisdiction over L&O that could impact the Formula Rate or calculations under the Formula;

7. implementation of accounting practices for unusual or unconventional items where FERC has not provided specific accounting direction;

8. a change in L&O's accounting policies and practices (as such changes are defined by the Statement of Financial Accounting Board Standards No. 154 issued by the Financial Accounting Standards Board or its successor);

9. L&O's own Accounting Changes (which constitute a change to the ATRR greater than or equal to $10,000) such as the addition or deletion of a subaccount not specified by FERC's USoA; or

10. a change in L&O's inter-corporate cost allocation policies or practices from those policies and/or practices in effect in the Prior Rate Year, which change causes a result under the Formula Rate different than the result under the Formula Rate as calculated without such change.

B. "Annual Transmission Revenue Requirement" ("ATRR") means the net revenue requirement for the Transmission Services calculated in accordance with the Formula Rate filed by L&O for informational purposes with FERC and posted on the SPP Open Access Same-Time Information System ("OASIS") on or before the annual Publication Date, subject to review pursuant to the provisions of these Protocols.

C. "Annual Meeting" means the meeting hosted by L&O for the purpose of exchanging information with Interested Parties regarding the Formula Rate.

D. "Annual Update" means L&O's annual filing of its Formula Rate, in a working Excel™ format. The Annual Update is submitted as described in these Protocols.

E. "Business Day" means from 9:00 AM to 5:00 PM Central Prevailing Time other than weekends and Federal Holidays.

F. "Calendar Year" means January 1 through December 31 of a given year.

G. "Current Rate Year" means the Rate Year for which the Annual Update is posted on the SPP OASIS and which L&O has filed with FERC (*e.g.*, if the Annual Update is posted on April 15, 2021, and the Informational Filing is submitted to FERC on August 15, 2021, the Current Rate Year is July 1, 2021 through June 30, 2022).

H. "Customer(s)" or "Transmission Customer(s)" means the customers taking NITS, service under Grandfathered Agreements, or PTP Transmission Service.

I. "FERC" or "Commission" means the Federal Energy Regulatory Commission.

J. "Final Posting" means the Annual Update information which L&O requests that SPP post to the SPP OASIS with changes agreed to during the Review Period.

K. "Formal Challenge" means a challenge by an Interested Party to an aspect of the Annual Update that is filed with FERC and served on L&O by electronic service on the date of such filing.

L. "Form No. 12" means the RUS Financial and Operating Report - Electric Power Supply.

M. "Formula" means the Formula Rate Template set forth in Addendum 47 to Attachment H of the SPP Tariff.

N. "Formula Rate" has the meaning defined herein and means the L&O Implementation Protocols together with the Formula Rate Template.

O. "Formula Rate Template" means the L&O transmission formula rate template set forth herein.

P. "FPA" means Federal Power Act.

Q. "Informal Challenge" means written notification by an Interested Party to L&O of any specific challenge to the Annual Update.

R. "Information Request" means a written request submitted by an Interested Party to L&O.

S. "Informational Filing" means L&O's annual filing at the Commission with the information stipulated in these Protocols.

T. "Initial Posting" means the date on which SPP posts L&O's Annual Update to the SPP OASIS.

U. "Interest" means interest calculated pursuant to 18 C.F.R. § 35.19a (a)(2)(iii) or successor regulation.

V. "Interested Party" includes but is not limited to, (i) Transmission Customers under the SPP Tariff, (ii) state utility regulatory commissions with rate jurisdiction over a public utility located within the SPP footprint; (iii) consumer advocacy agencies authorized by state law to review and contest the rates for any such public utility; and (iv) state attorneys general.

W. "NITS" means Network Integration Transmission Service as defined in the SPP Tariff.

X. "OASIS" means Open Access Same-Time Information System.

Y. "OATT" or "SPP Tariff" means SPP's Open Access Transmission Tariff.

Z. "Prior Rate Year" means the Rate Year prior to the Current Rate Year (*e.g.*, if the Current Rate Year is July 1, 2021 through June 30, 2022, then the Prior Rate Year is July 1, 2020 through June 30, 2021).

AA. "PTP Rates" means the point-to-point rates derived from the Formula Rate.

BB. "Publication Date" means the date on which L&O posts the Annual Update to the SPP OASIS. The Publication Date for each year beginning in 2021 shall be no later than April 15, provided, however, that if April 15 should fall on a weekend or a holiday recognized by FERC, then the posting shall be due no later than the next Business Day, and the Publication Date shall correspond to the actual posting date.

CC. "Rate Year" means July 1 of a given year through June 30 of the subsequent Calendar year.

DD. "Review Period" means, unless otherwise extended in writing by L&O, 60 days after the Publication Date, which includes a period for submission of Information Requests and a period for preparation of Informal Challenges.

EE. "RUS" means Rural Utilities Service.

FF. "Stated Values" means values that are fixed and not subject to change in an Annual Update. Stated values include: (i) the authorized return on equity (ROE); (ii) depreciation and amortization rates; and (iii) other similar fixed values. Stated Values may be changed only pursuant to FPA Section 205 or 206.

GG. "USoA" means FERC's Uniform System of Accounts.

## Section II Annual Update

A. On or before April 15 of each calendar year (the Publication Date), L&O shall:

1. Recalculate the ATRR and the rates applicable to NITS for the new Rate Year in accordance with the Formula Rate and using the Formula Rate Template (Annual Update); and

2. Provide its Annual Update to SPP and request that SPP post such information to the SPP OASIS (the Initial Posting); and

3. If the date for posting the Annual Update falls on a weekend or a holiday recognized by FERC, then the Initial Posting shall be due on the next Business Day. The date on which such posting occurs shall be that year's Publication Date. Any delay in the Publication Date shall result in an equivalent extension of time for the submission of Information Requests.

