## Transmission Formula Rate Implementation Protocols

## I. ANNUAL UPDATE

1. The transmission formula rate template of City Utilities of Springfield Missouri ("City Utilities") and these Transmission Formula Rate Implementation Protocols ("Protocols") together comprise the filed rate ("Formula Rate") of City Utilities for transmission service in the City Utilities zone of the Southwest Power Pool, Inc. ("SPP") footprint. City Utilities must follow the instructions specified in the Formula Rate to calculate its Annual Transmission Revenue Requirements ("ATRR") and the rates for Network Integration Transmission Service ("NITS") and Point-to-Point ("PTP") Transmission Service, as well as rates for Scheduling, System Control and Dispatch Service ("Schedule 1 Service") in the City Utilities zone of the SPP footprint.

2. The Formula Rate shall be applicable to service on and after April 1 of each calendar year through March 31 of the following calendar year ("Rate Year"), subject to review, challenge and refunds or surcharges with interest, to the extent provided herein.

3. On or before February 1 of each calendar year, City Utilities shall:

   (a) Recalculate the ATRR and the rates for zonal NITS, zonal PTP and Schedule 1 service for the new Rate Year in accordance with the Formula Rate ("Annual Update"); and

   (b) Provide its Annual Update to SPP and cause such information to be accessible on SPP's website; and

   (c) Post its Annual Update to the City Utilities website; and

   (d) If the date for posting the Annual Update falls on a weekend or a holiday recognized by the Federal Energy Regulatory Commission (FERC), then the posting shall be due on the next business day. The date on which such posting occurs shall be that year's "Posting Date." Any delay in the Posting Date shall result in an equivalent extension of time for the submission of Information Requests discussed in Section III of these Protocols.

4. Concurrent with the Annual Update postings, City Utilities shall provide a notice of such posting via an email distribution list to all Interested Parties.

   (a) Interested Parties shall include:

      i. Customers under the SPP Tariff;

ii. the Missouri Public Service Commission;

iii. the Kansas Corporation Commission;

iv. Missouri Consumer Advocacy Agencies;

v. Missouri Attorney General; and

vi. any person or entity who communicates to City Utilities an interest in participating in the Annual Update process.

5. The Annual Update shall:

(a) Include a workable populated rate formula template with fully functional spreadsheets showing the calculation of the Annual Update and underlying workpapers in native format with links and formulas intact, including sufficiently detailed workpapers and supporting documentation for data;

(b) Be based on the independently-audited books and records of City Utilities for the most recent fiscal year (October 1 through September 30);

(c) Provide sufficient information to enable Interested Parties to replicate the calculation of the formula results from the Formula Rate;

(d) With respect to any change in accounting that affects the inputs to the Formula Rate or the resulting charges billed under the Formula Rate, City Utilities shall identify:

i. Any accounting changes, such as the initial implementation of an accounting standard or policy; the initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific direction; or the correction of errors and prior period adjustments that impact the ATRR.

ii. Any items included in the Formula Rate at an amount other than a historic cost basis; and

iii. The individual impact of any changes in i. or ii. above on charges billed under the Formula Rate; and

(e) Not seek to modify the Formula Rate.

## II. Review of Annual Update

Within twenty (20) but not less than 10 days after the posting of City Utilities' Annual Update, City Utilities will host a Meeting for Interested Parties to discuss the Annual Update ("Annual Meeting"). City Utilities shall provide notice of this meeting concurrent with the posting of the Formula Rate Update accessible on SPP's website and City Utilities' website. The notice shall include the date, time and location of the Annual Meeting and shall be provided via email distribution list of Interested Parties identified in Section I.4.(a) above. The Annual Meeting shall also be available by telephone and/or web access with all meeting materials provided electronically.

**III. Information Exchange**

1. Interested Parties may begin submitting information requests immediately following the Posting Date of the Annual Rate Update and will have until sixty (60) days of the date of the posting to serve reasonable information requests on City Utilities for information and work papers supporting the Annual Rate Update. Such information requests shall be limited to that what is necessary to determine:

   (a) The extent or effect of an accounting change;

   (b) Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

   (c) The proper application of the Formula Rate and procedures in these Protocols;

   (d) The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

   (e) The effect of any change to the underlying Uniform System of Accounts or Formula Rate template; or

   (f) Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

The information and document requests shall not otherwise be directed to ascertain whether the Formula Rate is just and reasonable.

2. City Utilities shall make a good faith effort to respond to information requests pertaining to the Annual Update within seven (7) business days.

3. City Utilities shall post on its website and cause to be accessible on the SPP Website all

information requests from Interested Parties and City Utilities' response(s) to such requests. If responses to information requests contain information deemed by City Utilities to be confidential, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement executed by the requesting party and City Utilities.

## IV. Informal Challenge Procedures

1. Interested Parties shall have until April 15 (or the first Business Day after April 15 if April 15 falls on a weekend or holiday) to notify City Utilities in writing (which may be electronically) of any specific Informal Challenges. The Informal Challenge must specify the inputs, supporting explanations, allocations calculations, or other information to which the Interested Party objects and provide an appropriate explanation and documents to support its Informal Challenge. City Utilities will make a good faith effort to respond to any Informal Challenge within twenty (20) days of notification of such Informal Challenge. City Utilities, and, if appropriate, SPP, shall appoint representatives to work with the Interested Party to resolve the Informal Challenge.

2. City Utilities will post on its website and cause to be accessible on the SPP Website all Informal Challenges from Interested Parties and City Utilities' responses to the Informal Challenges. If responses to information requests contain information deemed by City Utilities to be confidential, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement executed by the requesting party and City Utilities.

3. Any changes or adjustments to the Annual Update resulting from the Information Exchange and Informal Challenge procedures that are agreed to by City Utilities and resolved prior to the Informational Filing shall be reported in the Informational Filing made with FERC and will be reflected in the Annual Rate Update for the following Rate Year.

## V. Formal Challenges

1.A Formal Challenge shall:

(a) Clearly identify the action or inaction which is alleged to violate the filed Formula Rate or Protocols;

(b) Explain how the action or inaction violates the filed Formula Rate or Protocols;

(c) Set forth the business, commercial, economic or other issues presented by the action or inaction as such relate to or affect the party filing the Formal Challenge, including:

i. The extent or effect of an accounting change;

ii. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;

iii. The proper application of the Formula Rate and procedures in these Protocols;

iv. The prudence of actual costs and expenditures, including information on procurement methods and cost control methodologies;

v. The effect of any change to the underlying Uniform System of Accounts or Formula Rate template; or

vi. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

(d) Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;

(e) State whether the issues presented are pending in an existing proceeding in any forum in which the Interested Party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;

(f) State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that belief;

(g) Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the Interested Party, including, but not limited to, contracts and affidavits; and

(h) State whether the filing party utilized the Informal Challenge procedures described in these Protocols with regard to any issue.

2. Formal Challenges shall be filed with FERC, either in the FERC Docket assigned to the Informational Filing or via Section 206 of the Federal Power Act, and shall be served upon City Utilities contemporaneously with the filing at FERC. Service can be accomplished by electronic mail in accordance with § 385.2010(f)(3), by facsimile, express delivery or messenger to the individual listed as the contact person in City Utilities' Informational Filing.

## VI. Modification of Formula Rate or Annual Update

1. No party shall seek to modify the Formula Rate under the Challenge procedures (either Formal or Informal) set forth in these Protocols and the Annual Update shall not be subject to challenge for the purpose of modifying the Formula Rate.

2. A change to the Formula Rate fixed inputs related to rate of return on equity ("ROE"), depreciation rates, capital structure, amortization periods, and any ROE incentives for SPP regional projects may not be made absent the appropriate filing with FERC pursuant to the Federal Power Act Sections 205 or 206.

3. If City Utilities makes a correction to a Mistake in its financial information during a Rate Year that would affect the Formula Rate for that Rate Year, such corrections and any resulting refunds or surcharges shall be reflected in the Annual Update for the next effective Rate Year with interest computed in accordance with the SPP Tariff. For purposes of these Protocols, "Mistake" shall mean errors or omissions regarding the values inputted into the Formula Rate template, such as arithmetic or computational errors. Mistakes shall not include matters involving exercise of judgment or substantive differences of opinion regarding the derivation of an input that is more properly the subject of the annual review process.

4. Any changes to the data inputs or as the result of a FERC proceeding shall be incorporated into the Formula Rate and the charges produced by the Formula Rate in the Annual Update for the next effective Rate Year. Any interest on any refund shall be calculated in accordance with the SPP Tariff.

## VII. Informational Filing

1. By June 1 of each year, City Utilities shall submit to FERC an informational filing ("Informational Filing") of its Annual Update.

2. This Informational Filing must include the information that is reasonably necessary to determine:

   (a) That input data under the Formula Rate is properly recorded in any underlying workpapers;

   (b) That City Utilities has properly applied the Formula Rate and these procedures;

   (c) The accuracy of the data and the consistency with the Formula Rate of the ATRR and rates under review; and

   (d) The extent of accounting changes that affect Formula Rate inputs.

3. The Informational Filing must also describe all aspects of the Formula Rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures.

4. Contemporaneous with the making of such Informational Filing, City Utilities shall provide notice of the Informational Filing via the mail distribution list and by posting the docket number assigned to the Informational filing on City Utilities website and accessible on SPP's website.

## VIII. Joint SPP Transmission Owners' Meeting

If the SPP Transmission Owners with transmission projects that utilize a regional cost-sharing methodology implement a process to coordinate and hold joint meetings, City Utilities will participate in that process.

## Formula Rate Template Inputs
**(For Rate Year Beginning July 1, 20 , Based on 20 Data)**

**Data Input from Company Records and/or Verification Required (Manual Input)**

| Line No | Account/Description/Classification | Inputs From End of Year | Source of Data | Template Sheet of the Link |
|---|---|---|---|---|
| 1 | Federal Income Tax Rate | -% | From Tax Department | Appendix A - Ln. 98 |
| 2 | Missouri State Income Tax Rate | -% | From Tax Department | ATT 5 - Cost Support, Ln. 99 & Appendix A - Ln. 99 |
| 3 | Percent of Federal Tax Eligible for Deduction by Missouri | -% | From Tax Department | Appendix A - Ln. 100 |
| 4 | Kansas State Income Tax Rate | -% | From Tax Department | ATT 5 - Cost Support, Ln. 99 |
| 5 | Oklahoma State Income Tax Rate | -% | From Tax Department | ATT 5 - Cost Support, Ln. 99 |
| 6 | Arkansas State Income Tax Rate | -% | From Tax Department | ATT 5 - Cost Support, Ln. 99 |
| 7 | Safety/Peak Alert Advtzg - Acct 909, Product codes ADAS, ADCS, ADPA (Adult Safety, Child Safety, Peak Alert) | -%<br>-%<br>-% | From General Ledger, Manager of General Accounting | ATT 5 - Cost Support, Ln. 64 |
| 8 | EPRI Annual Membership Dues | - | FF1, Pgs. 352 & 353 & Co. Records | For informational purposes only. Empire currently is not a member of EPRI. |
| 9 | Plant Held for Future Use (Account 105) - Total | - | FF1, 214.47.d & Co. Records | ATT 5 - Cost Support, Ln. 26 |
| 10 | Plant Held for Future Use (Account 105) - Non-Transmission | - | FF1, 214.47.d & Co. Records | ATT 5 - Cost Support, Ln. 26 |
| 11 | Transmission Related Regulatory Expenses | - | FF1, 350.41-44.d | ATT 5 - Cost Support, Ln. 63 |
| 12 | Plant Held for Future Use (Non-Land) - Transmission Only | - | Company Records from Mgr of Property Acctg | ATT 5 - Cost Support, Ln. 26 |
| 13 | Actual PBOP Expense - Electric Portion Only | - | Company Records- From Controller (Acct 926.328) | ATT 5 - Cost Support, Ln. 56 |
| 14 | Fixed PBOP Expense (Based on 2011 Data) - Electric Portion Only | | Electric Portion of 2011 Actuarial Study and Report. | ATT 5 - Cost Support, Ln 55 |
| 15 | Revenues from Directly Assigned Transmission Facilities (ATT 3, Note 2) | - | No DA Transmission Lines as of 12/31/11. Need to verify annually with Director of Transmission Policy and/or Director of Supply Management. To: ATT 5 - Cost Support, Ln. 117 | |
| 16 | Charges billed to Transmission Owner for system integration and transmission costs paid to others that benefit transmission customers and are recorded in Account 565. | - | Verify amount annually with Director of Transmission Policy, Director of Supply Management, Manager of Fuel-Revenue Accounting, and/or Controller. | |
| 17 | Zonal Transmission Network 12 CP Average (Trans. 12 CP Avg) | - | Data to be supplied by Director of Supply Management, based on SPP information. | |
| 18 | Other Electric Revenues - Transmission for Others (Schedules 7 & 8) | - | From Manager of General Accounting (Acct 457.137 & Acct 457.138). To: ATT-3, Line 4. Also see ATT 3, Notes 1 & 4 | |
| 19 | Net revenues associated with Transmission Service Requests, Sponsored Upgrades, and Generation Interconnections for which the load is not included in the divisor. | - | Need to verify during each annual update with Director of Supply Management if there are any such TSR revenues (including TSR revenue from SPP customers not in EDE zone) for load that is NOT included in Empire's divisor. From Energy Supply Services derived from respective Transmission Statement (Recorded in Acct 457.160. To: ATT-3, Line 5) | |
| 20 | Other Electric Revenues - Transmission for Others (Schedule 1 P-T-P Revenue | -0 | | |
| 21 | Pre-OATT grandfathered Non-Firm Point to Point Service bundled deman revenues for which the load is not included in the divisor received by Transmission owner and for which the revenues are divided between production and transmission functions. Revenues are collected directly by Empire under mid-180-s agreements. | | This represents "Point-To-Point" demand revenue margins derived from the "grandfathered" BPU & Kaw Valley agreements (the BPU contract terminated effective 5/31/12, and data input associated with this contract will no longer be includedafter the 2013 Annual Update. The non-RQ "Demand Revenues" found in FF1, Pg.3, Col. H (and page 311 extensions) for these two customers should be reduced by the sum of the Demand Charges (costs) found in FF1, Pg. 3 27,col.j (and page 327 extensions for these two customers. | |

**The Worksheets listed below require Input of Data directly into the Worksheets themselves:**

| Line | Sheet |
|---|---|
| 22 | ATT 1 - ADIT |
| 23 | ATT 2 - Other Taxes |
| 24 | ATT 4 - Non-Escrowed Funds |
| 25 | ATT 5 - Cost Support |
| 26 | ATT 8 - Pref Stock |
| 27 | ATT 10 - Depreciation Rates |
| 28 | ATT 10A - Intangible Plant Detail |
| 29 | ATT 11 - Reconciliation |
| 30 | ATT 12 - Regional Projects |

| | | Description/Source | | | |
|---|---|---|---|---|---|
| | | Accumulated Def Inc Taxes - Verify with Controller and Tax Department. | | | |
| | | From FF1 - Out of period Property taxes (included in Appendix A) and Corporate Franchise Taxes (excluded from Appendix A). | | | |
| | | Non-Escrowed Funds - Verify with Controller. | | | |
| | | Provide Description of Direct Assigned Transmission Facilities (See Line 15, above). Pref Stock & Accts 204, 207,208, 210, 211, 213 - Verify with Director of Finance and Controller Depreciation Rates from FF1 will remain fixed absent a Section 205 or 206 filing. | | | |
| | | Enter Description, Amortization Amounts, and Plant Balances for Intangible Plant. Adjustments to FF1 data - Verify with Director of Finance and Controller | | | |
| | | Enter Specific SPP Regional Project/Upgrade Information from Property Accounting Records of the Company. | | | |

## ADDENDUM 18 TO ATTACHMENT H - Page 8 of 47
## The Empire District Electric Company
## APPENDIX A
**(For Rate Year Beginning July 1, 20 ___, Based on 20___Data)**

**Notes:**

A Electric portion only.

B Depreciation rates are displayed in ATT 10 and will not change absent a Federal Power Act Section 205 or 206 filing. Amortization periods are displayed in ATT 10A and will not change absent a Federal Power Act Section 205 or 206 filing.

C Includes Transmission portion only.

D Includes all Regulatory Commission Expenses for all Electric jurisdictions.

E Includes safety-related and load/grid congestion management advertising expense included in Account 909 (Product codes ADAS, ADCS, ADPA).

F Includes Regulatory Commission Expenses directly related to transmission service, RTO filings, or transmission siting; as itemized on ATT-5, Ln. 63. G The currently effective income tax rate where FIT is the Federal income tax rate; SIT is the Missouri income tax rate, and p = the percentage of federal income tax deductible for Missouri state income taxes. See details on ATT 5, Ln. 99.

H ROE will be fixed at 10.00% and will not change absent a Federal Power Act Section 205 or 206 filing at FERC.

I There are no direct assigned transmission facilities on EDE's system as of 12/31/2011. Annual verification/updates will be documented on ATT 5. J Includes only charges incurred for system integration and transmission costs paid to others that benefit transmission customers.

K Represents the average of Empire's 12 Monthly Coincident Peaks of Empire Zonal Transmission load (includes all firm wholesale NITS & Pt-Pt loads during the FF1 year).

L Total Electric Accumulated Depreciation has been adjusted to reflect Missouri Regulatory Plan Amortization, as shown on ATT 11, Line 6.

M PBOP expense is fixed at 2011 levels until changed as a result of a Federal Power Act Section 205 or 206 filing at FERC.

N Unamortized Excess/Deficient Deferred Tax Regulatory Liabilities/Assests and the Amortization of those Regulatory Liablities/Assets arising from future tax changes may only be included after receiving Commission approval.

| 31 Difference (Line 29 - Line 30) | - | | |

Criteria for Allocation:
A Other Taxes that are incurred through ownership of plant, including transmission plant, will be allocated based on the Gross Plant Allocator. If the taxes are 100% recovered at retail, they shall not be included.
B Other Taxes that are incurred through ownership of only general or intangible plant will be allocated based on the Wages and Salary Allocator. If the taxes are 100% recovered at retail, they shall not be included.
C Other taxes that are assessed based on labor will be allocated based on the Wages and Salary Allocator.
D Other taxes, except as provided for in A, B and C above, which are incurred and (1) are not fully recovered at retail or (2) are directly or indirectly related to transmission service, will be allocated based on the Gross Plant Allocator; provided, however, that overheads shall be treated, as described in footnote B above.

## ADDENDUM 18 TO ATTACHMENT H - Page 13 of 47
## The Empire District Electric Company

### Attachment 3 - Revenue Credits
**(For Rate Year Beginning July 1, 20 , Based on 20 Data)**

**Account 454 - Rent from Electric Property**

| | | |
|---|---|---|
| 1 | Rent from Electric Property [FF1, Pg. 300, Ln. 19, Col. b] [From Inputs, Pg. 2, Ln. 72] | - |
| 2 | T/D Revenue Allocation Factor [From Appendix A, Ln. 19] | - |
| 3 | Rent from Electric Transmission Property [Line 1 x Line 2] | - |

**Other Electric Revenues (Note 1)**

| | | |
|---|---|---|
| 4 | SPP Schedule 7 & 8 Transmission Revenues (Note 1 & Note 4) [From Inputs, Pg. 3, Ln. 18] | - |
| 5 | Schedule 1 P-T-P Revenue | - |
| 6 | This Line Not used | |
| 7 | Non-Firm Point-to-Point Service revenues for which the load is not included in the divisor received by Transmission Owner (Note 4) [From Inputs, Pg. 3, Ln. 20] | - |
| 8 | Direct Assigned Facilities Revenues (Note 2) [From Inputs, Pg. 3, Ln. 15] | - |
| 9 | Other Revenues Associated with Loads Outside of Empire's Zone [From Inputs, Pg. 3, Ln. 19] | - |
| 10 | Gross Revenue Credits (sum Lines 3 thru 9) [To Appendix A, Line 122] | - |

**Note 1**: All Schedule 7 & 8 revenues derived as a Transmission Owner from SPP for loads not included in the system peak and for which the cost of the service is recovered under this formula will be included in this revenue credit. These revenues are booked in Accounts 457.137 (Firm Point-to- Point) and 457.138 (Non-Firm Point-to-Point). All current NITS customers in the Empire zone are included in the Load Divisor.

**Note 2**: If the costs associated with Directly Assigned Transmission Facility Charges are included in this TFR, the associated revenues will be included in this TFR. If the costs associated with the Directly Assigned Transmission Facility Charges are not included in this TFR, the associated revenues will not be included in this TFR.

**Note 3**: Schedule 1A charges are assessed by SPP directly to the transmission customers and are retained by SPP. Schedule 12 revenues associated with Transmission Service are collected by SPP and remitted to FERC by SPP. Any Schedule 1a or Schedule 12 revenues collected by Empire on behalf of Zonal customers are not retained by Empire, but are simply passed through to SPP.

**Note 4**: The portion of Point-to-Point revenues collected by SPP and assigned to Empire are included on ATT 3, Ln. 4. Any demand revenue margins collected directly by Empire for "grandfathered" bundled contracts will be included on ATT 3, Ln. 8. See note on "Inputs" worksheet, Pg. 3, Ln. 20 regarding remaining pre-OATT contracts.

**ADDENDUM 18 TO ATTACHMENT H - Page 14 of 47**

**The Empire District Electric Company**

**Attachment 4, NON-ESCROWED FUNDS**

**(For Rate Year Beginning July 1, 20 , Based on 20 Data)**

The purpose of this worksheet is to individually document the value(s) of the non- escrowed reserve funds that will be credited against working capital. All inputs are derived from the Company's Books and Records, as described.

| FERC Reserve Acct | | FERC Expense Acct [3] | Balance | Allocator NP | Working Capital Adjustment (Col. C = Col. A x Col. B) |
|---|---|---|---|---|---|
| COL. A | | | | COL. B | COL. C |
| **Description of Reserve:** | | | | | |
| Line | | | | | |
| 1. Accum Prov for Inj/Damgs - Public Liability [1] (NP Allocator) | 228.210 | 925 | - | - | - |
| 2. Accum Prov Inj/Damgs - Workman's Comp [2] (NP Allocator) | 228.220 | 925 | - | - | - |
| 3. **Total** (Ln. 1 + Ln. 2) [Appendix A, Pg. 1, Ln. 46] | | | - | | - |
| 4. Conformation [FF1, Pg. 112, Ln. 28, Col. c] [From Inputs, Pg. 1, Ln. 22] | | | - | | |

[1] Serves as the reserve for injuries and damages to the public for which we have open litigation.

[2] Serves as the reserve for future costs of worker's compensation claims and long-term disability claims.

[3] Account 925 is the FERC expense account which includes the cost of insurance, the cost of claims not covered by insurance, the re-imbursement from insurance companies, and amounts credited to account 228.2 as an Accumulation Provision for Injuries and Damages.

## The Empire District Electric Company

## Attachment 11, RECONCILIATION ITEMS, REFUNDS, & SURCHARGES

**(For Rate Year Beginning July 1, 20 , Based on 20 Data)**

**RECONCILIATION ITEMS TO FF1:**

| Line | TFR Reference COLUMN A | Description & FF1 Reference COLUMN B | FF1 COLUMN C | Adjustment COLUMN D | Total COLUMN E |
|---|---|---|---|---|---|
| 1. | ATT-9, Pg. 2, Ln. 1 | Interest on Long-Term Debt [1] [FF1, Pg. 117, Ln. 62, Col. c] [From Inputs, Pg. 1, Ln. 24] | - | - | - |
| 2. | ATT-9, Pg. 1, Ln. 1, Col. B | Beg. of Year 1st Mortgage Bond Balance [2] [FF1, Pg. 112, Ln. 18, Col. d] [From Inputs, Pg. 1, Ln. 11] | - | - | - |
| 3. | ATT-9, Pg. 1, Ln. 2, Col. B | End of Year 1st Mortgage Bond Balance [3] [FF1, Pg. 112, Ln. 18, Col. c] [From Inputs, Pg. 1, Ln. 10] | - | - | - |
| 4. | ATT-7, Pg. 1, Ln. 1, Col. G | Beg of Year Unapprop. Undistrib. Subsidiary Earnings [4] [FF1, Pg. 112, Ln. 12, Col. d] [From Inputs, Pg. 1, Ln. 5] | - | - | - |
| 5. | ATT-7, Pg. 1, Ln. 2, Col. G | End of Year Unapprop. Undistrib. Subsidiary Earnings [5] [FF1, Pg. 112, Ln. 12, Col. c] [From Inputs, Pg. 1, Ln. 4] | - | - | - |
| 6. | Appendix A, Ln. 7 | Total Electric Accumulated Depreciation [6] [FF1, Pg. 219, Ln. 29, Col. c] [From Inputs, Pg. 1, Ln. 49] | - | - | - |

[1] The bond interest paid [FF1, Pg. 117, Ln. 62, Col. c] does not include the interest paid on the EDG bond. This adjustment adds the EDG bond interest into LTD interest costs to reflect the consolidated capital structure used by Empire. See FF1, Pg. 256, EDG Bond Footnote.

[2] The beginning of year 1st mortgage bond balance [FF1, Pg. 112, Ln. 18, Col. d] does not include the EDG bond principal. This adjustment adds the EDG bond principal to the bond balance to reflect the consolidated capital structure used by Empire. See FF1, Pg. 256, EDG Bond Footnote.

[3] The end of year 1st mortgage balance [FF1, Pg. 112, Ln. 18, Col. c] does not include the EDG bond principal; which is added in to reflect the consolidated capital structure used by Empire. See FF1, Pg. 256, EDG Bond Footnote.

[4] The unappropriated undistributed subsidiary earnings [FF1, Pg. 112, Ln. 12, Col. d] includes interest paid [$ ] on the bonds held by an LDC gas subsidiary of Empire (EDG) for previous FF1 year (20___). This adjustment reflects the exclusion of the EDG interest payments from the "end of year" unappropriated undistributed subsidiary earnings. This adjustment is necessary because these items were reclassed to interest expense.

[5] This adjustment is described as follows: The unappropriated undistributed subsidiary earnings [FF1, Pg. 112, Ln. 12, Col. c] includes the interest paid [$ ] on the bonds held by an LDC gas subsidiary of Empire (EDG) for the 20___FF1 year. This adjustment reflects the exclusion of this interest payment from the "end of year" unappropriated undistributed subsidiary earnings. This adjustment is necessary because this item was reclassed to interest expense.

[6] The accumulated depreciation is adjusted to reflect the Missouri Regulatory Plan [as described in footnote to FF1, Pg. 219, Ln. 20, Col. c]. The Total Electric Accumulated Depreciation on Line 6, above, will be reduced by the amounts displayed in the tables below, for each respective Annual Update. After the 2071 Annual Update, the adjustment amount will be "zero". The adjustment amounts in the tables below will not change absent a Federal Power Act Section 205 or 206 filing.

## Attachment 12, SPP Regional Projects

**SPP REGIONAL UPGRADE DETAILS:**

The calculated revenue requirements displayed below for prior years may change as this Attachment 12 of this Transmission Formula Rate is updated in subsequent years. The values displayed for the current year are valid only during the current year. Any changes to the prior years' calculations will not result in a refund or additional charge for prior years. Empire reserves the option, but not the obligation, to "lock in" such prior years revenue requirements during each successive Annual Update (to retain data for informational purposes).

Notes:
Column (e): Prior Years Amortization for each subaccount based on column (h) of this Table 15 A from the prior year's TFR Update.
Column (f): Attachment 11, Reconciliation, Columns F and G, as appropriate, for adjustments to the balance and amortization of Excess ADIT. The total adjustment(s) should be allocated based on each FERC subaccount as a ratio of all FERC subaccounts in column (d) of this Table 15 A. If the adjustment(s) pertains to a specific FERC subaccount(s), the adjustment(s) should be directly assigned to the applicable FERC subaccount(s) rather than being allocated.
Column (g): Transmission ARAM amount allocated based on the beginning balance for each FERC subaccount as a ratio of all subaccounts in column (d).

Table 15 B - Allocated Transmission Protected Deficient Deferred Taxes

Table to be developed.

**ADDENDUM 18 TO ATTACHMENT H**
**Transmission Formula Rate Implementation Protocols**

## I. Annual Update

1. The transmission formula rate template of The Empire District Electric Company ("Empire") and these Formula Rate Implementation Protocols ("Protocols") together comprise the filed rate ("Formula Rate") of Empire for transmission service in the Empire zone of the Southwest Power Pool, Inc. ("SPP") footprint. Empire must follow the instructions specified in the Formula Rate to calculate its Annual Transmission Revenue Requirements ("ATRR") and the rates for Network Integration Transmission Service and Point-to-Point Transmission Service in the Empire zone of the SPP footprint, as well as rates for Scheduling, System Control and Dispatch Service under the Empire Open Access Transmission Tariff ("Schedule 1 Service").

2. The Formula Rate shall be applicable to service on and after July 1 of each calendar year through June 30 of the following calendar year ("Rate Year"), subject to review, challenge and refunds or surcharges with interest, to the extent provided herein.

3. On or before June 1 of each calendar year, Empire shall:

   (a) recalculate the ATRR and the rates for zonal Network Integration Transmission Service, zonal Point-to-Point Transmission Service, and Schedule 1 Service for the new Rate Year in accordance with the Formula Rate ("Annual Update"); and

   (b) provide its Annual Update to SPP and cause such information to be posted on SPP's website and OASIS. Within five (5) days of such posting, Empire shall provide notice of such posting via an e-mail distribution list. Interested Parties may contact Empire to request to be added to the e-mail distribution list.

4. If the date for posting the Annual Update falls on a weekend or a holiday recognized by FERC, then the posting shall be due on the next business day. The date on which such posting occurs shall be that year's "Publication Date." Any delay in the Publication Date will result in an equivalent extension of time for the submission of Information Requests discussed in Section III of these Protocols.

5. The Annual Update for the Rate Year shall:

   (a) include a workable populated rate formula template with fully functional spreadsheets showing the calculation of the Annual Update and underlying workpapers in native format with all formulas and links intact;

   (b) to the extent specified in the Formula Rate, be based upon Empire's FERC Form No. 1 for the most recent calendar year, and, to the extent specified in the Formula Rate, upon the books and records of Empire consistent with FERC accounting regulations, policies, and practices;

(c) as and to the extent specified in the Formula Rate, provide sufficiently detailed

workpapers and supporting documentation for data (and all adjustments thereto or allocations thereof) that are used to develop the Formula Rate and are not otherwise available directly from the FERC Form No. 1;

(d) provide sufficient information to enable Interested Parties (as that term is defined in Section II of these Protocols) to replicate the calculation of the formula results from the Formula Rate;

(e) identify any changes in the formula references (page and line numbers) to the FERC Form No. 1;

(f) identify all material adjustments made to the Formula Rate data in determining formula inputs, including relevant footnotes to the FERC Form No. 1 and any adjustments not shown in the FERC Form No. 1;

(g) With respect to any change in accounting that affects the inputs to the Formula Rate or the resulting charges billed under the Formula Rate ("Accounting Change"):

i. Identify any Accounting Changes, including:

a. The initial implementation of an accounting standard or policy;

b. the initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific accounting direction;

c. correction of errors and prior period adjustments that impact the revenue requirement;

d. the implementation of new estimation methods or policies that change prior estimates; and

e. changes to income tax elections.

ii. Identify items included in the Formula Rate at an amount other than on a historic cost basis (e.g., fair value adjustments);

iii. Identify any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs to the Formula Rate;

iv. Provide, for each item identified pursuant to items I.5.g.i.a - I.5.g.i.c of these Protocols, a narrative explanation of the individual impact of such changes on charges billed under the Formula Rate.

(h) not seek to modify the Formula Rate.

## II. Review of Annual Update

1. Empire shall host an open meeting among Interested Parties, to be held no sooner than thirty (30) days after the Publication Date and no later than June 30 each year ("Annual Meeting"). Empire shall make available to Interest Parties remote access to the Annual Meeting. No less than seven (7) days prior to such Annual Meeting, Empire shall provide Interested Parties notice on SPP's website and OASIS of the time, date, location and remote access information for the Annual Meeting, and shall provide notice of such meeting via the e-mail distribution list. For purposes of these procedures, the term Interested Party includes, but is not limited to, customers under the SPP Tariff, state utility regulatory commissions, consumer advocacy agencies, and state attorneys general. The Annual Meeting shall (i) permit Empire to explain and clarify its Annual Update and (ii) provide Interested Parties an opportunity to seek information and clarifications from Empire about the Annual Update.

2. Each year Empire shall endeavor to coordinate with other transmission owners in the SPP using formula rates to establish revenue requirements for recovery of the costs of transmission projects that utilize the same regional cost sharing mechanism and transmission owners that own inter-regional projects whose costs are allocated in part to SPP members, and hold a joint informational meeting to enable all Interested Parties to understand how those transmission owners are implementing their formula rates for recovering the costs of such projects.

## III. Information Exchange Procedures

1. Interested Parties shall have until September 15 following the Publication Date (unless such period is extended with the written consent of Empire or by FERC order) to serve reasonable information and document requests on Empire ("Information Exchange Period"). If September 15 falls on a weekend or a holiday recognized by FERC, the deadline for submitting all information and document requests shall be extended to the next business day. Such information and document requests shall be limited to what is necessary to determine:

   (a) the extent or effect of an Accounting Change;

   (b) whether the Annual Update fails to include data properly recorded in accordance with these Protocols;

   (c) the proper application of the Formula Rate and procedures in these Protocols;

   (d) the accuracy of data and consistency with the Formula Rate of the calculations shown in the Annual Update;

   (e) the prudence of actual costs and expenditures;

   (f) the effect of any change to the underlying Uniform System of Accounts or the

Formula Rate template; or

(g) any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the Formula Rate.

The information and document requests shall not otherwise be directed to ascertaining whether the Formula Rate is just and reasonable.

2. Empire shall make a good faith effort to respond to information requests pertaining to the Annual Update within fifteen (15) business days of receiving such requests. Information requests received after 4 p.m. Central Prevailing Time shall be considered received the next business day. Empire shall respond to all information and document requests by no later than October 15 following the Publication Date, unless the Information Exchange Period is extended by Empire or FERC.

3. Empire shall cause to be posted on SPP's website and OASIS all information requests from Interested Parties and Empire's response(s) to such requests; except, however, if responses to information and document requests include material deemed by Empire to be confidential information, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement to be executed by Empire and the requesting party.

4. Empire shall not claim that responses to information and document requests provided pursuant to these Protocols are subject to any settlement privilege in any subsequent FERC proceeding addressing Empire's Annual Update.

## IV. Challenge Procedures

1. Interested Parties shall have until November 15 following the Publication Date (unless such period is extended with the written consent of Empire or by FERC order) to review the inputs, supporting explanations, allocations, and calculations ("Review Period") and to notify Empire in writing, which may be made electronically, of any specific Informal Challenges. The period of time from the Publication Date until November 15 shall be referred to as the Review Period. If November 15 falls on a weekend or a holiday recognized by FERC, the deadline for submitting all Informal Challenges shall be extended to the next business day. Failure to pursue an issue through an Informal Challenge shall not bar pursuit of that issue as part of a Formal Challenge with respect to the same Annual Update as long as the Interested Party has included at least one issue as part of an Informal Challenge with respect to that Annual Update. If the Interested Party has not included any issues as part of an Informal Challenge for an Annual Update, the Interested Party is barred from pursing a Formal Challenge with respect to any issue for that Annual Update but is not barred form pursing an issue or from lodging a Formal Challenge as to such issue as it relates to a subsequent Annual Update.

2. A party submitting an Informal Challenge to Empire must specify the inputs, supporting explanations, allocations, calculations, or other information to which it objects, and

provide an appropriate explanation and documents to support its challenge. Empire shall make a good faith effort to respond to any Informal Challenge within twenty (20) business days of notification of such challenge. Empire, and where applicable, SPP, shall

appoint a senior representative to work with the party that submitted the Informal Challenge (or its representative) toward a resolution of the challenge. If Empire disagrees with such challenge, Empire will provide the Interested Party(ies) with an explanation supporting the inputs, supporting explanations, allocations, calculations, or other information. No Informal Challenge may be submitted after November 15, and Empire must respond to all Informal Challenges by no later than December 15, unless the Review Period is extended by Empire or FERC.

3. Informal Challenges shall be subject to the resolution procedures and limitations in this Section IV. Formal Challenges shall be filed pursuant to these Protocols and shall satisfy all of the following requirements.

(a) A Formal Challenge shall:

i. Clearly identify the action or inaction which is alleged to violate the filed rate formula or Protocols;

ii. Explain how the action or inaction violates the filed rate formula or Protocols;

iii. Set forth the business, commercial, economic or other issues presented by the action or inaction as such relate to or affect the party filing the Formal Challenge, including:

a. The extent or effect of an Accounting Change;

b. Whether the Annual Update fails to include data properly recorded in accordance with these Protocols;

c. The proper application of the Formula Rate and procedures in these Protocols;

d. The accuracy of data and consistency with the Formula Rate of the charges shown in the Annual Update;

e. The prudence of actual costs and expenditures;

f. The effect of any change to the underlying Uniform System of Accounts or the Applicable Form; or

g. Any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the formula.

iv. Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;

v. State whether the issues presented are pending in an existing Commission

proceeding or a proceeding in any other forum in which the filing party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;

vi. State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that relief;

vii. Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the filing party, including, but not limited to, contracts and affidavits; and

viii. State whether the filing party utilized the Informal Challenge procedures described in these Protocols to dispute the action or inaction raised by the Formal Challenge, and, if not, describe why not.

(b) Service. Any person filing a Formal Challenge must serve a copy of the Formal Challenge on Empire. Service to Empire must be simultaneous with filing at the Commission. Simultaneous service can be accomplished by electronic mail in accordance with § 385.2010(f)(3), facsimile, express delivery, or messenger. The party filing the Formal Challenge shall serve the individual listed as the contact person on Empire's Informational Filing required under Section VIof these Protocols.

4. Informal and Formal Challenges shall be limited to all issues that may be necessary to determine: (1) the extent or effect of an Accounting Change; (2) whether the Annual Update fails to include data properly recorded in accordance with these Protocols; (3) the proper application of the Formula Rate and procedures in these Protocols; (4) the accuracy of data and consistency with the Formula Rate of the charges shown in the Annual Update; (5) the prudence of actual costs and expenditures; (6) the effect of any change to the underlying Uniform System of Accounts or the Applicable Form; or (7) any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the formula.