B. Concurrent with the Initial Posting, L&O shall provide the Annual Update to SPP to serve electronically upon the Formula Rate Posting Information Notification List.[1]

C. The Annual Update shall:

1. Include a workable populated Formula Rate Template with fully functional spreadsheets showing the calculation of the Annual Update and underlying work papers in native format with links and formulas intact, including sufficiently detailed work papers and supporting documentation for data;

[1] As used in these Protocols, "Formula Rate Posting Information Notification List" shall mean the list of email addresses maintained by SPP of Interested Parties, provided that such Interested Parties request to be added to the Formula Rate Posting Information Notification List through the "Exploder List" link on the SPP website. As of September 2019, the Exploder List was titled "Formula Rate Posting Information Notification" and could accessed at http://www.spp.org/ stakeholder-center/exploder-lists/.

2. Be based on the independently-audited books and records of L&O for the most recent fiscal year including its certified RUS Form No. 12 or successor reports including the Financial and Operating Report Electric Power Supply (Op. Report – Power Supply), (January 1 through December 31);

3. Provide sufficient information to enable Interested Parties to replicate the calculation of the formula results from the Formula Rate;

4. With respect to any change in accounting that affects the inputs to the Formula Rate or the resulting charges billed under the Formula Rate, L&O shall identify:

   a. Any Accounting Changes, such as the initial implementation of an accounting standard or policy; the initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific direction; or the correction of errors and prior period adjustments that impact the ATRR. Any items included in the Formula Rate at an amount other than a historic cost basis.

   b. Individual impact of any changes in i. above on charges billed under the Formula Rate.

   c. Accounting Changes related to any reorganization or merger transaction.

5. Not seek to modify the Formula Rate, as any modification to the Formula Rate will require filing under section 205 or 206 of the FPA.

6. With each Annual Update, L&O will include a list of any new transmission facilities included in the Formula Rate Template that were not included in the prior Annual Update. New transmission facilities include but are not limited to additional substations, breakers, other major substation equipment, and additional transmission line miles. The list will indicate the Zone 19 Attachment AI Guidance Document criteria that L&O believes supports each facility's inclusion in L&O's ATRR as well as the beginning-of-year and end-of-year balances associated with that facility. This provision in no way limits the rights of any Interested Party to challenge inclusion of new facilities.

## Section III Review of Annual Update

Within twenty (20) days of the posting of L&O's Annual Update, L&O will host a meeting for Interested Parties to discuss the Annual Update (Annual Meeting). L&O shall provide notice of this meeting concurrent with the posting of the Annual Update accessible on the SPP OASIS. The notice shall include the date, time and location of the Annual Meeting and also shall be provided to Interested Parties through the Formula Rate Posting Information Notification List. The Annual Meeting shall also be available by telephone and/or web access with all meeting materials provided electronically.

A. Information Exchange

1. Interested Parties may begin submitting Information Requests immediately following the Publication Date of the Annual Update and will have until sixty (60) days after the Publication Date to serve reasonable Information Requests on L&O for information and work papers supporting the Annual Update (the Review Period). Such Information Requests shall be limited to that which is necessary to determine:

    a. The extent or effect of an Accounting Change;

    b. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

    c. The proper application of the Formula Rate and procedures in these Protocols;

    d. The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

    e. The effect of any change to the underlying USoA or Formula Rate Template; or

    f. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

    The information and document requests shall not otherwise be directed to ascertain whether the Formula Rate is just and reasonable. L&O will not claim that responses to information and document requests pursuant the Protocols are subject to any settlement confidentiality provision; however, L&O may require that Interested Parties execute a non- disclosure agreement to obtain access to material that L&O deems commercially sensitive or that contains Critical Energy Infrastructure Information as that term is defined in 18 CFR § 388.113(c)(1).

2. L&O shall make a good faith effort to respond to Information Requests pertaining to the Annual Update within fifteen (15) Business Days of receipt.

3. L&O shall request that SPP post on a publicly accessible portion of the SPP OASIS all Information Requests from Interested Parties and L&O response(s) to such requests, and a link to the posting will be electronically served on all Interested Parties via the Formula Rate Posting Information Notification List. If responses to Information Requests contain information deemed by L&O to be confidential, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement executed by the requesting party and L&O.

4. If the deadline for Interested Parties falls on a weekend or holiday recognized by the Commission the deadline will be extended to the next Business Day.

B. Informal Challenge Procedures

1. Interested Parties shall have until June 15 (or the first Business Day after June 15 if June 15 falls on a weekend or holiday) to notify L&O in writing (which may be electronically) of any specific Informal Challenges. The Informal Challenge must specify the inputs, supporting explanations, allocations calculations, or other information to which the Interested Party objects and provide an appropriate explanation and documents to support its Informal Challenge. L&O will make a good faith effort to respond to any Informal Challenge within twenty (20) calendar days of notification of such Informal Challenge. L&O, and, if appropriate, SPP, shall appoint senior representatives to work with the Interested Party to resolve the Informal Challenge.

2. L&O will request that SPP post on the SPP OASIS all Informal Challenges from Interested Parties and L&O responses to the Informal Challenges and a link to the posting will be electronically served on all Interested Parties via the Formula Rate Posting Information Notification List. If responses to Informal Challenges contain information deemed by L&O to be confidential, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement executed by the requesting party and L&O.

3. Any changes or adjustments to the Annual Update resulting from the Information Exchange and Informal Challenge procedures that are agreed to by L&O and resolved prior to the end of the Review Period shall be reported in the Final Posting on the SPP OASIS. Any changes or adjustments agreed to by L&O after this date will be reported in the Informational Filing made with FERC and will be reflected in the Annual Update for the following Rate Year.

C. Formal Challenges

1. An Interested Party shall have until September 15 (or the first Business Day after September 15 if September 15 falls on a weekend or holiday recognized by FERC) to file a Formal Challenge. A party may not pursue a Formal Challenge if that party did not submit an Informal Challenge on at least one issue. Having submitted an Informal Challenge on at least one issue, an Interested Party may pursue a Formal Challenge on other issues. Regardless of whether an Interested Party pursues or fails to pursue Informal or Formal Challenges, an Interested Party may file a complaint under section 206 of the FPA at any time.

2. A Formal Challenge shall:

   a. Clearly identify the action or inaction which is alleged to violate the filed Formula Rate or Protocols;

   b. Explain how the action or inaction violates the filed Formula Rate or Protocols;

   c. Set forth the business, commercial, economic or other issues presented

by the action or inaction as such relate to or affect the party filing the Formal Challenge, including:

i. The extent or effect of an Accounting Change;

ii. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

iii. The proper application of the Formula Rate and procedures in these Protocols;

iv. The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

v. The effect of any change to the underlying Uniform System of Accounts or Formula Rate Template; or

vi. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

d. Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;

e. State whether the issues presented are pending in an existing proceeding in any forum in which the Interested Party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;

f. State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that belief.

g. Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the Interested Party, including, but not limited to, contracts and affidavits; and

h. State whether the filing party utilized the Informal Challenge procedures described in these Protocols with regard to any issue.

3. Formal Challenges shall be filed with FERC, either in the FERC Docket assigned to the Informational Filing or via section 206 of the FPA and shall be served upon L&O contemporaneously with the filing at FERC. Service can be accomplished by electronic mail in accordance with 18 C.F.R. § 385.2010(f)(3), or by facsimile, express delivery or messenger to the individual listed as the contact person in L&O's Informational Filing.

4. In any proceeding initiated by FERC concerning the Annual Update or in response to a Formal Challenge, L&O shall bear the burden, consistent with

section 205 of the FPA, of proving that it has correctly applied the Formula Rate consistent with these Protocols. Nothing herein is intended to alter the burdens applied by FERC with respect to prudence challenges.

D. Modification of Formula Rate or Annual Update

1. No party shall seek to modify the Formula Rate under the Challenge procedures (either Formal or Informal) set forth in these Protocols and the Annual Update shall not be subject to challenge for the purpose of modifying the Formula Rate. Modifications to the Formula Rate may be made only pursuant to Federal Power Act section 205 or section 206.

2. A change to the Formula Rate fixed inputs related to ROE, depreciation rates, capital structure, amortization periods, and any ROE incentives for SPP regional projects may not be made absent the appropriate filing with FERC pursuant to the FPA, sections 205 or 206.

3. If L&O makes a correction to a Mistake in its financial information during the Current Rate Year that would affect the Formula Rate for the Current Rate Year, such corrections and any resulting refunds or surcharges shall be reflected in the Annual Update for the next effective Rate Year with interest computed in accordance with 18 C.F.R. § 35.19a or successor regulation. For purposes of these Protocols, "Mistake" shall mean errors or omissions regarding the values inputted into the Formula Rate Template, such as arithmetic or computational errors. Mistakes shall not include matters involving exercise of judgment or substantive differences of opinion regarding the derivation of an input that is more properly the subject of the annual review process.

4. Any changes to the data inputs or as the result of a FERC proceeding shall be incorporated into the Formula Rate and the charges produced by the Formula Rate in the Annual Update for the next effective Rate Year. Any interest on any refund shall be calculated in accordance with 18 C.F.R. § 35.19a or successor regulation.

E. Informational Filing

1. By August 15 of each year, L&O shall submit to FERC an informational filing (Informational Filing) of its Annual Update under a separate docket number.

2. This Informational Filing must include the information that is reasonably necessary to determine:

   a. That input data under the Formula Rate is properly recorded in any underlying work papers;

   b. That L&O has properly applied the Formula Rate and these procedures;

   c. The accuracy of the data and the consistency with the Formula Rate of

the ATRR and rates under review; and

d. The extent of Accounting Changes that affect Formula Rate inputs.

3. The Informational Filing must also describe all aspects of the Formula Rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures.

4. Contemporaneous with the making of such Informational Filing, L&O shall provide notice of the Informational Filing to Interested Parties via the Formula Rate Posting Information Notification List and request that SPP post the notice and the docket number assigned to the Informational filing on the SPP OASIS.

## Section IV Joint SPP Transmission Owners' Meeting

If the SPP Transmission Owners with transmission projects that utilize a regional cost-sharing methodology implement a process to coordinate and hold joint meetings, L&O intends to participate in that process. Notice of joint informational meetings, including the time, date, and location, shall be posted on the SPP OASIS and distributed to Interested Parties via the Formula Rate Posting Information Notification List no less than seven (7) days prior to such meetings.

## Section V Example L&O Schedule

| Line No. | Action | Date |
|---|---|---|
| 1 | Rate Year | July 1-June 30 |
| 2 | Publication Date | April 15 |
| 3 | Annual Meeting of Interested Parties | May 5 |
| 4 | Interested Parties Review Period | April 15 – June 15 |
| 5 | Informal Challenges Due Date | June 15 |
| 6 | Final Posting | June 20 |
| 7 | Informational Filing | August 15 |
| 8 | Formal Challenge Due Date | September 15 |

Formula Rate - Non-Levelized

Rate Formula Template Utilizing EIA Form 412 Data Missouri Joint Municipal Electric Utility Commission

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#)

References to data from EIA Form 412 are indicated as: x.y.z (section, line, column)

To the extent the page references to EIA Form 412 are missing, the entity will include a "Notes" section in the EIA 412 to provide this data.

| Note Letter | |
|---|---|
| A | The utility's maximum monthly megawatt load (60-minute integration) for RQ service at time of applicable pricing zone coincident monthly peaks. RQ service is service which the supplier plans to provide on an on-going basis (i.e., the supplier includes projected load for this service in its system resource planning). |
| B | Includes LF, IF, LU, IU service. LF means "firm service" (cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions), and long-term (duration of at least five years); does not meet definition of RQ service. IF is "firm service" for a term longer than one but less than five years. LU is service from a designated generating unit, of a term no less than five years. LI is service from a designated generating unit for a term between one and five years. Measured at time of applicable pricing zone coincident monthly peaks. |
| C | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| D | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| E | The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff, if any |
| F | The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note K. Account 281 is not allocated. |
| G | Transmission related only. |
| H | Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 8, column 5. Prepayments are the electric related prepayments booked to Account No. 165 as shown on Schedule I of EIA Form 412. |
| I | Line 5 - EPRI Annual Membership Dues, all Regulatory Commission Expenses, and non-safety related advertising. Line 5a - Regulatory Commission Expenses directly related to transmission service, ISO filings or transmission siting. |
| J | Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere. |
| K | The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, |

rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit. multiplied by (1/1-T) (page 3, line 26).

| | | | | |
|---|---|---|---|---|
| Required: | Inputs | FIT = | 0.00% | |
| | | SIT= | 0.00% | (State Income Tax Rate or Composite SIT) |
| | | p = | 0.00% | (percent of federal income tax deductible for state purposes) |

L Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Account Nos. 561.1, 561.2, 561.3, and 561.BA.