5. Empire will cause to be posted on SPP's website and OASIS all Informal Challenges from Interested Parties and Empire's response(s) to such Informal Challenges; except, however, if Informal Challenges or responses to Informal Challenges include material deemed by Empire to be confidential information, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement to be executed by the Transmission Owner and the requesting party.

6. Any changes or adjustments to the Annual Update resulting from the Information Exchange and Informal Challenge processes that are agreed to by Empire will be reported in the Informational Filing required pursuant to Section VI of these Protocols and will be reflected in the Annual Update for the following Rate Year, as discussed in Section V of these Protocols.

7. An Interested Party shall have until March 1 following the Review Period (unless such date is extended with the written consent of Empire to continue efforts to resolve the

Informal Challenge) to make a Formal Challenge with FERC, which shall be served on Empire on the date of such filing as specified in Section IV.3.b above. A Formal Challenge shall be filed in the same docket as Empire's Informational Filing discussed in Section VI of these Protocols. Empire shall respond to the Formal Challenge by the deadline established by FERC. A party may not pursue a Formal Challenge if that party did not submit an Informal Challenge during the applicable Review Period.

8. In any proceeding initiated by FERC concerning the Annual Update or in response to a Formal Challenge, Empire shall bear the burden, consistent with section 205 of the Federal Power Act, of proving that it has correctly applied the terms of the Formula Rate consistent with these Protocols, and that it followed the applicable requirements and procedures in these Protocols. Nothing herein is intended to alter the burdens applied by FERC with respect to prudence challenges.

9. Except as specifically provided herein, nothing herein shall be deemed to limit in any way the right of Empire to file unilaterally, pursuant to Federal Power Act section 205 and the regulations thereunder, to change the Formula Rate or any of its inputs, or to replace the Formula Rate with a stated rate, or the right of any other party to request such changes pursuant to section 206 of the Federal Power Act and the regulations thereunder.

10. No party shall seek to modify the Formula Rate under the Challenge Procedures set forth in these Protocols and the Annual Update shall not be subject to challenge by anyone for the purpose of modifying the Formula Rate. Any modifications to the Formula Rate will require, as applicable, a Federal Power Act section 205 or section 206 filing.

11. Any Interested Party seeking changes to the application of the Formula Rate due to a change in the Uniform System of Accounts or the Applicable Form, shall first raise the matter with Empire in accordance with this Section IV before pursuing a Formal Challenge.

## V. Changes to Annual Update

1. A change to the Formula Rate fixed inputs related to rate of return on equity ("ROE"), depreciation rates, amortization periods, the amount of expense for Post-Employment Benefits Other than Pensions, the 55% cap on the share of common equity in the capital structure and ROE incentives for SPP regional projects may not be made absent an appropriate filing with the FERC pursuant to Federal Power Act Section 205 or Section 206; provided, however, that Empire may make a limited Section 205 filing to change depreciation rates, amortization periods, the amount of expense for Post-Employment Benefits Other than Pensions, and/or ROE incentives for SPP regional projects, in which the sole issue for examination shall be whether the proposed change(s) are just and reasonable, and not unduly discriminatory. Any filing to change the ROE, capital structure or the 55% cap on common equity is not considered a limited filing.

2. If Empire files any corrections to correct a Mistake in its FERC Form No. 1 during a Rate

Year that would affect the Formula Rate for that Rate Year, such corrections and any resulting refunds or surcharges shall be reflected in the Annual Update for the next

effective Rate Year, with interest computed in accordance with 18 C.F.R. § 35.19a. See Worksheet 11 of the Formula Rate template. For purposes of these Protocols, "Mistake" shall mean errors or omissions regarding the values inputted into the Formula Rate template, such as, but not limited to, arithmetic and other inadvertent computational errors, erroneous Form No. 1 references or the like. Mistakes shall not include matters involving exercise of judgment or substantive differences of opinion regarding the derivation of an input that is more properly the subject of the annual review process. Corrections to erroneous FERC Form No. 1 references in the Formula Rate template may be made in the Annual Update without a Section 205 or 206 filing. There is no deadline for any Interested Party or Empire to notify the other party of any mistake in any FERC Form No. 1 data or specific data applied in the Formula Rate template.

3. Any changes to the data inputs, including but not limited to revisions to Empire's FERC Form No. 1, or as the result of any FERC proceeding to consider the Annual Update, or as a result of the procedures set forth herein, shall be incorporated into the Formula Rate and the charges produced by the Formula Rate in the Annual Update for the next effective Rate Year. This reconciliation mechanism shall apply in lieu of mid-Rate Year adjustments. Interest on any refund shall be calculated in accordance with 18 C.F.R. § 35.19a**.**

## VI. Informational Filings

1. By January 15 of each year, Empire shall submit to FERC an informational filing ("Informational Filing") of its Annual Update. This Informational Filing must include the information that is reasonably necessary to determine: (1) that input data under the Formula Rate are properly recorded in any underlying workpapers; (2) that Empire has properly applied the Formula Rate and these procedures; (3) the accuracy of data and the consistency with the Formula Rate of the ATRR and rates under review; and (4) the extent of accounting changes that affect Formula Rate inputs. The Informational Filing must also describe any corrections or adjustments made during that period, and must describe all aspects of the Formula Rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures. Within five (5) days of such Informational Filing, Empire shall provide notice of the Informational Filing via the e-mail distribution list and by posting the docket number assigned to Empire's Informational Filing on SPP's website and OASIS.

2. Any challenges to the implementation of Empire's Formula Rate must be made through the Challenge Procedures described in Section IV of these Protocols or in a separate complaint proceeding, and not in response to the Informational Filing.

## Rate Formula Template
## Table of Contents

**Overview**

The formula is calculated in two steps. The first step is to fill out Tabs A-1 thru A-11, and the Actual Gross Rev Req tab with data from the previous year's KCC Annual Report. This data input results in the calculation of the actual annual transmission revenue requirement (Actual ATRR) for the previous year, as shown in the Actual Net Rev Req tab. The results of this calculation are presented to the customers for review in accordance with the Protocols.

The TU (True-up) tab uses the Actual ATRR from the Actual Net Rev Req tab and compares it to the Projected ATRR (without the True-up for a prior year) that customers were billed for the same period. Interest is added to the difference and the adjusted true-up then is included in the Projected Net Rev Req tab.

The projected O&M and plant balances are calculated in Tabs P-1 thru P-5. These sheets feed into the Projected Gross Rev Req tab and ultimately into the Projected Net Rev Req tab. The RTO Projects Smry tab retrieves project specific data from other tabs to calculate the amount of revenue requirements associated with those projects which are contained in the total Projected Gross Revenue Requirement amount. The Spon Projects Smry tab does the same process for Sponsored projects. The total revenue requirements for these two groups of upgrades and revenue credits are subtracted from the SEPC total revenue requirement to obtain the Zonal ATRR (line 20, before true-up). This calculation is shown on the Projected Net Rev Req tab. This tab also calculates the point-to-point zonal rates. SPP rates are set on the trued up Base Plan Net Revenue Requirements, Balanced Portfolio Net Revenue Requirements, and ITP/Priority Projects Net Revenue Requirements as well as the trued up Zonal Net Revenue Requirements. The specific charges are defined under the SPP Open Access Transmission Tariff.

The FBR is set up initially to address the revenue requirements for six separate special categories: 1) Base Plan, 2) Balanced Portfolio, 3) Integrated Transmission Plan Priority 1, 4) Integrated Transmission Plan Priority 2, 5) Sponsored, and 6) Third Party Projects. From time-to-time it may become necessary to add other categories of special projects.

Cells highlighted in light blue are data input cells. Some cells may reference the results from other calculations in the formula. Such cell references may change from year to year, requiring manual adjustment of the reference or the direct entry of the proper value.

reduced by taxes other than income taxes that are included in transmission O&M on L74, Col. 6.

Prepayments are the electric related prepayments booked to Acct. 165 and reported on SEPC's KCC Annual Report Pg. 17, L20, Col. b.

Expenses recorded in Account 565, Trans

mission of Electricity by Others, are not recoverable through the formula rate.

Lease and joint facilities charges included on L62, page 2 of 5, are those costs attributable to transmission service.

This line shall not be populated unless authorized by the Commission.

Transmission O&M on this line does not include any SPP charges for Schedule 1-A of the SPP OATT.

Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template.

Removes transmission plant determined by Commission order to be excluded from RTO transmission rate base to the extent that plant balances are not adjusted.

Removes generator step-up facilities determined by Commission order to be excluded from RTO transmission rate base to the extent plant balances are not adjusted. SEPC records this investment in a transmission plant account.

If the transmission related component of property tax is specifically identified in SEPC's KCC Annual Report, then a TP allocator shall be used. Property tax shall be allocated to transmission by the GP allocator if transmission related property tax is not specifically identified in the KCC Annual Report.

To the extent amortization of abandoned transmission plant has not been authorized for recovery, or has been included in line 82, it will not be included in line 78.

Does not include leases since return associated with leased facilities is included in the lease payment.

The approved TIER ratio will be established by the FERC and include the the RTO incentive adder. No change in TIER may be made absent a filing with the FERC. Any incentive ROEs approved by the FERC are shown by project in Worksheet A-9.

Excluded plant (line 5) is removed from the calculation of plant in the transmission column (column 6), but it not removed from the calculation of plant in the total company column (column 3).

The Unamortized Abandoned Transmission Plant can only be included in rate base if authorized by the Commission.

The GP allocator is primarily used to allocate prepaid insurance payments; and Sunflower provides property insurance for leased facilities.

Reserved for future use.

Includes depreciation of capital lease improvements. Includes annual amortization of $59,779, as authorized in KCC Docket 14-MKEE-170-TAR, for the period January 1, 2020 through December 31, 2024.

Reserved for future use.

Reserved for future use.

**Notes:**

(1) Data for this worksheet came from SEPC's Annual Report to the KCC and the Company's General Ledger.

(2) Project list is subject to expansion based on the number of base plan projects for the given year.

(3) Bundled transmission service for Sch. 1, 2, 3, 5 & 6, WDR and loss billed to the SEPC Members. See Note 2 as well.

(4) Reserved for future use.

)
(
5 Reserved for future use.
)

(6) Revenue from other entities to cover use of administrative assets. The non-transmission portion is equal to Actual Revenue * (1-WS Allocator).

(7) Reserved for future use.

(8) Schedule 11 revenue for projects not yet completed as of 12/31/-2 and excess revenue (i.e., revenue less ATRR) for Sch. 11 projects completed by 12/31/-2 are assigned as a revenue credit against Transmission ATRR. See page 2, L85

(9) The Net Revenue Requirement with True-up from Projection for Actual Period, Schedule "Projected Net Rev Req," taken from the FBR two years prior to the current one (i.e., when the ATRR for these projects was established).

(10) Excludes lease revenue on assets expected to be recorded as long-term leases.

Notes:

Column (n) :This column reflects the relationship of the actual load for each month (September, October, November and December) as a percentage of the average transmission network load for January through August. For example, the September percentage in column (n) is equal to the September load in column (l) divided by the 8-month average of column (m) shown on line 13.

# Sunflower Electric Power Corporation (SEPC)
# Allocation of ADIT
# For the 12 months ended December 31, -2

SEPC is a taxable cooperative subject to income taxes to the extent that income or losses are allocated to nonpatron
activity. The ADIT as of 12/31/-2 is zero. See the income tax notes to the combined financial statements found in the
-2 Audit Report for additional information on the calculation of ADIT.

**Notes**

Notes:
(C) See WP A-5 (Act Depreciation Rate). This rate will reflect any future FERC approved depreciation rates.
(D) BPF projects that have been completed and whose costs are in the KCC Annual Report should be entered on this page. If a project is completed in phases over multiple years, that project should be entered in sheet P-4 until the entire project is completed and reported in the KCC Annual Report.
(E) BPF projects with incentives granted by FERC should be included in Sheet A-9 as well as this sheet.
(F) Accumulated Depreciation will be brought forward from the prior year for each project.

Notes:
(C) See WP A-5 (Act Depreciation Rate). This rate will reflect any future FERC approved depreciation rates.
(D) BPF projects that have been completed and whose costs are in the KCC Annual Report should be entered on this page. If a project is completed in phases over multiple years, that project should be entered in sheet P-4 until the entire project is completed and reported in the KCC Annual Report.
(E) BPF projects with incentives granted by FERC should be included in Sheet A-9 as well as this sheet.
(F) Accumulated Depreciation will be brought forward from the prior year for each project.
(G)

Notes See WP A-5 (Act

: Depreciation Rate).

(C) This rate will reflect any future FERC

approved depreciation rates.

(E) ITP/Priority 2 projects that have been completed and whose costs are in the KCC Annual Report should be entered on this page. If a project is completed in phases over multiple years, that project should be entered in sheet P-4 until the entire project is completed and reported in the KCC Annual Report.

ITP/Priority 2 Project with incentives granted by FERC should be included in Sheet A-9 as well as

(F) this sheet.

Accumulated Depreciation will be brought forward from

(G) the prior year for each project.

**Notes:**

(A) See WP A-5 (Act Depreciation Rate).

(B) This rate will reflect any future FERC approved depreciation rates.

(C) Sponsored Upgrade Projects that have been completed and whose costs are in the KCC Annual Report should be entered on this page. If a project is completed in phases over multiple years, that project should be entered in sheet P-4 until the entire project is completed and reported in the Annual Report.

(D) Sponsored Projects with incentives granted by FERC should be included in Sheet A-9 as well as this sheet.

(E) Accumulated Depreciation will be brought forward from the prior year for each project.

(A) Special incentive (Depreciation Rate or TIER) may be utilized for specific incentive transmission projects if approved by the FERC.

(B) The formula is set up to accommodate an incentive TIER Adder. If FERC grants an ROE adder, it may be converted to a TIER adder using the following formula: TIER Adder = (ROE Adder * Equity Ratio) / Average System Interest Rate. If FERC grants a different incentive, the formula may need to be modified accordingly.

**Notes:**

(A) See WP A-5 (Act Depreciation Rate). This rate will reflect any

(B) future FERC approved depreciation rates.

(C) Projects constructed by SEPC on behalf of Third Parties that have been completed and whose costs are in the KCC Annual Report should be entered on this page. If a project is completed in phases over multiple years, that project should be entered in sheet P-4 until the entire project is completed and reported in the Annual Report.

(D) Third Party Projects with incentives granted by FERC should be included in Sheet A-9 as well as on this sheet.

(E) Accumulated Depreciation will be brought forward from the prior year for each project.

None of the following expenses shall be recovered directly or indirectly through the formula rate:

A. Industry association dues (*e.g.*, EEI, NRECA, KEC and EPRI).

B. The following charges to Account 930.2: nuclear power research expenses, miscellaneous general expenses related to a Nuclear Generating Station; Nuclear Energy Institute fees, assessments and other costs; and any other nuclear-related expenses.

C. Other experimental and general research expenditures (other than those related to transmission which shall be directly assigned to transmission).

D. Expenses to Maintain Corporate Visibility (except such costs related to regulatory, reporting, compliance, and shareholder communications).

E. All regulatory Commission expenses, except for FERC transmission-related dockets, which shall be directly assigned to transmission. Transmission-related dockets shall not include transmission-related rulemakings or notices of inquiry proceedings, except those related to siting or reliability.

1. When calculating the "Actual Gross Revenue Requirement," use the actual 13 month account balances for the year being trued-up.
2. For Capital Leases, the Plant-in-Service values are reduced as principal is paid off. No depreciation/amortization expense is recorded as it is included in the lease payment; and no reserves for depreciation are accumulated.
3. In accordance with 18 C.F.R. §§ 35.25(c)(3) and 35.25(e), without prior approval from the Commission, no more than 50 percent of CWIP may be included in the rate base. No AFUDC will be calculated on the portion of CWIP included in rate base.
4. Accumulated Depreciation and Amortization - Trans. (Excl. Cap. Lease) includes accumulated amortization for transmission leasehold improvements.

| 24 | | | | | | | Total ATRR with bid commitments | L23 As Bid | $ - |
| 25 | | | | | | | Non-Transmission ATRR (Note C) | L24 - L23 | $ - |

**Note**

A Unless fixed or capped or discounted in the bid, project costs will use the formula rate allocated cost (Col (d)).

B Costs from column (j) to be reflected on A-7 in columns (e) through (n).

C Amount entered on tab A-7 cannot be greater than zero.

D Blue shaded cells represent input cells and are not derived from a formula.

E Tab A-13 will only be used when Sunflower has a competitively bid project in which Sunflower has made commitments in its bid for any of the adjustable line items. If Sunflower has a competitively bid project in which no commitments where made, tab A-13 shall be left blank and the project costs will appear the same as other RTO projects on tab A-7. Only the following items may be adjusted from the Traditional values (Col. d) in developing a Competititive Bid: financing costs, target TIER, depreciation expense, and other cash taxes.

F This spreadsheet will be replicated for each competitively bid project.

# Sunflower Electric Power Corporation (SEPC)
# True-up Adjustment and Timeline

**Notes:**

A Enter the Projected Revenue Requirement for the Actual period without a true-up adjustment plus any adjustments, either positive or negative, resulting from corrections of prior years. For 2013 and 2014, set this equal to L2

B If the annual update is for a partial year, not 12 months, then the amount on L12 shall be prorated to represent the number of months in the partial year.

C If the annual update is for a partial year, monthly interest will be multiplied by 18 plus one-half of the months in the partial year.

D The 2018 True-Up was calculated on an individual company basis. Per FERC Docket ER19-2273, the individual company true-ups will be summed together for the merged Sunflower entity. For the 2018 and 2019 individual true-ups, Sunflower will calculate a total collection amount using the transition method attached to the Sunflower protocols.

Note A: All line references are to page 1 of this worksheet.

Note B: To be completed with any ITP2 project approved by the Southwest Power Pool.

Note C: This tab shows the amount in column **s** that SPP is required to recover for each ITP2 project.

Note D: Effective carrying charge rate as a percent of net plant before true up is applied.

Note E: For competitively bid projects, data for

columns a through
n for new
Projected Projects

are taken from Worksheet P-7.

(A) Special incentive (Depreciation Rate or TIER) may be utilized for specific incentive transmission projects if approved by the FERC.

(B) The formula is set up to accommodate an incentive TIER Adder. If FERC grants an ROE adder, it may be converted to a TIER adder using the following formula: TIER Adder = (ROE Adder * Equity Ratio) / Average System Interest Rate. If FERC grants a different incentive, the formula may need to be modified accordingly.

| 187 | 13 Mon Avg | | | | $ - | | | $ - | | | $ - | $ - | $ - | $ - | |

Note: Depreciation/amortization is not actually recorded for capital leased facilities. Instead, Plant-in-Service is reduced as a portion of the lease payments are used to reduce the principle amount. The above treatment is equivalent to the accounting treatment intended to develope the appropriate Net Plant values to use in allocating O&M and other expenses.

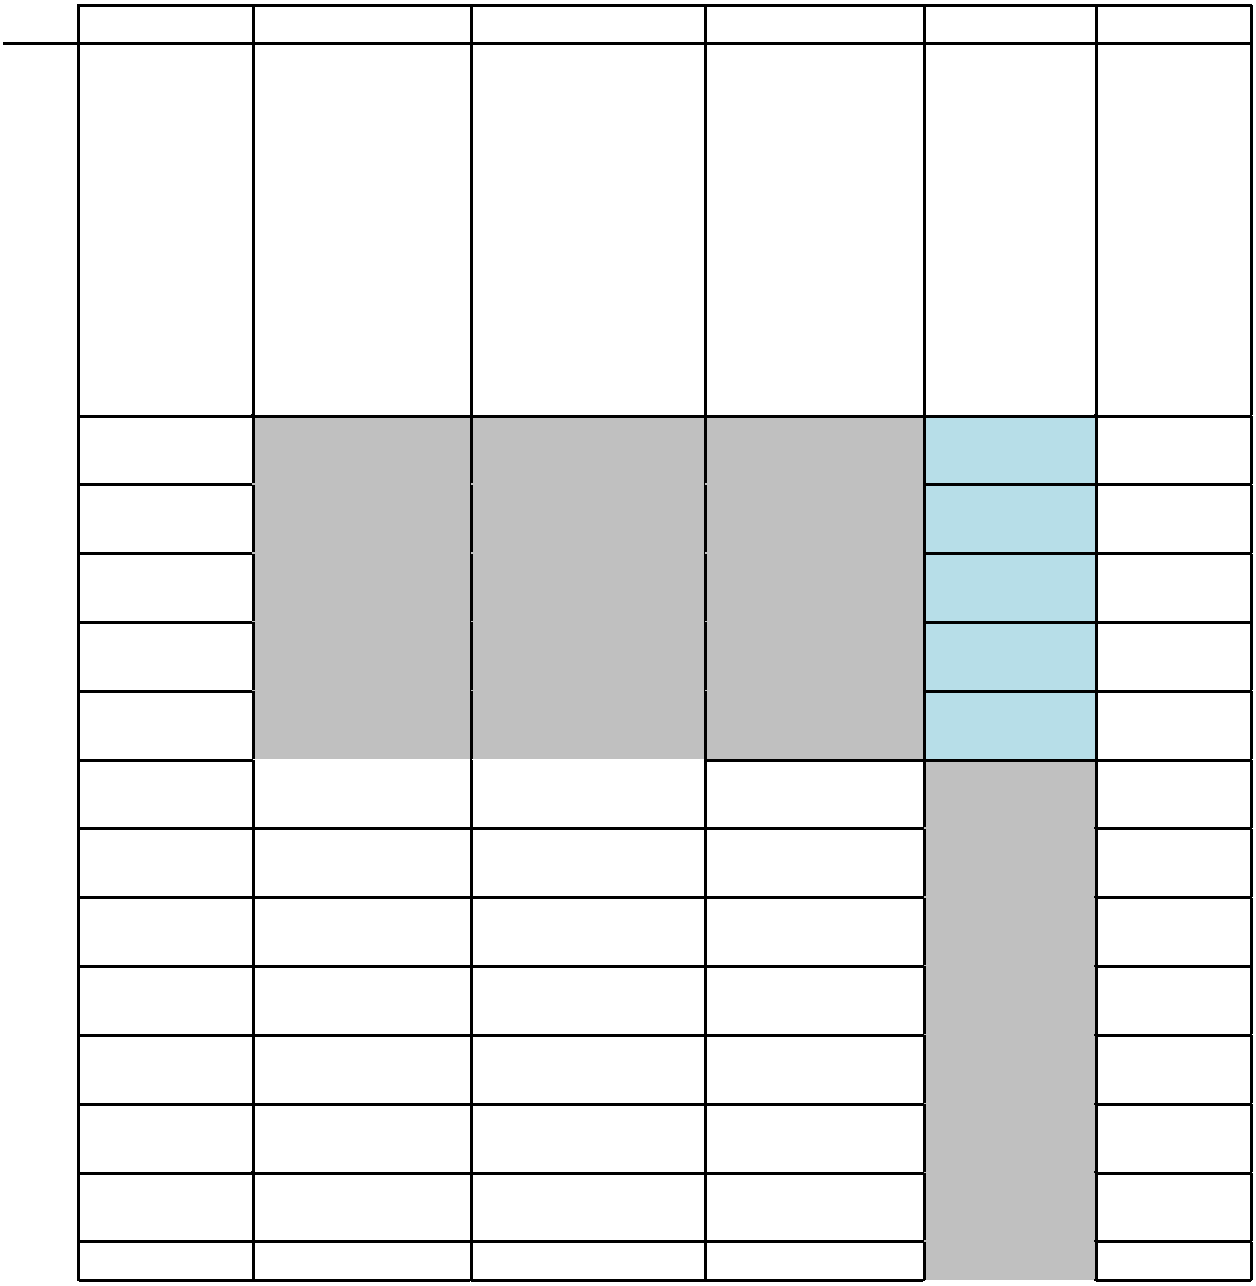
|---|---|---|---|---|---|---|
| | **Month** | **Monthly Transmission Network Load as Percentage of the Average Total Network Load of January thru May (Worksheet A-2)** | **Average Monthly Transmission Network Load for January thru May (col e, line 2 thru line 9)** | **Estimated Monthly Transmission Network Load for June thru December ( b X c)** | **Actual Load for January through May** | **Projected Transmission Network Load** |
| 1 | January | | | | - | - |
| 3 | February | | | | - | - |
| 4 | March | | | | - | - |
| 5 | April | | | | - | - |
| 6 | May | | | | - | - |
| 7 | June | #DIV/0! | - | #DIV/0! | | #DIV/0! |
| 8 | July | #DIV/0! | - | #DIV/0! | | #DIV/0! |
| 9 | August | #DIV/0! | - | #DIV/0! | | #DIV/0! |
| 10 | September | #DIV/0! | - | #DIV/0! | | #DIV/0! |
| 11 | October | #DIV/0! | - | #DIV/0! | | #DIV/0! |
| 12 | November | #DIV/0! | - | #DIV/0! | | #DIV/0! |

| | | | | | | |
|---|---|---|---|---|---|---|
| 13 | December | #DIV/0! | - | #DIV/0! | | #DIV/0! |
| 14 | Total | | | | | #DIV/0! |



| | | | | | | |
|---|---|---|---|---|---|---|
| | | | | | | |

| | | | |
|---|---|---|---|
| 15 | 12-CP | | #DIV/0! |

Note: **Column b** is the monthly transmission network load for June thru December as a percentage of the average of the monthly transmission network load values for January through May, based on monthly load values in Worksheet A-2.
**Column c** is average (January thru May) of monthly transmission network load in column e.
**Column f** contains actual load values for January-May and projected load values for June - December.

**Notes:**

(A) See WP A-5 (Act Depreciation.Rate).

| | | | |
|---|---|---|---|
| (B) P-4 projects should be included in total projected transmission projects for P-1 | | | |

(C) Projects should not be listed until the first year they are expected to be in service unless there is a CWIP return incentive. Do not duplicate projects listed in A-7 (Act. RTO Proj).

**Note**

A Unless fixed or capped or discounted in the bid, project costs will use the formula rate allocated cost (Col (d)).

B Costs from column (j) to be reflected on RTO Project Smry in columns (e) through (n).

C Amount entered on tab RTO Project Smry cannot be greater than zero.

D Blue shaded cells represent input cells and are not derived from a formula.

E Tab P-7 will only be used when Sunflower has a competitively bid project in which Sunflower has made commitments in its bid for any of the adjustable line items. If Sunflower has a competitively bid project in which no commitments where made, tab P-7 shall be left blank and the project costs will appear the same as other RTO projects on tab RTO Project Smry. Only the following items may be adjusted from the Traditional values (Col. d) in developing a Competititive Bid: financing costs, target TIER, depreciation expense, and other cash taxes.

# Sunflower Electric Power Corporation

# Transmission Formula Rate Protocols

The formula rate template ("Formula Rate Template") and these implementation protocols ("Protocols") together comprise the filed rate ("Formula Rate") of Sunflower Electric Power Corporation ("Sunflower") for transmission revenue requirement determinations under the Southwest Power Pool, Inc. ("SPP") Open Access Transmission Tariff ("Tariff"). Sunflower shall follow annually the instructions specified in the Formula Rate to calculate its annual transmission revenue requirement. Recovery of the costs associated with existing facilities and new facilities shall be consistent with the Formula Rate and Attachment AI and Attachment J, respectively, of the Tariff.

The initial annual transmission revenue requirement will be in effect on January 1, 2020. The Formula Rate shall be recalculated each year with the resulting rates to become effective on and after January 1 of the following year through December 31 of such year ("Rate Year"). The resulting rates implemented each January 1 will be subject to review and true-up as further provided in the Protocols. The Formula Rate shall become effective for recovery of Sunflower's annual transmission revenue requirement upon the effective date authorized by the Federal Energy Regulatory Commission ("FERC") under Section 205 of the Federal Power Act ("FPA").

## I. Definitions

For purposes of these Protocols, the following capitalized terms shall have the meanings set forth below.

A. "Accounting Change(s)" means any change in Sunflower's accounting policies or practices from those in effect for the Calendar Year upon which the immediately preceding Annual Update was based and that could impact the calculations in the Annual Update. Accounting Changes include:

1. initial implementation of an accounting standard or policy;
2. revisions to Sunflower's Annual Report data or the requirement to report certain values within it;
3. correction of errors and prior periods adjustments;
4. the implementation of new or different estimation methods or policies;
5. changes to any tax requirements for Sunflower;
6. changes to accounting practices or policies mandated by a regulatory authority that Sunflower adopts that could impact the Formula Rate or calculations under the Formula Rate;
7. implementation of accounting practices for unusual or unconventional items;
8. items included in the Formula Rate at an amount other than a historic cost basis (e.g., fair value adjustments);
9. changes in Sunflower's inter-corporate cost allocation policies or

practices from those policies and/or practices in effect in the Prior Rate Year; or

10. new requirements or changes related to any reorganization or merger transaction with the exception of the merger which was consummated pursuant to KCC Docket 19-SEPE-054-MER.

B. "Annual Meeting" means the meeting hosted by Sunflower for the purpose of exchanging information with Interested Parties regarding the Annual Update.

C. "Annual Report" means the Electric Cooperative Utility Annual Report that is filed by Sunflower with the Kansas Corporation Commission, or any equivalent thereof. Data provided in the Annual Report will reflect the independently-audited books and records of Sunflower.

D. "ATRR" means Sunflower's net annual revenue requirement for the transmission services in a Rate Year calculated in accordance with the Formula Rate.

E. "Annual Update" means Sunflower's annual posting of its populated Formula Rate Template, as defined in Section II.

F. "Business Day" means from 9:00 AM to 5:00 PM Central Prevailing Time other than weekends and federal holidays.

G. "Calendar Year" means January 1 through December 31 of a given year.

H. "Current Calendar Year" means the Calendar Year in which the Annual Update is posted (e.g., if the Annual Update is posted on July 1, 2018, the Current Calendar Year is 2018).

I. "Customer(s)" means the customers taking Network Integration Transmission Service, service under Grandfathered Agreements, or Point-To-Point Service, pursuant to the Tariff.

J. "FERC" means the Federal Energy Regulatory Commission.

K. "Final Posting" means the Annual Update information posted to the SPP Member Related Postings Website with changes agreed to during the Informal Challenge procedures.

L. "Formal Challenge" means a challenge filed by an Interested Party with FERC to an aspect of the Annual Update, and served on Sunflower by electronic service on the date of such filing.

M. "Formula Rate" means the Sunflower Protocols together with the Formula Rate Template.

N. "Formula Rate Template" means the Sunflower transmission formula rate template set forth in Attachment H of the SPP Tariff.

O. "FPA" means the Federal Power Act, 16 U.S.C. § 791a *et seq*.

P. "Informal Challenge" means written notification by an Interested Party to

Sunflower, during the Review Period, of a specific challenge to the Annual Update.

Q. “Information Request” means a written request submitted by an Interested Party to Sunflower during the Review Period, and which may include a reasonable request for explanations, documents, or other materials, subject to Section IV.A of these Protocols.

R. “Informational Filing” means Sunflower’s annual filing at FERC as described in Section IV.E.

S. “Interest” means the amount of interest calculated consistent with 18 C.F.R. § 35.19a(a)(2)(iii).

T. “Interest Rate” means the interest rate produced by the calculation set forth in 18 C.F.R. § 35.19a(a)(2)(iii).

U. “Interested Party” includes, but is not limited to, Customers, state utility regulatory commissions, consumer advocacy agencies, and state attorneys general.

V. “Member Related Postings Website” shall mean such publicly available website as established by SPP for SPP Member postings.

W. “Prior Rate Year” means the Rate Year prior to the Current Calendar Year (e.g., if the Current Calendar Year is January 1, 2018 through December 31, 2018, then the Prior Rate Year is January 1, 2017 through December 31, 2017).

X. “Protective Agreement and Non-Disclosure Certificate” means the agreement and certificate to be executed by parties and their representatives in order to obtain access to material that Sunflower deems confidential or that contains Critical Energy Infrastructure Information as that term is defined in 18 C.F.R. § 388.113(c)(1).

Y. “Protocols” means these Sunflower transmission Formula Rate implementation protocols.

Z. “Publication Date” means the date on which SPP posts the Sunflower Annual Update to the SPP Member Related Postings Website. The Publication Date for each year shall be no later than June 24 (or the first Business Day after June 24 if June 24 is not a Business Day).

AA. “Rate Year” means January 1 of a given Calendar Year through December 31 of the same Calendar Year.

BB. “Review Period” means, unless otherwise extended in writing by Sunflower, the period commencing on the Publication Date and ending November 1 of the same Calendar Year or, if November 1 is not a Business Day, the next Business Day.

CC. “Service List” shall mean the list of email addresses maintained by SPP of Interested Parties, provided that such Interested Parties request to be

added to the Service List through the "Exploder List" link on the SPP website.[1]

DD. "SPP" means Southwest Power Pool, Inc. or its successor organization.

EE. "Stated Values" means values that are fixed and not subject to change in an Annual Update including (i) the times interest earned ratio ("TIER"); (ii) depreciation and amortization rates; (iii) the cap on projected expenses and (iv) other similar fixed values. Stated Values may be changed only pursuant to FPA Section 205 or 206.

FF. "Sunflower" means Sunflower Electric Power Corporation.

GG. "Tariff" means SPP's Open Access Transmission Tariff.

HH. "True-Up Adjustment" means Sunflower's calculated difference between the projected ATRR and actual ATRR collected for a Rate Year, calculated in accordance with the Formula Rate.

II. "Upcoming Rate Year" means the Rate Year after the Current Calendar Year.

## II. Annual Update

A. On or before the Publication Date (i) Sunflower shall provide its Annual Update, the non-confidential version of the applicable Annual Report(s), and Protective Agreement and Non-Disclosure Certificate to SPP and (ii) SPP shall post the Sunflower Annual Update, the non-confidential version of the applicable Annual Report(s), and Protective Agreement and Non-Disclosure Certificate on the SPP Member Related Postings Website. The Annual Update shall:

1. Calculate the projected ATRR for the Upcoming Rate Year in accordance with the Formula Rate;

2. Calculate the True-up Adjustment for the Prior Rate Year as described in Section III below;

3. Sum the projected ATRR for the Upcoming Rate Year and the True-up Adjustment for the Prior Rate Year, including Interest, as explained in Section III below.

B. Concurrent with the posting of the Annual Update, the non-confidential version of the applicable Annual Report(s), and Protective Agreement and Non-Disclosure Certificate Sunflower shall provide notice of the posting to the Service List.

C. The Annual Update shall:

1. Include a populated Formula Rate Template with fully functional spreadsheets with links and formulas intact, showing the calculation of the Annual Update and underlying, detailed work papers in

[1] As of February 2019, the Exploder List was titled "Formula Rate Information Notification" and could be accessed at http://www.spp.org/stakeholder-center/exploder-lists/.

native format with links and formulas intact, and supporting documentation for data;

2. Be based on the Annual Report and the independently-audited books and records of Sunflower for the most recent fiscal year, and provide information necessary to trace the data and information in the populated Formula Rate Template to the Annual Report;

3. Provide sufficient information to enable Interested Parties to replicate the calculations of the formula results from the Formula Rate;

4. Identify any Accounting Change(s), and explain the individual impact of such Accounting Change(s) on charges billed under the Formula Rate;

5. Not seek to modify the Formula Rate; and

6. Include an affidavit from the Manager of Regulatory Relations of Sunflower (or a similar successor position, if applicable) attesting to the accuracy of the cost and revenue data.

## III. True-Up Adjustment

A. The True-Up Adjustment shall be the sum of components 1 and 2, determined in the following manner:

1. *Difference between the projected ATRR and the actual ATRR:* Sunflower's projected ATRR for the Prior Rate Year will be compared to Sunflower's actual ATRR for the Prior Rate Year calculated in accordance with the Sunflower Formula Rate and based upon:

   a. the Stated Values and the data from the Annual Report applicable to the Prior Rate Year;

   b. any Sunflower filings and FERC orders specifically applicable to Sunflower's calculation of its ATRR;

   c. accounting policies and practices applicable to the calculation of annual revenue requirements under formula rates;

   d. any aspects of the Tariff or SPP Governing Documents that apply to the calculation of annual revenue requirements under individual transmission owner formula rates; and

2. *Interest:* Interest on any over- or under-recovery.

B. The True-Up Adjustment will include a variance analysis of, at minimum, actual revenue requirement components of the zonal ATRR, base plan ATRR, operating and maintenance expenses, depreciation expense,

taxes, return, and revenue credits as compared to the corresponding components in the projected ATRR that was calculated for the Prior Rate

Year with an explanation of material variances in each revenue requirement component listed above.

*True-Up Transition Formula*

C. For the ATRR to be recovered in Rate Year 2020, the True-Up Adjustment shall be determined using 2018 data, combined for both Sunflower and Mid-Kansas Electric Company, Inc., and applied to the 2020 projection, as filed with and approved by FERC. Similarly, for the ATRR to be recovered in Rate Year 2021, the ATRR shall be determined using 2019 data, combined for both Sunflower and Mid-Kansas Electric Company, Inc., and applied to the 2021 projection, as filed with and approved by FERC.

D. For the 2018 and 2019 True-Up Adjustments included in the 2020 and 2021 projection, respectively, Sunflower will calculate the applicable charge or refund for each of its zonal transmission customers in accordance with the transition formula agreed to in the Unanimous Settlement Agreement in Docket 19-SEPE-054-MER on file with the Kansas Corporation Commission and included as *Attachment 1* to these Protocols.

## IV. Review of Annual Update

No sooner than seven (7) calendar days and no later than twenty (20) calendar days after the Publication Date of Sunflower's Annual Update, Sunflower will host its Annual Meeting. Concurrent with the posting of the Annual Update on the SPP Member Related Postings Website, Sunflower shall provide notice of the Annual Meeting by providing such notice to SPP, which SPP shall post on the SPP Member Related Postings Website and by providing such notice to Interested Parties via email to the Service List. The notice shall include the date, time and location of the Annual Meeting, and shall also include instructions for (i) execution of a Protective Agreement and Non-Disclosure Certificate and (ii) if applicable, accessing Sunflower's external sharing site. The Annual Meeting shall also be available by telephone and/or web access with all meeting materials provided electronically from the SPP Member Related Postings Website.