M Removes transmission plant determined to be state-jurisdictional by Commission order according to the seven-factor test (until EIA 412 balances are adjusted to reflect application of seven-factor test).

N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

O Enter dollar amounts

P Debt cost rate = long-term interest (Line 21) / long term debt (Line 22). A 50 basis point RTO participation adder may be added to the Base ROE (currently 9.80%) to produce Proprietary Capital Cost Rate, which will be capped at the upper end of the zone of reasonableness established by FERC, for transmission owners who have turned over functional control of their Transmission Facilities to MISO or provide service over Non-transferred Transmission Facilities through the MISO Tariff with MISO acting as agent, subject to the following criteria: MJMEUC affirms that it commits to provide refunds (with interest at the FERC refund interest rates) consistent with any refund effective date established in any proceedings resulting in a new base ROE or new zone of reasonableness for the MISO transmission owners' base ROE, to the extent that the ROE or zone of reasonableness established in any such proceedings, when applied as of the refund effective date established in such proceedings, would result in a lower revenue requirement than that charged. The obligation to provide refunds resulting from such a proceeding shall apply only prospectively as of effective date of rates charged under this transmission formula rate.

Q Not used

R Includes income related only to transmission facilities, such as pole attachments, rentals and special use.

S Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking - the revenues are included in line 4, page 1 and the loads are included in line 13, page 1. Grandfathered agreements whose rates have not been changed to eliminate or mitigate pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.

T The revenues credited on page 1, lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template.

U From Reference III.17.b include only the amount from Accounts 428, 429, and 430.

V Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements.

W Pursuant to Attachment GG of the Midwest ISO Tariff, removes dollar amount of revenue requirements calculated pursuant to Attachment GG.

X Removes from revenue credits revenues that are distributed pursuant to Schedules associated with Attachment GG of the Midwest ISO Tariff, since the Transmission Owner's Attachment O revenue requirements have already been reduced by the Attachment GG revenue requirements.

Y Pursuant to Attachment MM of the Midwest ISO Tariff, removes dollar amount of revenue requirements calculated pursuant to Attachment MM.

Z Removes from revenue credits revenues that are distributed pursuant to Schedules associated with Attachment MM of the Midwest ISO Tariff, since the Transmission Owner's Attachment O revenue requirements have already been reduced by the Attachment MM revenue requirements.

# Forecasted 12 Months Ended December 31, 2XXX

## Worksheet 12: Interest Rate

**Instructions:** Inputs are indicated by light yellow highlighted cells with blue bold font

**Purpose:** To calculate the average interest rates to be applied to the true-up calculations

**Per Section _____ of the Annual True-up, Information Exchange and Challenge Procedures**

Interest on over-recovery will be based on FERC's regulation 18 C.F.R 35.19a

Interest on under-recovery will be based on the annual average of the one-month

LIBOR rate **capped** at the FERC refund interest rate
MJMEUC to enter monthly LIBOR amounts and provide a cite to source of LIBOR rate

The interest payable will be calculated using an average interest rate for the twenty-four (24) months
during which the over or under recovery in the net revenue requirement or load volume changes exists.
The interest rate to be applied to the over or under recovery amounts will be determined using the average

rate for the twenty (20) months preceding September of the current year.

**MISSOURI JOINT MUNICIPAL ELECTRIC UTILITY COMMISSION**

**(MJMEUC)**

**TRANSMISSION FORMULA RATE IMPLEMENTATION PROTOCOLS: ANNUAL TRUE-UP, INFORMATION EXCHANGE, AND CHALLENGE PROCEDURES**

## Section I. Applicability

The following procedures shall apply to Missouri Joint Municipal Electric Utility Commission's ("MJMEUC") calculation of its actual net revenue requirement, True-Up Adjustment, and projected net revenue requirement.

## Section II. Annual True-Up and Projected Net Revenue Requirement

A. Beginning on or before June 1, 2023, and on or before each subsequent June 1, MJMEUC shall determine its Annual True-Up under this Attachment H and Section VII of these protocols, to derive a True-Up Adjustment to be included in MJMEUC's projected net revenue requirement for the subsequent calendar year (the "Rate Year").

B. On or before June 1, 2023, and on or before each subsequent June 1, MJMEUC shall provide its Annual True-Up, actual net revenue requirement, and True-Up Adjustment to Southwest Power Pool, Inc. ("SPP") and cause such information to be posted on the SPP OASIS. Within ten (10) days of such posting, MJMEUC shall provide notice of such posting via an SPP email exploder list (Formula Rate Posting Information Notification). Interested Parties as that term is defined in Section II.F of these protocols) can subscribe to the SPP email exploder list (Formula Rate Posting Information Notification) on the SPP website or request to be notified of the posting by emailing MJMEUC at FormulaRates@mpua.org.

C. On or before October 1, 2023, and on or before each subsequent October 1, MJMEUC shall provide its projected net revenue requirement to SPP and cause such information to be posted on the SPP OASIS. Within ten (10) days of posting of the projected net revenue requirement, MJMEUC shall provide notice of such posting via an SPP email exploder list (Formula Rate Posting Information Notification). Interested parties as that term is defined in Section II.G of these protocols) can subscribe to the SPP email exploder list (Formula Rate Posting Information Notification) on the SPP website or request to be notified of the posting by emailing MJMEUC at FormulaRates@mpua.org.

D. If the date for posting the Annual True-Up or the projected net revenue requirement falls on a weekend or a holiday recognized by the Federal Energy Regulatory Commission ("Commission" or "FERC"), then the posting shall be due on the next business day. The date on which posting of the Annual True-Up occurs shall be that year's "Publication Date." Any delay in the Publication Date or in the posting of the projected net revenue requirement will result in an equivalent extension of time for the submission of Information Requests discussed in Section III of these protocols.