A. Information Exchange

1. Interested Parties may submit Information Requests to Sunflower immediately on the Publication Date through the end of the Review Period. Such Information Requests shall be limited to seeking information, documents, and other materials that are necessary to determine:

   a. The extent, effect, or impact of an Accounting Change;

   b. Whether the Annual Update fails to include data in accordance with the Protocols;

   c. The proper application of the Formula Rate, including the

accuracy of data, consistency with the Formula Rate, and/or correctness of calculations shown in the Annual Update;

d. The prudence of actual costs and expenditures, including prudence of Sunflower's procurement methods and cost control methodologies;

e. The effect of any change to the Formula Rate Template; or

f. Any other information that may reasonably have an effect on the calculation of the charges pursuant to the Formula Rate.

The Information Requests shall not otherwise be directed to ascertain whether the Formula Rate is just and reasonable. Sunflower will not claim that Sunflower's own information that is responsive to Information Requests pursuant to the Protocols is subject to any settlement confidentiality provision. However, Sunflower may require that Interested Parties and their representative(s) execute a Protective Agreement and Non-Disclosure Certificate, respectively. Sunflower shall provide to SPP the Protective Agreement and Non-Disclosure Certificate, which SPP shall post it on the SPP Member Related Postings Website concurrent with the Publication Date.

2. Sunflower shall use best efforts to respond fully to Information Requests pertaining to the Annual Update within ten (10) Business Days of receipt. Sunflower shall use best efforts to timely notify the proponent of an Information Request if all or any part of an Information Request is unclear or the subject matter is outside the scope of Section IV.A.1.

3. Sunflower shall provide copies of all Information Requests from Interested Parties and Sunflower's response(s) to such requests, to the Service List by email, or by creating an external sharing site. If an external sharing site is used, Sunflower shall provide to the Service List instructions for accessing the site. If responses to Information Requests contain information deemed by Sunflower to be confidential, such information will only be provided to requesting parties pursuant to a Protective Agreement executed by the requesting party and Sunflower.

B. Informal Challenge Procedures

1. Interested Parties shall have until the end of the Review Period to notify Sunflower in writing (which may be transmitted by e-mail) of any Informal Challenges. The Informal Challenge is to specify (to the extent such information has been made available) the inputs, supporting explanations, allocations calculations, or other information to which the Interested Party objects, and provide an appropriate explanation and documents to support its Informal Challenge. Sunflower will make a good faith effort to respond to any Informal Challenge within fifteen (15) Business Days of notification of such Informal Challenge. If Sunflower disagrees with an Informal

Challenge, Sunflower's response shall provide an explanation of the basis for Sunflower's disagreement. Sunflower shall provide the

Interested Party with the name of the representative(s) assigned to work with the Interested Party to resolve the Informal Challenge.

2. Sunflower will provide to SPP and SPP shall then post on the Member Related Postings Website all Informal Challenges from Interested Parties and Sunflower's responses to the Informal Challenges. If responses to Informal Challenges contain information deemed by Sunflower to be confidential, such information will only be made available to Interested Parties pursuant to a Protective Agreement executed by the requesting Interested Party and Sunflower.

3. Sunflower will provide to SPP and SPP will then post the Final Posting on the Member Related Postings Website no later than November 30 of each year (or the next Business Day if November 30 is not a Business Day).

4. Any changes or adjustments to the Annual Update resulting from the Information Exchange and Informal Challenge procedures that are agreed to by Sunflower and resolved not less than 10 Business Days prior to the Final Posting shall be reported in the Final Posting. Any changes or adjustments agreed to by Sunflower after this date will be reported in the Informational Filing made with FERC and will be reflected in the Annual Update for the following Rate Year.

C. Formal Challenges

1. Interested Parties shall have until February 1 (or the next Business Day if February 1 is not a Business Day) to file a Formal Challenge.

2. A Formal Challenge shall:

a. Identify the action or inaction that is alleged to violate the Formula Rate;

b. Explain how the action or inaction violates the Formula Rate;

c. Set forth the business, commercial, economic or other issues presented by the action or inaction as such relate to or affect the party filing the Formal Challenge, including if applicable:

i. The extent, effect or impact of an Accounting Change;

ii. The proper application of the Formula Rate, including the accuracy of data, consistency with the Formula Rate and/or correctness of calculations shown in the Annual Update;

iii. The prudence of actual costs and expenditures;

iv. The effect of any change to the Formula Rate Template; or

v. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.

d. Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;

e. State whether the issues presented are pending in an existing proceeding in any forum in which the filing party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;

f. State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that relief;

g. Include relevant documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the filing party, including, but not limited to, contracts and affidavits; and

3. There is no requirement to raise an issue in an Informal Challenge prior to filing a Formal Challenge on that issue. The filing party may state whether it used the Informal Challenge procedures.

4. Formal Challenges shall be filed with FERC, either in the FERC Docket assigned to the Informational Filing or in a separate docket established for FPA Section 206 complaint procedures, and shall be served upon Sunflower. Service can be accomplished by electronic mail in accordance with 18 C.F.R. § 385.2010(f)(3), by express delivery or messenger to the individual listed as the contact in Sunflower's Informational Filing.

5. Sunflower will provide a response to the Formal Challenge within the time period prescribed by FERC.

6. In any proceeding initiated by FERC concerning the Annual Update or in response to a Formal Challenge, Sunflower shall bear the burden, consistent with FPA Section 205, of proving that it has correctly applied the terms of the Formula Rate. Nothing herein is intended to alter the burdens applied by FERC with respect to prudence challenges.

D. Modification of the Formula Rate or Annual Update

1. No party shall seek to modify the Formula Rate under the Informal or Formal Challenge procedures set forth in these Protocols. Any modifications to the Formula Rate will require an FPA Section 205 or 206 filing, as applicable. Nothing herein shall be deemed to limit in any way the right of Sunflower to file unilaterally, pursuant to FPA

Section 205 and the regulations thereunder, to change the Formula Rate or any of its inputs, or the right of any party to request such

changes pursuant to Section 206 of the FPA and the regulations thereunder.

2. In the event that Sunflower identifies an error in the True-Up Adjustment (or its Annual Report or successor form which is used as an input to the Formula), or is required by applicable law or a court or regulatory body to correct an error, Sunflower shall correct such error in good faith and without regard to whether the correction increases or decreases Sunflower's revenue requirements. Nothing in these protocols should or may be construed as preventing Interested Parties or the Commission from protesting such correction as inappropriate. If, in the normal course of business, Sunflower identifies and error in a prior True-Up Adjustment (or its Annual Report or successor form which is used as an input to the Formula), Sunflower will provide notice to the service list of the error identified.

3. .Any changes to the data inputs or any changes as the result of a FERC proceeding shall be incorporated into the Formula Rate and the charges produced by the Formula Rate in the Annual Update for the Upcoming Rate Year. Interest shall be calculated on any over- or under-recovery.

E. FERC Informational Filing

1. By December 15 of each year (or the next Business Day if December 15 is not a Business Day), Sunflower shall submit to FERC its Informational Filing.

2. This Informational Filing must include the information that is reasonably necessary to determine:

   a. That input data is properly recorded in the populated Formula Rate Template and any underlying work papers;

   b. That Sunflower has properly applied the Formula Rate;

   c. The accuracy of the data and the consistency with the Formula Rate of the ATRR and rates under review; and

   d. The effect of Accounting Changes that affect Formula Rate inputs.

3. The Informational Filing must also describe (i) each error, correction, and/or adjustment resolved after the Final Posting, for inclusion in the next Annual Update, and (ii) all aspects of the Formula Rate or its inputs that are subject of an ongoing dispute under the Informal or Formal Challenge procedures.

4. Contemporaneous with the making of such Informational Filing, Sunflower shall provide to SPP and SPP shall then post the

Informational Filing to the SPP Member Related Postings Website and Sunflower will provide notice of the Informational Filing and the

docket number assigned to the Informational Filing to Interested Parties via the Service List.

## V. Joint SPP Transmission Owner's Meeting

If the SPP Transmission Owners with transmission projects that utilize a regional cost-sharing methodology implement a process to coordinate and hold joint meetings, Sunflower intends to participate in that process. Notice of joint informational meetings, including the time, date, and location, shall be posted on the SPP Member Related Postings Website and distributed by Sunflower to Interested Parties via the Service List maintained by SPP no less than seven (7) calendar days prior to such meetings.

| Formal Challenge Due Date | February 1 |

**Attachment 1 to Protocols**

**EXHIBIT SA-1 to Unanimous Settlement Agreement in**

**Docket No. 19-SEPE-054-MER**

**Per paragraph 17(d.)(i)., Transition Method for Convergence of Transmission Zones:**

The Transition Method is as set forth herein and as reflected in the supporting example calculations:

a. **Transition Period.** The "Transition Period" shall begin on the effective date of any subsequent Converged TFR approved or accepted by FERC that will supersede the separate Sunflower and Mid-Kansas Legacy TFRs and continue for two years. For example, if Joint Applicants, in the SPP filing at FERC that will seek to consolidate the Sunflower and Mid-Kansas transmission zones and converge the transmission rates, request, and FERC permits, the filing and rates to become effective January 1, 2020, the Transition Period will run from January 1, 2020 until December 31, 2021, inclusive.

b. **Legacy True-Up Adjustments.** During the Transition Period, the Legacy True-Up Adjustments shall be the Annual True-Up Adjustments for Sunflower and Mid-Kansas determined separately for each transmission zone using the Legacy TFR formulas. For example, if the Converged TFR becomes effective January 1, 2020, Legacy True-Up Adjustments will be determined separately for Sunflower and Mid-Kansas for the 2018 and 2019 Rate Years in accordance with the Legacy TFR Protocols. For clarity, only the calculation of the Legacy True-up Adjustments will follow the Legacy TFR protocols. The procedural schedule will be in accordance with any newly approved protocols.

c. **Corrections during the Transition Period.** Legacy True-Up Adjustments shall be

limited to the adjustments, including interest at the applicable FERC-authorized interest rate (Applicable Rate), to reflect any under-collection or over-collection of ATRRs in the final two Rate Years of the Sunflower and Mid-Kansas Legacy TFRs,

plus any corrections to Annual True-Up Adjustment calculations under the Legacy TFRs to be applied during the Transition Period, for errors discovered before the effective date established by FERC for the convergence of the TFRs (*i.e.*, True-Up Adjustments for the 2018 and 2019 Rate Years plus any corrections during the Transition Period).

d. **Corrections after the Transition Period.** Corrections discovered by the Combined Company or wholesale transmission customers after the Transition Period that would impact prior Annual True-Up Adjustments shall be included in the annual true-up adjustments proposed under the Converged TFR. For example, if an error discovered after the end of the Transition Period resulted in an overstatement of the actual ATRR determined for an Annual True-Up Adjustment under a Legacy TFR, the correction necessary for that error shall be included with the Converged TFR's True-Up Adjustment for the Converged TFR. The parties acknowledge that this treatment of corrections is intended solely to provide the Combined Company with the benefit of administrative convenience.

e. **Load Ratio Share.** Annually, the Joint Applicants submit zonal load ratio share (LRS) information to SPP. During the Transition Period, Joint Applicants shall also prepare LRS information for (i) the Converged TFR, (ii) the standalone Sunflower zone, and (iii) the standalone Mid-Kansas zone. The standalone LRS information shall reflect the zonal LRS information that would have existed had the Joint Applicants not caused to be established a Converged TFR. The standalone LRS information will be used to calculate the Transition Adjustment. Parties acknowledge, for example, the 2019 load ratio shares are used to allocate transmission revenue requirements billed in 2020.

f. **Adjustments to Load Ratio Share.** The Combined Company shall be allowed to

propose a reasonable adjustment to the allocation of any relevant Legacy True-Up Adjustments to address customer migration, subject to the condition that complete supporting documentation for any such adjustments shall be provided to the impacted wholesale transmission customers. Approval shall not be unreasonably withheld.

g. **Transition Method applies to WPA.** The parties agree that, during 2020, under the Wholesale Power Agreement (WPA) between Sunflower and KEPCo, the Transmission Charge that Sunflower shall assess KEPCo shall reflect the ATRR including the Sunflower LRS of the Sunflower Legacy True-Up Adjustment. As the WPA is KCC jurisdictional and not FERC jurisdictional, information regarding the WPA calculations will not be included with the information filed at FERC. At KEPCo's request, Sunflower shall provide to KEPCo workpapers supporting the Sunflower Legacy True-Up Adjustment applied for the calculation of the Transmission Charge under the WPA.

h. **Allocation of Base Plan Legacy True-Up to Projects.** The parties recognize that in the Legacy TFR, the base plan true-up in the FBR requires allocation to eligible individual base plan projects in order to be allocated properly in the SPP RRR file, including to the Sunflower and Mid-Kansas zones. The Converged TFR will calculate the projected revenue requirement by project. During the Transition Period, the Converged TFR projected revenue requirement by project will be used to allocate the Sunflower base plan true-up to the eligible Sunflower projects and the Mid-Kansas base plan true-up to the eligible Mid-Kansas projects. For this purpose, 'Sunflower projects' and 'Mid-Kansas projects' pertain to

projects as they appear in the Annual Projections in the standalone Sunflower and Mid-Kansas Legacy TFRs, respectively.

i. A**llocation of Base-Plan Legacy True-Up to Zones**. After the base plan Legacy True-up Adjustment is allocated to each qualifying project, the base plan Legacy True-up is allocated to the various SPP zones and to the SPP regional charges in accordance with the SPP parameters for each project. Following this process, Sunflower will calculate the percent of the Base Plan True-Ups allocated to the Sunflower zone on a stand-alone basis, the Mid-Kansas zone on a stand-alone basis, and to the Converged zone on a converged basis (Base Plan Zonal Percent).

j. **Zonal True-Up Adjustment.** During the Transition Period, Sunflower will calculate a Zonal True-Up Transition Adjustment for each zonal customer. The Zonal Legacy True-up Adjustment (see section b. and section c.) for Sunflower will be allocated to each zonal customer using the stand-alone LRS information for the Sunflower zone (see section e.). The Zonal Legacy True-up Adjustment (see section b. and section c.) for Mid-Kansas will be allocated to each zonal customer using the stand-alone LRS information for the Mid-Kansas zone (see section e.). The Sunflower and Mid-Kansas Zonal Legacy True-Up Adjustments will be added together and allocated to each Zonal Customer using the LRS information for the Converged TFR (see section e.). The Zonal True-Up Transition Adjustment for each zonal customer is the difference between the sum of the Sunflower and Mid-Kansas stand-alone Zonal Legacy True-up Adjustments allocated to that customer and the Converged Zonal Legacy Trueup Adjustment allocated to that customer.

k. **Base Plan True-Up Adjustment**. During the Transition Period, Sunflower will

calculate a Base Plan True-Up Transition Adjustment for each zonal customer.

The zonal impact of the base plan Legacy True-up Adjustment is calculated by

multiplying the base plan Legacy True-up Adjustment (see section b. and section c.) by the Base Plan Zonal Percent (see section i.) for each of Sunflower, MidKansas, and the Converged zone. The base plan True-up Transition Adjustment is then calculated for each zonal customer following the same process as described for the Zonal True-Up Adjustment.

l. **Reallocation of Imbalance.** The base plan True-up Adjustment, for the zone as a whole, can result in an imbalance from the calculated net cost shift to or from the SPP region. To the extent this cost shift occur, the result of the Transition Adjustment would be an imbalance, which could result in the Combined Company either over- or under-collecting costs associated with the Legacy TrueUp Adjustments. To eliminate this imbalance, the imbalance shall be reallocated to each zonal customer based on their LRS in the Converged zone.

m. **Net Transition Adjustment.** The net Transition Adjustment for each zonal customer will be the sum of the Zonal True-Up Adjustment (see section j.), the Base Plan True-Up Adjustment (see section k.), and the Reallocation of Imbalance (see section l.)

n. **Settlement and Timing.** The Transition Adjustment calculation is dependent on LRS data that will not be finalized until after the end of the calendar year (see section e.). For example, 2018 Legacy True-Up Adjustments distributed in 2020 rely on LRS data for 2019 that will not be available until after the end of 2019. The stand-alone LRS data will be prepared concurrently with the Converged LRS information that is required to be submitted to SPP for the Converged TFR in January. The Allocation of Base Plan Legacy True-Up to Projects relies on data

from the Converged TFR and the SPP RRR file. Complete RRR file data may not be available until as late as February ( for example February of 2020 for the

2020 distribution of the 2018 Legacy True-Up Adjustments). Note that some data will be available with the posting of the Converged TFR projected rate for Sunflower. Zonal Customers shall be notified when data is available to complete the calculations. Interested parties may request and review the calculation prior to settlement. Settlement (payments or invoices) will be issued to zonal customers in 12 equal monthly amounts beginning after all interested parties have completed their review.

General Note: References to pages in this formulary rate are indicated as: (page#, line#, col.#)
References to data from FERC Form 1 are indicated as: #.y.x (page, line, column)

| Note Letter | |
|---|---|
| A | The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note F. Account 281 is not allocated. |
| B | Identified in Form 1 as being only transmission related. |
| C | Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission<br>Prepayments are the electric related prepayments booked to Account No. 165 and reported on Pages 110-111 line 57 in the Form 1. |
| D | Line 41 removes EPRI Annual Membership Dues listed in Form 1 at 353._.f (enter FN1 line #),<br>any EPRI Lobbying expenses included in line 44 of the template and all Regulatory Commission Expenses itemized at 351.h<br>Line 41 removes all advertising included in Account 930.1, except safety, education or out-reach related advertising<br>Line 41 removes EEI and EPRI research, development and demonstration expenses associated with projects in which transmission customers can voluntarily participate to the extent such expenses exceed a maximum annual aggregate amount of $100,000<br>Line 42 reflects all Regulatory Commission Expenses directly related to transmission service, RTO filings, or transmission siting itemized at 351.h |
| E | Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year.<br>Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere. |
| F | The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit (Form 1, 266.8.f) multiplied by (1/1-T) . |

Inputs Required:

FIT = -

SIT= - (State Income Tax Rate or Composite SIT from Attachment 3)

p = - (percent of federal income tax deductible for state purposes)

For each Rate Year (including both Annual Projections and True-Up Adjustments) the statutory income tax rates utilized in the Formula Rate shall reflect the weighted average rates actually in effect during the Rate Year. For example, if the statutory tax rate is 10% from January 1 through June 30, and 5% from July 1 through December 31, such rates would be weighted 181/365 and 184/365, respectively, for a non-leap year.

G The cost of debt is determined using the internal rate of return methodology shown on Attachment 5 until the Actual Capital Structure Date, and is determined using the methodology in Attachment 2 thereafter. Attachment 5 contains a hypothetical example of the internal rate of return methodology; the methodology will be applied to actual amounts for use in Appendix A.

H Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

I Enter dollar amounts

J ROE will be supported in the original filing and no change in ROE may be made absent a filing with FERC under FPA Section 205 or 206.

The capital structure will be 60% equity and 40% debt for the CWIP associated with the projects listed below (60/40 Projects), and the return on such projects will be calculated on Attachments 3 and 4 and input on line 71. The CWIP associated with the 60/40 Projects will not be included in rate base (line 25). The capital structure shown on lines 89-92 will be 60% equity and 40% debt until the first of the 60/40 Projects is placed into service. After the first 60/40 project is placed in service, the capital structure on lines 89-92 will reflect the actual capital structure, and will be capped at 55% equity. If the actual equity ratio exceeds 55%, the common stock ratio will be reset to 55% and the debt ratio will be equal to 1 minus sum of the preferred stock ratio and common stock ratio. Any remaining 60/40 projects will continue to earn a return predicated on a 60% equity capital structure until such time as they are placed into commercial operation.

| Projects for which the Comission has authorized a 60/40 proxy capital structure during construction: | Docket Number |
|---|---|
| Iatan – Nashua 345 kV line Project | ER12-2554 |
| Nebraska City – Sibley 345 kV line Project | ER12-2554 |
| … | |
| … | |

K

Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant. Company must submit a Section 205 filing to recover the cost of abandoned plant. Any such filing to recover the cost of an abandoned plant item shall be made no later than 730 days after the date that Company formally declares such plant item abandoned.

# 1 – Revenue Credits

# Attachment 1 - Revenue Credit Workpaper*

## Transource Missouri, LLC

|---|---|---|---|
| | **Account 454 - Rent from Electric Property** | Notes 1 & 3 | |
| 1 | Rent from FERC Form No. 1 | | - |
| | **Account 456 and 456.1** | Notes 1 & 3 | |
| 2 | Other Electric Revenues (Note 2) | | - |
| 3 | Professional Services | | - |
| 4 | Revenues from Directly Assigned Transmission Facility Charges (Note 2) | | - |
| 5 | Rent or Attachment Fees associated with Transmission Facilities | | - |
| 6 | Total Revenue Credits | Sum lines 2-5 + line 1 | - |

Note 1

All revenues booked to Account 454 that are derived from cost items classified as transmission-related will be included as a revenue credit. All revenues booked to Account 456 that are derived from cost items classified as transmission-related, and are not derived from rates under this transmission formula rate will be included as a revenue credit. Work papers will be included to properly classify revenues booked to these accounts to the transmission function. A breakdown of all Account 454 revenues by subaccount will be provided below, and will be used to derive the proper calculation of revenue credits. A breakdown of all Account 456 revenues by subaccount and customer will be provided and tabulated below, and will be used to develop the proper calculation of revenue credits.

Note 2

If the facilities associated with the revenues are not included in the formula, the revenue is shown below, but not included in the total above and explained in the Attachment 3.

Note 3 All Account 454 and 456 Revenues must be itemized below

| 222 | August | - | - | - | - | - |
| 223 | September | - | - | - | - | - |
| 224 | October | - | - | - | - | - |
| 225 | November | - | - | - | - | - |
| 226 | December | - | - | - | - | - |
| 227 | Average | | - | - | - | - |

Debt is equal to 112.18c less 112.19c plus 112.20c plus 112.21c, recognizing that 112.19c is entered into the Form 1 as a negative number and shall remain negative (i.e., it is not a double minus in the formula that mathematically would lead to adding in line 112.19c) so that Reacquired Bonds (Account 222) are subtracted from other long term debt outstanding and that Line 112.20c may contain both short term and long term indebtedness to affiliates and therefore any short term affiliate debt shall be removed from 112.20c before adding it into the above long term debt balance formula in the formula rate.

Preferred Stock is equal to 112.3c less any Preferred Treasury Stock plus any Preferred Additional Paid-in-Capital, recognizing that if there is any Preferred Treasury Stock or Preferred Additional Paid-in-Capital, then the respective amounts shall be appropriately disclosed in a footnote to the capital structure cost support in the formula rate template.

Common Equity is equal to 112.16c less 112.3c less 112.12c less 112.15c, recognizing that line 112.15c may be a positive or negative number and if it is positive, it shall be subtracted in the formula, and if it is entered as a negative in the Form 1, it shall be added (a double minus sign when subtracting a negative number) in the formula.

The cost of long-term debt for a Rate Year will be the sum of the interest expense and cost of issuances divided by the 13-month average long-term debt balance for the Rate Year. The cost of long-term debt issuances shall include long-term interest expense amounts recorded in the following FERC accounts:

| | | | | Amount |
|---|---|---|---|---|
| 228 | | Account 427 | Interest on Long-Term Debt (limited solely to interest expense for long-term debt reported in Accounts 221-224) (FF1, 117/62/c) | - |
| 229 | plus: | Account 428 | Amortization of Debt Discount and Expense (FF1, 117/63/c) | - |
| 230 | plus: | Account 428.1 | Amortization of Loss on Reacquired Debt (FF1, 117/64/c) | - |
| 231 | less: | Account 429 | Amortization of Premium on Debt (FF1, 117/65/c) | - |
| 232 | less: | Account 429.1 | Amortization of Gain on Reacquired Debt (FF1, 117/66/c) | - |
| 233 | plus: | Account 430 | Interest on Debt to Associated Companies but limited solely to the expense associated with long-term debt recorded in Account 223. | - |
| 234 | Total | | | - |

Interest expenses not directly related to the long-term bond issuances included in the capital structure will be excluded.

The cost of preferred stock will be preferred stock dividends (booked in FERC Account 437) divided by the average preferred stock balance for the rate year.

| | | |
|---|---|---|
| 235 | Preferred Dividends in Account 437 | - |
| 236 | 13 Month average balance of Preferred Stock | - |
| 237 | Cost of Preferred Stock | - |

# 5 – LTD

**Attachment 5 - Financing Costs for Long Term Debt using the Internal Rate of Return Methodology**
Transource Missouri, LLC
HYPOTHETICAL EXAMPLE

Assumes financing will be a 5 year loan with Origination Fees of $2.1 million and a Commitments Fee of 0.3% on the undrawn principal.
Consistent with GAAP, the Origination Fees and Commitments Fees will be amortized using the standard Internal Rate of Return formula below.
Each year, the amounts withdrawn, the interest paid in the year, Origination Fees, Commitments Fees, and total loan amount will be updated on this attachment
The IRR calculation will use the Excel Worksheet Function XIRR.

| | |
|---|---|
| **Total Loan Amount** | **$ 200,000,000** |

| | |
|---|---|
| **Internal Rate of Return[1]** | **4.902%** |

**Based on following Financial Formula[2]:**

$$\text{NPV} = 0 = \sum_{t=1}^{N} Ct/(1+IRR)^{pwr(t)}$$

| | |
|---|---|
| **Origination Fees** | |
| Underwriting Discount | - |
| Arrangement Fee | 400,000 |
| Upfront Fee | 700,000 |
| Rating Agency Fee | - |
| Legal Fees | 1,000,000 |
| Total Issuance Expense | **2,100,000** |
| **Annual Rating Agency Fee** | 160,000 |
| **Annual Bank Agency Fee** | 50,000 |
| **Revolving Credit Commitment Fee** | 0.300% |

| 6/30/2018 | Q4 | - | - | - | - | - | - |
| 9/30/2018 | Q1 | - | - | - | - | - | - |

1 The IRR is the Debt Cost shown on Line 88 of Appendix A.

2 The IRR is a discount rate that makes the net present value of a series of cash flows equal to zero. The IRR equation can only be solved through iterations performed by a computer program (i.e., NPV function with goal seek in a spreadsheet program).

# 6a – ADIT

**Transource Missouri, LLC**

**Attachment 6a - Accumulated Deferred Income Taxes (ADIT) Worksheet (Beginning of Year)**

**Beginning of Year**

# 7a – Interest Rate

Attachment 7

**True-Up Interest Calculation**

| | | | Avg. Ann Short Term Interest |
|---|---|---|---|
| | **Short term Interest Rate (Notes A & C)** | | |
| 1 | Other Interest Exp.(Notes, p.117) | (Note A) | - |
| 2 | Notes Payable (Acct. 231-daily balances wksht.) | (Note A) | - |
| 3 | No. of Months | | - |
| 4 | Annual Short-term Int Rate | (line 1 / line 2 ) | - |

| | | | Purusant to 35.19 (a) |
|---|---|---|---|
| | **FERC Quarterly Interest Rate** | | |
| 5 | Qtr 3 (Previous Year) | | - |
| 6 | Qtr 4 (Previous Year) | | - |
| 7 | Qtr 1 (Current Year) | | - |
| 8 | Qtr 2 (Current Year) | | - |
| 9 | Average of the last 4 quarters | (Lines 5-8 / 4) | - |
| 10 | Interest Rate Used for True-up adjustment (Note B) | | - |
| 11 | Monthly Interest Rate | (Line 10 / 12) | - |

**Note:**

A The short term interest rate is based on a 12 month rate ending June of the year in which the Annual Update is prepared, with denominator calculated using daily balances and the numerator based on Form 3Q.

B If the True-up amount on Attachment 7 is a surcharge to customers use the lower of line 4 and line 9, however, if line 4 is zero, then use line 9. Use line 9 if the True-up amount is a refund to customers.

C The numerator and denominator of the short-term interest rate calculation will reflect consistent debt components.

# 8 - Const Loan True-up

# Attachment 8 - Hypothetical Example of Final True-Up of Interest Rates and Interest Calculations for the Construction Loan
## Transource Missouri, LLC

**SUMMARY**

| YEAR | | Estimated Effective cost of debt used in true up | Final Effective cost of debt for the construction loan: | Revenue Requirement: Based on Estimated Effective cost of debt | Revenue Requirement: Based on Actual Effective cost of debt | Over (Under) Recovery | Monthly Interest Rate applicable over the ATRR period | Total Amount of Construction Loan Related True-Up included in rates effective Jan 2017 (Refund)/Owed |
|---|---|---|---|---|---|---|---|---|
| 2012 | | 7.18% | 6.50% | $ 2,500,000.00 | $ 2,400,000.00 | $ 100,000.00 | 0.550% | $ (148,288.33) |
| 2013 | | 6.8% | 6.50% | $5,000,000.00 | $5,150,000.00 | $ (150,000.00) | 0.560% | $ 209,670.43 |
| 2014 | | 7.2% | 6.50% | $8,300,000.00 | $8,200,000.00 | $ 100,000.00 | 0.540% | $ (131,109.09) |
| 2015 | | 7.3% | 6.50% | $12,300,000.00 | $12,000,000.00 | $ 300,000.00 | 0.580% | $ (368,656.73) |
| 2016 | * | 7.1% | 6.50% | $18,000,000.00 | $17,900,000.00 | $ 100,000.00 | 0.570% | $ (114,946.28) |
| | * | | | | | | | |
| 2016 | * | 6.50% | 6.50% | $25,000,000.00 | $25,000,000.00 | $ - | | |
| | | | | | | | | $ (553,329.99) |

***The Hypothetical Example:***
**** Assumes that the construction loan is retired on Sept 1, 2016***
***** Assumes permanent debt structure is put in place on Sept 1, 2016 with effective rate of 6.5%***

**Calculation of Applicable Interest Expense for each ATRR period**

| | | Transmission facility Contributions in Aid of Construction | Note 1 |

These depreciation rates will not change absent the appropriate filing at FERC.

Note 1: In the event a Contribution in Aid of Construction (CIAC) is made for a transmission facility, the transmission depreciation rates above will be weighted based on the relative amount of underlying plant booked to the accounts shown in lines 1-7 above and the weighted average depreciation rate will be used to amortize the CIAC.

# FORMULA RATE IMPLEMENTATION PROTOCOLS

The formula rate template ("Template") and these Formula Rate Implementation Protocols ("Protocols") together comprise the filed rate ("Formula Rate") of Transource Missouri, LLC ("Transource Missouri") for transmission revenue requirement determinations under the Southwest Power Pool ("SPP") Open Access Transmission Tariff ("OATT"). Transource Missouri shall follow the instructions specified in the Formula Rate to calculate annually its net revenue requirement, as set forth at page 1, line 4 of the Template ("Net Revenue Requirement"). The project-specific net revenue requirements determined under the Formula Rate are "up to" rates, i.e., ceiling rates, and permit Transource Missouri to discount the revenue requirement for a future project to the extent necessary to reflect the result of any competitive bidding on such a project. The Net Revenue Requirement (page 1, line 4 of the Template) shall be determined for January 1 to December 31 of a given calendar year (the "Rate Year"). The Formula Rate shall become effective for recovery of Transource Missouri's Net Revenue Requirement upon the effective date for incorporation into the SPP OATT through an appropriate filing with the Federal Energy Regulatory Commission ("FERC" or "Commission") under Section 205 of the Federal Power Act ("FPA").

## Section 1. Annual Projection

a. No later than September 30 preceding the first Rate Year, and each subsequent Rate Year, Transource Missouri shall determine its projected Net Revenue Requirement for the upcoming Rate Year in accordance with Transource Missouri's Formula Rate ("Annual Projection"). The Annual Projection shall include the True-up Adjustment described and defined in Section 2 below, if applicable. Transource Missouri shall cause an electronic version of the Annual Projection to be posted in both a Portable Document Format and fully-functioning Excel file at a publicly accessible location on SPP's internet website. Such posting shall include (i) all inputs in sufficient detail to identify the components of Transource Missouri's projected Net Revenue Requirement, and (ii) explanations of the bases for the projections and input data. If the date for making such posting of the Annual Projection should fall on a weekend or a holiday recognized by FERC, then the posting shall be made no later than the next business day. Transource Missouri shall electronically serve each Annual Projection upon the Service List.[1]

[1] As used in these protocols, "Service List" shall mean (i) the email list of SPP OATT Transmission Customers maintained by the SPP; (ii) any state regulatory agency with rate jurisdiction over a public utility located within the SPP footprint; and (iii) any consumer advocate agency authorized by state law to review and contest the rates for any such public utility, provided such consumer advocate agency requests to be placed on the Service List and provides an e-mail address to Transource Missouri.

b. To the extent Transource Missouri agrees to make changes in the Annual Projection for a given Rate Year, such revised Annual Projection shall be promptly posted at a publicly accessible location on SPP's internet website and a link to the website shall be electronically served upon the Service List. Changes posted prior to November 30 of the preceding Rate Year, or the next business day if November 30 is not a business day (or such later date as can be accommodated under SPP's billing practices), shall be reflected in the Annual Projection for the Rate Year; changes posted after that date will be reflected, as appropriate, in the True-up Adjustment for the Rate Year.

c. The Annual Projection, including the True-Up Adjustment, for each Rate Year shall be subject to review, challenge, true-up and refunds or surcharges with interest, to the extent and in the manner provided in these Protocols.

**Section 2. <u>True-up Adjustment</u>**

Transource Missouri will calculate the amount of under- or over-collection of its actual Net Revenue Requirement during the preceding Rate Year ("True-up Adjustment") after the FERC Form No. 1 data for that Rate Year has been filed with the Commission. The True-up Adjustment shall be the sum of components a and b, determined in the following manner:

a. Transource Missouri's projected Net Revenue Requirement collected during the previous Rate Year[2] will be compared to Transource Missouri's actual Net Revenue Requirement for the previous Rate Year calculated in accordance with Transource Missouri's Formula Rate and based upon (i) Transource Missouri's FERC Form No. 1 for that same Rate Year, (ii) any FERC orders specifically applicable to Transource Missouri's calculation of its annual revenue requirement, (iii) the books and records of Transource Missouri (which shall be maintained consistent with the FERC Uniform System of Accounts ("USoA")), (iv) FERC accounting policies and practices applicable to the calculation of annual revenue requirements under formula rates, and (v) any aspects of the SPP OATT Governing Documents that apply to the calculation of annual revenue requirements under individual transmission owner formula rates, [3] to determine any over- or under-recovery ("True-up Adjustment Over/Under Recovery").

[2] If the initial year of this rate schedule is a partial year, the initial projected Net Revenue Requirement will be divided by the number of months the Formula Rate is in effect to calculate the monthly projected cost of service to be collected each month of the first year. Similarly, the actual Net Revenue Requirement will be divided by the number of months the rate is in effect to calculate the actual cost of service to be collected each month of the first year. The first True-up Adjustment will compare the projected Net Revenue Requirement billed and the actual Net Revenue Requirement for that initial Rate Year.

[3] SPP OATT Governing Documents include the SPP OATT, Bylaws, Criteria, and Membership Agreements.

Transource Missouri will include a variance analysis of, at minimum, actual revenue requirement components of rate base, operating and maintenance expenses, depreciation expense, taxes, return on rate base, and revenue credits as compared to the corresponding components in the projected revenue requirement that was calculated for the prior Rate Year with an explanation of material changes.

b. Interest on any True-up Adjustment Over/Under Recovery of the actual Net Revenue Requirement shall be calculated in accordance with the Formula Rate true-up worksheet.

**Section 3. <u>Annual Update</u>**

a. On or before June 30 following each Rate Year, Transource Missouri shall calculate its actual Net Revenue Requirement and the True-up Adjustment as described in Section 2 ("Annual Update") for such Rate Year, and shall cause such Annual Update to be posted, in both a Portable Document Format and fully-functioning Excel format containing the populated template for that year's update, at a publicly accessible location on SPP's internet website, and electronically serve a link to the website on the Service List. In addition, the Annual Update shall be contemporaneously submitted as an informational filing with the FERC.

b. If the date for making the Annual Update posting should fall on a weekend or a holiday recognized by the FERC, then the posting shall be due on the next business day.

c. The date on which the last of the events listed in Section 3.a or 3.b occurs shall be that year's "Publication Date."

d. Together with the posting of the Annual Update, Transource Missouri shall cause to be posted on the SPP website the time, date and location for a stakeholder meeting with (i) any Eligible Customer under the SPP OATT; (ii) any regulatory agency with rate jurisdiction over a public utility located within the SPP footprint; (iii) any consumer advocate authorized by state law to review and contest the rates for any such public utility, or (iv) any party with standing under FPA Section 205 or 206 (collectively, "Interested Persons") in order for Transource Missouri to explain its Annual Update and to provide Interested Persons an opportunity to seek information and clarifications regarding the Annual Update ("Stakeholder Meeting"). The Stakeholder Meeting shall be held no less than twenty (20) business days and no more than thirty (30) business days after June 30.

e. The Annual Update for the Rate Year:

(i) Shall provide, via the Formula Rate worksheets, sufficiently detailed supporting documentation for data (and all adjustments thereto or allocations thereof) used in the Formula Rate that are not stated in the FERC Form No. 1;[4]

(ii) Shall provide notice of changes in Transource Missouri's accounting policies and practices from those in effect for the calendar year upon which the immediately preceding Annual Update was based that affect the Formula Rate or calculation of the Annual Update ("Accounting Change(s)"). Such notice shall include (i) those changes that, in Transource Missouri's reasonable judgment, could impact the Formula Rate or the calculations under the Formula Rate within the next three years; (ii) any changes in the SPP OATT from the provisions of the SPP OATT in effect during the calendar year upon which the most recent ATRR was based and that, in Transource Missouri's reasonable judgment, could impact the Formula Rate or the calculations under the Formula Rate within the next three years; and (iii) any change, and the dollar value of the change, in the classification of any transmission facility under Attachment AI of the SPP OATT (including the costs of any reclassified facility) that Transource Missouri has made in the applicable True-Up Adjustment or Annual Update.

(iii) Shall be subject to review and challenge in accordance with the procedures set forth in Sections 4, 5, and 6 of these Protocols.

(iv) Shall be subject to review and challenge in accordance with the procedures set forth in these Protocols with respect to the prudence of any costs and expenditures included for recovery in the Annual Update; provided, however, that nothing in these Protocols is intended to modify the Commission's applicable precedent with respect to the burden of going forward or burden of proof under formula rates in such prudence challenges; and

(v) Shall not seek to modify the Formula Rate and shall not be subject to challenge by any Interested Person seeking to modify the Formula Rate. *(i.e.*, any modifications to the Formula Rate will require, as applicable, an FPA Section 205 or Section 206 filing or

[4] It is the intent of the Formula Rate, including the supporting explanations and allocations described therein, that each input to the Formula Rate for purposes of determining the actual Net Revenue Requirement for a given Rate Year will be either taken directly from the FERC Form No. 1 or reconcilable to the FERC Form No. 1 by the application of clearly identified and supported information. If the referenced form is superseded, the successor form(s) shall be utilized and supplemented as necessary to provide equivalent information as that provided in the superseded form. If the referenced form is discontinued, equivalent information as that provided in the discontinued form shall be utilized.

initiation of a Section 206 investigation).

f. The following Formula Rate inputs shall be stated values to be used in the Formula Rate until changed pursuant to an FPA Section 205 or 206 proceeding: (i) rate of return on common equity ("ROE"); (ii) "Post-Employment Benefits other than Pensions" pursuant to Statement of Financial Accounting Standards No. 106, Employers' Accounting for Postretirement Benefits Other Than Pensions ("PBOP") charges; and (iii) the depreciation and/or amortization rates as set forth in Attachment 9 to the Formula Rate template.

g. **Example – Timeline for 2015 Annual Update**:

On or before September 30, 2013, Transource Missouri will determine the projected Net Revenue Requirement for the 2014 Rate Year, which is expected to be the first year that costs are recovered from SPP customers under the Formula Rate. Transource Missouri will post the Annual Projection for the 2014 Rate Year in accordance with Section 1 above. Transource Missouri will not determine a True-up Adjustment or post an Annual Update on August 1, 2014 if no costs have been recovered under the Formula Rate during 2013. On or before September 30, 2014, Transource Missouri will post the Annual Projection for the 2015 Rate Year. On or before August 1, 2015, Transource Missouri will post its first Annual Update, consisting of the True-up Adjustment for the 2014 Rate Year determined pursuant to Section 2 above. Such True-up Adjustment will be reflected in the Annual Projection of the Net Revenue Requirement for the 2016 Rate Year posted on or before September 30, 2015. The Annual Update posted August 1, 2015 will be subject to the customer review and challenge procedures described in Sections 4, 5, and 6 of these Protocols.

## Section 4. Annual Review Procedures

Each Annual Update shall be subject to the following review procedures ("Annual Review Procedures"):

a. Interested Persons shall have up to the latest of one hundred fifty (150) calendar days after the Publication Date, thirty (30) calendar days after the receipt of all responses to timely submitted information requests (unless such period is extended with the written consent of Transource Missouri), or thirty (30) calendar days after resolution of a dispute that does not result in the production of additional information ("Review Period"), to review the calculations and to notify Transource Missouri in writing of any specific challenges, including challenges related to

Accounting Changes, to the Annual Update ("Preliminary Challenge"). Transource Missouri shall promptly cause to be posted all Preliminary Challenges at a publicly accessible location on SPP's internet website and a link to the website will be electronically served upon the Service List.

Transource Missouri shall respond in writing to a Preliminary Challenge within twenty (20) business days of receipt, and its response shall notify the challenging party of the extent to which Transource Missouri agrees or disagrees with the challenge. If Transource Missouri disagrees with the Preliminary Challenge, its response shall include supporting documentation. Transource Missouri shall promptly cause to be posted responses to all Preliminary Challenges at a publicly accessible location on SPP's internet website and a link to the website will be electronically served upon the Service List.

b. Interested Persons shall have up to one hundred twenty (120) calendar days after each annual Publication Date (unless such period is extended with the written consent of Transource Missouri) to serve reasonable information requests on Transource Missouri. Information requests shall be limited to what is necessary to determine if: (i) Transource Missouri has properly calculated the Annual Update under review (including any corrections pursuant to Section 6); (ii) the costs included in the Annual Update are properly recordable and recorded, prudently incurred, and otherwise consistent with Transource Missouri's accounting policies, practices and procedures consistent with the USoA; (iii) the input data used in the Annual Update are accurate and correctly used in the Formula Rate; and (iv) the Formula Rate has been applied according to its terms, including the procedures in these Protocols. Information requests shall not solicit information concerning costs or allocations where the costs or allocation methods have been determined to be appropriate by FERC in the context of prior Transource Missouri Annual Updates, except that such information requests shall be permitted if they (i) seek to determine if there has been a change in circumstances, (ii) are in connection with corrections pursuant to Section 6, or (iii) relate to costs or allocations that have not previously been challenged and adjudicated by FERC. Information requests received will be posted at a publicly accessible location on SPP's internet website and a link to the website will be electronically served upon the Service List.

c. Transource Missouri shall make a good faith effort to respond to information requests pertaining to the Annual Update within ten (10) business days of receipt of such requests.

To the extent Transource Missouri and any Interested Person(s) are unable to resolve disputes related to information requests submitted in accordance with these Annual Review Procedures,

Transource Missouri or any Interested Person may petition the FERC to appoint an Administrative Law Judge as a discovery master to resolve the discovery dispute(s) in accordance with these Protocols and consistent with the FERC's discovery rules.

d. Preliminary Challenges, or Formal Challenges as described in Section 5 below, related to Accounting Changes shall be treated in the same manner under these Protocols as other challenges to the Annual Update. Failure to make a Preliminary Challenge with respect to an Accounting Change in an Annual Update shall not act as a bar with respect to a Formal Challenge with respect to that Annual Update, nor shall such failure bar a subsequent Preliminary Challenge related to a subsequent Annual Update to the extent such Accounting Change affects the subsequent Annual Update.

e. If a change made by Transource Missouri to its accounting policies, practices or procedures, or the application of the Formula Rate, is found by the FERC to be unjust, unreasonable, and/or unduly discriminatory or preferential, then the calculation of the charges to be assessed during the Rate Year then under review, and the charges to be assessed during any subsequent Rate Years, including any True-up Adjustments, shall not include such change, but shall include any remedy that may be prescribed by FERC in the exercise of its discretion as of the effective date of such remedy, to ensure that the Formula Rate continues to operate in a manner that is just, reasonable, and not unduly discriminatory or preferential.

**Section 5. Resolution of Challenges**

a. If Transource Missouri and any Interested Person have not resolved any Preliminary Challenge to the Annual Update within sixty (60) calendar days after the end of the Review Period (unless such period is extended with the written consent of Transource Missouri to continue efforts to resolve the Preliminary Challenge), such Interested Person may, within thirty (30) calendar days thereafter, file a challenge with the FERC, pursuant to 18 C.F.R. § 385.206 ("Formal Challenge"), which shall be served on Transource Missouri by electronic service on the date of such filing. Subject to any applicable confidentiality and Critical Energy Infrastructure Information restrictions, all information and correspondence produced by Transource Missouri pursuant to these Protocols may be included in any Formal Challenge or other FERC proceeding relating to the Formula Rate.

b. Any response by Transource Missouri to a Formal Challenge must be submitted to the FERC within thirty (30) calendar days of the date of the filing of the Formal Challenge, and shall be

served on the filing party(ies) and the Service List by electronic service on the date of such filing.

c. In any proceeding concerning a given year's Annual Update (including corrections) or Accounting Change(s), Transource Missouri shall demonstrate the justness and reasonableness of the rate resulting from its application of the Formula Rate by demonstrating that it has reasonably and accurately calculated the Annual Update and/or reasonably adopted and applied the Accounting Change.

d. Except as specifically provided herein, nothing herein shall be deemed to limit in any way the right of Transource Missouri to file unilaterally, pursuant to Section 205 of the FPA and the regulations thereunder, an application seeking changes to the Formula Rate or to any of the stated value inputs requiring a Section 205 filing under these Protocols (including, but not limited to, ROE, depreciation and amortization rates, and PBOPs), or the right of any other party or the Commission to seek such changes pursuant to Section 206 of the FPA and the regulations thereunder.

e. Transource Missouri may, at its discretion and at a time of its choosing, make a limited filing pursuant to Section 205 to modify stated values in the Formula Rate for amortization and depreciation rates, or PBOP rates. The sole issue in any such limited Section 205 proceeding shall be whether such proposed change(s) is just and reasonable, and it shall not address other aspects of the Formula Rate.

**Section 6. Changes to Annual Updates**

If Transource Missouri determines or concedes that corrections to the Annual Update are required, whether under Sections 4 or 5 of these Protocols, including but not limited to those requiring corrections to its FERC Form No. 1, or input data used for a Rate Year that would have affected the Annual Update for that Rate Year, Transource Missouri shall promptly notify the Service List, file a correction to the Annual Update with the FERC as an amended informational filing, and cause such information to be posted at a publicly accessible location on SPP's internet website. Such corrections shall be subject to review at the time they are made and shall be reflected in the next Annual Update, with interest. A corrected posting shall reset the deadlines under Section 4 and 5 of the Protocols for Interested Person review and the revised dates shall run from the posting date(s) for each of the corrections. The scope of review shall be limited to the aspects of the Formula Rate affected by the corrections. Interest on any over- or under-recovery due to corrections for preceding True-up Adjustments shall be calculated monthly on such over- or under-recovery from January 1 of

the corrected Rate Year through December 31 of the Rate Year in which such over- or under-recovery is reflected ("Correction Period"). That is equivalent to two years interest applied to over- or under- collection. The applicable monthly interest rates for the Correction Period for an over-recovery shall be determined in accordance with the Formula Rate true-up worksheet divided by twelve (12) for each month from the beginning of the Correction Period through December 31 of the Rate Year immediately preceding the Rate Year in which such over-recovery is reflected. The applicable monthly interest rates for the Correction Period for an under-recovery shall be the annual interest rate determined in accordance 18 C.F.R § 35.19a divided by twelve (12) for each month from the beginning of the Correction Period through December 31 of the Rate Year immediately preceding the Rate Year in which such under-recovery is reflected.

**Section 7. Construction Work in Progress**

a. *Accounting.* For each transmission project for which Transource Missouri has been authorized by a Commission order to include 100 percent of Construction Work in Progress ("CWIP") in transmission rate base ("CWIP Incentive Project"), Transource Missouri shall use the following accounting procedures to ensure that it does not recover an Allowance for Funds Used During Construction ("AFUDC") for such project.

(i) Transource Missouri shall assign each CWIP Incentive Project a unique Funding Project Number ("FPN") for internal cost tracking purposes.

(ii) Transource Missouri shall record actual construction costs to each FPN through work orders that are coded to correspond to the FPN for each CWIP Incentive project. Such work orders shall be segregated from work orders for transmission projects for which the Commission has not authorized Transource Missouri to include CWIP in rate base.

(iii) For each CWIP Incentive Project, Transource Missouri shall prepare monthly work order summaries of costs incurred under the associated FPN. These summaries shall show monthly additions to CWIP and plant in service and shall correspond to amounts recorded in Transource Missouri's FERC Form No. 1. Transource Missouri shall use these summaries as data inputs into the Annual Update calculated pursuant to Section 3. Transource Missouri shall make such work order summaries available upon request under the review procedures of Section 4.

(iv) When a CWIP Incentive Project, or portion thereof, is placed into service, Transource Missouri shall deduct from total CWIP the accumulated charges for work orders under the FPN for that project, or portion thereof. The purpose of this control process is to

ensure that expenditures are not double counted as both CWIP and as additions to plant.

(v) For transmission projects for which the Commission has not authorized Transource Missouri to include CWIP in rate base, Transource Missouri shall record AFUDC to be applied to CWIP and capitalized when the project is placed into service.

b. *Annual Reporting.* For each CWIP Incentive Project, Transource Missouri shall file a report with the Commission at the time of Transource Missouri's Annual Update that shall include the following information concerning each such project:

(i) the actual amount of CWIP recorded for each project;

(ii) any amounts recorded in related FERC accounts or subaccounts, such as AFUDC and regulatory liability;

(iii) the resulting effect of CWIP on the revenue requirement;

(iv) a statement of the current status of each project; and

(v) the estimated in-service date for each project.

Notes

A FERC Form No. 1 plus new investment EOY / BOY average.

B Transmission capital leases are excluded from transmission plant investment.
General Plant directly assigned to transmission includes

the transmission maintenance buildings and microwave

C assigned to transmission.

Cash working capital (CWC) assigned to transmission is one eighth of O&M allocated to transmission on
D Schedule 1, page 4 , line 9, columns 7-9.
Prepayments are the electric related prepayments booked to Account No. 165 and reported on the FERC Form No. 1, page 111, line 57.
Includes estimated lease payments for member facilities in the SPP system and O&M that is charged to specific
E lines or substations.
Line 5 - Regulatory Commission expenses directly related to transmission service, ISO filings, or
F transmission siting.
A&G costs directly allocated to MBPP - Costs split between MBPP Production and MBPP Transmission G
based on MBPP gross plant investment.
MBPP plant investment on page 3, line 2, column 7 is excluded in the percentage calculations on page 5, GP2, columns 6-8 for
H A&G and transmission O&M allocation
as these are directly allocated to MBPP through the project billing.
SD Gross receipts taxes paid in lieu of property tax with a portion directly assigned to Common Use System
I (CUS).
Payroll taxes, property taxes and the North Dakota transmission line tax are included in Account 408.1
Equity and long term debt balances are from Work paper #4. Cost of long debt is long term interest divided by
J long term debt balance .
K ROE will be supported in the original filing and no change in ROE may be made absent a filing with FERC.
Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by
L FERC.
M Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant. Utility must submit a Section 205 filing to recover the cost of abandoned plant.
N Recovery of Regulatory Asset permitted only for pre-commercial and formation expenses related to

projects and is subject to FERC approval before any Regulatory Asset amounts are included in rates.
Recovery of any other Regulatory Assets requires authorization from the Commission. A carrying

charge equal to the AFUDC rate will be applied to the Regulatory Asset prior to the rates becoming effective.

O DA in the allocator Column means that the cost is directly assigned to transmission consistent with the attached workpapers.

P AFUDC ceases when CWIP is recovered in rate base. No CWIP will be included in rate base absent FERC authorization

Q The dollar amount will be N/A absent specific FERC approval.

At which time, Basin Electric will add an additional worksheet showing the derivation of Postretirement Benefits Other Than Pensions (PBOP) expense/authorized PBOP expense.

s
:

A Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in page 1, line 1 . This value includes subsequent capital investments required to maintain the facilities to their original capabilities. Gross plant does not include CWIP, Unamortized Regulatory Asset or Unamortized Abandoned Plant.

B Project Net Plant is the Project Gross Plant Identified in Column 3 less the associated Accumulated Depreciation in page 2, column 4. Net Plant includes CWIP, Unamortized Abandoned Plant and any FERC approved Regulatory Asset.

C Project Depreciation Expense is the amount in Schedule 1, Page 4, line 11 that is associated with the specified project. Project Depreciation Expense includes the amortization of Abandoned Plant and any FERC approved

Regulatory Asset.

However, if FERC

| | |
|---|---|
| | grants accelerated depreciation for a project the depreciation rate authorized by FERC will be used instead of the rates shown on Schedule 7 for all other projects. Requires approval by FERC of incentive return applicable to the specified |
| D | project(s) Competitive Bid Concession, if any, will reflect outcome of SPP competitive developer selection process and |
| E | will be computed on a workpaper that will be provided as supporting documentation for each Annual Update and will be zero or a reduction to the revenue requirement. |

Additionally, the value and form of the rate reduction will be

| | |
|---|---|
| | reflected in a project sponsor agreement between BEPC and SPP. |
| F | True-Up Adjustment is calculated on the Schedule 4 - Project True-Up Template |
| G | Prior Year Sch 11 Point-to-Point Revenue as detailed on Sch 4 - True-up is allocated on a prorata basis to all Base Plan Projects. |
| H | The addition of new lines and the removal of outdated lines necessary to populate or remove data in the Schedule with the changes in future years does not require a Federal Power Act section 205 or 206 filing. However, the addition or removal of columns and formulas contained within those columns cannot be changed absent a Federal Power Act |

section 205 or 206 filing,
except to reflect the
addition of new lines

and the removal of outdated lines in the formulas.

| 8 | Incremental Return for 100 basis point increase in ROE | | | (Line 6 less line 7) | | | | #DIV/0! |

#D

9 Rate Base (line 1) IV/0!

| | | | |
|---|---|---|---|
| 10 | Incremental Return for 100 basis point increase in ROE divided by Rate Base | (Line 8 / line 9) | #DIV/0! |

Notes:

A Line 5 includes a 100 basis point increase in ROE that is used only to determine the increase in return and income taxes associated with a 100 basis point increase in ROE. Any actual incentive is calculated on Attachment 1 and must be approved by the Commission. For example, if the Commission were to grant a 137 basis point ROE incentive, the increase in return and taxes for a 100 basis point increase in ROE would be multiplied by 1.37 on Schedule 2 column 16.

Notes

FERC Form No. 1 plus new

A investment EOY / BOY average.

B Transmission capital leases are excluded from transmission plant investment.

C General Plant directly assigned to transmission includes the transmission maintenance buildings and microwave assigned to transmission.

D Cash working capital (CWC) assigned to transmission is one eighth of O&M allocated to transmission on Schedule 5, page 4 , line 9, columns 7-9.

Prepayments are the electric related prepayments booked to Account No. 165 and reported on the FERC Form No. 1, page 111, line 57.

E Includes estimated lease payments for member facilities in the SPP system and O&M that is charged to specific lines or substations.

F Line 5 - Regulatory Commission expenses directly related to transmission service, ISO filings, or transmission siting.

G A&G costs directly allocated to MBPP - Costs split between MBPP Production and MBPP Transmission based on MBPP gross plant investment.

H MBPP plant investment on page 3, line 2, column 7 is excluded in the percentage calculations on page 5, GP2, columns 6-8 for A&G and transmission O&M allocation as these are directly allocated to MBPP through the project billing.

I SD Gross receipts taxes paid in lieu of property tax with a portion directly assigned to Common Use System (CUS).

Payroll taxes, property taxes and the North Dakota transmission line tax are included in Account 408.1

J Equity and long term debt balances are from Work paper #4. Cost of long debt is long term interest divided by long term debt balance .

K ROE will be supported in the original filing and no change in ROE may be made absent a filing with FERC.

L Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC.

M Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the

Commission accepts or approves recovery of the cost of abandoned plant. Utility must submit a Section 205 filing to recover the cost of abandoned plant.

N Recovery of Regulatory Asset permitted only for pre-commercial and formation expenses related to projects and is subject to FERC approval before any Regulatory Asset amounts are included in rates. Recovery of any other Regulatory Assets requires authorization from the Commission. A carrying charge equal to the AFUDC rate will be applied to the Regulatory Asset prior to the rates becoming effective.

O DA in the allocator Column means that the cost is directly assigned to transmission consistent with the attached workpapers.

P AFUDC ceases when CWIP is recovered in rate base. No CWIP will be included in rate base absent FERC authorization

Q The dollar amount will be N/A absent specific FERC approval. At which time, Basin Electric will add an additional worksheet showing the derivation of Postretirement Benefits Other Than Pensions (PBOP) expense/authorized PBOP expense.

Total Regulatory Asset and Abandoned Plant Amortization Expense for Rate Year: -

Notes:

A Amounts should be directly assigned to pricing zones on Schedule 1

B Regulatory Assets and/or Abandoned Plant cannot be included absent FERC approval.

Amounts, percentages includable, and amortization periods cannot be added or changed absent FERC approval.

C The addition of new lines and the removal of outdated lines necessary to populate or remove data in the worksheet with the changes in future years does not require a Federal Power Act section 205 or 206 filing. However, the addition or removal of columns and formulas contained within those columns cannot be changed absent a Federal Power Act section 205 or 206 filing, except to reflect the addition of new lines and the removal of outdated lines in the formulas.

Notes:

Percentage recovery cannot be added or changed absent approval

A from FERC

CWIP amounts should be directly assigned to pricing zones on Schedule 1

B AFUDC ceases when CWIP is recovered in rate base. No CWIP will be included in rate base absent FERC authorization.

C Accounting procedures must be provided during the annual update to ensure that there is no duplicate recovery of CWIP and corresponding AFUDC capitalized.

D The addition of new lines and the removal of outdated lines necessary to populate or remove data in the worksheet with the changes in future years does not require a Federal Power Act section 205 or 206 filing. However, the addition or removal of columns and formulas contained within those columns cannot be changed absent a Federal Power Act section 205 or 206 filing, except to reflect the addition of new lines and the removal of outdated lines in the formulas.

Note:

The addition of new lines and the removal of outdated lines necessary to populate or remove data in the workpaper with the changes in future years does not require a Federal Power Act section 205 or 206 filing. However, the addition or removal of columns and formulas contained within those columns cannot be changed absent a Federal Power Act section 205 or 206 filing, except to reflect the addition of new lines and the removal of outdated lines in the formulas.

Note:
The addition of new lines and the removal of outdated lines necessary to populate or remove data in the workpaper with the changes in future years does not require a
Federal Power Act section 205 or 206 filing. However, the addition or removal of columns and formulas contained within those columns cannot be changed absent a
Federal Power Act section 205 or 206 filing, except to reflect the addition of new lines and the removal of outdated lines in the formulas.

**BASIN ELECTRIC POWER COOPERATIVE**
**FORMULA RATE IMPLEMENTATION PROTOCOLS**

The formula rate template ("Template") and these Formula Rate Implementation Protocols ("Protocols") together comprise the filed rate ("Formula Rate") of Basin Electric Power Cooperative ("BEPC") for transmission revenue requirement determinations under the Southwest Power Pool, Inc. ("SPP") Open Access Transmission Tariff ("Tariff"). BEPC shall follow the instructions specified in the Formula Rate to calculate annually its Annual Transmission Revenue Requirement ("ATRR"). Recovery of costs associated with existing facilities and new facilities shall be consistent with the Formula Rate and Attachment AI and Attachment J, respectively, of the Tariff. The ATRR shall be determined for January 1 to December 31 of a given calendar year (the "Rate Year"). The Formula Rate shall become effective for recovery of BEPC's ATRR upon the effective date authorized by the Federal Energy Regulatory Commission ("Commission") under Section 205 of the Federal Power Act ("FPA").

**Section 1.** **Annual Update**

a. No later than 10 days after the Commission accepts for filing of the Formula Rate, BEPC shall post its projected ATRR for the 2015 Rate Year in accordance with BEPC's Formula Rate ("Annual Update"). Not later than September 30 of 2015 and each subsequent Rate Year, BEPC shall post its Annual Update for the following Rate Year. Beginning in 2016, the Annual Update shall include the True-up Adjustment for the preceding Rate Year as described and defined in

Section 2 below, if applicable. The posting shall be accomplished as follows:

BEPC shall cause an electronic version of the Annual Update to be posted in

both a Portable Document Format and fully-functioning Excel file at a publicly accessible location on the SPP Open Access Same-Time Information System ("OASIS"). Such posting shall include (i) all inputs in sufficient detail to identify the components of BEPC's projected ATRR, and (ii) explanations of the bases for the projections and input data. If the last date for making such posting of the Annual Update should fall on a weekend or a holiday recognized by the Commission, then the posting shall be made no later than the next business day. BEPC shall provide each Annual Update to SPP to serve electronically upon the Service List.[1] The date of the posting shall be the Publication Date.

b. Together with the posting of the Annual Update, BEPC shall cause to be posted on the SPP OASIS the time, date and location for a stakeholder meeting with (i) any Eligible Customer under the Tariff; (ii) any regulatory agency with rate jurisdiction over a public utility located within the SPP footprint; (iii) any consumer advocate authorized by state law to review and contest the rates for any such public utility, or (iv) any party with standing under FPA Section 205 or 206 (collectively, "Interested Parties") in order for BEPC to explain its Annual Update and to provide Interested Parties an opportunity to seek information and clarifications regarding the Annual Update ("Stakeholder Meeting"). The initial Stakeholder Meeting shall be held within thirty (30) days after the Commission accepts the Formula Rate for filing. Thereafter, the Stakeholder Meeting shall be held no earlier than October 10 and no later than October 30. BEPC shall provide remote access to the Stakeholder Meeting.

c. To the extent BEPC agrees to make changes in the Annual Update for a given Rate Year, BEPC will coordinate with SPP to ensure such revised Annual Update shall be promptly posted at a publicly accessible location on SPP's OASIS and a link to the OASIS shall be electronically served upon the Service List. Changes posted prior to November 30 of the preceding Rate Year, or the next business day if November 30 is not a business day (or such later date as can be accommodated under SPP's billing practices), shall be reflected in the Annual Update for the Rate Year. Changes posted after that date will be reflected in the Annual True-Up for the Rate Year if the change results in a change in BEPC's actual ATRR for that year.

d. The Annual Update for each Rate Year shall be subject to review, challenge, true-up and refunds or surcharges with interest, to the extent and in the manner provided in these Protocols.

e. On or before December 15 of each year, BEPC will submit an informational filing to the Commission and will provide to SPP, for posting on SPP's OASIS, BEPC's final projected ATRR that will become effective January 1 of the following year. BEPC will submit all Annual Update informational filings in the same docket assigned to BEPC's initial informational filing (Docket No. ER15-1775.[2] BEPC will provide the Annual Update informational filing to SPP to serve on the Service List.

---

1

As used in these Protocols, "Service List" shall mean the list of email addresses maintained by SPP of Interested Parties, provided that such Interested Parties request to be added to the Service List through the "Exploder List" link on the SPP OASIS. As of

January 2016, the Exploder List was titled "Formula Rate Information Notification" and could be accessed at https://www.spp.org/stakeholder-center/exploder-lists/. Interested Parties may include (i) SPP Tariff Transmission Customers; (ii) any state regulatory agency with rate jurisdiction over a public utility located within the SPP footprint; and (iii) any consumer advocate agency authorized by state law to review and contest the rates for any such public utility.

[2] If Commission policy changes and a new docket is assigned to each annual informational filing, BEPC will request that SPP post the docket number assigned to each informational filing on the SPP OASIS within 5 business days of receiving the new docket number.

**Section 2. True-Up Adjustment**

BEPC will calculate the amount of under- or over-collection of its actual ATRR during the preceding Rate Year ("True-up Adjustment"). The True-up Adjustment shall be the sum of components a and b, determined in the following manner:

a. BEPC's actual revenues collected during the previous Rate Year[3] will be compared to BEPC's actual ATRR for the previous Rate Year calculated in accordance with BEPC's Formula Rate and based upon (i) BEPC's FERC Form No. 1 for that same Rate Year, (ii) any Commission orders specifically applicable to BEPC's calculation of its annual revenue requirement, (iii) the books and records of BEPC (which shall be maintained consistent with the FERC Uniform System of Accounts ("USofA")), (iv) FERC accounting policies and practices applicable to the calculation of annual revenue requirements under formula rates, and (v) any aspects of the Tariff Governing Documents that apply to the calculation of annual revenue requirements under individual transmission owner formula rates,[4] to determine any over- or under-recovery ("True-up Adjustment"). BEPC will include a variance analysis of, at minimum, actual

revenue requirement components of rate base, operating and maintenance expenses, depreciation expense, taxes, return on rate base, and revenue credits as

compared to the corresponding components in the projected ATRR that was calculated for the previous Rate Year with an explanation of material changes.

b. Interest on any over-or under-recovery shall be calculated in accordance with 18 C.F.R. § 35.19a, and shall be accrued from the date on which the over- or underrecovery occurs to the date on which the refunds or surcharges are applied.

---

[3] b.

[4]

**Section 3.**

a.

Since the initial year of this rate schedule is a partial year, the actual revenues collected and the Net Revenue Requirement will be converted to monthly amounts. The difference between the monthly actual revenues collected and the monthly Net Revenue Requirement will be multiplied by the number of months the Formula Rate was in effect to calculate the True-up Adjustment.

SPP Governing Documents include the Tariff, Bylaws, Criteria, and Membership Agreements.

shall calculate its actual ATRR and the True-Up Adjustment as described in Section 2 ("Annual True-Up") for such Rate Year, and shall cause such Annual True-Up to be posted, in both a Portable Document Format and fully-functioning Excel format containing the populated template for that year's update, at a publicly accessible location on SPP's OASIS. BEPC also shall cause its FERC Form No. 1 for that Rate Year to be posted on the SPP OASIS by June 1. The information included with the Annual True-Up should be sufficient such that Interested Parties may replicate the calculations. BEPC shall coordinate with SPP to ensure a link to the SPP OASIS is served electronically upon the Service List.

If June 1 falls on a weekend or a holiday recognized by the Commission, then

**Annual True-Up**

Beginning in 2016, on or before June 1 following each Rate Year, BEPC

the postings shall be due not later than the next business day.

c. The date on which the posting occurs shall be that year's "Annual True-Up Publication Date."

d. Together with the posting of the Annual True-Up, BEPC shall cause to be posted on the SPP OASIS the time, date and location for a stakeholder meeting with Interested Parties in order for BEPC to explain its Annual True-Up and to provide Interested Parties an opportunity to seek information and clarifications regarding the Annual True-Up ("Stakeholder Meeting"). The Stakeholder Meeting shall be held no earlier than June 10 and no later than June 30. BEPC shall provide remote access to the Stakeholder Meeting.

e. The Annual True-Up for the Rate Year:

(i) Shall provide, via the Formula Rate worksheets, sufficiently detailed supporting documentation for data (and all adjustments thereto or allocations thereof) used in the Formula Rate that are not stated in the FERC Form No. 1;[5]

(ii) Shall provide notice of any change in BEPC's accounting policies and practices from those in effect for the Rate Year upon which the immediately preceding Annual Update was based that affect the Formula Rate or calculation of the Annual True-Up ("Accounting Change").

Accounting Changes include: (1) the initial implementation of an accounting standard or policy; (2) the initial implementation of

accounting practices for unusual or unconventional items for which the Commission has not provided specific accounting direction; (3) corrections of errors and prior period adjustments; (4) the implementation of new estimation methods or policies that change prior estimates; and (5) changes to income tax elections. To the extent these Accounting Changes affect the inputs to the Formula Rate, BEPC will provide a narrative explanation of the individual impact of those items on charges billed under the Formula Rate and will identify items included in the Annual True-Up at an amount other than on a historic cost basis (*e.g.*, fair value adjustments).

(iii) Shall identify any reorganization or merger transaction during the previous year and provide an explanation of the effect of the accounting for such transactions on inputs to the Formula Rate.

(iv) Shall be subject to review and challenge in accordance with the procedures set forth in Section 4 of these Protocols.

(v) Shall be subject to review and challenge in accordance with the procedures set forth in these Protocols with respect to the prudence of any costs and expenditures included for recovery in the Annual True-Up; provided, however, that nothing in these Protocols is intended to modify the Commission's applicable precedent with respect to the burden of

going forward or burden of proof under formula rates in such prudence challenges; and

(vi) Shall not seek to modify the Formula Rate and shall not be subject to challenge by any Interested Party seeking to modify the Formula Rate. *(i.e.,* any modifications to the Formula Rate will require, as applicable, an FPA Section 205 or Section 206 filing or initiation of a Section 206 investigation).

f. The following Formula Rate inputs shall be stated values to be used in the Formula Rate until changed pursuant to an FPA Section 205 or 206 proceeding: (i) rate of return on common equity ("ROE"); (ii) "Post-Employment Benefits other than Pensions" pursuant to Statement of Financial Accounting Standards No. 106, Employers' Accounting for Postretirement Benefits Other Than Pensions ("PBOP") charges; and (iii) the depreciation and/or amortization rates as set forth in Schedule 7 to the Template.

g. If BEPC constructs a transmission project that is allocated using a regional cost sharing mechanism, it shall coordinate with other transmission owners using formula rates to establish the revenue requirements for recovery of the costs of transmission projects that use the same regional cost sharing mechanism to the extent such transmission owners are required to do so pursuant to their formula rate implementation protocols. Such coordination shall include participation in a joint informational meeting to enable all Interested Parties to understand how the transmission owners are implementing their formula rates for recovering the costs of such projects. Notice of Joint informational meetings shall be posted on the SPP OASIS and served electronically on the Service List by SPP no less than 7 days prior to such meeting.

---

[5] It is the intent of the Formula Rate, including the supporting explanations and allocations described therein, that each input to the Formula Rate for purposes of determining the actual Net Revenue Requirement for a given Rate Year will be either taken directly from the FERC Form No. 1 or reconcilable to the FERC Form No. 1 by the application of clearly identified and supported information. If the referenced form is superseded, the successor form(s) shall be utilized and supplemented as necessary to provide equivalent information as that provided in the superseded form. If the referenced form is discontinued, equivalent information as that provided in the discontinued form shall be utilized.

**Section 4. Information Requests, Challenge Procedures and Annual Review Procedures**

Each Annual True-Up and each Annual Update shall be subject to the following procedures:

a. Interested Parties shall have up to ninety (90) calendar days after each Publication Date (unless such period is extended with the written consent of BEPC) to serve reasonable information requests on BEPC. Any delay in the Publication Date will therefore result in an equivalent extension of time for such requests. Information requests shall be limited to what is necessary to determine: (i) that input data under the Formula Rate are properly recorded in any underlying workpapers; (ii) that BEPC has properly applied the Formula Rate and the procedures in the Protocols; (iii) the accuracy of data and the consistency with the Formula Rate of the actual Net Revenue Requirement (including any True-Up Adjustment) under review; (iv) the extent of accounting changes that affect Formula Rate inputs; and (v) the reasonableness of projected costs included in the projected capital addition expenditures. Information requests shall not solicit information concerning costs or allocations where the

costs or allocation methods have been determined to be appropriate by

Commission in the context of prior BEPC Annual Updates, except that such

information requests shall be permitted if they (i) seek to determine if there has been a change in circumstances or (ii) are in connection with corrections pursuant to Section 6.

b. BEPC shall make a good faith effort to respond to information requests within fifteen (15) business days of receipt of such requests. BEPC shall not assert that responses to information requests are subject to settlement privilege; however, BEPC may require that Interested Parties execute a non-disclosure agreement to obtain access to material that BEPC deems commercially sensitive or that contains Critical Energy Infrastructure Information as that term is defined in 18 CFR§ 388.113(c)(1).

c. Interested Parties shall have up to the latest of one hundred twenty (120) calendar days after the Publication Date of the Annual True-Up or the Annual Update, thirty (30) calendar days after the receipt of all responses to timely submitted information requests (unless such period is extended with the written consent of BEPC), or thirty (30) calendar days after resolution of a dispute that does not result in the production of additional responses to information requests ("Review Period"), to review the calculations and to notify BEPC in writing of any specific challenges, including challenges related to Accounting Changes and either the Annual True-Up or the Annual Update ("Preliminary Challenge"). BEPC shall promptly cause to be posted all Preliminary Challenges at a publicly accessible location on SPP's OASIS and a link to the SPP OASIS will be electronically served upon the Service List.

BEPC shall respond in writing to a Preliminary Challenge within twenty (20) business days of receipt, and its response shall notify the challenging party of the extent to which BEPC agrees or disagrees with the challenge. If BEPC disagrees with the Preliminary Challenge, its response shall include supporting documentation. BEPC shall promptly cause to be posted responses to all Preliminary Challenges at a publicly accessible location on SPP's OASIS and a link to the SPP OASIS will be electronically served upon the Service List.

d. BEPC and any Interested Parties who have raised Preliminary Challenges shall attempt in good faith to resolve them. If requested, BEPC will appoint a senior representative to work with the Interested Parties toward a resolution of the Preliminary Challenge. Any refunds or additional amounts billed resulting from the resolution of a Preliminary Challenge to an Annual Update shall be applied pursuant to Section 1.b. Any refunds or additional amounts billed resulting from the resolution of a Preliminary Challenge to an Annual True-Up shall be applied to the True-Up Adjustment in the next Annual Update.

e. If BEPC and an Interested Party cannot resolve a Preliminary Challenge to an Annual Update, the Interested Party may file a Formal Challenge with the Commission. An Interested Party shall have until March 31 (or the next business day if March 31 falls on a weekend or holiday recognized by the Commission) following the Review Period to file a Formal Challenge. A Formal Challenge shall:

i. Clearly identify the action or inaction which is alleged to violate the filed

Formula Rate or these Protocols;

ii. Explain how the action or inaction violates the filed Formula Rate or these Protocols;

iii. Set forth the business, commercial, economic or other issues presented by the action or inaction as such relate to or affect the party filing the Formal Challenge, including:

a. The extent or effect of an Accounting Change;

b. Whether the Annual Update or Annual True-Up fails to include data properly recorded in accordance with these Protocols;

c. The proper application of the Formula Rate and procedures in these Protocols;

d. The accuracy of data and consistency with the Formula Rate of the charges shown in the Annual True-Up or projected ATRR;

e. The prudence of actual costs and expenditures;

f. The effect of any change to the underlying Uniform System of Accounts, FERC Form No. 1 or any other Commission-filed form that is used in calculating ATRR-related calculations; and

g. Any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the Formula Rate.

iv. Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;

v. State whether the issues presented are pending in an existing Commission proceeding or a proceeding in any other forum in which the filing party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;

vi. State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that relief;

vii. Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the filing party, including, but not limited to, contracts and affidavits; and

viii. State whether the filing party utilized the Preliminary Challenge procedures described in these Protocols to dispute the action or inaction raised by the Formal Challenge, and, if not, describe why not.

f. The Formal Challenge must be filed in the same docket as BEPC's Annual Update Informational Filing and served on BEPC. Service on BEPC must be simultaneous with filing at the Commission. Simultaneous service can be accomplished by electronic mail in accordance with 18 C.F.R. § 385.2010(f)(3), facsimile, express delivery, or messenger.

g. Any response by BEPC to a Formal Challenge must be submitted to the Commission within thirty (30) calendar days of the date of the filing of the Formal Challenge, and shall be served on the filing party(ies) and the Service List by electronic service on the date of such filing.

h. If the last date for any of the above activities should fall on a weekend or a holiday recognized by the Commission, then the deadline shall be extended to the next business day.

i. In any Commission proceeding concerning an Annual Update, (including corrections) Annual True-Up or Accounting Change(s), BEPC shall support its assertion that the ATRR resulting from its application of the Formula Rate is just and reasonable by demonstrating that it has reasonably and accurately calculated the Annual Update or Annual True-Up and/or reasonably adopted and applied the Accounting Change. BEPC will bear the burden of demonstrating the justness and reasonableness of the ATRR resulting from its application of the Formula Rate.

j. If an Accounting Change or the application of the Formula Rate to BEPC's costs is found by the Commission to be unjust, unreasonable, and/or unduly discriminatory or preferential, then the calculation of the charges to be assessed during the Rate Year then under review, and the charges to be assessed during any subsequent Rate Years, including any True-Up Adjustments, shall not

include such change, but shall include any remedy that may be prescribed by the Commission in the exercise of its discretion as of the effective date of such

remedy, to ensure that the Formula Rate continues to operate in a manner that is just, reasonable, and not unduly discriminatory or preferential; provided that this limitation shall not apply if BEPC demonstrates that circumstances have changed since the Commission's decision.