E. The Annual True-Up shall:
   1. Include a workable data-populated Formula Rate Template and underlying workpapers in native format with all formulas and links intact;
   2. Be based on MJMEUC's audited financial statements and EIA Form 412[1] information for the prior calendar year;
   3. Provide the formula rate calculations and all inputs thereto, as well as supporting documentation and workpapers for data that are used in the Annual True-Up that are not otherwise available in MJMEUC's audited financial statements and EIA Form 412 information;[2]
   4. Provide sufficient information to enable Interested Parties (as that term is defined in Section II.G of these protocols) to replicate the calculation of the Annual True-Up results from the MJMEUC audited financial statements and EIA Form No. 412;
   5. Identify any changes in the formula references (page and line numbers) to the MJMEUC audited financial statements and EIA Form No. 412;
   6. Identify all material adjustments made to the MJMEUC audited financial statements or the EIA Form No. 412 data in determining formula inputs, including relevant footnotes to the MJMEUC audited financial statements or EIA Form 412;

---

[1] While the EIA no longer requires the submission of EIA-Form 412, MJMEUC will make the data from EIA Form No. 412 that is used in calculating the rates publicly available.

[2] It is the intent of the formula rate, including the supporting explanations and allocations described therein, that each input to the formula rate will be either taken directly from MJMEUC's audited financial statement, EIA Form No. 412 information, or reconcilable to EIA Form No. 412 by the application of clearly identified and supported information. If the referenced form is superseded, the successor form(s) shall be utilized and supplemented as necessary to provide equivalent information as that provided in the superseded form. If the referenced form(s) is (are) discontinued, equivalent information as that provided in the discontinued form(s) shall be utilized.

7. Provide underlying data for formula rate inputs that provide greater granularity than is required for the MJMEUC audited financial statements and EIA Form No. 412; and
8. With respect to any change in accounting that affects inputs to the formula rate or the resulting charges billed under the formula rate ("Accounting Change"):
    a. Identify any Accounting Changes, including:
        i. The initial implementation of an accounting standard or policy;
        ii. The initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific accounting direction;
        iii. Correction of errors and prior period adjustments that impact the True-Up Adjustment calculation;
        iv. The implementation of new estimation methods or policies that change prior estimates; and
        v. Changes related to taxes, including new or increased taxes and changes in the application of existing taxes;
    b. Identify terms included in the Annual True-Up at an amount other than on a historic cost basis (e.g., fair value adjustments);
    c. Identify any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs to the Annual True-Up; and
    d. Provide, for each item identified pursuant to items II.E.8.a – II.E.8.c of these protocols, a narrative explanation of the individual impact of such changes on the True-Up Adjustment.

F. The projected net revenue requirement shall:
    1. Include a workable data-populated Formula Rate Template and underlying workpapers in native format with all formulas and links intact;
    2. Provide the formula rate calculations and all inputs thereto, as well as supporting documentation and workpapers for data that are used in the projected net revenue requirement;
    3. Provide sufficient information to enable Interested Parties (as that term is defined in Section II.G of these protocols) to replicate the calculation of the projected net revenue requirement; and
    4. With respect to any change in accounting that affects inputs to the formula rate or the resulting charges billed under the formula rate ("Accounting Change"):
        a. Identify any Accounting Changes, including:
            i. The initial implementation of an accounting standard or policy;
            ii. The initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific accounting direction;
            iii. Correction of errors and prior period adjustments that impact the projected net revenue requirement calculation;

iv. The implementation of new estimation methods or policies that change prior estimates; and
v. Changes related to taxes, including new or increased taxes and changes in the application of existing taxes;

b. Identify items included in the projected net revenue requirement at an amount other than on a historic cost basis (e.g., fair value adjustments);
c. Identify any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs to the projected net revenue requirement; and
d. Provide, for each item identified pursuant to items II.F.4.a – II.F.4.c of these protocols, a narrative explanation of the individual impact of such changes on the projected net revenue requirement.

G. MJMEUC shall hold an open meeting for Interested Parties ("Annual True-Up Meeting") between the Publication Date and September 1st. No less than ten (10) days prior to such Annual True-Up Meeting, MJMEUC shall provide notice on SPP's OASIS and via an SPP email exploder list (Formula Rate Posting Information Notification) of the date, time, and location of the Annual True-Up Meeting, including web conference and teleconference information. For purposes of these protocols, the term "Interested Party" includes, but is not limited to, customers under the SPP Tariff, state regulatory commissions, and consumer advocacy agencies. The Annual True-Up Meeting shall (i) permit MJMEUC to explain and clarify its Annual True-Up and True-Up Adjustment; and (ii) provide Interested Parties an opportunity to seek information and clarifications from MJMEUC regarding its Annual True-Up and True-Up Adjustment.

H. MJMEUC shall hold an open meeting among Interested Parties ("Annual Projected Rate Meeting") between the date that the projected net revenue requirement is posted to the SPP OASIS (as described in Sections II.C and II.D of these protocols) and October 31. No less than ten (10) days prior to such Annual Projected Rate Meeting, MJMEUC shall provide notice on SPP's OASIS and via an SPP email exploder list (Formula Rate Posting Information Notification) of the date, time, and location of the Annual Projected Rate Meeting, including web conference and teleconference information. The Annual Projected Rate Meeting shall (i) permit MJMEUC to explain and clarify its projected net revenue requirement and (ii) provide Interested Parties an opportunity to seek information and clarifications from MJMEUC regarding the projected net revenue requirement.

I. If SPP Transmission Owners with transmission projects that utilize a regional cost-sharing methodology implement a process to coordinate and hold joint meetings, MJMEUC will participate in that process and will provide notice to Interested Parties of the time, date, and location of the joint meeting (including web conference and teleconference information) via posting on SPP's OASIS and via an SPP email exploder list (Formula Rate Posting Information Notification) no less than ten (10) days prior to

such meeting.

**Section III. Information Exchange Procedures**

Each Annual True-Up and projected net revenue requirement shall be subject to the following information exchange procedures ("Information Exchange Procedures"):

A. Interested Parties shall have until December 1st following the Publication Date (unless such period is extended with the written consent of MJMEUC or by FERC order) to serve reasonable information and document requests on MJMEUC ("Information Exchange Period"). If December 1st falls on a weekend or holiday recognized by FERC, the deadline for submitting all information and document requests shall be the next business day. Information and document requests shall be limited to what is necessary to determine:
    1. The extent or effect of an Accounting Change;
    2. Whether the Annual True-Up or projected net revenue requirement fails to include data properly recorded in accordance with these protocols;
    3. The proper application of the formula rate and procedures in these protocols;
    4. The accuracy of data and consistency with the formula rate of the calculations shown in the Annual True-Up or projected net revenue requirement;
    5. The prudence of actual costs and expenditures;
    6. The effect of any change to the underlying Uniform System of Accounts, the MJMEUC audited financial statements, or EIA Form No. 412; or
    7. Any other information that may reasonably have a substantive effect on the calculation of the charge pursuant to the formula.

    The information and document requests shall not otherwise be directed to ascertaining whether the formula rate is just and reasonable.

B. MJMEUC shall make a good faith effort to respond to information and document requests within fifteen (15) business days of receipt of such requests. MJMEUC shall respond to all information and document requests by no later than January 10th following the Publication Date unless the Information Exchange Period is extended by MJMEUC or FERC.

C. MJMEUC will cause to be posted on the SPP OASIS and via an SPP email exploder list (Formula Rate Posting Information Notification) all information requests from Interested Parties and MJMEUC's response(s) to such requests; except, however, if responses to information and document requests include material deemed confidential information by MJMEUC, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement to be executed by MJMEUC and the requesting party.

D. MJMEUC shall not claim that responses to information and document requests provided pursuant to these protocols are subject to any settlement privilege in any subsequent

FERC proceeding addressing MJMEUC's Annual True-Up or projected net revenue requirement.

**Section IV. Challenge Procedures**

A. Interested Parties shall have until January 31st following the Publication Date (unless such period is extended with the written consent of MJMEUC or by FERC order) to review the inputs, supporting explanations, allocations, and calculations and to notify MJMEUC in writing, which may be submitted electronically, of any specific Informal Challenges to the Annual True-Up or projected net revenue requirement. The period of time from the Publication Date until January 31st shall be referred to as the "Review Period". If January 31st falls on a weekend or a holiday recognized by FERC, the deadline for submitting all Informal Challenges shall be extended to the next business day. Failure to pursue an issue through an Informal Challenge or to lodge a Formal Challenge regarding any issue as to a given Annual True-Up or projected net revenue requirement shall bar pursuit of such issue with respect to that Annual True-Up or projected net revenue requirement but shall not bar pursuit of such issue or the lodging of a Formal Challenge as to such issue as it relates to a subsequent Annual True-Up or projected net revenue requirement.

B. A party submitting an Informal Challenge to MJMEUC must specify the inputs, supporting explanations, allocations, calculations, or other information to which it objects, and provide an appropriate explanation and documents to support its challenge. MJMEUC shall make a good faith effort to respond to any Informal Challenge within twenty (20) business days of notification of such challenge. MJMEUC shall appoint a senior representative to work with the party that submitted the Informal Challenge (or its representative) toward a resolution of the challenge. If MJMEUC disagrees with such challenge, MJMEUC will provide the Interested Party(ies) with an explanation supporting the inputs, supporting explanations, allocations, calculations, or other information. No Informal Challenge may be submitted after January 31st, and MJMEUC must respond to all Informal Challenges by no later than February 28th, unless the review period is extended by MJMEUC or FERC.

C. Informal Challenges shall be subject to the resolution procedures and limitations in this Section IV.

D. Formal Challenges shall be filed with FERC pursuant to these protocols and shall satisfy all the following requirements:
    1. A Formal Challenge shall:
        a. Clearly identify the action or inaction which is alleged to violate the filed rate formula or protocols;
        b. Explain how the action or inaction violates the filed rate formula or protocols;

c. Set forth the business, commercial, economic, or other issues presented by the action or inaction as such relates to or affects the party filing the Formal Challenge, including:
    i. The extent or effect of an Accounting Change;
    ii. Whether the Annual True-Up or projected net revenue requirement fails to include data properly recorded in accordance with these protocols;
    iii. The proper application of the formula rate and procedures in these protocols;
    iv. The accuracy of data and consistency with the formula rate of the calculations shown in the Annual True-Up or projected net revenue requirement;
    v. The prudence of actual costs and expenditures;
    vi. The effect of any change to the underlying Uniform System of Accounts, the MJMEUC audited financial statements, or the EIA Form No. 412; or
    vii. Any other information that may reasonably have a substantive effect on the calculation of the charge pursuant to the formula.
d. Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;
e. State whether the issues presented are pending in an existing FERC proceeding or a proceeding in any other forum in which the filing party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;
f. State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that belief;
g. Include all documents that support the facts in the Formal Challenge in the possession of, or otherwise attainable by, the filing party, including, but not limited to, contracts and affidavits; and
h. State whether the filing party utilized the Informal Challenge procedures described in these protocols to dispute the action or inaction raised by the Formal Challenge, and, if not, describe why not.

2. Service. Any person filing a Formal Challenge must serve a copy of the Formal Challenge on MJMEUC. Service to MJMEUC must be simultaneous with filing at FERC. Simultaneous service can be accomplished by electronic mail in accordance with § 385.2010(f)(3), facsimile, express delivery, or messenger. The party filing the Formal Challenge shall serve the individual listed as the contact person on MJMEUC's Informational Filing required under Section IV of these protocols.

E. Informal and Formal Challenges shall be limited to all issues that may be necessary to determine:
    1. The extent or effect of an Accounting Change;

2. Whether the Annual True-Up or projected net revenue requirement fails to include data properly recorded in accordance with these protocols;
3. The proper application of the formula rate and procedures in these protocols;
4. The accuracy of data and consistency with the formula rate of the calculations shown in the Annual True-Up or projected net revenue requirement;
5. The prudence of actual costs and expenditures;
6. The effect of any change to the underlying Uniform System of Accounts, the MJMEUC audited financial statements, or the EIA Form No. 412; or
7. Any other information that may reasonably have a substantive effect on the calculation of the charge pursuant to the formula.