**Section 5. Rate Filings**

a. Nothing stated herein shall be deemed to limit in any way the right of BEPC to cause SPP to file unilaterally on its behalf, pursuant to Section 205 of the FPA and the regulations thereunder, an application seeking changes to the Formula Rate or to any of the stated value inputs requiring a Section 205 filing under these Protocols (including, but not limited to, ROE, depreciation and amortization rates, and PBOPs); or the right of any other Interested Party to seek such changes or file a complaint concerning the Formula Rate or the application of the Formula Rate to BEPC's costs pursuant to Section 206 of the FPA and the regulations thereunder.

b. BEPC may make limited Section 205 filings to change depreciation rates, amortization periods, the amount of expense for Post-Employment Benefits Other than Pensions, and/or ROE incentives for SPP regional projects, in which the sole issue for examination shall be whether the proposed change(s) are just and reasonable, and not unduly discriminatory.

c. The party filing pursuant to Sections 205 or 206 bears the standard burden of proof associated with those filings.

**Section 6. Changes to Annual Updates**

If BEPC makes a change to the actual ATRR, including but not limited to a change requiring correction to its FERC Form No. 1 or input data used for a Rate Year that would have affected the Annual True-Up for that Rate Year, BEPC shall promptly (1) request that SPP notify the Service List; (2) file a change to the Annual Update with the Commission as an amended informational filing or compliance filing, as appropriate; and (3) cause such information to be posted at a publicly accessible location on SPP's OASIS. Such changes shall be subject to review at the time they are made and shall be reflected in the next Annual Update, with interest. A changed posting shall reset the deadlines established by these Protocols for Interested Party review and the revised dates shall run from the Publication Date for the change. The scope of review shall be limited to the aspects of the Annual Update affected by the corrections.

**Section 7. Example Timelines for 2015 and 2016 Annual True-ups and Annual Updates**

Calendar Year 2015

| | |
|---|---|
| Not later than 10 days after Commission accepts the Formula Rate for filing | October 10 - October 30 November 30 |
| Within 30 days after Commission accepts the Formula Rate for filing | |
| On or before September 30 | |

Annual Update for 2015 is posted and served. Date posted is the Publication Date. Date of Stakeholder Meeting is posted.

Stakeholder Meeting for 2015 Annual Update.

Annual Update for 2016 Rate Year is posted and served. Date for Stakeholder Meeting is posted.

Stakeholder Meeting for 2016 Annual Update.

Deadline for BEPC to make changes to Annual Update for the 2016 Rate Year. Changes posted

| | |
|---|---|
| | |
| | |

| | |
|---|---|
| | |
| | after the deadline will be included in the following Rate Year's True-Up Adjustment if the change results in a change in BEPC's actual ATRR. |
| December 15 | BEPC makes an informational filing of its ATRR for the following Rate Year. |

| | |
|---|---|
| Calendar Year 2016 | |
| On or before June 1 | BEPC calculates and SPP posts and serves Annual True-Up. The Annual True-Up includes |
| | 2015 actual ATRR and True-Up Adjustment for the 2015 Rate Year. Date posted is the Publication Date. FERC Form No. 1 and date of |
| June 10 - June 30 | Stakeholder Meeting are posted.<br>Stakeholder Meeting. |
| On or before September 30 | BEPC posts Annual Update for 2017 Rate Year, which includes True-Up Adjustment from 2015 |
| October 10 - October 30 | Rate Year and Projected ATRR for the 2017 Rate Year. Date of Stakeholder Meeting is posted.<br>Stakeholder Meeting. |
| November 30 | Deadline for BEPC to make changes to Annual Update for the 2017 Rate Year. Changes posted after the deadline will be included in the 2017 |
| | Rate Year True-Up Adjustment and reflected in the Annual Projection Update for the 2018 Rate Year if the change results in a change in BEPC's actual ATRR. |
| December 15 | BEPC makes an informational filing of its ATRR for the following Rate Year. |

Attachment H - Cash

Formula Rate Template
Heartland Consumers Power District
Cash Flow, Page 3 of 4
For the 12 Months Ending December 31, 20XX

| Note Letter | |
|---|---|
| A | The utility's maximum monthly megawatt load (60-minute integration) for RQ service at time of applicable pricing zone coincident monthly peaks. RQ service is service which the supplier plans to provide on an on-going basis (i.e., the supplier includes projected load for this service in its system resource planning). |
| B | Includes LF, IF, LU, IU service. LF means "firm service" (cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions), and long-term (duration of at least five years); does not meet definition of RQ service. IF is "firm service" for a term longer than one but less than five years. LU is service from a designated generating unit, of a term no less than five years. LI is service from a designated generating unit for a term between one and five years. Measured at time of applicable pricing zone coincident monthly peaks. |
| C | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| D | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| E | The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff, if any. |
| F | Line 5 - EPRI Annual Membership Dues, all Regulatory Commission Expenses, and non-safety related advertising. Line 5a - Regulatory Commission Expenses directly related to transmission service, |

| | |
|---|---|
| | ISO filings, or transmission siting. |
| G | Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere. |
| H | The Margin Requirement is the margin the utility uses in calculating rates applicable to its native load sales. The Margin Requirement Heartland uses is based on the Fixed Charge Coverage Ratio ("FCCR") approved for use in setting rates by the Heartland Board of Directors. Heartland's Margin Requirement is fixed at 20% and will not be changed absent a Section 205 filing. |
| I | Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including all of Account No. 561.1, 561.2, 561.3 and 561.BA. |
| J | Removes transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test For Heartland this amount represents the step-up transmission facilities associated with the Laramie River Station. |
| K | Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For Heartland, these amounts are related to TP II - East River facilities and improvements made to to Nebraska Public Power District's transmission system through the Missouri Basin Power Project. These transmission assets are on the HCPD balance sheet until 2017 but the transmission assets are paid for by East River so are not includable in the HCPD ATRR. |
| L | If the utility has more employees assigned to A&G than to all other functions combined, set the W&S allocator at page 3, line 23 equal to the amount of transmission plant includable in ISO rates divided by the sum of total gross production, transmission, and distribution plant. All of Heartland's employees are assigned to A&G. After 2017 there will be no amount included from TP II on this line. assigned to A&G. After 2017 there will be no amount included from TP II on this line. |

M Enter dollar amounts.

N Line 33 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456 and all other uses are to be included in the divisor.

O Includes income related only to transmission facilities, such as pole attachments, rentals and special use.

P Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking - the revenues are included in line 4 page 1 and the loads are included in line 13, page 1. Grandfathered agreements whose rates have not been changed to eliminate or mitigate pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.

Q The revenues credited on page 1 lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template.

R Calculated using end of year projected amounts.

S Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements. revenue requirements.

T Debt service calculation is supported by the debt service work paper and is comprised of the gross plant allocator portion of the Heartland long-term debt plus the transmission-related portion of the debt service for the Public Power Generation Agency payments. The work paper calculates the transmission only debt service that is entered on line 9, page 2 0f 4 so it is 100% directly assigend to the ATRR.

U Includes amounts recorded to accounts 428 and 429.

V Calculated using 13 month average balance. Gross Plant in Service amounts exclude Asset Retirement Obligation amounts unless

| | |
|---|---|
| | authorized by FERC. |
| W | For the 2016, 2017, and 2018 rate years, per the settlement agreement in FERC Docket No. ER15-1777. An annual amount of $50,000 for each rate year of 2016, 2017, and 2018. |

| Worksheet K, Actuals Page 4 of 4 | | | | | | | | | | | |
| For the 12 months ending 12/31/20xx | | | | | | | | | | | |
| | | | | | | | | | | | |
| No te | | | | | | | | | | | |
| Let ter | | | | | | | | | | | |
| A | | The utility's maximum monthly megawatt load (60-minute integration) for RQ service at time of applicable pricing zone coincident monthly peaks. | | | | | | | | | |
| | | RQ service is service which the supplier plans to provide on an on-going basis (i.e., the supplier includes projected load for | | | | | | | | | |
| | | this service in its system resource planning). | | | | | | | | | |
| B | | Includes LF, IF, LU, IU service. LF means "firm service" (cannot be interrupted for economic reasons and is intended to remain reliable | | | | | | | | | |
| | | even under adverse conditions), and long-term (duration of at least five years); does not meet definition of RQ service. IF is "firm service" | | | | | | | | | |
| | | for a term longer than one but less than five years. LU is service from a designated generating unit, of a term no less than five years. | | | | | | | | | |
| | | LI is service from a designated generating unit for a term between one and five years. Measured at time of applicable pricing zone coincident monthly peaks. | | | | | | | | | |
| C | | LF as defined above at time of applicable pricing zone coincident monthly peaks. | | | | | | | | | |
| D | | LF as defined above at time of applicable pricing zone coincident monthly peaks. | | | | | | | | | |

| | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| E | | The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff, if any. | | | | | | | | |
| F | | Line 5 - EPRI Annual Membership Dues, all Regulatory Commission Expenses, and non-safety | | | | | | | | |
| | | related advertising. Line 5a - Regulatory Commission Expenses directly related to transmission service, | | | | | | | | |
| | | ISO filings, or transmission siting. | | | | | | | | |
| G | | Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. | | | | | | | | |
| | | Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula | | | | | | | | |
| | | Template, since they are recovered elsewhere. | | | | | | | | |
| H | | The Margin Requirement is the margin the utility uses in calculating rates applicable to its native load sales. The Margin Requirement | | | | | | | | |
| | | Heartland uses is based on the Fixed Charge Coverage Ratio ("FCCR") approved for use in setting rates by the Heartland Board of Directors. | | | | | | | | |
| | | Heartland's Margin Requirement is fixed at 20% and will not be changed absent a Section 205 filing. | | | | | | | | |
| I | | Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including all of Account No. 561.1, 561.2, | | | | | | | | |
| | | 561.3 and 561.BA. | | | | | | | | |
| J | | Removes transmission plant determined by Commission order to be state-jurisdictional according to the seven-factor test | | | | | | | | |
| | | For Heartland this amount represents the step-up transmission facilities associated with the Laramie River Station. | | | | | | | | |
| K | | Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, | | | | | | | | |
| | | which are deemed to included in OATT ancillary services. For Heartland, these amounts are related to TP II - East River facilities and improvements made to | | | | | | | | |
| | | to Nebraska Public Power District's transmission system through the Missouri Basin Power Project. These transmission assets are | | | | | | | | |
| | | on the HCPD balance sheet until 2017 but the transmisssion assets are paid for by East River so are not includable in the HCPD ATRR. | | | | | | | | |
| L | | If the utility has more employees assigned to A&G than to all other functions combined, set the W&S | | | | | | | | |
| | | allocator at page 3, line 23 equal to the amount of transmission plant includable in ISO rates divided by the sum of total gross production, | | | | | | | | |
| | | transmission, and distribution plant. All of Heartland's employees are assigned to A&G. After 2017 there will be no amount included from TP II on this line. | | | | | | | | |
| | | assigned to A&G. After 2017 there will be no amount included from TP II on this line. | | | | | | | | |
| M | | Enter dollar amounts. | | | | | | | | |
| N | | Line 33 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account | | | | | | | | |

| | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | | No. 456 and all other uses are to be included in the divisor. | | | | | | | | | |
| O | | Includes income related only to transmission facilities, such as pole attachments, rentals and special use. | | | | | | | | | |
| P | | Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking - the revenues are included in line 4 page 1 | | | | | | | | | |
| | | and the loads are included in line 13, page 1. Grandfathered agreements whose rates have not been changed to eliminate or mitigate | | | | | | | | | |
| | | pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1. | | | | | | | | | |
| Q | | The revenues credited on page 1 lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements) | | | | | | | | | |
| | | or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include | | | | | | | | | |
| | | revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct | | | | | | | | | |
| | | assignment facilities and GSUs) which are not recovered under this Rate Formula Template. | | | | | | | | | |
| R | | Calculated using end of year projected amounts. | | | | | | | | | |
| S | | Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements. | | | | | | | | | |
| | | revenue requirements. | | | | | | | | | |
| T | | Debt service calculation is supported by the debt service work paper and is comprised of the gross plant allocator portion of the Heartland long-term | | | | | | | | | |
| | | debt plus the transmission-related portion of the debt service for the Public Power Generation Agency payments. The work paper calculates | | | | | | | | | |
| | | the transmission only debt service that is entered on line 9, page 2 0f 4 so it is 100% directly assigend to the ATRR. | | | | | | | | | |
| U | | Includes amounts recorded to accounts 428 and 429. | | | | | | | | | |
| V | | Calculated using 13 month average balance. Gross Plant in Service amounts exclude Asset Retirement Obligation amounts unless | | | | | | | | | |
| | | authorized by FERC. | | | | | | | | | |

# HEARTLAND CONSUMERS POWER DISTRICT
# FORMULA RATE IMPLEMENTATION PROTOCOLS

## Section I. Applicability

The following procedures shall apply to Heartland Consumers Power District's ("Heartland") calculation of its annual transmission revenue requirement ("ATRR"), True-Up Adjustment, and Projected ATRR. The ATRR shall be determined for January 1 to December 31 of a given calendar year (the "Rate Year"). The Formula Rate Template shall become effective for recovery of Heartland's ATRR upon the effective date authorized by the Federal Energy Regulatory Commission ("Commission") under Section 205 of the Federal Power Act ("FPA"). The transmission formula rate template and protocols together comprise the filed rate ("Formula Rate"), and any modifications to the Formula Rate shall require a filing under Section 205 or 206 of the FPA.

## Section II. Annual True-Up and Projected ATRR

A. Beginning on or before June 1, 2016, and on or before each subsequent June 1, Heartland shall determine its Annual True-Up pursuant to these Protocols, to derive a True-Up Adjustment to be included in Heartland's projected ATRR ("Projected ATRR") for the subsequent Rate Year.

B. On or before June 1, 2016, and on or before each subsequent June 1, Heartland shall post its Annual True-Up, actual ATRR, and True-Up Adjustment at a publicly accessible location on the SPP OASIS. Within ten business days after the OASIS posting of its Annual True-Up, Heartland shall notify Interested Parties via the SPP email exploder titled "Formula Rate Posting Information Notification" of the website address where such information is posted.

C. On or before October 1, 2015, and on or before each subsequent October 1, Heartland shall provide its Projected ATRR to SPP and post such information at a publicly accessible location on the SPP OASIS. Within ten business days after the OASIS posting of its Projected ATRR, Heartland shall notify Interested Parties via the SPP email exploder titled "Formula Rate Posting Information Notification" of the website address where such information is posted.

D. If the date for posting the Annual True-Up or the Projected ATRR falls on a weekend or a holiday recognized by the Federal Energy Regulatory Commission ("FERC" or "Commission"), then the posting shall be due on the next business day. The date on which posting of the Annual True-Up occurs shall be that year's "Publication Date." Any delay in the Publication Date or in the posting of the Projected ATRR will result in an equivalent extension of time for the submission of Information Requests discussed in Section III of these protocols.

E. The Annual True-Up shall:

1. Include a workable data-populated Formula Rate Template and underlying work papers in native format with all formulas intact;

2. Be based on Heartland's audited financial statements for the prior calendar year;

3. Provide the formula rate calculations and all inputs thereto, as well as supporting documentation and work papers for data that are used in the Annual True-Up that are not otherwise available in audited financial statements, and provide a hyperlink (on SPP's OASIS) that redirects to that portion of Heartland's publicly accessible website where Heartland's audited financial statements are posted;

4. Identify all material adjustments made to the audited financial statements data in determining formula inputs;

5.Provide information sufficient such that Interested Parties may replicate the calculation.

6. With respect to any change in accounting that affects inputs to the formula rate or the resulting charges billed under the formula rate ("Accounting Change"):

a. Identify:

i. The initial implementation of an accounting standard or policy;
ii. The initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific accounting direction;
iii. Correction of errors and prior period adjustments that affect the True-Up Adjustment calculation;
iv. The implementation of new estimation methods or policies that change prior estimates; and
v. changes to income tax elections (if applicable);

b. Identify items included in the Annual True-Up at an amount other than on a historic cost basis (e.g., fair value adjustments);

c. Identify any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs to the Annual True-Up;

d. Provide, for each item identified pursuant to items II.E.8.a - II.E.8.c of these protocols, a narrative explanation of the individual impact of such changes on the True-Up Adjustment.

F. The Projected ATRR shall:

1. Include a workable data-populated Formula Rate Template and underlying work papers in native format with all formulas intact;

2. Provide the formula rate calculations and all inputs thereto, as well as supporting documentation and work papers for data that are used in the Projected ATRR;

3. With respect to any Accounting Change:

a. Identify:

i. The initial implementation of an accounting standard or policy;
ii. The initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific accounting direction;
iii. Correction of errors and prior period adjustments that impact the Projected ATRR calculation;
iv. The implementation of new estimation methods or policies that change prior estimates; and
v. Changes to income tax elections (if applicable);

b. Identify items included in the Projected ATRR at an amount other than on a historic cost basis (e.g., fair value adjustments);

c. Identify any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs to the Projected ATRR;

d. Provide, for each item identified pursuant to items II.F.4.a - II.F.4.c of these protocols, a narrative explanation of the individual impact of such changes on the Projected ATRR.

G. Heartland shall hold an open meeting among Interested Parties (“Annual True-Up Meeting”) between the Publication Date and September 1 of each year. No less than seven (7) days prior to such Annual True-Up Meeting, Heartland shall provide notice on a publicly accessible location on of the SPP OASIS of the time, date, and location of the Annual True-Up Meeting. For purposes of these Protocols, the term “Interested Parties” includes, but is not limited to, customers under the Tariff, state utility regulatory commissions, consumer advocacy agencies, and state attorneys general. The Annual True-Up Meeting shall (i) permit Heartland to explain and clarify its Annual True-Up and True-Up Adjustment and (ii) provide Interested Parties an opportunity to seek information and clarifications from Heartland about the Annual True-Up and True-Up Adjustment. Heartland shall allow Interested Parties to participate in the Annual True-Up Meeting in person or via telephone or other remote access mechanism (e.g., webex).

H. Heartland shall hold an open meeting among Interested Parties between the date that the Projected ATRR is posted to the Heartland page on the SPP OASIS (as described in Section II.C of these protocols) and October 31 of each year (“Annual Projected Rate Meeting”). No less than seven (7) days prior to such Annual Projected Rate Meeting, Heartland shall provide notice at a publicly accessible location on the SPP OASIS of the time, date, and location of the Annual Projected Rate Meeting. The Annual Projected Rate Meeting shall (i) permit Heartland to explain and clarify its Projected ATRR and (ii) provide Interested Parties an opportunity to seek information and clarifications from Heartland about the Projected ATRR. Heartland shall allow

Interested Parties to participate in the Annual Projected Rate Meeting in person or via telephone or other remote access mechanism (e.g., webex).

I. If Heartland constructs any transmission project that utilizes a regional cost sharing mechanism, it shall participate in a joint informational meeting with other transmission owners to establish revenue requirements for recovery of costs of projects subject to the same regional cost allocation. Notice of Joint informational meetings shall be posted on the SPP website and distributed to Interested Parties via email no less than 7 days prior to such meeting.

**Section III. Information Exchange Procedures**

Each Annual True-Up and Projected ATRR shall be subject to the following information exchange procedures ("Information Exchange Procedures"):

A. Interested Parties shall have until December 1 following the Publication Date (unless such period is extended with the written consent of Heartland or by FERC order) to serve reasonable information and document requests on Heartland ("Information Exchange Period"). If December 1 falls on a weekend or a holiday recognized by FERC, the deadline for submitting all information and document requests shall be extended to the next business day. Such information and document requests shall be limited to what is necessary to determine:

(1) The extent or effect of an Accounting Change;

(2) Whether the Annual True-Up or Projected ATRR fails to include data properly recorded in accordance with these protocols;

(3) The proper application of the formula rate and procedures in these protocols;

(4) The accuracy of data and consistency with the formula rate of the calculations shown in the Annual True-Up or Projected ATRR;

(5) The prudence of actual costs and expenditures;

(6) The effect of any change to the underlying Uniform System of Accounts; or

(7) Any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the formula.

The information and document requests shall not otherwise be directed to ascertaining whether the formula rate is just and reasonable.

B. Heartland shall make a good faith effort to respond to information and document requests within fifteen (15) business days of receipt of such requests. Heartland shall respond to all information and document requests received on or before December 1 by no later than January 10 following the Publication Date, unless the Information Exchange Period is extended by Heartland or FERC.

C. Heartland will cause to be posted at a publicly accessible location on the SPP OASIS all information requests regarding Heartland ATRR in SPP from Interested Parties and Heartland's response(s) to such requests; except, however, if responses to information and document requests include material deemed by Heartland to be confidential information, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement to be executed by Heartland and the requesting party.

D. Heartland shall not claim that non-confidential responses to information and document requests provided pursuant to these protocols are subject to any settlement privilege, in any subsequent FERC proceeding addressing Heartland's Annual True-Up or Projected ATRR.

**Section IV. Resolution of Issues and Challenges to Projected ATRR Update and/or Annual True-Up**

No later than January 10 of each year, any Interested Party may notify Heartland in writing of any specific challenge(s) to any component of the most recently posted Annual True-up and/or Projected ATRR ("Preliminary Challenge"). Within five (5) business days of receiving notice of such challenge(s), Heartland shall provide written notice to all Interested Parties of such challenge(s) and post notice of such challenge(s) at a publicly accessible location on the SPP OASIS. Heartland and the Interested Party shall make good faith efforts to resolve the Preliminary Challenge through informal negotiations, and shall allow any Interested Party to participate in such negotiations. Any modification to the Annual True-up or the Projected ATRR that results from such negotiations and that is agreed upon no later than November 15 shall be incorporated into the Projected ATRR and Annual True-up for the next Rate Year and incorporated into Heartland's Informational Filing. However, to the extent such negotiations lead to agreed-upon changes to the Projected ATRR, such changes shall be incorporated into the Projected ATRR for the next rate year.

Heartland shall provide and post a written response within fourteen (14) calendar days of receiving a Preliminary Challenge. Its written response shall notify all Interested Parties of the extent to which Heartland agrees or disagrees with the position raised by the Interested Party(ies), and what, if any, modifications to the Projected ATRR or Annual True-up will result. If Heartland disagrees with the issue(s) raised in the Preliminary Challenge, it shall provide supporting documentation with its response.

If Heartland and the Interested Parties have not resolved all identified issues within thirty (30) calendar days after receipt of Heartland's response to the issue(s), senior management representatives of Heartland and the Interested Parties shall meet to try to resolve the issue(s).

If these senior management representatives are not able to resolve the issue(s) within thirty (30) calendar days, any Interested Party that has not resolved any Preliminary Challenge to an Annual True-up may then file with FERC a Formal Challenge to an Annual True-up pursuant to these Implementation Procedures ("Formal Challenge"). An Interested Party shall have until March 22 to file a Formal Challenge with FERC.

In any proceeding ordered by the FERC in response to a Formal Challenge raised under these Implementation Procedures, Heartland shall bear the burden of demonstrating the justness and reasonableness of the charges resulting from its application of the Formula Rate, and of proving that it properly applied the Formula Rate, properly calculated the challenged Projected ATRR or Annual True-up pursuant to the Formula Rate, and that adoption of any material change is just and reasonable. Nothing herein is intended to alter the burden applied by FERC with respect to prudence challenges.

**Section V. Changes to True-Up Adjustment or Projected ATRR**

Any changes to the data inputs, including but not limited to revisions as the result of any FERC proceeding to consider the Annual True-Up or Projected ATRR, or as a result of the procedures set forth herein, shall be incorporated into the Projected ATRR for the next Rate Year. This reconciliation mechanism shall apply in lieu of mid-Rate Year adjustments. Interest on any refund or surcharge shall be calculated in accordance with the procedures outlined in Section VII of these protocols. The fixed margin percentage of 20% set forth in Heartland's Formula Rate Template will remain fixed in that Template and will not be changed absent a filing pursuant to section 205 of the Federal Power Act.

**Section VI. Informational Filings**

By March 15 of each year, Heartland shall submit to FERC an informational filing ("Informational Filing") of its Projected ATRR for the Rate Year, including its Annual True-Up and True-Up Adjustment. This Informational Filing must include the information that is reasonably necessary to determine: (1) that input data under the formula rate are properly recorded in any underlying work papers; (2) that Heartland has properly applied the formula rate and these procedures; (3) the accuracy of data and the consistency with the formula rate of the Transmission Revenue Requirement and rates under review; (4) the extent of accounting changes that affect formula rate inputs; and (5) the reasonableness of projected costs. The Informational Filing must also describe any corrections or adjustments made during that period, and must describe all aspects of the formula rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures. Any challenges to the implementation of the Formula Rate must be made through the challenge procedures described in Section IV of these protocols or in a separate complaint proceeding, and not in response to the Informational Filing. Heartland shall provide notification of each Informational Filing through notification to the Formula Rate Posting Information Notification exploder maintained by SPP, and shall request the docket or sub-docket number assigned to each Informational Filing to be posted on the SPP OASIS within 5 days of the Commission assigning such a number.

**Section VII. Calculation of True-Up Adjustment**

**True-Up Procedure**

The True-Up Adjustment will be determined in the following manner:

(1) Actual ATRR for the previous year shall be compared to the Projected ATRR for the same year ("True-Up Year") to determine any excess or shortfall in the Projected ATRR that was used for billing purposes in the True-Up Year. In addition, actual divisor load, the average 12 monthly coincident peaks ("12 CP") will be compared to the projected 12 CP and the difference multiplied by the rate calculated in the Formula Rate Template to determine any excess or shortfall in collection due load volume. The sum of the excess or shortfall due to the actual versus Projected ATRR and the excess or shortfall due to load volume will constitute the True-Up Adjustment. The True-Up Adjustment and related calculations will be posted at a publicly accessible location on the SPP OASIS no later than June 1 (or if that day falls on a weekend or a holiday recognized by FERC, then the posting shall be due on the next business day) following the issuance of the Heartland audited financial statements for the previous year, as set forth in Section II of these protocols.

(2) Interest on any over recovery of the ATRR or any over recovery due to load volume changes will be determined based on the Commission's regulation at 18 C.F.R. § 35.19a. Interest on any under recovery of the ATRR or any under recovery due to load volume changes will be based on the annual average of the one-month London Interbank Offer Rate ("LIBOR") plus 135 basis points capped at the applicable Commission refund interest rate. In either case, the interest payable will be calculated using an average interest rate for the twenty-four (24) months during which the over or under recovery in the ATRR or load volume changes exists. The interest amount (Page 1, Line 6i of Attachment H- Heartland) will be included in the projected costs made available by October 1 in accordance with Section II.C above.

(3) The ATRR for transmission services for the following year shall be the sum of the Projected ATRR for the following year, plus or minus the True-Up Adjustment (sum of Page 1, Lines 6+6c-6h+6i of Attachment H- Heartland) from the previous year, if any, including interest as explained above.

(4) Heartland may accelerate the refund of any over recovery amounts by one year. The interest calculation will be adjusted to reflect the period the over recovery exists.

**Example True-Up of 2012 ATRR:**
Projected ATRR was $7,000,000, projected load was 600,000 kW.
Actual 2016 net ATRR calculated based on the Formula Rate Template data available in
June 2017 is $6,800,000, actual 12 CP load is 580,000 kW. The rate calculated in the Formula Rate Template to determine any excess or shortfall in collection due load volume = $15 per kW-yr

**True-Up Calculation:**
There is an over recovery of the ATRR equal to $200,000 ($7,000,000 - $6,800,000 = $200,000).
There is a $300,000 shortfall in revenue collection due to volume
((600,000 kW – 580,000 kW) x $15.00 per kW-yr = $300,000).
The total True-Up Adjustment amount would be a net under recovery of $100,000 ($300- 000 - $200,000 = $100,000), which would be applied as an increase to the 2018 Projected ATRR beginning January 2018.

Formula Rate Template for SPP Zone 19 Transmission

Attachment H: ATRR Summary

12 Months Ended December 31, 20XX

Notes:

A Line 9 contains EPRI Annual Membership Dues, all Regulatory Commission Expenses, and non-safety related advertising. Line 10 contains Regulatory Commission Expenses directly related to transmission service, ISO filings, or transmission siting.

B Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere.

C MRES' Margin Requirement is dollar figure equal to a percentage (referred to as the margin ratio) of the annual total of actual debt service payments made by MRES. MRES' margin ratio is fixed at 90% and cannot be changed absent a FERC order. MRES' margin ratio is based on the Debt Service Coverage Ratio ("DSC") charged to MRES' native load.

D Calculated using 13 month average balance. Gross Plant in Service

amounts exclude Asset Retirement Obligation amounts unless authorized by FERC. MRES follows the Zone 19 (Upper Missouri Zone) Attachment AI Guidance Document as outlined in the Settlement Agreement filed in ER15-1943 for facilities which costs are recovered via this template. In the event that SPP revises and the Commission approves revisions to Attachment AI and the revised version of Attachment AI conflicts with the guidance document, Attachment AI shall govern. In the event that the Commission issues a decision on the merits as to what constitutes a Transmission Facility under Attachment AI and that decision conflicts with the guidance document, the Commission decision shall govern.

E Removes transmission plant determined to be state-jurisdictional by Commission order according to the seven-factor test (until EIA 412 balances are adjusted to reflect application of seven-factor test).

F Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

G Bond proceeds represent the amount of the 2014 debt issue for new projects that had not been expended at the end of each month. The bond proceeds on deposit have been included in the production plant since the vast majority of the proceeds are expected to utilized for additions to production plant. CWIP is included in the debt service allocator because the amounts included in CWIP were financed by bond proceeds and the annual debt service amount includes all bond proceeds, including those used to finance CWIP.

H "Direct Assign" and "DA & Allocated" items use the allocation noted in the referenced schedule; "Allocated" items are based off a Net or Gross Plant Allocator between SPP and MISO as calculated on Schedule 5, Page 5.

I Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements.

J Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including

Account Nos. 561.1, 561.2, 561.3, and 561.BA.

Notes:

it that

A Gross Transmission Plant is identified on Schedule 5, line 14, col 15 and is inclusive of all CWIP.

B Net Transmission Plant is identified on Schedule 5, line 42, col 15 and is inclusive of all CWIP.

C Project Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1 and includes all CWIP This value includes subsequent capital investments required to maintain the facilities to their original capabilities. Plant values are from Schedule 4, Col. 16

D Net Plant is derived from Schedule 4, Col. 16 and includes all CWIP

E True-Up Adjustment is included pursuant to a FERC approved methodology if applicable (see Schedule 12).

F Prior Year Sch 11 Point-to-Point Revenue as detailed on Schedule 10 is allocated on a prorata basis to all Base Plan Projects.

| 12 | November | Internal Accounting Records | - |
| 13 | December | Internal Accounting Records | - |
| 14 | **13 month Average** | **(sum lines 1-13) / 13** | **-** |

Notes:

A Bond proceeds represent the amount of the 2014 debt issue for new projects that had not been expended at the end of each month. The bond proceeds on deposit have been

included
in the production plant since the vast majority of the proceeds are expected to be utilized for
additions to production plant. CWIP is included in the debt service allocator because the amounts included in CWIP were financed by bond proceeds and the annual debt service amount includes all bond proceeds, including those used to finance CWIP. The amounts shown in lines (1-13) will be updated in each year to reflect the remaining balance of the 2014 debt issue for new projects that has not been expended at the end of each month. When
all the proceeds of the 2014 debt issue have been expended, a zero balance will be shown on
lines 1 through 13.

Notes:

A The amounts on lines 6-9 are from internal accounting records. The Total of these lines (line 10) agrees with the Combined Statement of Revenue, Expenses and Changes in Net Position in the MRES Annual Report.

B These property taxes are allocated based on where the taxes paid in each taxing district where facilities are located.

C MBPP Property taxes are allocated between MBPP production and transmission plant based on MBPP production and transmission gross plant, as shown on Schedule 9.

D General plant property taxes are allocated between production and transmission based on the gross plant allocator. General plant property taxes allocated to transmission are allocated to transmission facilities based on transmission gross plant.

E Includes income related only to transmission facilities, such as pole attachments, rentals and special use.

F Wages and Salaries are based on actual numbers from the following year:

| | |
|---|---|
| | 20XX |
| G | All amounts on lines 2-21 and 27-28 assume budgeted numbers unless listed below: |
| | |
| | |
| | |
| H | Removes from revenue credits revenues that are distributed pursuant to Schedules 26 and 37 of the Midwest ISO Tariff, since the Transmission Owner's Attachment O revenue requirements have already been reduced by the Attachment GG revenue requirements. |
| I | Pursuant to Attachment MM of the Midwest ISO Tariff, removes dollar amount of revenue requirements calculated pursuant to Attachment MM and recovered under Schedule 26-A of the Midwest ISO Tariff. |
| J | Prorated to each SPP Directed project on Schedule 1 |

## IMPLEMENTATION PROTOCOLS

### Section 1. Annual True-Up and Projected Net Revenue Requirement

1. Beginning on or before June 1, 2016, and on or before each subsequent June 1, Missouri River Energy Services ("MRES") shall determine its Annual True-Up under this Attachment H-MRES and Section VI of these protocols, to derive a True-Up Adjustment to be included in MRES' projected net revenue requirement for the subsequent calendar year (the "Rate Year").
2. On or before June 1, 2016, and on or before each subsequent June 1, MRES shall provide its Annual True-Up, actual net revenue requirement, and True-Up Adjustment, and shall request such information to be posted on the SPP OASIS. The transmission formula rate template and protocols together comprise the filed rate ("Formula Rate"), and any modifications to the Formula Rate shall require a filing under Section 205 or 206 of the Federal Power Act.
3. On or before October 1, 2016, and on or before each subsequent October 1, MRES shall provide its projected net revenue requirement to SPP, shall request such information to be posted to the SPP OASIS, and shall notify Interested Parties via the SPP email exploder titled "Formula Rate Posting Information Notification" of the website address where such information is posted.
    a. For purposes of these procedures, the term Interested Party includes, but is not limited to, customers under the OATT, state utility regulatory commissions, consumer advocacy agencies, and state attorneys general ("Interested Parties"). Interested Parties can subscribe to the Formula Rate Posting Information Notification exploder.
    b. MRES shall provide electronic notice of Annual ATRR Update postings to all Interested Parties within 10 days of such posting through an email to the Formula Rate Posting Information Notification exploder maintained by SPP.
    c. As used in these Protocols, "Formula Rate Posting Information Notification exploder" shall mean the list of email addresses maintained by SPP of Interested Parties, provided that such Interested Parties request to be added to the Formula Rate Posting Information Notification exploder through the "Exploder List" link

on the SPP website. The Exploder List is titled "Formula Rate Posting Information Notification" and can be accessed at http://www.spp.org/stakeholder-center/exploder-lists/. Interested Parties may include, but are not limited to, (i) SPP Tariff Transmission Customers; (ii) any state regulatory agency with rate jurisdiction over a public utility located within the SPP footprint; and (iii) any consumer advocate agency authorized by state law to review and contest the rates for any such public utility.

4. If the date for posting the Annual True-Up or the projected net revenue requirement falls on a weekend or a holiday recognized by FERC, then the posting shall be due on the next business day. The date on which posting of the Annual True-Up occurs shall be that year's "Publication Date." Any delay in the Publication Date or in the posting of the projected net revenue requirement will result in an equivalent extension of time for the submission of Information Requests discussed in Section 3 of these protocols.
5. The Annual True-Up shall:
    a. Include a workable data-populated Formula Rate Template and underlying Work papers in native format with all formulas intact;
    b. Be based on MRES' audited financial statements for the prior calendar year;
    c. Provide the formula rate calculations and all inputs thereto, as well as supporting documentation and work papers for data that are used in the Annual True-Up that are not otherwise available in audited financial statements, such that Interested Parties may replicate the calculation of the Annual True-Up results;
    d. Identify any changes in the formula references (page and line numbers);
    e. Identify all material adjustments made to the data in determining formula inputs,;
    f. Provide underlying data for formula rate inputs;
    g. With respect to any change in accounting that affects inputs to the formula rate or the resulting charges billed under the formula rate ("Accounting Change"):
        i. Identify any Accounting Changes, including
            1. The initial implementation of an accounting standard or policy;
            2. The initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific accounting direction;

3. Correction of errors and prior period adjustments that impact the True-Up Adjustment calculation;
4. The implementation of new estimation methods or policies that change prior estimates;
5. Changes to income tax elections (if applicable);

ii. Identify items included in the Annual True-Up at an amount other than on a historic cost basis (e.g., fair value adjustments);

iii. Identify any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs to the Annual True-Up;

iv. Provide, for each item identified pursuant to items Section 1, paragraph 5.g.i – 5.g.iii these protocols, a narrative explanation of the individual impact of such changes on the True-Up Adjustment.

6. The projected net revenue requirement shall:
   a. Include a workable data-populated Formula Rate Template and underlying work papers in native format with all formulas intact;
   b. Provide the formula rate calculations and all inputs thereto, as well as supporting documentation and work papers for data that are used in the projected net revenue requirement;
   c. Provide sufficient information to enable Interested Parties to replicate the calculation of the projected net revenue requirement;
   d. With respect to any change in accounting that affects inputs to the formula rate or the resulting charges billed under the formula rate ("Accounting Change"):
      i. Identify any Accounting Changes, including:
         1. The initial implementation of an accounting standard or policy;
         2. The initial implementation of accounting practices for unusual or unconventional items where FERC has not provided specific accounting direction;
         3. Correction of errors and prior period adjustments that impact the projected net revenue requirement calculation;

4. The implementation of new estimation methods or policies that change prior estimates; and
5. Changes to income tax elections (if applicable).

ii. Identify items included in the projected net revenue requirement at an amount other than on a historic cost basis (e.g., fair value adjustments);

iii. Identify any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs to the projected net revenue requirement;

iv. Provide, for each item identified pursuant to items in Section 1, paragraph 6.c.i. – 6.c.v. of these protocols, a narrative explanation of the individual impact of such changes on the projected net revenue requirement.

7. MRES shall hold an open meeting among Interested Parties ("Annual True-Up Meeting") between the Publication Date and September 1. No less than seven (7) days prior to such Annual True-Up Meeting, MRES shall provide notice on the SPP OASIS of the time, date, and location of the Annual True-Up Meeting. For purposes of these procedures, the term Interested Party includes, but is not limited to, customers under the Tariff, state utility regulatory commissions, consumer advocacy agencies, and state attorneys general. The Annual True-Up Meeting shall (i) permit MRES to explain and clarify its Annual True-Up and True-Up Adjustment and (ii) provide Interested Parties an opportunity to seek information and clarifications from MRES about the Annual True-Up and True-Up Adjustment. MRES shall provide an option for Interested Parties to remotely participate in this Annual True-Up Meeting (remote access options may include video conferencing, webinar, internet conferencing, or other appropriate remote access options as determined by MRES).
8. MRES shall hold an open meeting among Interested Parties ("Annual Projected Rate Meeting") between the date that the projected net revenue requirement is posted to the SPP OASIS (as described in Section 1) and October 31. No less than seven (7) days prior to such Annual Projected Rate Meeting, MRES shall provide notice on the SPP OASIS of the time, date, and location of the Annual Projected Rate. The Annual Projected Rate Meeting shall (i) permit MRES to explain and clarify its projected net revenue

requirement and (ii) provide Interested Parties an opportunity to seek information and clarifications from MRES about the projected net revenue requirement.

9. Transmission Owners with transmission projects that utilize a regional cost sharing mechanism (including MRES, if applicable) shall endeavor to coordinate with other Transmission Owners in the SPP using formula rates to hold a joint informational meeting to enable all interested parties to understand how those Transmission Owners are implementing their formula rates for cost recovery of such projects. Such meeting shall occur by November 1 of each year (or the next business day if November 1 falls on a weekend or holiday recognized by FERC). Notice of joint informational meetings, including the time, date, and location, shall be posted on the SPP OASIS and distributed to the Formula Rate Posting Information Notification exploder no less than seven (7) days prior to such meetings.

**Section 2. Information Exchange Procedures**

Each Annual True-Up and projected net revenue requirement shall be subject to the following information exchange procedures ("Information Exchange Procedures"):

1. Interested Parties shall have until December 1 following the Publication Date (unless such period is extended with the written consent of MRES or by FERC order) to serve reasonable information and document requests on MRES ("Information Exchange Period"). If December 1 falls on a weekend or a holiday recognized by FERC, the deadline for submitting all information and document requests shall be extended to the next business day. Such information and document requests shall be limited to what is necessary to determine:
    a. The extent or effect of an Accounting Change;
    b. Whether the Annual True-Up or projected net revenue requirement fails to include data properly recorded in accordance with these protocols;
    c. The proper application of the formula rate and procedures in these protocols;
    d. The accuracy of data and consistency with the formula rate of the calculations shown in the Annual True-Up or projected net revenue requirement;
    e. The prudence of actual costs and expenditures;

f. The effect of any change to the underlying Uniform System of Accounts; or
g. Any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the formula.

The information and document requests shall not otherwise be directed to ascertaining whether the formula rate is just and reasonable.

2. MRES shall make a good faith effort to respond to information and document requests within fifteen (15) business days of receipt of such requests. MRES shall respond to all information and document requests by no later than January 10 following the Publication Date, unless the Information Exchange Period is extended by MRES or FERC.
3. MRES will cause to be posted on the SPP OASIS all information requests regarding MRES ATRR in SPP from Interested Parties and MRES' response(s) to such requests; except, however, if responses to information and document requests include material deemed by MRES to be confidential information, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement to be executed by MRES and the requesting party.
4. MRES shall not claim that responses to information and document requests provided pursuant to these protocols are subject to any settlement privilege, in any subsequent FERC proceeding addressing MRES' Annual True-Up or projected net revenue requirement. However, MRES may require that Interested Parties execute a non-disclosure agreement to obtain access to material that MRES deems commercially sensitive or that contains Critical Energy Infrastructure Information as that term is defined in 18 CFR§ 388.113(c)(1).

**Section 3. Changes to True-Up Adjustment or Projected Net Revenue Requirement**

Any changes to the data inputs, including but not limited to revisions as the result of any FERC proceeding to consider the Annual True-Up or projected net revenue requirement, or as a result of the procedures set forth herein, shall be incorporated into the formula rate and the charges produced by the formula rate in the projected net revenue requirement for the next Rate Year. This reconciliation mechanism shall apply in lieu of mid-Rate Year adjustments. Interest on any

refund or surcharge shall be calculated in accordance with the procedures outlined in Section 7 of these protocols.

**Section 4. Challenge Procedures**

1. Interested Parties shall have until January 31 following the Publication Date (unless such period is extended with the written consent of MRES or by FERC order) to review the inputs, supporting explanations, allocations and calculations and to notify MRES in writing, which may be made electronically, of any specific Informal Challenges to the Annual True-Up or projected net revenue requirement. The period of time from the Publication Date until January 31 shall be referred to as the Review Period. If January 31 falls on a weekend or a holiday recognized by FERC, the deadline for submitting all Informal Challenges shall be extended to the next business day. Failure to pursue an issue through an Informal Challenge or to lodge a Formal Challenge regarding any issue as to a given Annual True-Up or projected net revenue requirement shall bar pursuit of such issue with respect to that Annual True-Up or projected net revenue requirement, but shall not bar pursuit of such issue or the lodging of a Formal Challenge as to such issue as it relates to a subsequent Annual True-Up or projected net revenue requirement.
2. A party submitting an Informal Challenge to MRES must specify the inputs, supporting explanations, allocations, calculations, or other information to which it objects, and provide an appropriate explanation and documents to support its challenge. MRES shall make a good faith effort to respond to any Informal Challenge within twenty (20) business days of notification of such challenge. MRES, and where applicable, the Transmission Provider, shall appoint a senior representative to work with the party that submitted the Informal Challenge (or its representative) toward a resolution of the challenge. If MRES disagrees with such challenge, MRES will provide the Interested Party(ies) with an explanation supporting the inputs, supporting explanations, allocations, calculations, or other information. No Informal Challenge may be submitted after January 31, and MRES must respond to all Informal Challenges by no later than February 28, unless the Review Period is extended by MRES or FERC.

3. Informal Challenges shall be subject to the resolution procedures and limitations in this Section IV. Formal Challenges shall be filed pursuant to these protocols and shall satisfy all of the following requirements.
    a. A Formal Challenge shall:
        i. Clearly identify the action or inaction which is alleged to violate the filed rate formula or protocols;
        ii. Explain how the action or inaction violates the filed rate formula or protocols;
        iii. Set forth the business, commercial, economic, or other issues presented by the action or inaction as such relate to or affect the party filing the Formal Challenge, including:
            1. The extent or effect of an Accounting Change;
            2. Whether the Annual True-Up or projected net revenue requirement fails to include data properly recorded in accordance with these protocols;
            3. The proper application of the formula rate and procedures in these protocols;
            4. The accuracy of data and consistency with the formula rate of the charges shown in the Annual True-Up or projected net revenue requirement;
            5. The prudence of actual costs and expenditures;
            6. The effect of any change to the underlying Uniform System of Accounts; or
            7. Any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the formula.
        iv. Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;
        v. State whether the issues presented are pending in an existing Commission proceeding or a proceeding in any other forum in which the filing party is

a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;

vi. State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that relief;

vii. Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the filing party, including, but not limited to, contracts and affidavits; and

viii. State whether the filing party utilized the Informal Challenge procedures described in these protocols to dispute the action or inaction raised by the Formal Challenge, and, if not, describe why not.

b. Service. Any person filing a Formal Challenge must serve a copy of the Formal Challenge on MRES. Service to MRES must be simultaneous with filing at the Commission. Simultaneous service can be accomplished by electronic mail in accordance with § 385.2010(f)(3), facsimile, express delivery, or messenger. The party filing the Formal Challenge shall serve the individual listed as the contact person on MRES's Informational Filing required under Section VI of these protocols.

4. Informal and Formal Challenges shall be limited to all issues that may be necessary to determine: (1) the extent or effect of an Accounting Change; (2) whether the Annual True-Up or projected net revenue requirement fails to include data properly recorded in accordance with these protocols; (3) the proper application of the formula rate and procedures in these protocols; (4) the accuracy of data and consistency with the formula rate of the calculations shown in the Annual True-Up and projected net revenue requirement; (5) the prudence of actual costs and expenditures; (6) the effect of any change to the underlying Uniform System of Accounts; or (7) any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the formula.

5. MRES will cause to be posted all Informal Challenges from Interested Parties and MRES's response(s) to such Informal Challenges; except, however, if Informal Challenges or responses to Informal Challenges include material deemed by MRES to be confidential information, such information will not be publicly posted but will be made

available to requesting parties pursuant to a confidentiality agreement to be executed by MRES and the requesting party.

6. Any changes or adjustments to the True-Up Adjustment or projected net revenue requirement resulting from the Information Exchange and Informal Challenge processes that are agreed to by MRES will be reported in the Informational Filing required pursuant to Section VI of these protocols. Any such changes or adjustments agreed to by MRES on or before December 1 will be reflected in the projected net revenue requirement for the upcoming Rate Year. Any changes or adjustments agreed to by MRES after December 1 will be reflected in the following year's Annual True-Up, as discussed in Section V of these protocols.
7. An Interested Party shall have until April 15 following the Review Period (unless such date is extended with the written consent of MRES to continue efforts to resolve the Informal Challenge) to make a Formal Challenge with FERC, which shall be served on MRES on the date of such filing as specified in Section IV.C(2) above. A Formal Challenge shall be filed in the same docket as MRES's Informational Filing discussed in Section VI of these protocols. MRES shall respond to the Formal Challenge by the deadline established by FERC. A party may not pursue a Formal Challenge if that party did not submit an Informal Challenge on any issue during the applicable Review Period.
8. In any proceeding initiated by FERC concerning the Annual True-Up or projected net revenue requirement or in response to a Formal Challenge, MRES shall bear the burden, consistent with section 205 of the Federal Power Act, of proving that it has correctly applied the terms of the formula rate consistent with these protocols, and that it followed the applicable requirements and procedures in this Attachment H. Nothing herein is intended to alter the burdens applied by FERC with respect to prudence challenges.
9. Except as specifically provided herein, nothing herein shall be deemed to limit in any way the right of MRES to file unilaterally, pursuant to Federal Power Act section 205 and the regulations thereunder, to change the formula rate or any of its inputs (including, but not limited to, rate of return and transmission incentive rate treatment), or to replace the formula rate with a stated rate, or the right of any other party to request such changes pursuant to section 206 of the Federal Power Act and the regulations thereunder.

10. No party shall seek to modify the formula rate under the Challenge Procedures set forth in these protocols and the Annual True-Up and projected net revenue requirement shall not be subject to challenge by anyone for the purpose of modifying the formula rate. Any modifications to the formula rate will require, as applicable, a Federal Power Act section 205 or section 206 filing.
11. Any Interested Party seeking changes to the application of the formula rate due to a change in the Uniform System of Accounts, shall first raise the matter with MRES in accordance with this Section IV before pursuing a Formal Challenge.

**Section 5. Changes to True-Up Adjustment or Projected Net Revenue Requirement**

Except as provided in Section IV.6 of these protocols, any changes to the data inputs, including, or as the result of any FERC proceeding to consider the Annual True-Up or projected net revenue requirement, or as a result of the procedures set forth herein, shall be incorporated into the formula rate and the charges produced by the formula rate in the projected net revenue requirement for the next Rate Year. This reconciliation mechanism shall apply in lieu of mid-Rate Year adjustments. Interest on any refund or surcharge shall be calculated in accordance with the procedures outlined in Section VII of these protocols. If MRES makes a change to the actual ATRR, including but not limited to a change requiring correction to its audited financial statements or input data used for a Rate Year that would have affected the Annual True-Up for that Rate Year, MRES shall promptly (1) request that SPP notify via the Formula Rate Posting Information Notifications exploder; (2) file a change to the Annual Update with the Commission as an amended informational filing or compliance filing, as appropriate; and, (3) cause such information to be posted at a publicly accessible location on SPP's OASIS.

**Section 6. Informational Filings**

By March 15 of each year, MRES shall submit to FERC an informational filing ("Informational Filing") of its projected net revenue requirement for the Rate Year, including its Annual True-Up and True-Up Adjustment. MRES shall submit each year's Informational Filing in the same docket assigned to the initial informational filing of MRES (ER16-1137), subject to the determination of the FERC's Secretary. This Informational Filing must include the information that is reasonably necessary to determine: (1) that input data under the formula rate are properly

recorded in any underlying work papers; (2) that MRES has properly applied the formula rate and these procedures; (3) the accuracy of data and the consistency with the formula rate of the Transmission Revenue Requirement and rates under review; (4) the extent of accounting changes that affect formula rate inputs; and (5) the reasonableness of projected costs. The Informational Filing must also describe any corrections or adjustments made during that period, and must describe all aspects of the formula rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures. Any challenges to the implementation of the Attachment H formula rate must be made through the Challenge Procedures described in Section IV of these protocols or in a separate complaint proceeding, and not in response to the Informational Filing. MRES shall provide notification of each Informational Filing through notification to the Formula Rate Posting Information Notification exploder maintained by SPP, and shall request the docket or sub-docket number assigned to each Informational Filing to be posted on the SPP OASIS within 5 days of the Commission assigning such a number.

**Section 7. Calculation of True-Up Adjustment.**

The True-Up Adjustment will be determined in the following manner:

1. Actual net revenue requirement (calculated in accordance with Page 1, Line 7 of Attachment H-MRES) for the previous year shall be compared to the projected net revenue requirement for the same year ("True-Up Year") to determine any excess or shortfall in the projected net revenue requirement that was used for billing purposes in the True-Up Year. The sum of the excess or shortfall due to the actual versus projected net revenue requirement will constitute the True-Up Adjustment. The True-Up Adjustment and related calculations will be posted on the SPP OASIS no later than June 1 (or if that day falls on a weekend or a holiday recognized by FERC, then the posting shall be due on the next business day) following the issuance of the MRES audited financial statements for the previous year, as set forth in Section 1 of these protocols.
2. Interest on any over or under recovery of the net revenue requirement will be determined based on the Commission's regulation at 18 C.F.R. § 35.19a. The interest payable will be calculated using an average interest rate for the prior sixteen (16) months (e.g. January – April) during which the over or under recovery in the net revenue requirement changes

exists. The interest amount (Page 1, Line 6i of Attachment H-MRES) will be included in the projected costs made available by October 1 in accordance with Section 2 above.

3. The net revenue requirement for transmission services for the following year shall be the sum of the projected net revenue requirement for the following year, plus or minus the True-Up Adjustment (sum of Page 1, Lines 6+6c+6d of Attachment H-MRES) from the previous year, if any, including interest as explained above.
4. MRES may accelerate the refund of any over recovery amounts by one year. The interest calculation will be adjusted to reflect the period the over recovery exists.

## Appendix A: Example of Net Revenue and True-Up Calculations

1. Example True-Up of 2016 Net Revenue Requirement:
    a. Projected net ATRR was $7,000,000.
    b. Actual 2016 net ATRR calculated based on the Attachment H-MRES data available in June 2017 is $6,800,000.
2. True-Up Calculation:
    a. There is an over recovery of the net revenue requirement equal to $200,000 ($7,000,000 - $6,800,000 = $200,000).
    b. The total True-Up Adjustment amount would be a net over recovery of $200,000, which would be applied as a decrease to the 2018 projected ATRR beginning January 2018.

Note
Letter

A Gross Plant is the total capital investment for the project calculated in the same method as the gross plant value in line 1.
This value includes subsequent capital investments required to maintain the facilities to their original capabilities. Gross Plant does not include CWIP, Unamortized Regulatory Asset or Unamortized Abandoned Plant.

B Net Plant is the Gross Plant less the associated Accumulated Depreciation.

C Depreciation Expense is the depreciation amount associated with the specified line or sub.
Depreciation Expenses includes the amortization of Abandoned Plant and any FERC approved Regulatory Asset.

D For new facilities which are approved through the SPP planning process or otherwise added and satisfy Attachment AI criteria, the facilities and CWIP (up to the 50% level) can be included and added.
The related costs are subject to the annual update process, including the data review procedures, per the East River Implementation Protocols.

Note
Letter

A The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Workpaper with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 12 data requirements or other similar supporting documentation.
Additional line items or line deletions will not require FPA Section 205 or 206 filings. East River will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in East River's Implementation Protocols. East River may not change the columns or the formulas included in these Work Papers during the Annual Update.

| 39 | | | | | | | | | | - | - |
| 40 | Total CWIP Includable in Rate Base | | | | | | | - | - | - | - |

Notes: A. Percentage recovery cannot be added or changed absent approval from FERC

B. CWIP amounts should be directly assigned to pricing zones on Summary

C. AFUDC ceases when CWIP is recovered in rate base. No CWIP will be included in rate base absent FERC authorization. Accounting procedures must be provided during the annual update to ensure that there is no duplicate recovery of CWIP and corresponding AFUDC capitalized.

D. The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Workpaper with changes in future years.
Where appropriate, these changes will provide detail and linkage to updated Form 12 data requirements or other similar supporting documentation.
For inclusion of CWIP for new facilities, East River will seek any necessary Commission authorization that is applicable. Otherwise, additional line items or line deletions will not require FPA Section 205 or 206 filings. East River will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in East River's Implementation Protocols. East River may not change the columns or the formulas included in these Work Papers during the Annual Update.

E. For new facilities which are approved through the SPP planning process or otherwise added and satisfy Attachment AI criteria, the facilities and CWIP (up to the 50% level) can be included and added.
The related costs are subject to the annual update process, including the data review procedures, per the East River Implementation Protocols.

Note: A. The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Workpaper with changes in future years.
Where appropriate, these changes will provide detail and linkage to updated Form 12 data requirements or other similar supporting documentation. Additional line items or line deletions will not require FPA Section 205 or 206 filings. East River will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in East River's Implementation Protocols. East River may not change the columns or the formulas included in these Work Papers during the Annual Update.

Note: A. The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Workpaper with changes in future years.
Where appropriate, these changes will provide detail and linkage to updated Form 12 data requirements or other similar supporting documentation. Additional line items or line deletions will not require FPA Section 205 or 206 filings. East River will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in East River's Implementation Protocols. East River may not change the columns or the formulas included in these Work Papers during the Annual Update.

B. Amounts listed on lines 1 through 9 are only eligible for inclusion in SPP Zone 19 ATRR following a change in accounting procedures to the RUS Form 12 or Uniform System of Accounts, which would classify amounts in these accounts as eligible for transmission rate recovery. To the extent that East River recovers any of these amounts in SPP Zone 19 ATRR, it will provide details of the applicable accounting procedure changes during the annual update.

# East River Electric Power Cooperative, Inc.

## Transmission Formula Rate Implementation Protocols

The transmission Formula Rate Template of East River Electric Power Cooperative, Inc. (East River) and these Transmission Formula Rate Implementation Protocols (Protocols) together comprise the filed rate (Formula Rate) for transmission service in transmission pricing zone, Zone 19, of the Southwest Power Pool, Inc. (SPP). East River must follow the instructions specified in the Formula Rate to calculate its Annual Transmission Revenue Requirement (ATRR) and the rates for Network Integration Transmission Service (NITS) and Point-to-Point (PTP) Transmission Service in Zone 19.

The initial ATRR and the initial rates will be in effect for a partial year from the effective date of transfer of functional control of East River's transmission facilities to SPP through December 31, 2015. The Formula Rate shall be recalculated each year with the resulting rates to become effective on and after January 1 of each year through December 31 of such year (Rate Year). The resulting rates implemented each January 1 will be subject to review and true-up as further provided in the Protocols.

## Section 1. Annual Updates

1. No later than 10 days after the Federal Energy Regulatory Commission (Commission) accepts for filing the Formula Rate, East River shall post its Annual Update for the following 2016 Rate Year. Beginning in 2016, the Annual Update shall include the True-up Adjustment for the preceding Rate Year, as applicable.
2. No later than September 10 of each year (Publication Date), East River, upon approval of East River's Board of Directors, shall populate the Formula Rate Template. The Annual Update shall include the populated Formula Rate Template and underlying data and calculations with sufficient detail that Interested Parties can replicate the calculations. In accordance with the Protocols East River will request that SPP post the Annual Update by September 10 of each year on the SPP OASIS. Contemporaneously, East River shall provide notice to the Interested Parties of the availability of the Annual Update along with the

time, date, location and remote access information for the Annual Meeting. The notice to Interested Parties shall be served electronically upon the Formula Rate Posting Information Notification List.[1]

3. Commencing September 11 of each year, such parties may submit written Information Requests and East River shall make a good faith effort to provide answers within ten (10) Business Days following receipt of such requests. East River will request that SPP post on the SPP OASIS responses to any such Information Requests and information regarding frequently asked questions.
4. No earlier than September 17 and no later than September 20 of each year, East River will hold an Annual Meeting with Interested Parties to explain the Formula Rate input projections and True-up Adjustments, and provide an opportunity for oral and written comments. East River shall provide in-person and remote access for participation in the Annual Meeting by Interested Parties.
5. Written comments from Interested Parties regarding both Informal Challenges and Formal Challenges must be submitted no later than November 10 and December 5, respectively. No later than December 20 of each year, East River will provide a final posting addressing all resolved issues to SPP for posting on the SPP OASIS. East River will also request SPP to post on the SPP OASIS the final Formula Rate Template and resulting ATRR to become effective January 1 of the following Rate Year. In addition, East River will provide an Informational Filing to the Commission by December 20 of each year.
6. Any modification to the Formula Rate will require filing under Section 205 or 206 of the Federal Power Act (FPA).

[1] As used in these Protocols, "Formula Rate Posting Information Notification List" shall mean the list of email addresses maintained by SPP of Interested Parties, provided that such Interested Parties request to be added to the Formula Rate Posting Information Notification List through the "Exploder List" link on the SPP website. As of June 2016, the Exploder List was titled "Formula Rate Posting Information Notification" and could be accessed at http://www.spp.org/stakeholder-center/exploder-lists/. Interested Parties may include (i) SPP Tariff Transmission Customers; (ii) any state regulatory agency with rate jurisdiction over a public utility located within the SPP footprint; and (iii) any consumer advocate agency authorized by state law to review and contest the rates for any such public utility.

## Section 2. True-up Adjustments

1. On or before September 10 of each year, East River will calculate the True-up Adjustment with supporting data inputs in sufficient detail to identify the projected and actual cost of each element of East River's ATRR and actual revenues. East River will reflect the True-up Adjustment as a line item in its Formula Rate included with the Annual Update which will be noticed on or before September 10 of each year. The True-up Adjustment will be determined as described below.

2. The actual ATRR shall be calculated in accordance with the Formula Rate Template using actual data from the previous year. For each Rate Year, East River will complete and make available for review, on the SPP OASIS, actual data as recorded in accordance with the Rural Utilities Service (RUS) Uniform Service of Accounts, including underlying data and calculations not included in East River's audited financial statements. The information provided shall include sufficient detail such that Interested Parties may replicate the calculation. An affidavit from the Manager of Finance and Accounting of East River (or a similar successor position, if applicable) attesting to the accuracy of the cost and revenue data set forth therein will also be provided. In addition, East River shall disclose and provide an explanation of any change in accounting policies and practices (including those resulting from mergers or reorganizations) that East River employed during the Rate Year that affect transmission accounts or the allocation of common costs to transmission. Actual costs incurred during the applicable Rate Year will be compared to actual revenues recovered during such period to determine whether there was any under-recovery or over-recovery. The True-up Adjustment and related calculations shall be posted no later than September 10 on the SPP OASIS.

3. Commencing September 11 of each year, any Interested Party may submit Information Requests and East River shall make a good faith effort to provide responses within ten (10) Business Days. East River will request that SPP post on the SPP OASIS responses to any such Information Requests and information regarding frequently asked questions. Written comments related to Informal Challenges and Formal Challenges must be submitted no later than November 10 and December 5, respectively, of each year. East River will request that SPP post on the SPP OASIS, the final True-up Adjustment no later

than December 20 of each year. East River will provide an Informational Filing to the Commission by December 20 of each year.

4. Interest on any over-recovery or under-recovery of the ATRR shall be based on the applicable interest rate set forth in 18 C.F.R. §35.19a of the Commission's regulations.
5. The ATRR for transmission services for the Rate Year shall be the sum of the projected ATRR for the Current Rate Year and a True-up Adjustment for the Prior Rate Year, including interest as explained above.

## Section 3. Information Requests

1. Interested Parties may begin submitting Information Requests immediately following the Posting Date of the Annual Update and will have until sixty (60) days of the date of the posting to serve reasonable Information Requests on East River for information and work papers supporting the Annual Update. Such Information Requests shall be limited to what is necessary to determine:
    a. The extent or effect of an accounting change;
    b. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;
    c. The proper application of the Formula Rate and procedures in these Protocols;
    d. The accuracy of data and consistency with the Formula Rate of the calculations shown in the Annual Update;
    e. The prudence of projected costs and expenditures;
    f. The effect of any change to the underlying Uniform System of Accounts or Formula Rate Template; or
    g. Any other information that may reasonably have a substantive effect on the calculation of the charges pursuant to the Formula Rate.
2. The Information Requests shall not otherwise be directed to ascertain whether the Formula Rate is just and reasonable.
3. East River shall make a good faith effort to respond to Information Requests pertaining to the Annual Update within ten (10) Business Days.
4. Any delay in the timing of the Publication Date or Annual Meeting will result in an equivalent extension of time for submission of Information Requests.
5. If a deadline for Interested Parties specified in the Protocols falls on a weekend or a holiday recognized by the Commission, the deadline will be extended to the next Business Day.

6. East River shall request SPP to post on the SPP OASIS all Information Requests from Interested Parties and East River's response(s) to such

requests. If responses to Information Requests contain information deemed by East River to be confidential, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement executed by the requesting party and East River.

7. East River shall not claim that responses to Information Requests provided pursuant to these Protocols are subject to any settlement confidentiality privilege in any subsequent Commission proceeding addressing East River's Annual Update; however, East River may require that Interested Parties execute a non-disclosure agreement to obtain access to material that East River deems commercially sensitive or that contains Critical Energy Infrastructure Information as that term is defined in 18 CFR § 388.113(c)(1).

## Section 4. Informal Challenges

1. Interested Parties shall have until November 10 (or the first Business Day after November 10 if November 10 falls on a weekend or holiday) to notify East River in writing (which may be electronically) of any specific Informal Challenges. The Informal Challenge must specify the inputs, supporting explanations, allocation calculations, or other information to which the Interested Party objects and provide a sufficient explanation and documents to support its Informal Challenge. East River will make a good faith effort to respond to any Informal Challenge within ten (10) Business Days of notification of such Informal Challenge. East River, and if appropriate, SPP shall appoint senior representatives to work with the Interested Party to resolve the Informal Challenge.
2. East River will request SPP to post on the SPP OASIS all Informal Challenges from Interested Parties and East River's responses to the Informal Challenges. If responses to Information Requests contain information deemed by East River to be confidential, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement executed by the requesting party and East River.
3. Any Informal Challenge that can be reconciled prior to, and included in the implementation of the Current Rate Year will be included in the Current Rate Year ATRR.
4. Any changes or adjustments to the Annual Update resulting from the Information Request and Informal Challenge procedures that are agreed to by East River and resolved prior to the Informational Filing shall be reported in the Informational Filing made with the Commission by East River and will be

reflected in the Annual Update for the following Rate Year if not already included in the Current Rate Year.

## Section 5. Formal Challenges

1. Formal Challenges shall:
    a. Clearly identify the action or inaction which is alleged to violate the filed Formula Rate or Protocols;
    b. Explain how the action or inaction violates the filed Formula Rate or Protocols;
    c. Set forth the business, commercial, economic or other issues presented by the action or inaction as such relate to or affect the party filing the Formal Challenge, including:
        i. The extent or effect of an Accounting Change;
        ii. Whether the Annual Update fails to include data properly recorded in accordance with the Protocols and the accuracy and consistency of data;
        iii. The proper application of the Formula Rate and procedures in these Protocols;
        iv. The accuracy of data and consistency with the Formula Rate of the charges shown in the Annual Update;
        v. The prudence of costs and expenditures;
        vi. The effect of any change to the underlying Uniform System of Accounts or Formula Rate Template; or
        vii. Any other information that may reasonably have a substantive effect on the calculation of the ATRR pursuant to the Formula Rate.
    d. Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;
    e. State whether the issues presented are pending in an existing proceeding in any forum in which the Interested Party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;
    f. State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that belief;
    g. Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the Interested Party, including, but not limited to, contracts and affidavits; and
    h. State whether the filing party utilized the Informal Challenge

procedures described in these Protocols with regard to any issue.

2. Any person filing a Formal Challenge must serve a copy of the Formal Challenge on East River. Service to East River must be simultaneous with filing at the Commission. Simultaneous service can be accomplished by electronic mail in accordance with § 385.2010(f) (3), facsimile, express delivery, or messenger. The party filing the Formal Challenge shall serve the individual listed as the contact person on East River's Informational Filing required under these Protocols.
3. Any Formal Challenge must be presented by December 5 (or the next Business Day if December 5 falls on a weekend or holiday) . East River will provide a response to the Formal Challenge no later than December 15.

## Section 6. Modification of Formula Rate or Annual Update

1. No party shall seek to modify the Formula Rate under the Challenge procedures (either Formal or Informal) set forth in these Protocols, and the Annual Update shall not be subject to challenge for the purpose of modifying the Formula Rate. Any modifications to the Formula Rate will require, as applicable, a FPA Section 205 or Section 206 filing.
2. A change to the Formula Rate Stated Values may not be made absent the appropriate filing with the Commission pursuant to the FPA, Sections 205 or 206.
3. If East River makes a correction to a Mistake in its financial information during a Rate Year that would affect the Formula Rate for that Rate Year, such corrections and any resulting refunds or surcharges shall be reflected in the Annual Update for the next effective Rate Year with interest computed in accordance with the SPP Tariff. For purposes of these Protocols, "Mistake" shall mean errors or omissions regarding the values inputted into the Formula Rate template, such as arithmetic or computational errors. Mistakes shall not include matters involving exercise of judgment or substantive differences of opinion regarding the derivation of an input that is more properly the subject of the annual review process.
4. Any changes to the data inputs or as the result of an Informal Challenge or a Commission proceeding shall be incorporated into the Formula Rate and the charges produced by the Formula Rate in the Annual Update for the next effective Rate Year. Any interest on any refund shall be calculated in accordance with the SPP Tariff, and the Commission interest rate.

## Section 7. Informational Filing

By December 20 of each year, East River shall provide to the Commission an

Informational Filing of its Annual Update under a separate docket number.

1. This Informational Filing must include the information that is reasonably necessary to determine:
    a. That input data under the Formula Rate is properly recorded in any underlying work papers.
    b. That East River has properly applied the Formula Rate and these procedures;
    c. The accuracy of the data and the consistency with the Formula Rate of the ATRR and rates under review; and
    d. The extent of accounting changes that affect Formula Rate inputs.
2. The Informational Filing must also describe all aspects of the Formula Rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures.
3. Contemporaneous with the making of such Informational Filing, East River shall provide notice of the Informational Filing and the associated docket number to the Interested Parties through Formula Rate Posting Information Notification List to be maintained by SPP. East River will also request that SPP post the notice and final Annual Update and True-up Adjustments on the SPP OASIS.

## Section8. Joint SPP Transmission Owners' Meeting

As applicable, each year East River shall endeavor to coordinate with other SPP transmission owners using formula rates to establish revenue requirements for recovery of the costs of transmission projects that utilize the same regional cost sharing mechanism and transmission owners that own inter-regional projects whose costs are allocated in part to SPP members, and hold a joint informational meeting to enable all Interested Parties to understand how those transmission owners are implementing their formula rates for recovering the costs of such projects.

## Section 9. Definitions

For purposes of these Protocols, the following capitalized terms shall have the meanings set forth below.

a. "Annual Transmission Revenue Requirement" (ATRR) means the net revenue requirement for the transmission services calculated in accordance with the Formula Rate, filed for informational purposes

with the Commission,posted on the SPP OASIS on or before the annual Publication Date, and subject to review pursuant to the provisions of these Protocols.

b. "Annual Meeting" means the meeting hosted by East River for the purpose of exchanging information with Interested Parties regarding the Annual Update and True-up Adjustment.

c. "Annual Update" means East River's annual filing of its Formula Rate, in a working Excel™ format. The Annual Update is submitted as described in these Protocols.

d. "Business Day" means from 9:00 AM to 5:00 PM Central Prevailing Time other than weekends and holidays recognized by the Commission.

e. "Calendar Year" means January 1 through December 31 of a given year.

f. "Current Calendar Year" means the Calendar Year in which the Annual Update is filed (e.g., if the Annual Update is filed on September 10, 2017, the Current Calendar Year is 2017).

g. "Current Rate Year" means the Rate Year for which the Annual Update is posted on the SPP OASIS and filed with the Commission (e.g., if the Annual Update is filed on September 10, 2016, the Current Rate Year is January 1, 2017 through December 31, 2017).

h. "Customer(s)" or "Transmission Customer(s)" means the East River customers taking NITS service, service under Grandfathered Agreements, or PTP service.

i. "Commission" means the Federal Energy Regulatory Commission.

j. "Formal Challenge" means a challenge by an Interested Party to an aspect of the Annual Update that is filed with the Commission, and served on East River by electronic service on the date of such filing.

k. "Formula Rate Template" means the East River transmission formula rate template set forth in Addendum 25 to Attachment H, , to the SPP Tariff.

l. "Formula Rate" means the East River Implementation Protocols together with the Formula Rate Template.

m. "FPA" means Federal Power Act.

n. "Informal Challenge" means written notification by an Interested Party to East River, during the Review Period, of any specific challenge to the Annual Update.

o. "Information Request" means a written request submitted by an Interested Party to East River.

p. "Informational Filing" means East River's annual filing at the Commission with the information stipulated in these Protocols.

q. "Interest" means interest calculated pursuant to 18 C.F.R. § 35.19a (a) (2) (iii), or successor regulation.

r. "Interested Party" includes but is not limited to, customers under the SPP Tariff, state utility regulatory commissions, consumer advocacy agencies, and state attorneys general.

s. "Interested Parties Review Period" means a period of up to sixty (60) days after each annual Publication Date (unless such period is extended with the written agreement of East River) during which Interested Parties may serve reasonable Information Requests on East River.

t. "NITS" means Network Integration Transmission Service as defined in the SPP Tariff.

u. "OASIS" means Open Access Same-Time Information System.

v. " SPP Tariff" means SPP's Open Access Transmission Tariff.

w. "Prior Calendar Year" means the year preceding the Current Calendar Year (e.g., if the Annual Update is filed on September 10, 2017, the Prior Calendar Year is 2016).

x. "Prior Rate Year" means the Rate Year prior to the Current Rate Year (e.g., if the Current Rate Year is January 1, 2017 through December 31, 2017, then the Prior Rate Year is January 1, 2016 through December 31, 2016).

y. "PTP Rates" means the point-to-point rates derived from the Formula Rate.

z. "Publication Date" means the date on which East River posts the Annual Update to the SPP OASIS. The Publication Date for each year beginning in 2016 shall be no later than September 10, provided however, that if September 10 should fall on a weekend or a holiday recognized by the Commission, then the posting shall be due no later than the next Business Day, and the Publication Date shall correspond to the actual posting date.

aa. "Rate Year" means January 1 through December 31 of a given year.

bb. "Review Period" means unless otherwise extended in writing by East River, sixty (60) days after the Publication Date.

cc. "Stated Values" means values that are fixed and not subject to change in an Annual Update. Stated Values include: (i) the authorized return on equity (ROE)percentage; (ii) the target equity minimum percentage; (iii) depreciation and amortization rates; and(iv) CWIP percentage recovery, and (v) direct allocation factors. Stated Values may be changed only pursuant to FPA Section 205 or 206.

dd. "True-up Adjustments" means the calculated difference between the

projected and actual ATRR for a Rate Year.

ee. "USoA" means the Rural Utilities Service Uniform System of Accounts.

**Corn Belt Power Cooperative**

Formula Rate Template for SPP Zone 19 Transmission

Schedule 1 (Utilizing RUS Form 12 Data)

12 Months Ended 12/31/2014

Notes:

This settlement adjustment (Docket No. ER15-2028) only applies to the Corn Belt 2015 and A 2016 ATRR and will expire following the 2016 rate year, at which time the amount listed on lines 6b and 6c will be 0 going forward.

B Communication and Microwave equipment is allocated between Transmission and Non-Transmission on Schedule 10. "CA" allocator is Transmission Allocator calculated on Schedule 10, line 28.

C Depreciation Rates are shown in Schedule 4 and will not be changed absent an Order from the FERC

D One-time settlement adjustment for the 2018 rate year (the year utilizing historical data from the 12 months ended 12/31/2017). For the 2018 rate year, the total company settlement adjustment will be -$119,743 per the settlement in Docket No. ER15-2028. This amount will be multiplied by the TP allocator to derive the SPP Zone 19 amount. The result will be a reduction in Corn Belt's net zonal revenue requirement. For every year other than the 2018 rate year, the total company amount will be populated with a zero, resulting in no change to the revenue requirement.

Formula Rate Template for SPP Zone 19 Transmission

Schedule 2: Project ATRR

12 Months Ended 12/31/2014

Notes

This value includes subsequent capital investments reqired to maintain the facilities to their original capabilities.
Gross Plant does not include CWIP, Unamortized Regulatory Asset or Unamortized Abandoned Plant.

B Project Net Plant is the Project Gross Plant Identified in Column 3 less the associated Accumulated Depreciation in column 4.
Net Plant includes CWIP, Unamortized Abandoned Plant and any FERC approved Regulatory Asset.

C Project Depreciation Expense is the amount in Schedule 1, Page 3, line 11 that is associated with the specified project per the annual deprciation rate specified in Schedule 4.
Project Depreciation Expenses includes the amortization of Abandoned Plant and any FERC approved Regulatory Asset.
However, if FERC grants accelerated depreciation for a project the depreciation rate authorized by FERC will be used instead of the rates shown on Schedule 4 for all other projects.