F. MJMEUC will cause to be posted all Informal Challenges from Interested Parties and MJMEUC's response(s) to such Informal Challenges; except, however, if Informal Challenges or responses to Informal Challenges include material deemed by MJMEUC to be confidential information, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement to be executed by MJMEUC and the requesting party.

G. Any changes or adjustments to the True-Up Adjustment or projected net revenue requirement resulting from the Information Exchange and Informal Challenge processes that are agreed to by MJMEUC will be reported in the Informational Filing required pursuant to Section VI of these protocols. Any such changes or adjustments agreed to by MJMEUC on or before December 1st will be reflected in the projected net revenue requirement for the upcoming Rate Year. Any changes or adjustments agreed to MJMEUC after December 1st will be reflected in the following year's Annual True-up, as discussed in Section V of these protocols.

H. An Interested Party shall have until April 15th following the Review Period (unless such date is extended with the written consent of MJMEUC to continue efforts to resolve the Informal Challenge) to file a Formal Challenge with FERC, which shall be served on MJMEUC on the date filed in the same docket as MJMEUC's Informational Filing discussed in Section VI of these protocols. MJMEUC shall respond to the Formal Challenge by the deadline established by FERC. A party may not pursue a Formal Challenge if that party did not submit an Informal Challenge on any issue during the applicable Review Period.

I. In any proceeding initiated by FERC concerning the Annual True-Up or projected net revenue requirement or in response to a Formal Challenge, MJMEUC shall bear the burden, consistent with section 205 of the Federal Power Act, of proving that it has correctly applied the terms of the formula rate consistent with these protocols and the applicable requirements and procedures in this Attachment H, Addendum 50 – MJMEUC. Nothing herein is intended to alter the burdens applied by FERC with respect to prudence challenges.

J. Except as specifically provided in these protocols, nothing shall be deemed to limit in any way the right of MJMEUC to file unilaterally, pursuant to section 205 of the Federal Power Act and the regulations thereunder, to change the formula rate or any of its inputs (including, but not limited to, rate of return and transmission incentive rate treatment), or to replace the formula rate with a stated rate, or the right of any other party to request such changes pursuant to section 206 of the Federal Power Act and the regulations thereunder.

K. No party shall seek to modify the formula rate under the Challenge Procedures set forth in these protocols and the Annual True-Up and projected net revenue requirement shall not be subject to challenge by anyone for the purpose of modifying the formula rate. Any modifications to the formula rate will require, as applicable, a Federal Power Act section 205 or section 206 filing.

L. Any Interested Party seeking changes to the application of the formula rate due to a change in the Uniform System of Accounts, the MJMEUC audited financial statements, or the EIA Form No. 412, shall first raise the matter with MJMEUC in accordance with this Section IV before pursuing a Formal Challenge.

**Section V. Changes to True-Up Adjustment or Projected Net Revenue Requirement**

Except as provided in Section IV.G of these protocols, any changes to the data inputs, including, but not limited to, revisions to MJMEUC's audited financial statements or EIA Form No. 412, or as the result of any FERC proceeding to consider the Annual True-Up or projected net revenue requirement, or as a result of the procedures set forth herein, shall be incorporated into the formula rate and the changes produced by the formula rate in the projected net revenue requirement for the next Rate Year. This reconciliation mechanism shall apply in lieu of mid-Rate Year adjustments. Interest on any refund or surcharge shall be calculated in accordance with the procedures outlined in Section VII of these protocols.

**Section VI. Informational Filings**

A. By March 15$^{th}$ of each year, MJMEUC shall submit to FERC an informational filing ("Informational Filing") of its projected net revenue requirement for the Rate Year, including its Annual True-Up and True-Up Adjustment. This Informational Filing must include the information that is reasonably necessary to determine:
    1. That input data under the formula rate is properly recorded in any underlying workpapers;
    2. That MJMEUC has properly applied the formula rate and these procedures;
    3. The accuracy of data and the consistency with the formula rate of the Transmission Revenue Requirement and rates under review;
    4. The extent of accounting changes that affect formula rate inputs; and
    5. The reasonableness of projected costs.

B. The Informational Filing must also describe any corrections or adjustments made during that period and must describe aspects of the formula rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures. Within five (5) days of such Informational Filing, SPP shall provide notice of the Informational Filing and the associated docket number via an email exploder list (Formula Rate Posting Information Notification) and by posting on the SPP OASIS.

C. Any challenges to the implementation of the Attachment H, Addendum 50 - MJMEUC formula rate must be made through the Challenge Procedures described in Section IV of these protocols or in a separate complaint proceeding, and not in response to the Informational Filing.

**Section VII. Calculation of True-Up Adjustment**

True-Up Procedure: The True-Up Adjustment will be determined in the following manner:

1. The actual net revenue requirement (page 1, line 7) for the previous year shall be compared to the revenue received for the same year ("True-Up Year") to determine any excess or shortfall in the projected net revenue requirement that was used for billing purposes in this True-Up Year. The True-Up Adjustment and related calculations will be posted in accordance with Section II of these protocols.

2. Interest on any over-recovery of the net revenue requirement will be determined based upon the Commission's regulation at 18 C.F.R. 35.19a. Interest on any under-recovery of the net revenue requirement will be based on the one-month U.S. Treasury Daily Treasury Par Yield Curve Rates for the first day of the month ("One Month Treasury Yield")[3] capped at the applicable Commission refund interest rate. In either case, the interest payable will be calculated using the average interest rate calculated below and applied for the twenty-four (24) months during which the over- or under-recovery in the net revenue requirement exists. The average interest rate to be applied to the over- or under-recovery amounts will be determined using the average rate for the twenty (20) months preceding September of the current year. The interest amount will be included in the projected costs made available by October 1st in accordance with Section II.C above.

3. The net revenue requirement for transmission services for the following year shall be the sum of the projected net revenue requirement for the following year, plus or minus the True-Up Adjustment (page 1, sum of lines 6c and 6d) from the previous year, if any, including interest as explained above.