D Requires approval by FERC of incentive return applicable to the specified project(s)

E Competitive Bid Concession, if any, will reflect outcome of SPP competitive developer selection process and will be computed on a workpaper that will be provided as supporting documentation for each Annual Update and will be zero or a reduction to the revenue requirement.
Additionally, the value and form of the rate reduction will be refected in a project sponsor agreement between Corn Belt Power Cooperative and SPP.

F True-Up Adjustment is calculated on Schedule 8

G Schedule 11 PTP revenue credits allocated to each project by SPP

H The sum of lines 21, 22, and 23 must equal the amount listed on line 20

|---|---|---|
| 2 | Total Regulatory Asset and Abandoned Plant Amortization Expense for Rate Year (Notes D and E): | - |
| 3 | Annual Amortization of Regulatory Assets (Note C): | - |
| 4 | Annual Amortization of Abandoned Plant (Note C): | - |

Notes:

A Only include projects approved for SPP Zone 19 (UMZ) transmission cost recovery

B Regulatory Assets and/or Abandoned Plant cannot be included absent FERC approval. Amounts, percentages includable, and amortization periods cannot be added or changed absent FERC approval.

C The totals of lines 3 and 4 must equal the amounts on line 2

D Recovery of Regulatory Asset permitted only for pre-commercial and formation expenses related to projects and are subject to FERC approval before any Regulatory Asset amounts are included in rates. Recovery of any other regulatory assets requires authorization from the Commission. A carrying charge equal equal to the AFUDC rate will be applied to the Regulatory Asset prior to the rates becoming effective.

E Unamortized Abandoned Plant and Amortization of Abandoned Plant will be zero until the Commission accepts or approves recovery of the cost of abandoned plant. Utility must submit a Section 205 filing to recover the cost of abandoned plant.

Recovery of Abandoned Plant Cost permitted only subject to FERC F approval before any Abandoned Plant Costs are included in rates

Notes:

A The cost of long term debt is calculated on line 3, column c. Per Docket No. ER15-2028-000 the higher of equity component applicable only to Rate Years prior to 2021.
A base ROE of 9.6% and an SPP incentive adder of 50 basis points. This amount will not be changed absent a Section 205 or 206 filing with FERC.

No party to this proceeding may submit a filing under section 205 or 206 of the Federal Power Act (FPA) prior to September 1, 2022

to change the base ROE, nor may any party to this proceeding support such a request by another entity. Corn Belt shall use the base ROE of 9.6% in any section 205 filing made before September 1, 2022 that requires an ROE component and the other parties will not challenge the use of such base ROE in those filings.

Notes:

A The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Workpaper with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 12 data requirements or other similar supporting documentation. Additional line items or line deletions will not require FPA Section 205 or 206 filings. Corn Belt will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in 's Corn Belt's Implementation Protocols. Corn Belt may not change the columns or the formulas included in these Work Papers during the Annual Update.

Notes:

| | | |
|---|---|---|
| A | The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Workpaper with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 12 data requirements or other similar supporting documentation. Additional line items or line deletions will not require FPA Section 205 or 206 filings. Corn Belt will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in 's Corn Belt's Implementation Protocols. Corn Belt may not change the columns or the formulas included in these Work Papers during the Annual Update. | |

Notes:

A The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Workpaper with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 12 data requirements or other similar supporting documentation. Additional line items or line deletions will not require FPA Section 205 or 206 filings. Corn Belt will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in 's Corn Belt's Implementation Protocols. Corn Belt may

not change the columns or the formulas included in these Work Papers during the Annual Update.

**Corn Belt Power Cooperative**

Notes:

A The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Workpaper with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 12 data requirements or other similar supporting documentation. Additional line items or line deletions will not require FPA Section 205 or 206 filings. Corn Belt will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in 's Corn Belt's Implementation Protocols. Corn Belt may not change the columns or the formulas included in these Work Papers during the Annual Update.

Notes:

A The addition of new lines and the removal of outdated lines may be necessary in order to accurately provide information, and populate or remove data in the Workpaper with changes in future years. Where appropriate, these changes will provide detail and linkage to updated Form 12 data requirements or other similar supporting documentation. Additional line items or line deletions will not require FPA Section 205 or 206 filings. Corn Belt will describe such changes in the Annual Update, and the changes will be subject to the review of Interested Parties under the procedures set forth in 's Corn Belt's Implementation Protocols. Corn Belt may not change the columns or the formulas included in these Work Papers during the Annual Update.

**Corn Belt Power Cooperative**

**Transmission Formula Rate Implementation Protocols**

## I. Annual Update

1. The transmission formula rate template of the Corn Belt Power Cooperative ("Corn Belt") and these Formula Rate Implementation Protocols ("Protocols") together comprise the filed rate ("Formula Rate") of Corn Belt for transmission service in the Upper Missouri Zone ("UMZ") - Zone 19 of the Southwest Power Pool, Inc. ("SPP"). Corn Belt must follow the instructions specified in the Formula Rate to calculate its Annual Transmission Revenue Requirements ("ATRR") for Network Integration Transmission Service and the revenue requirements for Scheduling, System Control and Dispatch Service ("Schedule 1 Service"), as well as the SPP Base Plan Zonal and Region-Wide Charge ("Schedule 11 Service") under the SPP Open Access Transmission Tariff ("OATT" or "SPP Tariff"). Corn Belt's ATRR includes the annual transmission revenue requirements associated with the facilities of North Iowa Municipal Electric Cooperative Association ("NIMECA") that are incorporated within the Formula Rate.

2. The ATRR calculated pursuant to the Formula Rate, as well as the SPP-derived rates, shall be applicable to service on and after June 1 of each calendar year through May 31 of the following calendar year ("Rate Year"), subject to review, challenge and refunds or surcharges with interest, to the extent provided herein.

3. On or before June 1 of each calendar year, Corn Belt shall:

   (a) recalculate the revenue requirements applicable to Network Integration Transmission Service, Schedule 1 Service, and Schedule 11 Service for the new Rate Year in accordance with the Formula Rate ("Annual Update"); and

   (b) provide its Annual Update to SPP and request SPP to post such information on SPP's website and Open Access Same-Time Information System ("OASIS"). Within ten (10) days of such posting, Corn Belt shall provide notice of such posting via the SPP e-mail subscription ("Service List").[1] Interested Parties can subscribe to the Service List on the SPP website.

4. If the date for posting the Annual Update falls on a weekend or a holiday recognized by the Federal Energy Regulatory Commission ("FERC"), then the posting shall be due on the next business day. The date on which such posting occurs shall be that year's "Publication Date." Any delay in the Publication Date will result in an equivalent extension of time for the submission of information requests and for Corn Belt's response to information requests as described in Sections III of these Protocols, and for the submission of Information Challenges and for Corn Belt's response to Informal Challenges as described in Section IV of these Protocols.

5. The Annual Update for the Rate Year shall:

[1] As used in these Protocols, "Service List" shall mean the list of email addresses maintained by SPP of Interested Parties, provided that such Interested Parties request to be added to the Service List through the "Exploder List" link on the SPP website. As of January 2016, the Exploder List was titled "Formula Rate Information Notification" and could be accessed at http://www.spp.org/stakeholder-center/exploder-lists/. Interested Parties may include (i) SPP Tariff Transmission Customers; (ii) any state regulatory agency with rate jurisdiction over a public utility located within the SPP footprint; and (iii) any consumer advocate agency authorized by state law to review and contest the rates for any such public utility.

(a) include a workable populated rate formula template with fully functional spreadsheets showing the calculation of the Annual Update and underlying workpapers in native format with all formulas and links intact;

(b) to the extent specified in the Formula Rate, be based upon Corn Belt's Rural Utilities Service ("RUS") Financial and Operating Report - Power Supply ("Form 12") for the most recent calendar year, and, to the extent specified in the Formula Rate, upon the books and records of Corn Belt consistent with RUS and FERC accounting regulations, policies, and practices.

(c) as and to the extent specified in the Formula Rate, provide sufficiently detailed workpapers and supporting documentation for data (and all adjustments thereto or allocations thereof) that are used to develop the Formula Rate and are not otherwise available directly from the RUS Form 12 or the audited financial statements;

(d) provide sufficient information to enable Interested Parties (as that term is defined in Section II of these Protocols) to replicate the calculation of the formula results from the Formula Rate;

(e) identify any changes in the formula references (page and line numbers) to the RUS Form 12;

(f) identify all material adjustments made to the Formula Rate data in determining formula inputs, including relevant footnotes to the RUS Form 12 or the audited financial statements and any adjustments not shown in the RUS Form 12 or the audited financial statements;

(g) With respect to any change in accounting that affects the inputs to the Formula Rate or the resulting charges billed under the Formula Rate ("Accounting Change"):

i. Identify any Accounting Changes, including:

a. The initial implementation of an accounting standard or policy;

b. the initial implementation of accounting practices for unusual or unconventional items where RUS or FERC has not provided specific accounting direction;

c. correction of errors and prior period adjustments that impact the revenue requirement;

d. the implementation of new estimation methods or policies that change prior estimates; and

e. changes to income tax elections if applicable.

ii. Identify items included in the Formula Rate at an amount other than on a historic cost basis (e.g., fair value adjustments);

iii. Identify any reorganization or merger transaction during the previous year and explain the effect of the accounting for such transaction(s) on inputs to the Formula Rate;

iv. Provide, for each item identified pursuant to items I.5.g.i.a - I.5.g.i.c of these Protocols, a

narrative explanation of the individual impact of such changes on charges billed under the Formula Rate.

(h) Identify the equity component of the capital structure used for the calculation of the Weighted Average Cost of Capital ("WACC");

(i) not seek to modify the Formula Rate, as any modification to the Formula Rate will require filing under Section 205 or 206 of the Federal Power Act.

**II. Review of Annual Update**

Corn Belt shall host an open meeting among Interested Parties, no earlier than July 1 and no later than September 1 each year ("Annual Meeting"). No less than seven (7) days prior to such Annual Meeting, Corn Belt shall provide Interested Parties notice on SPP's website and OASIS of the time, date, and location of the Annual Meeting and shall provide notice of such meeting via the Service List. For purposes of these procedures, the term Interested Party includes, but is not limited to, customers under the SPP Tariff, state utility regulatory commissions, consumer advocacy agencies, and state attorneys general. The Annual Meeting shall (i) permit Corn Belt to explain and clarify its Annual Update and (ii) provide Interested Parties an opportunity to seek information and clarifications from Corn Belt about the Annual Update. The Annual Meeting may be held as solely as a "remote access" meeting (web and voice) to limit travel costs and ease burdens.

If Corn Belt is responsible for the construction of any transmission projects that utilize a regional cost sharing mechanism, Corn Belt shall participate in a joint informational meeting with other transmission owners using formula rates to establish revenue requirements for recovery of costs of projects subject to the same regional cost allocation. The purpose of the meeting is to enable all interested parties to understand how those Transmission Owners are implementing their formula rates for cost recovery of such projects. Notice of joint informational meetings, including the time, date, and location, shall be posted on the SPP website and OASIS and distributed to Interested Parties via the Service List no less than seven (7) days prior to such meetings.

**III. Information Exchange Procedures**

1. Interested Parties shall have until September 15 following the Publication Date (unless such period is extended with the written consent of Corn Belt, by FERC order, or by operation of Section I.4) to serve reasonable information and document requests on Corn Belt ("Information Exchange Period"). If September 15 falls on a weekend or a holiday recognized by FERC, the deadline for submitting all information and document requests shall be extended to the next business day. Such information and document requests shall be limited to what is necessary to determine:

(a) the extent or effect of an Accounting Change;

(b) whether the Annual Update fails to include data properly recorded in accordance with these Protocols;

(c) the proper application of the Formula Rate and procedures in these Protocols;

(d) the accuracy of data and consistency with the Formula Rate of the calculations shown in the Annual Update;

(e) the prudence of actual costs and expenditures;

(f) the effect of any change to the underlying Uniform System of Accounts or the Formula Rate template; or

(g) any other information that may reasonably have substantive effect on the calculation of the Annual

Update pursuant to the Formula Rate.

The information and document requests shall not otherwise be directed to ascertaining whether the Formula Rate is just and reasonable.

2. Corn Belt shall make a good faith effort to respond to information requests pertaining to the Annual Update within fifteen (15) business days of receiving such requests. Information requests received after 4 p.m. Central Prevailing Time shall be considered received the next business day. Corn Belt shall respond to all information and document requests by no later than October 15 following the Publication Date, unless the Information Exchange Period is extended by Corn Belt or FERC, or by operation of Section I.4.

3. Corn Belt shall request SPP to post on SPP's website and OASIS all information requests from Interested Parties and Corn Belt's response(s) to such requests, and a link to the website will be electronically served upon the Service List; except, however, if responses to information and document requests include material deemed by Corn Belt to be confidential information, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement to be executed by Corn Belt and the requesting party.

4. Corn Belt shall not claim that responses to information and document requests provided pursuant to these Protocols are subject to any settlement confidentiality privilege; however, Corn Belt may require that Interested Parties execute a non-disclosure agreement to obtain access to material that Corn Belt deems commercially sensitive or that contains Critical Energy Infrastructure Information as that term is defined in 18 CFR§ 388.113(c)(1).

**IV. Challenge Procedures**

1. Interested Parties shall have until November 15 following the Publication Date (unless such period is extended with the written consent of Corn Belt, by FERC order or by operation of Section I.4) to review the inputs, supporting explanations, allocations, and calculations ("Review Period") and to notify Corn Belt in writing, which may be made electronically, of any specific Informal Challenges. The period of time from the Publication Date until November 15 shall be referred to as the Review Period. If November 15 falls on a weekend or a holiday recognized by FERC, the deadline for submitting all Informal Challenges shall be extended to the next business day. Failure to pursue an issue through an Informal Challenge shall not bar pursuit of that issue as part of a Formal Challenge with respect to the same Annual Update as long as the Interested Party has included at least one issue as part of an Informal Challenge with respect to that Annual Update. If the Interested Party has not included any issues as part of an Informal Challenge for an Annual Update, the Interested Party is barred from pursing a Formal Challenge with respect to any issue for that Annual Update but is not barred from pursing an issue or from lodging a Formal Challenge as to such issue as it relates to a subsequent Annual Update.

2. A party submitting an Informal Challenge to Corn Belt must specify the inputs, supporting explanations, allocations, calculations, or other information to which it objects, and provide an appropriate explanation and documents to support its challenge. Corn Belt shall make a good faith effort to respond to any Informal Challenge within twenty (20) business days of notification of such challenge. Corn Belt, and where applicable, SPP, shall appoint a senior representative to work with the party that submitted the Informal Challenge (or its representative) toward a resolution of the challenge. If Corn Belt disagrees with such challenge, Corn Belt will provide the Interested Party(ies) with an explanation supporting the inputs, supporting explanations, allocations, calculations, or other information. No Informal Challenge may be submitted after November 15, and Corn Belt must respond to all Informal Challenges by no later than December 15, unless the Review Period is extended by Corn Belt or FERC or by operation of Section I.4.

3. Informal Challenges shall be subject to the resolution procedures and limitations in this Section IV. Formal Challenges shall be filed pursuant to these Protocols and shall satisfy all of the following requirements.

(a) A Formal Challenge shall:

i. Clearly identify the action or inaction which is alleged to violate the filed rate formula or Protocols;

ii. Explain how the action or inaction violates the filed rate formula or Protocols;

iii. Set forth the business, commercial, economic or other issues presented by the action or inaction as such relate to or affect the party filing the Formal Challenge, including:

a. The extent or effect of an Accounting Change;

b. Whether the Annual Update fails to include data properly recorded in accordance with these Protocols;

c. The proper application of the Formula Rate and procedures in these Protocols;

d. The accuracy of data and consistency with the Formula Rate of the charges shown in the Annual Update;

e. The prudence of actual costs and expenditures;

f. The effect of any change to the underlying RUS System of Accounts or the Applicable Form; or

g. Any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the formula.

iv. Make a good faith effort to quantify the financial impact or burden (if any) created for the party filing the Formal Challenge as a result of the action or inaction;

v. State whether the issues presented are pending in an existing Commission proceeding or a proceeding in any other forum in which the filing party is a party, and if so, provide an explanation why timely resolution cannot be achieved in that forum;

vi. State the specific relief or remedy requested, including any request for stay or extension of time, and the basis for that relief;

vii. Include all documents that support the facts in the Formal Challenge in possession of, or otherwise attainable by, the filing party, including, but not limited to, contracts and affidavits; and

viii. State whether the filing party utilized the Informal Challenge procedures described in these Protocols to dispute the action or inaction raised by the Formal Challenge, and, if not, describe why not.

(b) Service. Any person filing a Formal Challenge must serve a copy of the Formal Challenge on Corn Belt. Service to Corn Belt must be simultaneous with filing at the Commission. Simultaneous service can be accomplished by electronic mail in accordance with § 385.2010(f)(3), facsimile, express delivery, or messenger. The party filing the Formal Challenge shall serve the individual listed as the contact person on Corn Belt's Informational Filing required under Section VI of these Protocols.

4. Informal and Formal Challenges shall be limited to all issues that may be necessary to determine: (1) the extent or effect of an Accounting Change; (2) whether the Annual Update fails to include data properly recorded in accordance with these Protocols; (3) the proper application of the Formula Rate and procedures in these Protocols; (4) the accuracy of data and consistency with the Formula Rate of the charges shown in the Annual Update; (5) the prudence of actual costs and expenditures; (6) the effect of any change to the underlying RUS System of Accounts or the Applicable Form; or (7) any other information that may reasonably have substantive effect on the calculation of the charge pursuant to the formula.

5. Corn Belt will request SPP to post on SPP's website all Informal Challenges from Interested Parties and Corn Belt's response(s) to such Informal Challenges and a link to the website will be electronically served upon the Service List; except, however, if Informal Challenges or responses to Informal Challenges include material deemed by Corn Belt to be confidential information, such information will not be publicly posted but will be made available to requesting parties pursuant to a confidentiality agreement to be executed by Corn Belt and the requesting party.

6. Any changes or adjustments to the Annual Update resulting from the Information Exchange and Informal Challenge processes that are agreed to by Corn Belt will be reported in the Informational Filing required pursuant to Section VI of these Protocols and will be reflected in the Annual Update for the following Rate Year, as discussed in Section V of these Protocols.

7. An Interested Party shall have until March 1 following the Review Period (unless such date is extended with the written consent of Corn Belt to continue efforts to resolve the Informal Challenge) to make a Formal Challenge with FERC, which shall be served on Corn Belt on the date of such filing as specified in Section IV.3.b above. A Formal Challenge shall be filed in the same docket as Corn Belt's Informational Filing discussed in Section VI of these Protocols. Corn Belt shall respond to the Formal Challenge by the deadline established by FERC. A party may not pursue a Formal Challenge if that party did not submit an Informal Challenge during the applicable Review Period.

8. In any proceeding initiated by FERC concerning the Annual Update or in response to a Formal Challenge, Corn Belt shall bear the burden, consistent with section 205 of the Federal Power Act, of proving that it has correctly applied the terms of the Formula Rate consistent with these Protocols, and that it followed the applicable requirements and procedures in these Protocols. Nothing herein is intended to alter the burdens applied by FERC with respect to prudence challenges.

9. Except as specifically provided herein, nothing herein shall be deemed to limit in any way the right of Corn Belt to file unilaterally, pursuant to Federal Power Act section 205 and the regulations thereunder, to change the Formula Rate or any of its inputs, or to replace the Formula Rate with a stated rate, or the right of any other party to request such changes pursuant to section 206 of the Federal Power Act and the regulations thereunder.

10. No party shall seek to modify the Formula Rate under the Challenge Procedures set forth in these Protocols and the Annual Update shall not be subject to challenge by anyone for the purpose of modifying the Formula Rate. Any modifications to the Formula Rate will require, as applicable, a Federal Power Act section 205 or section 206 filing.

11. Any Interested Party seeking changes to the application of the Formula Rate due to a change in the RUS System of Accounts or the Applicable Form, shall first raise the matter with Corn Belt in accordance with this Section IV before pursuing a Formal Challenge.

## V. Changes to Annual Update

1. A change to the Formula Rate fixed inputs related to rate of return on equity ("ROE"), depreciation rates, amortization periods, the amount of expense for Post-Employment Benefits Other than Pensions, and ROE incentives for SPP regional projects may not be made absent an appropriate filing with the FERC pursuant

to Federal Power Act Section 205 or Section 206; provided, however, that Corn Belt may make a limited Section 205 filing to change depreciation rates, amortization periods, the amount of expense for Post-Employment Benefits Other than Pensions, and/or ROE incentives for SPP regional projects, in which the sole issue for examination shall be whether the proposed change(s) are just and reasonable, and not unduly discriminatory. Any filing to change the ROE, or capital structure is not considered a limited filing.

2. If Corn Belt files any corrections to correct a Mistake in its RUS Form 12 or the audited financial statements during a Rate Year that would affect the Formula Rate for that Rate Year, such corrections and any resulting refunds or surcharges shall be reflected in the Annual Update for the next effective Rate Year, with interest computed in accordance with 18 C.F.R. § 35.19a. *See* Worksheet 11 of the Formula Rate template. For purposes of these Protocols, "Mistake" shall mean errors or omissions regarding the values inputted into the Formula Rate template, such as, but not limited to, arithmetic and other inadvertent computational errors, erroneous Form 12 references or the like. Mistakes shall not include matters involving exercise of judgment or substantive differences of opinion regarding the derivation of an input that is more properly the subject of the annual review process. Corrections to erroneous Form 12 references in the Formula Rate template may be made in the Annual Update without a Section 205 or 206 filing. There is no deadline for any Interested Party or Corn Belt to notify the other party of any mistake in any RUS Form 12 or the audited financial statements data or specific data applied in the Formula Rate template.

3. Any changes to the data inputs, including but not limited to revisions to Corn Belt's RUS Form 12 or the audited financial statements, or as the result of any FERC proceeding to consider the Annual Update, or as a result of the procedures set forth herein, shall be incorporated into the Formula Rate and the charges produced by the Formula Rate in the Annual Update for the next effective Rate Year. This reconciliation mechanism shall apply in lieu of mid-Rate Year adjustments. Interest on any refund shall be calculated in accordance with 18 C.F.R. § 35.19a**.**

## VI. Informational Filings

1. By January 15 of each year, Corn Belt shall submit to FERC an informational filing ("Informational Filing") of its Annual Update. Corn Belt will submit all Informational Filings in the same docket assigned to Corn Belt's first Informational Filing. This Informational Filing must include the information that is reasonably necessary to determine: (1) that input data under the Formula Rate are properly recorded in any underlying workpapers; (2) that Corn Belt has properly applied the Formula Rate and these procedures; (3) the accuracy of data and the consistency with the Formula Rate of the ATRR and rates under review; and (4) the extent of accounting changes that affect Formula Rate inputs. The Informational Filing must also describe any corrections or adjustments made during that period, and must describe all aspects of the Formula Rate or its inputs that are the subject of an ongoing dispute under the Informal or Formal Challenge procedures. Within five (5) days of such Informational Filing, Corn Belt shall provide notice of the Informational Filing to Interested Parties via email and by posting the docket number assigned to Corn Belt's Informational Filing on SPP's website and OASIS and a link to the website will be electronically served upon the Service List.

2. Any challenges to the implementation of Corn Belt's Formula Rate must be made through the Challenge Procedures described in Section IV of these Protocols or in a separate complaint proceeding, and not in response to the Informational Filing.

Formula Rate - Non-Levelized Rate Formula Template

Algona Municipal
Utilities

| Note Letter | |
|---|---|
| A | The utility's maximum monthly megawatt load (60-minute integration) for RQ service at time of applicable pricing zone coincident monthly peaks. RQ service is service which the supplier plans to provide on an on-going basis (i.e., the supplier includes projected load for this service in its system resource planning). |
| B | Includes LF, IF, LU, IU service. LF means "firm service" (cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions), and long-term (duration of at least five years); does not meet definition of RQ service. IF is "firm service" for a term longer than one but less than five years. LU is service from a designated generating unit, of a term no less than five years. |

LI is service from a designated generating unit for a term between one and five years. Measured at time of applicable pricing zone coincident monthly peaks.

C LF as defined above at time of applicable pricing zone coincident monthly peaks.

D LF as defined above at time of applicable pricing zone coincident monthly peaks.

E The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff, if any

F The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note K. Account 281 is not allocated.

G Transmission related only.

H Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 8, column 5.

I Prepayments are the electric related prepayments booked to Account No. 165.
Line 5 - EPRI Annual Membership Dues, all Regulatory Commission Expenses, and non-safety related advertising.
Line 5a - Regulatory Commission Expenses directly related to transmission service, ISO filings or transmission siting.

J Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate

Formula Template,

since they are recovered elsewhere.

K The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit. multiplied by (1/1-T) (page 3, line 26).

| | | | |
|---|---|---|---|
| Inputs Required: | FIT = | 0.0 0% | |
| | SIT= | 0.0 0% | (State Income Tax Rate or Composite SIT) |
| | p = | 0.0 0% | (percent of federal income tax deductible for state purposes) |

L Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Account Nos. 561.1, 561.2, 561.3, and 561.BA.

M Removes transmission plant determined to be state-jurisdictional by Commission order according to the seven-factor test (until account balances are adjusted to reflect application of seven-factor test).

N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

O Enter dollar amounts

P Debt cost rate = long-term interest (line 21) / long term debt (line 22). The Proprietary Capital Cost rate is implicit, a residual calculation after TIER is determined. TIER will be supported in the filing and no change in TIER may be made absent a filing with the ISO and the FERC, if the entity is under FERC's jurisdiction.

Q Line 29 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1 and all other uses are to be included in the divisor.

R Includes income related only to transmission facilities, such as pole attachments, rentals and special use.

S Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking - the revenues are included in line 4, page 1 and the loads are included in line 13, page 1. Grandfathered agreements whose rates have <u>not</u> been changed to eliminate or mitigate pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.

T The revenues credited on page 1 lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template

| | |
|---|---|
| | (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template. |
| U | Include only the amount from Accounts 428, 429 and 430. |
| V | Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements. |
| W | Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC. |
| X | Schedule 12-FERC charges should not be included in O&M recovered under this formula rate |
| Y | Per the settlement terms of Docket ER15-2028, the Gross Plant Allocator may be used in lieu of the Wages & Salary Allocator by setting the WSA = GPA. When this is done, The Net SPP ATRR using the GPA and the Net SPP ATRR using 5.1% for the WSA are entered in NIMECA Workpaper Z to calculate the annual payment to MRES. This payment is in effect the first rate update after the settlement is approved by FERC. |
| Z | Per the settlement terms of Docket ER15-2028, the return used is calculated with the fixed capital structure capped at 68.86% equity or the actual capital structure if the equity percentage in the actual capital structure is equal to or lower than |

68.86%. If the actual capital structure does not include any long-term debt,
then the fixed capital structure will use a debt cost of 4.65% to calculate the fixed capital structure return. This is in effect the first rate update
after the settlement is approved by FERC.

A
A

Per the settlement terms of Docket ER15-2028, any NIMECA Member participating in an SPP project the total cost of which is $10,000,000 or more and
which has regional cost sharing ("Project Costs"), may not recover a return on its share of those Project Costs through a transmission formula rate using a capital
structure equity component higher than 50% unless the NIMECA Member makes a single-issue Federal Power Act ("FPA") Section 205 filing proposing that
capital structure. This provision is effective until a NIMECA Member makes a general FPA Section 205 filing to change its formula rate.

Formula Rate - Non-Levelized

Rate Formula Template

Alta Municipal Utilities

For the 12 months ended 12/31/20XX

Note L

| Letter | |
|---|---|
| A | The utility's maximum monthly megawatt load (60-minute integration) for RQ service at time of applicable pricing zone coincident monthly peaks. RQ service is service which the supplier plans to provide on an on-going basis (i.e., the supplier includes projected load for this service in its system resource planning). |
| B | Includes LF, IF, LU, IU service. LF means "firm service" (cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions), and long-term (duration of at least five years); does not meet definition of RQ service. IF is "firm service" for a term longer than one but less than five years. LU is service from a designated generating unit, of a term no less than five years. LI is service from a designated generating unit for a term between one and five years. Measured at time of applicable pricing zone coincident monthly peaks. |
| C | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| D | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| E | The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff, if any |
| F | The balances in Accounts 190, 281, 282 and 283, as adjusted by |

any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note K. Account 281 is not allocated.

G Transmission related only.

Cash Working Capital assigned to transmission is one-eighth of

H O&M allocated to transmission at page 3, line 8, column 5.

Prepayments are the electric related prepayments booked to Account No. 165.

Line 5 - EPRI Annual Membership Dues, all Regulatory

I Commission Expenses, and non-safety related advertising.

Line 5a - Regulatory Commission Expenses directly related to transmission service, ISO filings or transmission siting.

Includes only FICA, unemployment, highway, property, gross

J receipts, and other assessments charged in the current year.

Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere.

The currently effective income tax rate, where FIT is the Federal

K income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce

rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit. multiplied by (1/1-T) (page 3, line 26).

| | | | |
|---|---|---|---|
| Inputs Required: | FIT = | 0.00 % | (State Income Tax Rate or |
| | SIT= | 0.00 % | Composite SIT) |
| | p = | 0.00 % | (percent of federal income tax deductible for state purposes) |

L Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Account Nos. 561.1, 561.2, 561.3, and 561.BA.

M Removes transmission plant determined to be state-jurisdictional by Commission order according to the seven-factor test (until account balances are adjusted to reflect application of seven-factor test).

N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

O Enter dollar amounts

P Debt cost rate = long-term interest (line 21) / long term debt (line 22). The Proprietary Capital Cost rate is implicit, a residual calculation after TIER is determined. TIER will be supported in the filing and

no change in TIER may be made absent a filing with the ISO and the FERC, if the entity is under FERC's jurisdiction.

Q Line 29 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1 and all other uses are to be included in the divisor.

R Includes income related only to transmission facilities, such as pole attachments, rentals and special use.

S Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking - the revenues are included in line 4, page 1 and the loads are included in line 13, page 1. Grandfathered agreements whose rates have not been changed to eliminate or mitigate pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.

T The revenues credited on page 1 lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template.

U Include only the amount from Accounts 428, 429 and 430.

V Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements.

W Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC.

| | |
|---|---|
| X | Schedule 12-FERC charges should not be included in O&M recovered under this formula rate |
| Y | Per the settlement terms of Docket ER15-2028, the Gross Plant Allocator may be used in lieu of the Wages & Salary Allocator by setting the WSA = GPA. When this is done, The Net SPP ATRR using the GPA and the Net SPP ATRR using 5.1% for the WSA are entered in NIMECA Workpaper Z to calculate the annual payment to MRES. This payment is in effect the first rate update after the settlement is approved by FERC. |
| Z | Per the settlement terms of Docket ER15-2028, the return used is calculated with the fixed capital structure capped at 68.86% equity or the actual capital structure if the equity percentage in the actual capital structure is equal to or lower than 68.86%. If the actual capital structure does not include any long-term debt, then the fixed capital structure will use a debt cost of 4.65% to calculate the fixed capital structure return. This is in effect the first rate update after the settlement is approved by FERC. |
| AA | Per the settlement terms of Docket ER15-2028, any NIMECA |

Member participating in an SPP project the total cost of which is $10,000,000 or more and which has regional cost sharing ("Project Costs"), may not recover a return on its share of those Project Costs through a transmission formula rate using a capital structure equity component higher than 50% unless the NIMECA Member makes a single-issue Federal Power Act ("FPA") Section 205 filing proposing that capital structure. This provision is effective until a NIMECA Member makes a general FPA Section 205 filing to change its formula rate.

Formula Rate - Non-Levelized

Rate Formula Template

Bancroft Municipal Utilities

For the 12 months ended 12/31/20XX

Note Letter

A

The utility's maximum monthly megawatt load (60-minute integration) for RQ service at time of applicable pricing zone coincident monthly peaks.

| | |
|---|---|
| | RQ service is service which the supplier plans to provide on an on-going basis (i.e., the supplier includes projected load for this service in its system resource planning). Includes LF, IF, LU, IU service. LF means "firm service" (cannot be interrupted for economic |
| B | reasons and is intended to remain reliable even under adverse conditions), and long-term (duration of at least five years); does not meet definition of RQ service. IF is "firm service" for a term longer than one but less than five years. LU is service from a designated generating unit, of a term no less than five years. LI is service from a designated generating unit for a term between one and five years. Measured at time of applicable pricing zone coincident monthly peaks. |
| C | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| D | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| E | The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff, if any |
| F | The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note K. Account 281 is not allocated. |
| G | Transmission related only. |
| H | Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 8, column 5. Prepayments are the electric related prepayments booked to Account No. 165. |

Line 5 - EPRI Annual Membership Dues, all Regulatory Commission
I Expenses, and non-safety related advertising.
Line 5a - Regulatory Commission
Expenses directly related to
transmission service, ISO filings or
transmission siting.
Includes only FICA, unemployment, highway, property, gross receipts, and
J other assessments charged in the current year.
Taxes related to income are excluded. Gross receipts taxes are not
included in transmission revenue requirement in the Rate Formula
Template,
since they are recovered elsewhere.
The currently effective income tax rate, where FIT is the Federal income
K tax rate; SIT is the State income tax rate, and p =
"the percentage of federal income tax deductible for state income taxes".
If the utility is taxed in more than one state it must attach a
work paper showing the name of each state and how the blended or composite
SIT was developed. Furthermore, a utility that
elected to utilize amortization of tax credits against taxable income, rather than
book tax credits to Account No. 255 and reduce
rate base, must reduce its income tax expense by the
amount of the Amortized Investment Tax Credit.
multiplied by (1/1-T) (page 3, line 26).

| | | | |
|---|---|---|---|
| | | 0.0 | |
| Inputs Required: | FIT = | 0% | |
| | | | (State Income Tax Rate or |
| | | 0.0 | Composite |
| | SIT= | 0% | SIT) |
| | | | (percent of federal income tax deductible for |
| | | 0.0 | state |
| | p = | 0% | purposes) |

Removes dollar amount of transmission expenses included in the OATT
L ancillary services rates, including Account Nos. 561.1, 561.2, 561.3, and

561.BA.

M Removes transmission plant determined to be state-jurisdictional by Commission order according to the seven-factor test (until account balances are adjusted to reflect application of seven-factor test).

N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

O Enter dollar amounts

P Debt cost rate = long-term interest (line 21) / long term debt (line 22). The Proprietary Capital Cost rate is implicit, a residual calculation after TIER is determined. TIER will be supported in the filing and no change in TIER may be made absent a filing with the ISO and the FERC, if the entity is under FERC's jurisdiction.

Q Line 29 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1 and all other uses are to be included in the divisor.

R Includes income related only to transmission facilities, such as pole attachments, rentals and special use.

S Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking - the revenues are included in line 4, page 1 and the loads are included in line 13, page 1. Grandfathered agreements whose rates have <u>not</u> been changed to eliminate or mitigate pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.

T The revenues credited on page 1 lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template.

U Include only the amount from Accounts

| | |
|---|---|
| | 428, 429 and 430. |
| V | Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements. |
| W | Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC. |
| X | Schedule 12-FERC charges should not be included in O&M recovered under this formula rate |
| Y | Per the settlement terms of Docket ER15-2028, the Gross Plant Allocator may be used in lieu of the Wages & Salary Allocator by setting the WSA = GPA. When this is done, The Net SPP ATRR using the GPA and the Net SPP ATRR using 5.1% for the WSA are entered in NIMECA Workpaper Z to calculate the annual payment to MRES. This payment is in effect the first rate update after the settlement is approved by FERC. |
| Z | Per the settlement terms of Docket ER15-2028, the return used is calculated with the fixed capital structure capped at 68.86% equity or the actual capital structure if the equity percentage in the actual capital structure is equal to or lower than 68.86%. If the actual capital structure does not include any long-term debt, then the fixed capital structure will use a debt cost of 4.65% to calculate the fixed capital structure return. This is in effect the first rate update after the settlement is approved by |

FERC.

A
A

Per the settlement terms of Docket ER15-2028, any NIMECA Member participating in an SPP project the total cost of which is $10,000,000 or more and
which has regional cost sharing (“Project Costs”), may not recover a return on its share of those Project Costs through a transmission formula rate using a capital
structure equity component higher than 50% unless the NIMECA Member makes a single-issue Federal Power Act (“FPA”) Section 205 filing proposing that capital structure. This provision is effective until a NIMECA Member makes a general FPA Section 205 filing to change its formula rate.

Formula Rate - Non-Levelized

Rate Formula Template

Coon Rapids Municipal Utilities

For the 12 months ended 6/30/2014

| Note | Letter | |
|---|---|---|
| | A | The utility's maximum monthly megawatt load (60-minute integration) for RQ service at time of |

applicable pricing zone coincident monthly peaks.

B RQ service is service which the supplier plans to provide on an on-going basis (i.e., the supplier includes projected load for this service in its system resource planning). Includes LF, IF, LU, IU service. LF means "firm service" (cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions), and long-term (duration of at least five years); does not meet definition of RQ service. IF is "firm service" for a term longer than one but less than five years. LU is service from a designated generating unit, of a term no less than five years. LI is service from a designated generating unit for a term between one and five years. Measured at time of applicable pricing zone coincident monthly peaks.

C LF as defined above at time of applicable pricing zone coincident monthly peaks.

D LF as defined above at time of applicable pricing zone coincident monthly peaks.

E The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff, if any

F The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note K. Account 281 is not allocated.

G Transmission related only.

H Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 8, column 5. Prepayments are the electric related prepayments booked to Account No. 165.