[3] MJMEUC does not have any short-term debt, which is the interest rate other SPP transmission owners typically apply to under-recoveries in their true-up calculations. Therefore, MJMEUC proposes to use the One Month Treasure Yield, capped at the Commission refund interest rate, as an equivalent approximation of MJMEUC's short-term debt interest rate costs.

4. MJMEUC may accelerate the refund of any over-recovery amounts by one year. The interest calculation will be adjusted to reflect the period during which the over-recovery exists.

**Example of True-Up of 2022 Net Revenue Requirement:**

Projected net ATRR was $2,100,000.

Actual ATRR (including point-to-point revenue) is $2,000,000.

**True-Up Calculation:**
There is an over-recovery of the net revenue requirement for 2022 equal to $100,000 ($2,100,000 - $2,000,000 = $100,000).
The total True-Up Adjustment amount would be a reduction of $100,000 plus interest on the $100,000 shortfall calculated using the FERC statutory interest rate. This amount would be applied as a decrease to the 2024 projected ATRR beginning January 2024.

| | | | |
|---|---|---|---|
| 5 | Rate Base | Worksheet A, Line 50, Column J | #DI V/0! |
| 6 | Return | Line 4 * Line 5 | #DI V/0! |

7 Notes:

8 A.) The capital structure listed in Column (E) is calculated based on total capitalization amounts listed in Column (D). The capital structures listed in Column (F) are fixed and cannot be modified or deleted absent authorization from FERC via a Section 205 or 206 filing.

9 B.) In the case where PEC's actual capital structure (Column (E)) contains a Total Margins and Equities percentage greater than 35.24%, Column (G) should be populated with the actual capital structure. In the case where PEC's actual Margins and Equities percentage is below 35.24 percent, Column (G) should be populated with the capital structure listed in Column (F).

10 C.) The Cost of Capital for Total Margins and Equities (ROE) is fixed and cannot be modified or deleted absent authorization from FERC via a Section 205 or 206 filing. The Cost of Capital for Total Margins and Equities reflects a 50 basis point incentive adder for RTO participation. The Cost of Capital for Long Term Debt is calculated by dividing the interest expense in Column (H) by the total amount in Column (D).

11 D.) Column (J) values for lines 2-3 equal Column (G) values multiplied by Column (I) values.

4 Notes:
4 A. Acquisition adjustments will not be used in the calculation of
5 ATRR absent Commission approval through a 205 or 206 filing.
4 B. The addition of new lines and the removal of outdated lines may
6 be necessary in order to accurately provide
4 information, and populate or remove data in the Worksheet with
7 changes in future years. Where appropriate, these
4 changes will provide detail and linkage to updated
8 Form 7 data requirements or other similar supporting
4 documentation. Additional line items or line deletions will not
9 require FPA Section 205 or 206 filings. PEC will
5 describe such changes in the Annual Update, and the changes
0 will be subject to the review of Interested Parties under
5 the procedures set forth in PECs's Implementation Protocols.
1 PEC may not change the columns or the formulas
included in these
5 Worksheets during the Annual
2 Update.

## People's Electric Cooperative

Worksheet L

## RTO / ISO Expenses

| A<br>Line | B<br>Account No. | C<br>Description | D<br>Annual Expense Amount | E<br>% Included in SPP | F<br>SPP Amount |
|---|---|---|---|---|---|
| | **575.1-575.8 RTO/ISO Expense - Operation** | | | | |
| 1a | | | $0.00 | 100% | $0.00 |
| 1b | | | $0.00 | 100% | $0.00 |
| … | | | $0.00 | 100% | $0.00 |
| 2 | **Total 575.1-575.8 RTO/ISO Expense - Operation (sum lines 1a-1xx) (Note A)** | | $0.00 | | $0.00 |

| | | | | |
|---|---|---|---|---|
| | **576.1-576.5 RTO/ISO Expense - Maintenance** | | | |
| 3a | | $0.00 | 100% | $0.00 |
| 3b | | $0.00 | 100% | $0.00 |
| … | | $0.00 | 100% | $0.00 |
| 4 | **576.1-576.5 RTO/ISO Expense - Maintenance (sum lines 3a-3xx) (Note B)** | $0.00 | | $0.00 |

5 Notes
A. The total on line 2, column D must reconcile to
6 the amounts shown on Form 7.
B. The total on line 4, column D must reconcile to
7 the amounts shown on Form 7.
C. Amounts listed on lines 1a-1xx and 3a-3xx are only eligible for
8 inclusion in SPP Zone 19 ATRR following a change in
accounting procedures to the Form 7 or Uniform System of
9 Accounts, which would classify amounts in these accounts
as eligible for transmission rate recovery. To the extent that this
10 occurs, PEC may file a single-issue Section 205 filing with the
Commission to seek recovery of these amounts in Zone 19 rates. PEC may not include any
11 costs absent authorization from FERC via a Section 205 or 206 filing.
D. The addition of new lines and the removal of outdated lines necessary to populate or
12 remove data in the Worksheet with the changes in future years does not
require a Federal Power Act section 205 or 206 filing. The addition or removal of columns
13 and formulas contained with those columns cannot be changed absent a
14 Federal Power Act section 205 or 206 filing.

with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 7 data requirements or other similar supporting

documentation. Additional linkage to updated Form 7 data requirements or other similar supporting documentation. Additional line items or line deletions will not require

FPA Section 205 or 206 filings. PEC will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the

procedures set forth in PEC's Implementation Protocols. PEC may not change the columns or the formulas included in these Worksheets during the

Annual Update.

2 0 Notes:

A. Percentage of "Recovery Approved" cannot be added or changed absent approval from FERC.

B. AFUDC ceases when CWIP is recovered in rate base corresponding to the amount of CWIP included in Rate Base. No CWIP will be included in rate base absent FERC authorization.

Accounting procedures must be provided during the annual update to ensure that there is no duplicate recovery of CWIP and corresponding AFUDC capitalized. Projects are transmission related only.

C. The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Worksheet with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 7 data requirements or other similar supporting documentation.

Additional line items will not require FPA Section 205 or 206 filings. PEC will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in PEC's Implementation Protocols. PEC may not change the columns or the formulas included in these Worksheet during the Annual Update.