Line 5 - EPRI Annual Membership Dues, all Regulatory Commission
I Expenses, and non-safety related advertising.
Line 5a - Regulatory Commission
Expenses directly related to
transmission service, ISO filings or
transmission siting.
Includes only FICA, unemployment, highway, property, gross receipts, and
J other assessments charged in the current year.
Taxes related to income are excluded. Gross receipts taxes are not
included in transmission revenue requirement in the Rate Formula
Template,
since they are recovered elsewhere.
The currently effective income tax rate, where FIT is the Federal income
K tax rate; SIT is the State income tax rate, and p =
"the percentage of federal income tax deductible for state income taxes".
If the utility is taxed in more than one state it must attach a
work paper showing the name of each state and how the blended or composite
SIT was developed. Furthermore, a utility that
elected to utilize amortization of tax credits against taxable income, rather than
book tax credits to Account No. 255 and reduce
rate base, must reduce its income tax expense by the
amount of the Amortized Investment Tax Credit.
multiplied by (1/1-T) (page 3, line 26).

| | | | |
|---|---|---|---|
| | | 0.0 | |
| Inputs Required: | FIT = | 0% | |
| | | | (State Income Tax Rate or |
| | | 0.0 | Composite |
| | SIT= | 0% | SIT) |
| | | | (percent of federal income tax deductible for |
| | | 0.0 | state |
| | p = | 0% | purposes) |

Removes dollar amount of transmission expenses included in the OATT
L ancillary services rates, including Account Nos. 561.1, 561.2, 561.3, and

561.BA.

M Removes transmission plant determined to be state-jurisdictional by Commission order according to the seven-factor test (until account balances are adjusted to reflect application of seven-factor test).

N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

O Enter dollar amounts

P Debt cost rate = long-term interest (line 21) / long term debt (line 22). The Proprietary Capital Cost rate is implicit, a residual calculation after TIER is determined. TIER will be supported in the filing and no change in TIER may be made absent a filing with the ISO and the FERC, if the entity is under FERC's jurisdiction.

Q Line 29 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1 and all other uses are to be included in the divisor.

R Includes income related only to transmission facilities, such as pole attachments, rentals and special use.

S Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking - the revenues are included in line 4, page 1 and the loads are included in line 13, page 1. Grandfathered agreements whose rates have <u>not</u> been changed to eliminate or mitigate pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.

T The revenues credited on page 1 lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template.

U Include only the amount from Accounts

| | |
|---|---|
| | 428, 429 and 430. |
| V | Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements. |
| W | Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC. |
| X | Schedule 12-FERC charges should not be included in O&M recovered under this formula rate |
| Y | Per the settlement terms of Docket ER15-2028, the Gross Plant Allocator may be used in lieu of the Wages & Salary Allocator by setting the WSA = GPA. When this is done, The Net SPP ATRR using the GPA and the Net SPP ATRR using 5.1% for the WSA are entered in NIMECA Workpaper Z to calculate the annual payment to MRES. This payment is in effect the first rate update after the settlement is approved by FERC. |
| Z | Per the settlement terms of Docket ER15-2028, the return used is calculated with the fixed capital structure capped at 68.86% equity or the actual capital structure if the equity percentage in the actual capital structure is equal to or lower than 68.86%. If the actual capital structure does not include any long-term debt, then the fixed capital structure will use a debt cost of 4.65% to calculate the fixed capital structure return. This is in effect the first rate update after the settlement is approved by |

FERC.

A Per the settlement terms of Docket ER15-2028, any NIMECA Member participating in an SPP project the total cost of which is $10,000,000 or more and which has regional cost sharing ("Project Costs"), may not recover a return on its share of those Project Costs through a transmission formula rate using a capital structure equity component higher than 50% unless the NIMECA Member makes a single-issue Federal Power Act ("FPA") Section 205 filing proposing that capital structure. This provision is effective until a NIMECA Member makes a general FPA Section 205 filing to change its formula rate.
A

Formula Rate - Non-Levelized

Rate Formula Template

Graettinger
Municipal Light Plant

| Note Letter | |
|---|---|
| | The utility's maximum monthly megawatt load (60-minute integration) for RQ service at time of applicable pricing zone coincident monthly peaks. |
| A | RQ service is service which the supplier plans to provide on an on-going basis (i.e., the supplier includes projected load for this service in its system resource planning). |
| B | Includes LF, IF, LU, IU service. LF means "firm service" (cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions), and long-term (duration of at least five years); does not meet definition of RQ service. IF is "firm service" for a term longer than one but less than five years. LU is service from a designated generating unit, of a term no less than five years. LI is service from a designated generating unit for a term between one and five years. Measured at time of applicable pricing zone coincident monthly peaks. |
| C | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| D | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| E | The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff, if any |
| F | The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory |

assets

or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note K. Account 281 is not allocated.

G Transmission related only.

H Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 8, column 5.

Prepayments are the electric related prepayments booked to Account No. 165.

I Line 5 - EPRI Annual Membership Dues, all Regulatory Commission Expenses, and non-safety related advertising.

Line 5a - Regulatory Commission Expenses directly related to transmission service, ISO filings or transmission siting.

J Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year.

Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template,

since they are recovered elsewhere.

K The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit.

multiplied by (1/1-T) (page 3, line 26).

| | | | |
|---|---|---|---|
| | | 0.0 | |
| Inputs Required: | FIT = | 0% | |
| | | | (State Income Tax Rate or |
| | | 0.0 | Composite |
| | SIT= | 0% | SIT) |
| | | | (percent of federal income tax deductible for |
| | | 0.0 | state |
| | p = | 0% | purposes) |

L Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Account Nos. 561.1, 561.2, 561.3, and 561.BA.

M Removes transmission plant determined to be state-jurisdictional by Commission order according to the seven-factor test (until account balances are adjusted to reflect application of seven-factor test).

N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

O Enter dollar amounts

P Debt cost rate = long-term interest (line 21) / long term debt (line 22). The Proprietary Capital Cost rate is implicit, a residual calculation after TIER is determined. TIER will be supported in the filing and no change in TIER may be made absent a filing with the ISO and the FERC, if the entity is under FERC's jurisdiction.

Q Line 29 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1 and all other uses are to be included in the divisor.

R Includes income related only to transmission facilities, such as pole attachments, rentals and special use.

S Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking - the revenues are included in line 4, page 1 and the loads are included in line 13, page 1. Grandfathered agreements whose rates have not been changed to eliminate or mitigate pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.

T The revenues credited on page 1 lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template.

U Include only the amount from Accounts 428, 429 and 430.

V Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements.

W Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC.

X Schedule 12-FERC charges should not be included in O&M recovered under this formula rate

Y Per the settlement terms of Docket ER15-2028, the Gross Plant Allocator may be used in lieu of the Wages & Salary Allocator by setting the WSA = GPA.

When this is done, The Net SPP ATRR using the GPA and the Net SPP ATRR using 5.1% for the WSA are entered in NIMECA Workpaper Z to calculate the annual payment to MRES. This payment is in effect the first rate update after the settlement is approved by FERC.

| | |
|---|---|
| Z | Per the settlement terms of Docket ER15-2028, the return used is calculated with the fixed capital structure capped at 68.86% equity or the actual capital structure if the equity percentage in the actual capital structure is equal to or lower than 68.86%. If the actual capital structure does not include any long-term debt, then the fixed capital structure will use a debt cost of 4.65% to calculate the fixed capital structure return. This is in effect the first rate update after the settlement is approved by FERC. |
| A<br>A | Per the settlement terms of Docket ER15-2028, any NIMECA Member participating in an SPP project the total cost of which is $10,000,000 or more and which has regional cost sharing ("Project Costs"), may not recover a return on its share of those Project Costs through a transmission formula rate using a capital structure equity component higher than 50% unless the NIMECA Member makes a single-issue Federal Power Act ("FPA") Section 205 filing proposing that capital structure. This provision is effective until a NIMECA Member makes a general FPA Section 205 filing to change its formula rate. |

Formula Rate - Non-Levelized

Rate Formula Template

Laurens Municipal Power

For the 12 months ended 12/31/20XX

Note Letter

A

The utility's maximum monthly megawatt load (60-minute integration) for RQ service at time of applicable pricing zone coincident monthly peaks.

| | |
|---|---|
| | RQ service is service which the supplier plans to provide on an on-going basis (i.e., the supplier includes projected load for this service in its system resource planning). Includes LF, IF, LU, IU service. LF means "firm service" (cannot be interrupted for economic |
| B | reasons and is intended to remain reliable even under adverse conditions), and long-term (duration of at least five years); does not meet definition of RQ service. IF is "firm service" for a term longer than one but less than five years. LU is service from a designated generating unit, of a term no less than five years. LI is service from a designated generating unit for a term between one and five years. Measured at time of applicable pricing zone coincident monthly peaks. |
| C | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| D | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| E | The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff, if any |
| F | The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note K. Account 281 is not allocated. |
| G | Transmission related only. |
| H | Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 8, column 5. Prepayments are the electric related prepayments booked to Account No. 165. |

| | | | | |
|---|---|---|---|---|
| I | Line 5 - EPRI Annual Membership Dues, all Regulatory Commission Expenses, and non-safety related advertising. | | | |
| | Line 5a - Regulatory Commission Expenses directly related to transmission service, ISO filings or transmission siting. | | | |
| J | Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year. Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere. | | | |
| K | The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit. multiplied by (1/1-T) (page 3, line 26). | | | |
| | | | 0.0 | |
| | Inputs Required: | FIT = | 0% | |
| | | | | (State Income Tax Rate or |
| | | | 0.0 | Composite |
| | | SIT= | 0% | SIT) |
| | | | | (percent of federal income tax deductible for |
| | | | 0.0 | state |
| | | p = | 0% | purposes) |
| L | Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Account Nos. 561.1, 561.2, 561.3, and | | | |

561.BA.

M Removes transmission plant determined to be state-jurisdictional by Commission order according to the seven-factor test (until account balances are adjusted to reflect application of seven-factor test).

N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

O Enter dollar amounts

P Debt cost rate = long-term interest (line 21) / long term debt (line 22). The Proprietary Capital Cost rate is implicit, a residual calculation after TIER is determined. TIER will be supported in the filing and no change in TIER may be made absent a filing with the ISO and the FERC, if the entity is under FERC's jurisdiction.

Q Line 29 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1 and all other uses are to be included in the divisor.

R Includes income related only to transmission facilities, such as pole attachments, rentals and special use.

S Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking - the revenues are included in line 4, page 1 and the loads are included in line 13, page 1. Grandfathered agreements whose rates have <u>not</u> been changed to eliminate or mitigate pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.

T The revenues credited on page 1 lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template.

U Include only the amount from Accounts

| | |
|---|---|
| | 428, 429 and 430. |
| V | Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements. |
| W | Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC. |
| X | Schedule 12-FERC charges should not be included in O&M recovered under this formula rate |
| Y | Per the settlement terms of Docket ER15-2028, the Gross Plant Allocator may be used in lieu of the Wages & Salary Allocator by setting the WSA = GPA. When this is done, The Net SPP ATRR using the GPA and the Net SPP ATRR using 5.1% for the WSA are entered in NIMECA Workpaper Z to calculate the annual payment to MRES. This payment is in effect the first rate update after the settlement is approved by FERC. |
| Z | Per the settlement terms of Docket ER15-2028, the return used is calculated with the fixed capital structure capped at 68.86% equity or the actual capital structure if the equity percentage in the actual capital structure is equal to or lower than 68.86%. If the actual capital structure does not include any long-term debt, then the fixed capital structure will use a debt cost of 4.65% to calculate the fixed capital structure return. This is in effect the first rate update after the settlement is approved by |

FERC.

A
A

Per the settlement terms of Docket ER15-2028, any NIMECA Member participating in an SPP project the total cost of which is $10,000,000 or more and
which has regional cost sharing ("Project Costs"), may not recover a return on its share of those Project Costs through a transmission formula rate using a capital
structure equity component higher than 50% unless the NIMECA Member makes a single-issue Federal Power Act ("FPA") Section 205 filing proposing that capital structure. This provision is effective until a NIMECA Member makes a general FPA Section 205 filing to change its formula rate.

Formula Rate - Non-Levelized

Rate Formula Template

Milford Municipal Utilities

For the 12 months ended 6/30/20XX

Note Le

| tt e r | |
|---|---|
| | The utility's maximum monthly megawatt load (60-minute integration) for RQ service at time of applicable pricing zone coincident monthly peaks. |
| A | RQ service is service which the supplier plans to provide on an on-going basis (i.e., the supplier includes projected load for this service in its system resource planning). Includes LF, IF, LU, IU service. LF means "firm service" (cannot be interrupted for economic |
| B | reasons and is intended to remain reliable even under adverse conditions), and long-term (duration of at least five years); does not meet definition of RQ service. IF is "firm service" for a term longer than one but less than five years. LU is service from a designated generating unit, of a term no less than five years. LI is service from a designated generating unit for a term between one and five years. Measured at time of applicable pricing zone coincident monthly peaks. |
| C | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| D | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| E | The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff, if any |
| F | The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note K. Account 281 is not allocated. |

G Transmission related only.

H Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 8, column 5.

I Prepayments are the electric related prepayments booked to Account No. 165.
Line 5 - EPRI Annual Membership Dues, all Regulatory Commission Expenses, and non-safety related advertising.
Line 5a - Regulatory Commission Expenses directly related to transmission service, ISO filings or transmission siting.

J Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year.
Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template,
since they are recovered elsewhere.

K The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit.
multiplied by (1/1-T) (page 3, line 26).

| | | | |
|---|---|---|---|
| Inputs Required: | FIT = | 0.0 0% | |
| | SIT= | 0.0 0% | (State Income Tax Rate or Composite SIT) |
| | p = | 0.0 0% | (percent of federal income tax |

deductible for state purposes)

Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Account Nos. 561.1, 561.2, 561.3, and
L 561.BA.

Removes transmission plant determined to be state-jurisdictional by
M Commission order according to the seven-factor test (until account balances are adjusted to reflect application of seven-factor test).

Removes dollar amount of transmission plant included in the development
N of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

O Enter dollar amounts

Debt cost rate = long-term interest (line 21) / long term debt (line 22). The
P Proprietary Capital Cost rate is implicit, a residual calculation after TIER is determined. TIER will be supported in the filing and no change in TIER may be made absent a filing with the ISO and the FERC, if the entity is under FERC's jurisdiction.

Line 29 must equal zero since all short-term power sales must be
Q unbundled and the transmission component reflected in Account No. 456.1 and all other uses are to be included in the divisor.

Includes income related only to transmission facilities, such
R as pole attachments, rentals and special use.

Grandfathered agreements whose rates have been changed to eliminate or
S mitigate pancaking - the revenues are included in line 4, page 1 and the loads are included in line 13, page 1. Grandfathered agreements whose rates have <u>not</u> been changed to eliminate or mitigate pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.

The revenues credited on page 1 lines 2-5 shall include only the amounts received
T directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include

| | |
|---|---|
| U | revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template. Include only the amount from Accounts 428, 429 and 430. |
| V | Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements. |
| W | Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC. |
| X | Schedule 12-FERC charges should not be included in O&M recovered under this formula rate |
| Y | Per the settlement terms of Docket ER15-2028, the Gross Plant Allocator may be used in lieu of the Wages & Salary Allocator by setting the WSA = GPA. When this is done, The Net SPP ATRR using the GPA and the Net SPP ATRR using 5.1% for the WSA are entered in NIMECA Workpaper Z to calculate the annual payment to MRES. This payment is in effect the first rate update after the settlement is approved by FERC. |
| Z | Per the settlement terms of Docket ER15-2028, the return used is calculated with the fixed capital structure capped at 68.86% equity or the actual capital structure if the equity percentage in the actual capital structure is equal to or lower than 68.86%. If the actual capital structure does not include any long-term debt, then the fixed capital structure will use a |

debt cost of 4.65% to calculate the fixed capital structure return. This is in effect the first rate update after the settlement is approved by FERC.

A
A

Per the settlement terms of Docket ER15-2028, any NIMECA Member participating in an SPP project the total cost of which is $10,000,000 or more and which has regional cost sharing ("Project Costs"), may not recover a return on its share of those Project Costs through a transmission formula rate using a capital structure equity component higher than 50% unless the NIMECA Member makes a single-issue Federal Power Act ("FPA") Section 205 filing proposing that capital structure. This provision is effective until a NIMECA Member makes a general FPA Section 205 filing to change its formula rate.

**Please answer the followin g question s:**

Does the Grand total Gross Plant In-Service tie to the Gross Plant In-Service reflected on the audited balance sheet? If no, please provide an explanation & reconciliation.

Does Total Accum Depre tie to Accum Depre reflected on the audited balance sheet? If no, please provide an explanation & reconciliation.

Does the Total Depreciation expense tie to the depreciation expense reflected in the audited income statement? If no, please provide an explanation & reconciliation.

**Milford**

**Depreciation Rates**

| FERC Account | Transmission Plant | Average Service Life In Years | Calculated Annual Depreciation Rate |
|---|---|---|---|
| 350 | Land and Land Rights* | N/A | 0.00% |
| 351 | Energy Storage Equipment - Transmission | 20 | 5.00% |

Formula Rate - Non-Levelized

Rate Formula Template

New Hampton Municipal Light Plant

| Note Letter | |
|---|---|
| | The utility's maximum monthly megawatt load (60-minute integration) for RQ service at time of applicable pricing zone coincident monthly peaks. |
| A | RQ service is service which the supplier plans to provide on an on-going basis (i.e., the supplier includes projected load for this service in its system resource planning). |
| B | Includes LF, IF, LU, IU service. LF means "firm service" (cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions), and long-term (duration of at least five years); does not meet definition of RQ service. IF is "firm service" for a term longer than one but less than five years. LU is service from a designated generating unit, of a term no less than five years. LI is service from a designated generating unit for a term between one and five years. Measured at time of applicable pricing zone coincident monthly peaks. |
| C | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| D | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| E | The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff, if any |
| F | The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory |

assets

or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note K. Account 281 is not allocated.

G Transmission related only.

H Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 8, column 5.

Prepayments are the electric related prepayments booked to Account No. 165.

I Line 5 - EPRI Annual Membership Dues, all Regulatory Commission Expenses, and non-safety related advertising.

Line 5a - Regulatory Commission Expenses directly related to transmission service, ISO filings or transmission siting.

J Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year.

Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template,

since they are recovered elsewhere.

K The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit.

multiplied by (1/1-T) (page 3, line 26).

| | | | |
|---|---|---|---|
| Inputs Required: | FIT = | 0.0 0% | |
| | SIT= | 0.0 0% | (State Income Tax Rate or Composite SIT) |
| | p = | 0.0 0% | (percent of federal income tax deductible for state purposes) |

L Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Account Nos. 561.1, 561.2, 561.3, and 561.BA.

M Removes transmission plant determined to be state-jurisdictional by Commission order according to the seven-factor test (until account balances are adjusted to reflect application of seven-factor test).

N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

O Enter dollar amounts

P Debt cost rate = long-term interest (line 21) / long term debt (line 22). The Proprietary Capital Cost rate is implicit, a residual calculation after TIER is determined. TIER will be supported in the filing and no change in TIER may be made absent a filing with the ISO and the FERC, if the entity is under FERC's jurisdiction.

Q Line 29 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1 and all other uses are to be included in the divisor.

R Includes income related only to transmission facilities, such as pole attachments, rentals and special use.

S Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking - the revenues are included in line 4, page 1 and the loads are included in line 13, page 1. Grandfathered agreements whose rates have not been changed to eliminate or mitigate pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.

T The revenues credited on page 1 lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template.

U Include only the amount from Accounts 428, 429 and 430.

V Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements.

W Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC.

X Schedule 12-FERC charges should not be included in O&M recovered under this formula rate

Y Per the settlement terms of Docket ER15-2028, the Gross Plant Allocator may be used in lieu of the Wages & Salary Allocator by setting the WSA = GPA.

When this is done, The Net SPP ATRR using the GPA and the Net SPP ATRR using 5.1% for the WSA are entered in NIMECA

Workpaper Z to calculate the annual payment to MRES. This payment is in effect the first rate update after the settlement is approved by FERC.

| | |
|---|---|
| Z | Per the settlement terms of Docket ER15-2028, the return used is calculated with the fixed capital structure capped at 68.86% equity or the actual capital structure if the equity percentage in the actual capital structure is equal to or lower than 68.86%. If the actual capital structure does not include any long-term debt, then the fixed capital structure will use a debt cost of 4.65% to calculate the fixed capital structure return. This is in effect the first rate update after the settlement is approved by FERC. |
| A<br>A | Per the settlement terms of Docket ER15-2028, any NIMECA Member participating in an SPP project the total cost of which is $10,000,000 or more and which has regional cost sharing ("Project Costs"), may not recover a return on its share of those Project Costs through a transmission formula rate using a capital structure equity component higher than 50% unless the NIMECA Member makes a single-issue Federal Power Act ("FPA") Section 205 filing proposing that capital structure. This provision is effective until a NIMECA Member makes a general FPA Section 205 filing to change its formula rate. |

Formula Rate - Non-Levelized

Rate Formula Template

Spencer Municipal Utilities

For the 12 months ended 12/31/20XX

| Note Letter | |
|---|---|
| | The utility's maximum monthly megawatt load (60-minute integration) for RQ service at time of applicable pricing zone coincident monthly peaks. |
| A | RQ service is service which the supplier plans to provide on an on-going basis (i.e., the supplier includes projected load for this service in its system resource planning). Includes LF, IF, LU, IU service. LF means "firm service" (cannot be interrupted for economic |
| B | reasons and is intended to remain reliable even under adverse conditions), and long-term (duration of at least five years); does not meet definition of RQ service. IF is "firm service" for a term longer than one but less than five years. LU is service from a designated generating unit, of a term no less than five years. LI is service from a designated generating unit for a term between one and five years. Measured at time of applicable pricing zone coincident monthly peaks. |
| C | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| D | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| E | The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff, if any |
| F | The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or |

109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note K. Account 281 is not allocated.

G Transmission related only.

Cash Working Capital assigned to transmission is one-eighth of O&M

H allocated to transmission at page 3, line 8, column 5.

Prepayments are the electric related prepayments booked to Account No. 165.

Line 5 - EPRI Annual Membership Dues, all Regulatory Commission

I Expenses, and non-safety related advertising.

Line 5a - Regulatory Commission Expenses directly related to transmission service, ISO filings or transmission siting.

Includes only FICA, unemployment, highway, property, gross receipts, and

J other assessments charged in the current year.

Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template,

since they are recovered elsewhere.

The currently effective income tax rate, where FIT is the Federal income

K tax rate; SIT is the State income tax rate, and p = "the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit.

multiplied by (1/1-T) (page 3, line 26).

| | | |
|---|---|---|
| Inputs Required: | FIT = | 0.0<br>0% |

| | | | |
|---|---|---|---|
| | | | (State Income Tax Rate or |
| | | 0.0 | Composite |
| | SIT= | 0% | SIT) |
| | | | (percent of federal income tax deductible for |
| | | 0.0 | state |
| | p = | 0% | purposes) |

L Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Account Nos. 561.1, 561.2, 561.3, and 561.BA.

M Removes transmission plant determined to be state-jurisdictional by Commission order according to the seven-factor test (until account balances are adjusted to reflect application of seven-factor test).

N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

O Enter dollar amounts

P Debt cost rate = long-term interest (line 21) / long term debt (line 22). The Proprietary Capital Cost rate is implicit, a residual calculation after TIER is determined. TIER will be supported in the filing and no change in TIER may be made absent a filing with the ISO and the FERC, if the entity is under FERC's jurisdiction.

Q Line 29 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1 and all other uses are to be included in the divisor.

R Includes income related only to transmission facilities, such as pole attachments, rentals and special use.

S Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking - the revenues are included in line 4, page 1

and the loads are included in line 13, page 1. Grandfathered agreements whose rates have not been changed to eliminate or mitigate pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.

T The revenues credited on page 1 lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template.

U Include only the amount from Accounts 428, 429 and 430.

V Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements.

W Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC.

X Schedule 12-FERC charges should not be included in O&M recovered under this formula rate

Y Per the settlement terms of Docket ER15-2028, the Gross Plant Allocator may be used in lieu of the Wages & Salary Allocator by setting the WSA = GPA.
When this is done, The Net SPP ATRR using the GPA and the Net SPP ATRR using 5.1% for the WSA are entered in NIMECA
Workpaper Z to calculate the annual payment to MRES. This payment is in effect the first rate update after the settlement is approved by FERC.

Z Per the settlement terms of Docket ER15-2028, the return used is

calculated with the fixed capital structure capped at 68.86% equity or the actual capital structure if the equity percentage in the actual capital structure is equal to or lower than 68.86%. If the actual capital structure does not include any long-term debt, then the fixed capital structure will use a debt cost of 4.65% to calculate the fixed capital structure return. This is in effect the first rate update after the settlement is approved by FERC.

A Per the settlement terms of Docket ER15-2028, any NIMECA Member
A participating in an SPP project the total cost of which is $10,000,000 or more and which has regional cost sharing ("Project Costs"), may not recover a return on its share of those Project Costs through a transmission formula rate using a capital structure equity component higher than 50% unless the NIMECA Member makes a single-issue Federal Power Act ("FPA") Section 205 filing proposing that capital structure. This provision is effective until a NIMECA Member makes a general FPA Section 205 filing to change its formula rate.

| Note Letter | | ended 6/30/20XX |
|---|---|---|
| | | West Bend |
| A | The utility's maximum monthly megawatt load (60-minute integration) for RQ service at time of applicable pricing zone coincident monthly peaks. | |
| B | RQ service is service which the supplier plans to provide on an on-going basis (i.e., the supplier includes projected load for this service in its system resource planning). Includes LF, IF, LU, IU service. LF means "firm service" (cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions), and long-term (duration of at least five years); does not meet definition of RQ service. IF is "firm service" for a term longer than one but less than five years. LU is service from a designated generating unit, of a term no less than five years. LI is service from a designated generating unit for a term between one and five years. | |

Measured at time of applicable pricing zone coincident monthly peaks.

C LF as defined above at time of applicable pricing zone coincident monthly peaks.

D LF as defined above at time of applicable pricing zone coincident monthly peaks.

E The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff, if any

F The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note K. Account 281 is not allocated.

G Transmission related only.

H Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 8, column 5.

I Prepayments are the electric related prepayments booked to Account No. 165.
Line 5 - EPRI Annual Membership Dues, all Regulatory Commission Expenses, and non-safety related advertising.
Line 5a - Regulatory Commission Expenses directly related to transmission service, ISO filings or transmission siting.

J Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year.
Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template,
since they are recovered elsewhere.

K The currently effective income tax rate, where FIT is the Federal income

tax rate; SIT is the State income tax rate, and p =

"the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit.

multiplied by (1/1-T) (page 3, line 26).

| | | | |
|---|---|---|---|
| | | 0.0 | |
| Inputs Required: | FIT = | 0% | |
| | | | (State Income Tax Rate or |
| | | 0.0 | Composite |
| | SIT= | 0% | SIT) |
| | | | (percent of federal income tax deductible for |
| | | 0.0 | state |
| | p = | 0% | purposes) |

Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Account Nos. 561.1, 561.2, 561.3, and
L 561.BA.

Removes transmission plant determined to be state-jurisdictional by
M Commission order according to the seven-factor test (until account balances are adjusted to reflect application of seven-factor test).

Removes dollar amount of transmission plant included in the development
N of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

O Enter dollar amounts

P Debt cost rate = long-term interest (line 21) / long term debt (line 22). The Proprietary Capital Cost rate is implicit, a residual calculation after TIER is determined. TIER will be supported in the filing and no change in TIER may be made absent a filing with the ISO and the FERC, if the entity is under FERC's jurisdiction.

Q Line 29 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1 and all other uses are to be included in the divisor.

R Includes income related only to transmission facilities, such as pole attachments, rentals and special use.

S Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking - the revenues are included in line 4, page 1 and the loads are included in line 13, page 1. Grandfathered agreements whose rates have not been changed to eliminate or mitigate pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.

T The revenues credited on page 1 lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template.

U Include only the amount from Accounts 428, 429 and 430.

V Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements.

W Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC.

X Schedule 12-FERC charges should not be included in O&M recovered under this formula rate

Y Per the settlement terms of Docket ER15-2028, the Gross Plant Allocator

| | |
|---|---|
| | may be used in lieu of the Wages & Salary Allocator by setting the WSA = GPA. |
| | When this is done, The Net SPP ATRR using the GPA and the Net SPP ATRR using 5.1% for the WSA are entered in NIMECA |
| | Workpaper Z to calculate the annual payment to MRES. This payment is in effect the first rate update after the settlement is approved by FERC. |
| Z | Per the settlement terms of Docket ER15-2028, the return used is calculated with the fixed capital structure capped at 68.86% equity or the actual |
| | capital structure if the equity percentage in the actual capital structure is equal to or lower than 68.86%. If the actual capital structure does not include any long-term debt, |
| | then the fixed capital structure will use a debt cost of 4.65% to calculate the fixed capital structure return. This is in effect the first rate update |
| | after the settlement is approved by FERC. |
| A | Per the settlement terms of Docket ER15-2028, any NIMECA Member |
| A | participating in an SPP project the total cost of which is $10,000,000 or more and |
| | which has regional cost sharing (“Project Costs”), may not recover a return on its share of those Project Costs through a transmission formula rate using a capital |
| | structure equity component higher than |

50% unless the NIMECA Member makes a single-issue Federal Power Act ("FPA") Section 205 filing proposing that capital structure. This provision is effective until a NIMECA Member makes a general FPA Section 205 filing to change its formula rate.

Formula Rate - Non-Levelized

Rate Formula Template

For the 12 months ended 6/30/20XX

Grundy Center Municipal Utilities

Note

Let

t

e

r

A The utility's maximum monthly megawatt load (60-minute integration) for RQ service at time of applicable pricing zone coincident monthly peaks. RQ service is service

which the supplier plans to provide on an on-going basis (i.e., the supplier includes projected load for this service in its system resource planning).

B Includes LF, IF, LU, IU service. LF means "firm service" (cannot be interrupted for economic reasons and is intended to remain reliable

even under adverse conditions), and long-term (duration of at least five years); does not meet definition of RQ service. IF is "firm service"

for a term longer than one but less than five years. LU is service from a designated generating unit, of a term no less than five years.

LI is service from a designated generating unit for a term between one and five years. Measured at time of applicable pricing zone coincident monthly peaks.

C LF as defined above at time of applicable pricing zone coincident monthly peaks.

D LF as defined above at time of applicable pricing zone coincident monthly peaks.

E The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff, if any

F The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets

or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility

chose to utilize amortization of tax credits against taxable income as discussed in Note K. Account 281 is not allocated.

G Transmission related only.

H Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 8, column 5.

Prepayments are the electric related

prepayments booked to Account No. 165.

I Line 5 - EPRI Annual Membership Dues, all Regulatory Commission Expenses, and non-safety related advertising.

Line 5a - Regulatory Commission Expenses directly related to transmission service, ISO filings or transmission siting.

J Includes only FICA, unemployment, highway, property, gross receipts, and other assessments charged in the current year.

Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template,

since they are recovered elsewhere.

K The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate, and p =

"the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a

work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that

elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce

rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit.

multiplied by (1/1-T) (page 3, line 26).

| | | | |
|---|---|---|---|
| Inputs Required: | FIT = | 0.00% | |
| | SIT= | 0.00% | (State Income Tax Rate or Composite SIT) |
| | p = | 0.00% | (percent of federal income tax deductible for state purposes) |

L Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Account Nos. 561.1, 561.2, 561.3, and 561.BA.

M Removes transmission plant determined to be state-jurisdictional by Commission order according to the seven-factor test (until account

balances are adjusted to reflect

application of seven-factor test).

N Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation

step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up

facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down.

O Enter dollar amounts

P Debt cost rate = long-term interest (line 21) / long term debt (line 22). The Proprietary Capital Cost rate is implicit, a residual calculation

after TIER is determined. TIER will be supported in the filing and no change in TIER may be made absent a filing with the ISO and

the FERC, if the entity is under FERC's jurisdiction.

Q Line 29 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account

No. 456.1 and all other uses are to be included in the divisor.

R Includes income related only to transmission facilities, such as pole attachments, rentals and special use.

S Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking - the revenues are included in line 4, page 1

and the loads are included in line 13, page 1. Grandfathered agreements whose rates have not been changed to eliminate or mitigate

pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.

T The revenues credited on page 1 lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements)

or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include

revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct

assignment facilities and GSUs) which are not recovered under this Rate Formula Template.

U Include only the amount from Accounts 428, 429 and 430.

V Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner

revenue requirements.

W Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation amounts unless authorized by FERC.

X Schedule 12-FERC charges should not be included in O&M recovered under this formula rate

Z If the utility has more employees assigned to A&G than to the sum of production, transmission, and distribution, set the W&S

allocator at page 4 line 16 equal to the gross plant allocator (GP) at page 2, line 6.

A Any NIMECA Member participating in an SPP
A project the total cost of which is $10,000,000 or more and

which has regional cost sharing ("Project Costs"), may not recover a return on its share of those Project Costs through a transmission formula rate using a capital

structure equity component higher than 50% unless the NIMECA Member makes a single-issue Federal Power Act ("FPA") Section 205 filing proposing that

capital structure. This provision is effective until a NIMECA Member makes a general FPA Section 205 filing to change its formula rate.

Sumner Municipal Light Plant

| Note Letter | |
|---|---|
| A | The utility's maximum monthly megawatt load (60-minute integration) for RQ service at time of applicable pricing zone coincident monthly peaks. |
| B | RQ service is service which the supplier plans to provide on an on-going basis (i.e., the supplier includes projected load for this service in its system resource planning). Includes LF, IF, LU, IU service. LF means "firm service" (cannot be interrupted for economic reasons and is intended to remain reliable even under adverse conditions), and long-term (duration of at least five years); does not meet definition of RQ service. IF is "firm service" |

| | |
|---|---|
| | for a term longer than one but less than five years. LU is service from a designated generating unit, of a term no less than five years. LI is service from a designated generating unit for a term between one and five years. Measured at time of applicable pricing zone coincident monthly peaks. |
| C | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| D | LF as defined above at time of applicable pricing zone coincident monthly peaks. |
| E | The FERC's annual charges for the year assessed the Transmission Owner for service under this tariff, if any |
| F | The balances in Accounts 190, 281, 282 and 283, as adjusted by any amounts in contra accounts identified as regulatory assets or liabilities related to FASB 106 or 109. Balance of Account 255 is reduced by prior flow throughs and excluded if the utility chose to utilize amortization of tax credits against taxable income as discussed in Note K. Account 281 is not allocated. |
| G | Transmission related only. |
| H | Cash Working Capital assigned to transmission is one-eighth of O&M allocated to transmission at page 3, line 8, column 5. |
| | Prepayments are the electric related prepayments booked to Account No. 165. |

Line 5 - EPRI Annual Membership Dues, all Regulatory

I Commission Expenses, and non-safety related advertising.

Line 5a - Regulatory Commission Expenses directly related to transmission service, ISO filings or transmission siting.

Includes only FICA, unemployment, highway, property, gross

J receipts, and other assessments charged in the current year.

Taxes related to income are excluded. Gross receipts taxes are not included in transmission revenue requirement in the Rate Formula Template, since they are recovered elsewhere.

The currently effective income tax rate, where FIT is the Federal income tax rate; SIT is the State income tax rate,

K and p =

"the percentage of federal income tax deductible for state income taxes". If the utility is taxed in more than one state it must attach a work paper showing the name of each state and how the blended or composite SIT was developed. Furthermore, a utility that elected to utilize amortization of tax credits against taxable income, rather than book tax credits to Account No. 255 and reduce rate base, must reduce its income tax expense by the amount of the Amortized Investment Tax Credit. multiplied by (1/1-T) (page 3, line 26).

| | | | |
|---|---|---|---|
| Inputs Required: | FIT = | 0.0 0% | |
| | | | (State Income Tax Rate or |
| | SIT= | 0.0 0% | Composite SIT) |

| | | | |
|---|---|---|---|
| | p = | 0.0<br>0% | (percent of federal income tax deductible for state purposes) |

| | |
|---|---|
| L | Removes dollar amount of transmission expenses included in the OATT ancillary services rates, including Account Nos. 561.1, 561.2, 561.3, and 561.BA. |
| M | Removes transmission plant determined to be state-jurisdictional by Commission order according to the seven-factor test (until account balances are adjusted to reflect application of seven-factor test). |
| N | Removes dollar amount of transmission plant included in the development of OATT ancillary services rates and generation step-up facilities, which are deemed to included in OATT ancillary services. For these purposes, generation step-up facilities are those facilities at a generator substation on which there is no through-flow when the generator is shut down. |
| O | Enter dollar amounts |
| P | Debt cost rate = long-term interest (line 21) / long term debt (line 22). The Proprietary Capital Cost rate is implicit, a residual calculation after TIER is determined. TIER will be supported in the filing and no change in TIER may be made absent a filing with the ISO and the FERC, if the entity is under FERC's jurisdiction. |
| Q | Line 29 must equal zero since all short-term power sales must be unbundled and the transmission component reflected in Account No. 456.1 and all other uses |

are to be included in the divisor.

R Includes income related only to transmission facilities, such as pole attachments, rentals and special use.

S Grandfathered agreements whose rates have been changed to eliminate or mitigate pancaking - the revenues are included in line 4, page 1 and the loads are included in line 13, page 1. Grandfathered agreements whose rates have not been changed to eliminate or mitigate pancaking - the revenues are not included in line 4, page 1 nor are the loads included in line 13, page 1.

T The revenues credited on page 1 lines 2-5 shall include only the amounts received directly (in the case of grandfathered agreements) or from the ISO (for service under this tariff) reflecting the Transmission Owner's integrated transmission facilities. They do not include revenues associated with FERC annual charges, gross receipts taxes, ancillary services, facilities not included in this template (e.g., direct assignment facilities and GSUs) which are not recovered under this Rate Formula Template.

U Include only the amount from Accounts 428, 429 and 430.

V Account Nos. 561.4 and 561.8 consist of RTO expenses billed to load-serving entities and are not included in Transmission Owner revenue requirements.

W Plant in Service, Accumulated Depreciation, and Depreciation Expense amounts exclude Asset Retirement Obligation

amounts unless authorized by FERC.

X Schedule 12-FERC charges should not be included in O&M recovered under this formula rate

Z If the utility has more employees assigned to A&G than to the sum of production, transmission, and distribution, set the W&S allocator at page 4 line 16 equal to the gross plant allocator (GP) at page 2, line 6.

A Any NIMECA Member participating in an SPP
A project the total cost of which is $10,000,000 or more and which has regional cost sharing ("Project Costs"), may not recover a return on its share of those Project Costs through a transmission formula rate using a capital structure equity component higher than 50% unless the NIMECA Member makes a single-issue Federal Power Act ("FPA") Section 205 filing proposing that capital structure. This provision is effective until a NIMECA Member makes a general FPA Section 205 filing to change its formula rate.
